Resending the complaint below as requested.

Anonymous (88878-67394299@requests.muckrock.com) v Public Health

An immediate disclosure request was filed before start of business day on Feb 28, 2020. (See attached)
No response was received March 2 by close of business.
When they respond I may need to allege improper redaction or withholding at that time.

NOTE: Nothing herein is legal, IT, or professional advice of any kind. The author disclaims all warranties, express or implied, including but not limited to all warranties of merchantability or fitness. In no event shall the author be liable for any special, direct, indirect, consequential, or any other damages whatsoever. The digital signature (signature.asc attachment), if any, in this email is not an indication of a binding agreement or offer; it merely authenticates the sender. Please do not include any confidential information, as I intend that these communications with the government all be disclosable public records.

Anonymous

From: Anonymous Person 02/28/2020

Subject: California Public Records Act Request: Coronavirus/COVID-19/SARS-CoV-2 Response (San Fr... Email

SFDPH:

NOTE: THE EMAIL ADDRESS SENDING THIS REQUEST IS A PUBLICLY-VIEWABLE MAILBOX. Please be certain you have properly redacted all of your responses. Once you send them to us, there is no going back. All of your responses (including all responsive records) may be instantly and automatically available to the public online via the MuckRock.com FOIA service used to issue this request (though the requester is an anonymous user, not a representative of MuckRock). Nothing herein is legal, IT, or professional advice of any kind. The author disclaims all warranties, express or implied, including but not limited to all warranties of merchantability or fitness. In no event shall the author be liable for any special, direct, indirect, consequential, or any other damages whatsoever. The digital signature, if any, in this email is not an indication of a binding agreement or offer; it merely authenticates the sender. Please do not include any confidential information, as I intend that these communications with the City all be disclosable public records.

Below are new Immediate Disclosure Requests (SF Admin Code 67.25(a)) directed to your agency and its department head.
Your initial response is required by March 2, 2020. Rolling records responses are requested (SFAC 67.25(d)) if you are unable to immediately produce records.
Exact copies of every responsive record are requested (Gov Code 6253(b)). Provide only copies of records not requiring fees and in-person inspection of all other records (GC 6253).

Your non-exhaustive obligations:
- All withholding of any information must be justified in writing by specific statutory authority (SFAC 67.27).
- All withholdings by masking or deletion (aka redactions) must be keyed by footnote or other clear reference to the specific justification for that redaction, and only the minimal exempt portion of any record may be withheld (SFAC 67.26).
- You must respond to emailed requests (SFAC 67.21(b)).
- You must notify us of whether or not responsive records exist and/or were withheld for each below request (Gov Code 6253(c), 6255(b)).
- You must state the name and title of each person responsible for withholding any information (Gov Code 6253(d)).
- Do not impose any end-user restrictions upon me (Santa Clara Co. vs Superior Ct, 170 Cal.App 4th 1301); so if you use a third-party website to publish records, please make them completely public without any login or sign-in.

Your agency must do all of the above things in your response, and you cannot wait until we file complaints.

****** We have no duty to, and we will not again, remind the City of its obligations. Instead, we will file complaints for every Sunshine Ordinance or CPRA violation. We will continue to file complaints until the City's procedures are modified to fully comply with the Sunshine Ordinance and CPRA, without caveat or exception. ******

1. All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.

2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.

This information is of the highest public interest. You may prioritize this request over any other outstanding Sunshine requests from me, if it would speed up your response to this one.
You may exclude press releases or similar material already published to the general public. If you believe this query would take more than say a week to produce, please provide suggestions to narrow the query to match my purpose, which is: to determine the scope and quality of Federal, state, and local government response to COVID-19/SARS-CoV-2, most importantly including decisions to test or not to test PUIs or other suspect cases.

Do not destroy or discard any responsive records - we will appeal all withholdings or Sunshine violations.

Thank you for your anticipated cooperation in this matter.

Sincerely,
Anonymous

From: Anonymous Person 03/01/2020

Subject: RE: California Public Records Act Request: Coronavirus/COVID-19/SARS-CoV-2 Response (Sa... Email

I am expecting you to provide all of the Feb 28, 2020 information requested that is immediately available by March 2, 2020 CoB that you have. You cannot use maximum deadlines to delay providing an incremental response with whatever you have available; there is no legal reason to delay. Immediate appeals will be filed if you attempt to withhold or delay any information (except for patient privacy).

