

DIVISADERO STREET

STREETSCAPE IMPROVEMENTS

City and County of
San Francisco
Department of Public Works

Divisadero Corridor Revitalized

Divisadero Streetscape Improvement project is located on Divisadero Street from Haight Street to Geary Boulevard. Improvements include new bus bulb-outs and median widening with trees, landscaping & irrigation, lighting fixture upgrades, public art, planting of new street trees, and new site furnishings. Combining City resources, these improvements will coincide with streetscape repaving and a sewer upgrade project.

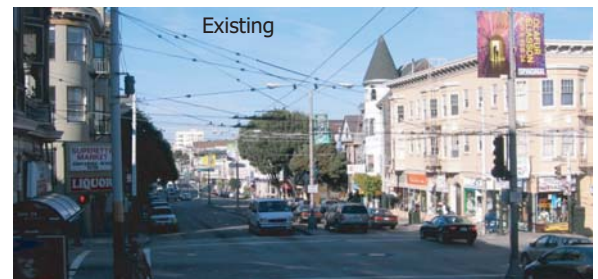

A COORDINATED EFFORT

Working with the Divisadero community, the San Francisco Department of Public Works, Municipal Transportation Agency, and the Mayor's Office of Economic and Workforce Development held a series of community workshops in fall 2007 to determine the needs of the Divisadero corridor.

DIVISADERO STREETSCAPE GOALS

The community identified several major goals for Divisadero through the planning process, in order of importance:

- Median greening
- Street tree infill and replacement of damaged or diseased species
- Streetlight upgrades
- Sidewalk bulbouts at bus stops
- Pedestrian countdown signals at crosswalks
- Bus stop removals to improve service at Ellis and Fulton Street
- Pedestrian refuges at medians