Also, these are further immediate disclosure requests:
3. Any records of the number of tests available for COVID-19/SARS-CoV-2 testing from CDC.
4. Any records of the COVID-19/SARS-CoV-2 test procedures, manuals, contents, or the conditions suspect cases must meet to be tested (including any communications from CDC regarding this)

Above are new Immediate Disclosure Requests (SF Admin Code 67.25(a)) directed to your agency and its department head.
Your initial response is required by March 3, 2020. Rolling records responses are requested (SFAC 67.25(d)) if you are unable to immediately produce records.
Exact copies of every responsive record are requested (Gov Code 6253(b)). Provide only copies of records not requiring fees and in-person inspection of all other records (GC 6253).

Your non-exhaustive obligations:
- All withholding of any information must be justified in writing by specific statutory authority (SFAC 67.27).
- All withholdings by masking or deletion (aka redactions) must be keyed by footnote or other clear reference to the specific justification for that redaction, and only the minimal exempt portion of any record may be withheld (SFAC 67.26).
- You must respond to emailed requests (SFAC 67.21(b)).
- You must notify us of whether or not responsive records exist and/or were withheld for each

below request (Gov Code 6253(c), 6255(b)).
- You must state the name and title of each person responsible for withholding any information (Gov Code 6253(d)).
- Do not impose any end-user restrictions upon me (Santa Clara Co. vs Superior Ct, 170 Cal.App 4th 1301); so if you use a third-party website to publish records, please make them completely public without any login or sign-in.

Your agency must do all of the above things in your response, and you cannot wait until we file complaints.

****** We have no duty to, and we will not again, remind the City of its obligations. Instead, we will file complaints for every Sunshine Ordinance or CPRA violation. We will continue to file complaints until the City's procedures are modified to fully comply with the Sunshine Ordinance and CPRA, without caveat or exception. ******

SOTF Files: 19089, 19091, 19105, 19108, 20002, 20007, 20039, 20059, 19097, 19098, 19103, 19103, 19112, 19119, 19120, 19124, 19128, 19141, 19143, 20005, 20006, 20006, 20009, 20014, 20052, 20053, 20054, 20057

This is a **further written waiver** until the latest of: [April 7, 2020, expiration of Order of the Health Officer No. C19-07, or expiration of paragraph 1 of Executive Order N-33-20, all as may be extended], of any CPRA/Sunshine deadlines (incl. SOTF's own 67.21(e) 45-day deadline to issue a determination) that would normally occur between now and such date in only the above list of SOTF cases, EXCEPT the following which are either long-standing and with which continued non-compliance is unrelated to COVID-19 work, or for which the information is itself about COVID-19:

- This waiver does not apply to SOTF Order 19047 or SOTF 19044.
- The waiver does not apply to requests about COVID-19 itself sent to DEM, DPH, or the Mayor.
- This waiver does not apply to agencies whose employees are not listed in the TO.

Note that while I am waiving these deadlines, SOTF may or may not be also waiving your deadlines and I have no control over that.

The following are **not** waived:

- Any violations, including timeliness, occurring prior to March 17, 2020, or after the end of the waiver date.
- Any non-timeliness violations.
- Failure by the City to retain and refrain from destroying during the pendency of the waiver any responsive records.
- Any unilateral decision by the City that purports to exempt itself or any of its agencies, officers, or employees from the CPRA or Sunshine Ordinance or any of its provisions.

Stay safe out there~

I do not believe Paragraph 2 of Executive Order N-35-20 or Paragraph 5 of the Mayor's March 13 Second Supplement or any other unilateral suspensions by the government of its own transparency obligations are legally valid and will challenge them if they are used.

Listed SOTF Respondents and SOTF itself,

This is a written waiver until April 7, 2020 of any CPRA/Sunshine deadlines (incl. SOTF's own 67.21(e) 45-day deadline to issue a determination) that would normally occur between now and April 7, 2020 in the **attached** list of SOTF cases, EXCEPT the following which are either long-standing and with which continued non-compliance is unrelated to COVID-19 work, or for which the information is itself about COVID-19:

- This waiver does not apply to SOTF Order 19047, which the Mayor's Office has never complied with, in providing minimally redacted ICS files of certain calendars entries.
- This waiver does not apply to SOTF 19044, which would require minimal redaction of the two emails in that case by the City Attorney's office pursuant to SOTF's motion in January (which has not issued yet as an Order).
- The waiver does not apply to requests about COVID-19 itself sent to DEM, DPH, or the Mayor.
- This waiver does not apply to agencies whose employees are not listed in the TO.

Note that while I am waiving these deadlines, SOTF may or may not be also waiving your deadlines and I have no control over that.

The following are **not** waived:

- Any violations, including timeliness, occurring prior to March 17, 2020, or after April 7, 2020. (note the deadlines are merely being delayed until April 7, not some *n* days after April 7).
- Any non-timeliness violations.
- Failure by the City to retain and refrain from destroying during the pendency of the waiver any responsive records.
- Any unilateral decision by the City that purports to exempt itself or any of its agencies, officers, or employees from the CPRA or Sunshine Ordinance or any of its provisions.

NOTE: Nothing herein is legal, IT, or professional advice of any kind. The author disclaims all warranties, express or implied, including but not limited to all

warranties of merchantability or fitness. In no event shall the author be liable for any special, direct, indirect, consequential, or any other damages whatsoever. The digital signature (signature.asc attachment), if any, in this email is not an indication of a binding agreement or offer; it merely authenticates the sender. Dr. Colfax,

(cc: Dr. Aragon, and SOTF Compliance Chair LaHood)

Last Wednesday, the SOTF unanimously ordered the production of **all** records responsive to the following request on a rolling basis: https://url.avanan.click/v2/___https://sanfrancisco.nextrequest.com/requests/20-1076___.YXAzOnNmZHQyOmE6bzo1Njg3YTZjZGY4MmZhMWYxOGE0YzNiYTI5ZDgyNzVmZDo2OjBjMTg6Nzg2YjIxNzIxMTUxODRkMjIzYTkwMWVlMGI5OGVlZGE1MjRiNGFhMTMxODI1Nzk2MDExNTEyNmU1ZTZmMzg3Mjp0Ok4 , specifically including in their motion the responsive **attachments, texts, chats, and email addresses** as well, and found violations of various provisions of the Sunshine Ordinance, and referred the matter to the Compliance Committee for verification. In this case you produced no records until 2 years after my request. You have also for some reason "closed" my request with what appears to be ~2600 pages of records, while testifying you produced ~4000 pages of email records. Where are the other ~1400?

Furthermore, DPH originally stated there were approximately 20000 or more records, and all must now be produced under the order. If you can account for the remaining 16,000 by sender/recipient or some other mechanism, I may be willing to narrow the remainder of the request *if you have preserved all of the responsive records*. You also don't need to produce the same email in multiple recipients' mailboxes over and over again. Note the SOTF has ordered you to produce all the records, so I am **NOT** required to narrow, but I may choose to do so voluntarily.

Most importantly, SFDPH has previously admitted [fn1] in a different response that it did NOT preserve your now-former employee SF Public Health Officer Tomas Aragon's **texts** or **chats** before he left when I made my requests. Note my requests were made ***before*** Aragon resigned from SF employment, and you were required by law to preserve his responsive records at the time I made my request. See the Good Government Guide, pg. 130. [fn2].

Please confirm whether you have preserved all of the relevant Aragon texts here, or whether DPH will retrieve them from Dr. Aragon now and that he has personally preserved all of the records from Nov 2019 until present. Note that Aragon remains subject to the CPRA as a state public official - DPH may wish to request all the responsive records from Aragon and then provide them to me, instead of continuing to violate the law. It is not my problem how you fully comply with my request, and you cannot insist that I instead go Aragon myself.

Note that as Member Schmidt discussed during the hearing, SOTF is required by SFAC 67.30(c) to refer any person who it concludes has violated the Sunshine Ordinance to an enforcement body.

If I do not hear back from you within 5 business days or if the failure to preserve the records is in fact true, I request the SOTF's Compliance Committee to refer back to the full SOTF with DPH's refusal or inability to comply, and then ask the SOTF to refer to the Ethics Commission under Admin Code 67.29-7(a) - an obligation of every department head to retain records - and willful violation under Admin Code 67.34; if you still refuse to comply, request Superior Court or the Ethics Commission to enforce SOTF's order.

Regards,

Anonymoose

Footnote 1: https://www.muckrock.com/foi/san-francisco-141/inter-agency-text-messages-immediate-disclosure-request-sf-health-officer-tomas-aragon-94374/#comm-1030904

Footnote 2:
"Even if a document does not meet the definition of "record" for retention purposes, if the department receives a public records request for the document, it may not destroy it or otherwise dispose of it. For example, if a third party submits a document to a department that later receives a records request for it, the department may not return the document to the third party and then tell the requester it does not possess the document. The legal obligation to respond to public records requests and provide responsive records unless there is a legal basis for withholding them precludes the department from destroying or disposing of a document after receiving a public records request for which the document is
a responsive record. The same principles apply if a document meets the definition of "record" for retention purposes but due to the passage of time could have been destroyed under the applicable records retention schedule. If the document is in the department's possession at the time of the public records request, then the legal obligation to respond to the request trumps the discretion the department otherwise would have to destroy the document"

Dear Compliance Chair LaHood,

I ask that this matter be scheduled before the compliance committee and that the committee refer the matter back to the full SOTF so it can find that Grant Colfax has violated Admin Code 67.29-7. Colfax failed to follow retention law. As the good government guide states, when records become responsive to a request they must be preserved.

As the department did not preserve the records from now former Health Officer Tomas Aragon, it is impossible for them to comply with my request. What the health officer did at the beginning of COVID is permanently lost to the public due to Colfax's violation of the law.

> Dear Requestor,
>
> This is email is follow-up to SOTF File No. 20059. The San Francisco Department of Public Health (DPH) has reopened this request (NextRequest case #20-1076) and is working to provide you additional records. In addition to the records that we have previously provided from the Department's most senior leadership, we have an email out to all 8,000+ DPH employees asking for all responsive records they may have. We will continue to provide documents on a rolling basis. Dr. Tomas Aragon no longer works for the City and County of San Francisco and does not have a CCSF cell phone. Dr. Aragon's texts from that period are no longer accessible.
>
> Please also note that the previous custodians of records who were managing this request separated from DPH in September 2021 and December 2021, respectively. The extent of our historical knowledge from that time is limited to what has been entered in our NextRequest database.

DPH is the lead City agency responsible for San Francisco's ongoing COVID emergency response. At the time these requests were made, a high proportion of DPH employees were deployed as Disaster Service Workers and reassigned from their usual duties to tasks related to the emergency, including our custodians of records. With an average of 50-60 public records requests received by the DPH every week, it has been incredibly challenging to respond to all requests received during the COVID pandemic in a timely manner.

Due to the high turnover of DPH custodians of records there has been a significant loss of historical knowledge and context with regards to overdue DPH Public Records Requests. DPH is working to address these staffing challenges as expeditiously as possible. We will be hiring staff dedicated solely to public records work. In this interim period, we have a team of DPH staff addressing our public records requests. We thank the Sunshine Ordinance Taskforce for their patience during this transition.

Sincerely,
DPH Sunshine Team

Good Morning:
Notice is hereby given that the Complaint Committee (Committee) of the Sunshine Ordinance Task Force (Task Force) shall hold hearings on complaints listed below to: 1) determine if the Task Force has jurisdiction; 2) review the merits of the complaints; and/or 3) issue a report and/or recommendation to the Task Force.
Date: February 15, 2022
Location: Remote Meeting
Time: 5:30 p.m.
Complainants: Your attendance is required for this meeting/hearing.
Respondents/Departments: Pursuant to Section 67.21 (e) of the Ordinance, the custodian of records or a representative of your department, who can speak to the matter, is required at the meeting/hearing.

File No. 20059: Complaint filed by Anonymous against the Department of Public Health for allegedly violating Administrative Code (Sunshine Ordinance), Section 67.25 by failing to respond to an Immediate Disclosure request in a timely and complete manner.

File No. 20053: Complaint filed by Anonymous against Lt. Kathryn Waaland, Police Department, for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.21(b)(l) by failing to respond to a records request in a complete and timely manner, 67.26 withholding of records.

File No. 20124: Complaint filed by Stephen Bejanski against Kevin Guy and the Office of Short-Term Rentals for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.24 for failing to provide public information; 67.25 for failing to respond to an Immediate Disclosure Request in a timely manner, 67.26 for failing to keep withholding to a minimum; 67.27 for failing to justify withholding and 67.29 and failing to provide an index of records.

File No. 22005: Complaint filed by Marc Norton Against the Department of Public Health for allegedly violating Administrator Code (Sunshine Ordinance), Sections 67.21, by failing to respond to a public records request in a timely and/or complete manner.

File No. 22006: Complaint filed by Andrew While against the Department of Police Accountability for allegedly violating Administrator Code (Sunshine Ordinance), Sections 67.1, 67.21, 67.24(d), by failing to respond to a public records request in a timely and/or complete manner.

Documentation (evidence supporting/disputing complaint)

For a document to be considered, it must be received at least five (4) working days before the hearing (see attached Public Complaint Procedure).

For inclusion in the agenda packet, supplemental/supporting documents must be received by ***5:00 pm, February 10, 2022.***

Subject: Public Records Request #20-1076

Hello,
I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had

heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

Requester,

We have conducted a diligent search for records responsive to your request. We have located responsive records, which are available to you here and have also been uploaded to NextRequest case #20-1076/ SOTF File 20059. We have redacted parts of the records provided in response to your request here because such records contain protected health information. Cal. Govt. Code Secs. 6254(c), 6254(k); Health Insurance and Accountability Act of 1996, 45 C.F.R. Secs.160, 164; Cal. Civ. Code Secs. 56 et seq.; California Constitution, Art. I, Sec. 1.

Due to the need to continue reviewing, we will produce any additional responsive records on a rolling basis.

Thank you.

We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO,

FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

This is an official
CDC HEALTH UPDATE
Distributed via the CDC Health Alert Network February 28, 2020, 15:05 ET (3:05 PM ET)
CDCHAN-0428

Update and Interim Guidance on Outbreak of Coronavirus Disease 2019 (COVID-19)

Summary
The Centers for Disease Control and Prevention (CDC) continues to closely monitor and respond to the COVID-19 outbreak caused by the novel coronavirus, SARS-CoV-2

This CDC Health Alert Network (HAN) Update provides updated guidance on evaluating and testing persons under investigation (PUIs) for COVID-19 It supersedes guidance provided in CDC's HAN 427 distributed on February 1, 2020
The outbreak that began in Wuhan, Hubei Province, has now spread throughout China and to 46 other countries and territories, including the United States As of February 27, 2020, there were 78,497 reported cases in China and 3,797 cases in locations outside China In addition to sustained transmission in China, there is evidence of community spread in several additional countries CDC has updated travel guidance to reflect this information (https://urldefense proofpoint com/v2/url?u=https-3A__www cdc gov_coronavirus_2019-2Dncov_travelers_index html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10lTbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=5wQ4u1pyd3huRECgL9FIF26fQM1Grl8RKwn_cdgfZhM&e=)

To date, there has been limited spread of COVID-19 in the United States As of February 26, 2020, there were a total of 61 cases within the United States, 46 of these were among repatriated persons from high-risk settings The other 15 cases were diagnosed in the United States; 12 were persons with a history of recent travel in China and 2 were persons in close household contact with a COVID-19 patient (i e person-to-person spread) One patient with COVID-19 who had no travel history or links to other known cases was reported on February 26, 2020, in California The California Department of Public Health, local health departments, clinicians, and CDC are working together to investigate this case and are identifying contacts with whom this individual interacted

CDC, state and local health departments, other federal agencies, and other partners have been implementing measures to slow and contain transmission of COVID-19 in the United States These measures include assessing, monitoring, and caring for travelers arriving from areas with substantial COVID-19 transmission and identifying cases and contacts of cases in the United States

Recognizing persons at risk for COVID-19 is a critical component of identifying cases and preventing further transmission With expanding spread of COVID-19, additional areas of geographic risk are being identified and PUI criteria are being updated to reflect this spread To prepare for possible additional person-to-person spread of COVID-19 in the United States, CDC continues to recommend that clinicians and state and local health departments consider COVID-19 in patients with severe respiratory illness even in the absence of travel history to affected areas or known exposure to another case

Criteria to Guide Evaluation and Testing of Patients Under Investigation (PUI) for COVID-19 Local or state health departments, in consultation with clinicians, should determine whether a patient is a PUI for COVID-19 The CDC clinical criteria for COVID-19 PUIs have been developed based on available information about this novel virus, as well as what is known about Severe Acute Respiratory Syndrome (SARS) (https://urldefense proofpoint com/v2/url?u=https-3A__www cdc gov_sars_clinical_guidance html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10lTbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=Ybw1Zg47KVi_h3WTKNftX3r2GeXQz0qbQYPAD-cRvDM&e=) and Middle East Respiratory Syndrome (MERS) (https://urldefense proofpoint com/v2/url?u=https-3A__www cdc gov_coronavirus_mers_interim-2Dguidance html-23evaluation&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10lTbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=xnTIEF3HGjcvZj-WiNTtuoHQC4OQErVlCpHRHPR7K7o&e=) These criteria are subject to change as additional information becomes available

Clinical Features
Epidemiologic Risk
Fever1 or signs/symptoms of lower respiratory illness (e g , cough or shortness of breath) AND Any person, including healthcare personnel2, who has had close contact3 with a laboratory-confirmed4 COVID-19 patient within 14 days of symptom onset
Fever1 and signs/symptoms of a lower respiratory illness (e g , cough or shortness of breath) requiring hospitalization AND A history of travel from affected geographic areas5, within 14 days of symptom onset
Fever1 with severe acute lower respiratory illness (e g , pneumonia, ARDS (acute respiratory distress syndrome) requiring hospitalization and without an alternative explanatory diagnosis (e g , influenza) 6 AND No identified source of exposure

These criteria are intended to serve as guidance for evaluation In consultation with public health departments, patients should be evaluated on a case-by-case basis to determine the need for testing Testing may be considered for deceased persons who would otherwise meet the PUI criteria

1Fever may be subjective or confirmed
2 For healthcare personnel, testing may be considered if there has been exposure to a person with suspected COVID-19 without laboratory confirmation Because of their often extensive and close contact with vulnerable patients in healthcare settings, even mild signs and symptoms (e g , sore throat) of COVID-19 should be evaluated among potentially exposed healthcare personnel Additional information is available in CDC's Interim U S Guidance for Risk Assessment and Public Health Management of Healthcare Personnel with Potential Exposure in a Healthcare Setting to Patients with Coronavirus Disease 2019 (COVID-19) (https://urldefense proofpoint com/v2/url?u=https-3A__www cdc gov_coronavirus_2019-2Dncov_hcp_guidance-2Drisk-2Dassesment-2Dhcp html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10lTbEa2fPd_cZyWQFA-

GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=lKstLNjCnfqcd23o6UD1ZcRn4S4Ho4HFn1udVea84io&e=)
3Close contact is defined as—
a) being within approximately 6 feet (2 meters) of a COVID-19 case for a prolonged period; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case – or –
b) having direct contact with infectious secretions of a COVID-19 case (e g , being coughed on) If such contact occurs while not wearing recommended personal protective equipment (PPE) (e g , gowns, gloves, NIOSH-certified disposable N95 respirator, eye protection), criteria for PUI consideration are met Additional information is available in CDC's updated Interim Healthcare Infection Prevention and Control Recommendations for Patients with Confirmed COVID-19 or Persons Under Investigation for COVID-19 in Healthcare Settings (https://urldefense proofpoint com/v2/url?u=https-3A__www cdc gov_coronavirus_2019-2Dncov_infection-2Dcontrol_control-2Drecommendations html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10lTbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=wNynx5KIW2oIA3rbVwoQBOKuaulNYR5Zkj_DmFLsUsA&e=)
Data to inform the definition of close contact are limited Considerations when assessing close contact include the duration of exposure (e g , longer exposure time likely increases exposure risk) and the clinical symptoms of the person with COVID-19 (e g , coughing likely increases exposure risk, as does exposure to a severely ill patient) Special consideration should be given to healthcare personnel exposed in healthcare settings, as described in CDC's Interim U S Guidance for Risk Assessment and Public Health Management of Healthcare Personnel with Potential Exposure in a Healthcare Setting to Patients with COVID-19 (https://urldefense proofpoint com/v2/url?u=https-3A__www cdc gov_coronavirus_2019-2Dncov_hcp_guidance-2Drisk-2Dassesment-2Dhcp html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10lTbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=lKstLNjCnfqcd23o6UD1ZcRn4S4Ho4HFn1udVea84io&e=)
4Documentation of laboratory-confirmation of COVID-19 may not be possible for travelers or persons caring for COVID-19 patients in other countries
5Affected areas are defined as geographic regions where sustained community transmission has been identified Relevant affected areas will be defined as a country with at least a CDC Level 2 Travel Health Notice Current information is available in CDC's COVID-19 Travel Health Notices (https://urldefense proofpoint com/v2/url?u=https-3A__www cdc gov_coronavirus_2019-2Dncov_travelers&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10lTbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=2qm4mGT9w53NATPI3vHQX-mCsXyY550snSeonTd8uhY&e=)
6Category includes single or clusters of patients with severe acute lower respiratory illness (e g , pneumonia, ARDS (acute respiratory distress syndrome) of unknown etiology in which COVID-19 is being considered
Recommendations for Reporting, Testing, and Specimen Collection Clinicians should immediately implement recommended infection prevention and control practices (https://urldefense proofpoint com/v2/url?u=https-3A__www cdc gov_coronavirus_2019-2Dncov_infection-2Dcontrol_control-2Drecommendations html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10lTbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=wNynx5KIW2oIA3rbVwoQBOKuaulNYR5Zkj_DmFLsUsA&e=) if a patient is suspected of having COVID-19 They should also notify infection control personnel at their healthcare facility and their state or local health department if a patient is classified as a PUI for COVID-19 State health departments that have identified a PUI or a laboratory-confirmed case should complete a PUI and Case Report form through the processes identified on CDC's Coronavirus Disease 2019 website (https://urldefense proofpoint com/v2/url?u=https-3A__www cdc gov_coronavirus_2019-2Dncov_php_reporting-2Dpui html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10lTbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=G-5rC5UNs8SmDxjncsRlG2Nk9-iUbUCUprZNgKXdgGc&e=)
State and local health departments can contact CDC's Emergency Operations Center (EOC) at 770-488-7100 for assistance with obtaining, storing, and shipping appropriate specimens to CDC for testing, including after hours or on weekends or holidays Currently, diagnostic testing for COVID-19 is being performed at state public health laboratories and CDC Testing for other respiratory pathogens should not delay specimen testing for COVID-19
For initial diagnostic testing for SARS-CoV-2, CDC recommends collecting and testing upper respiratory tract specimens (nasopharyngeal AND oropharyngeal swabs) CDC also recommends testing lower respiratory tract specimens, if available For patients who develop a productive cough, sputum should be collected and tested for SARS-CoV-2 The induction of sputum is not recommended For patients for whom it is clinically indicated (e g , those receiving invasive mechanical ventilation), a lower respiratory tract aspirate or bronchoalveolar lavage sample should be collected and tested as a lower respiratory tract specimen Specimens should be collected as soon as possible once a PUI is identified, regardless of the time of symptom onset See Interim Guidelines for Collecting, Handling, and Testing Clinical Specimens from Patients Under Investigation (PUIs) for COVID-19 (https://urldefense proofpoint com/v2/url?u=https-3A__www cdc gov_coronavirus_2019-2DnCoV_lab_guidelines-2Dclinical-2Dspecimens html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10lTbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=DhPv-k-sLjc78pLqKr6wTcmm4u26PTZzA_DIScyGAFg&e=) and Biosafety FAQs for handling and processing specimens from suspected cases and PUIs (https://urldefense proofpoint com/v2/url?u=https-3A__www cdc gov_coronavirus_2019-2Dncov_lab_biosafety-2Dfaqs html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10lTbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=ArqmusKD05_ckxY6FDNNTGCLSveH7X3I0knNn5MyQTA&e=)

For More Information
More information is available at the COVID-19 website: https://urldefense proofpoint com/v2/url?u=https-3A__www cdc gov_coronavirus_2019-2Dncov_index html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10lTbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=Sp9_uKKH0lDcuxsNB7et7Xz-zld_F73fRp5-rXqYvLY&e=
The Centers for Disease Control and Prevention (CDC) protects people's health and safety by preventing and controlling diseases and injuries; enhances health decisions by providing credible information on critical health issues; and promotes healthy living through strong partnerships with local, national, and international organizations

Hi Curtis,

Thank you for your feedback about our teleconference call and sharing your thoughts and concerns. We here at CDPH are in the same boat, learning as we go everyday and trying to keep up with reports and publications to come up with the best public health decisions and recommendation at the moment. Attached is that article from the China CDC (similar as the CDC MMWR) that was mentioned on the call; since we're not familiar with China CDC, I suggest reading it with some concern for the validity of the data and their interpretation, but there are some interesting and useful information there.

Thanks for manning the front line in SF,
Duc

Hi Dr. Vugia,
Thank you for today's excellent LHD teleconference call with so many clear summaries by the CDPH team. A CDPH physician described the severity of the disease and cited a study with very low CFR among young people in China. She suggested that she would forward the article to the LHDs. I found some articles (e.g., Woo, JAMA) to be very helpful, and wonder which article(s) plans to send and when?

With a new concern of community transmission in the SF Bay Area and increasing public concern about the one case of severe respiratory disease in Solano County, I've fielded many excellent community questions from clinicians and school/childcare leaders about:

1. testing only LRIs who are hospitalized

2. closure of schools and child care

Whereas I agree with the current public health decisions, as we're gathering capacity for regional lab testing and weighing the benefits/risks of childcare-school closure, the **epidemiology that your team quoted provides some rationale for**:

1. CFR (below SARS and MERS) helps justify NOT testing for mild-moderate patients, particularly for some demographics? For example, 0 deaths among 416 cases of children 0-9yo in China is helpful for the pediatric community and many concerned families.
2. Risk factors (>70y, lung disease, congregate living) might be considered for testing mild-moderate disease?
3. No school closure yet. With no evidence of high CFR, we have time to understand extent of community transmission?

As I'm replying to many emails while fielding calls from clinicians for the 3rd night-in-a-row, I'm eager to reference some data/rationale for not testing possible cases and preparing (not implementing) school closure. Thank you so much for your consideration. I hope that this worker-bee Deputy Health Officer perspective/questions is helpful.

Yours,
curtis

https://jamanetwork.com/journals/jama/fullarticle/2762130

<10yo: 0 deaths of 416 cases

70s: 8.0% CFR

80+ 14.8% CFR.

This is an excellent resource that Health Officers could share with hospitals.
Can you send out to all the HOs?
Thanks
Rick

What US Hospitals Should Do Now to Prepare for a COVID-19 Pandemic

Eric Toner, MD, and Richard Waldhorn, MD February 27, 2020

The World Health Organization (WHO) and the US Centers for Disease Control and Prevention (CDC) have called on health systems around the world to prepare for a possible COVID-19 pandemic. The purpose of this article is to offer to American hospital administrators and clinicians specific judgment on what hospitals should do to prepare for a COVID-19 pandemic. This is an update of a similar perspective related to pandemic influenza, published in 2006.[1] These recommendations derive from the authors' analysis of the consequences of a flu pandemic, review of many existing hospital plans, analysis of the federal government's recommendations, and meetings with a number of leaders in health care, public health, and emergency management. Recognizing that any such recommendations must be based on numerous untestable assumptions, any of which can be reasonably challenged, we propose specific actions and priorities for the purpose of making the discussion of hospital pandemic preparedness issues more operationally useful. This commentary pertains to hospitals, but long-term care facilities, outpatient clinics, medical offices, and other healthcare facilities must also urgently prepare.

The Argument for Urgent Preparedness

The current COVID-19 epidemic looks very much like an early influenza pandemic in many

important respects. It is spreading from person to person efficiently, much like influenza, including some degree of pre-symptomatic spread. Although the true case fatality rate is as yet uncertain, all evidence suggests that it is as severe as, if not more severe than, influenza pandemics of the last century. The case fatality rate (CFR) of confirmed COVID-19 patients in China is estimated to be 1-3%, although this may not account for all mildly symptomatic or asymptomatic infections. In some regions of China outside Hubei, the CFR has been less than 1%. For comparison, the CFR of the 2009 influenza pandemic was around 0.1%, the 1968 and 1957 pandemics in the United States were about 0.5%, and the CFR of the 1918 pandemic was estimated to be 2.5 % in the United States.

Because it will take considerable time to fully understand the epidemiology of COVID-19, it is reasonable to begin preparations using a model we have studied extensively for decades and that seems similar to COVID-19—pandemic influenza. The threat of a novel influenza pandemic has stimulated international, national, and local planning and preparedness efforts for years. In the event of a 1918-scale flu pandemic, hospitals would be flooded with sick patients seeking care.

The impact of a COVID-19 pandemic on hospitals is expected to be severe in the best of circumstances. Currently, US hospitals routinely operate at or near full capacity and have limited ability to rapidly increase services. There are currently shortages of healthcare workers of all kinds. Emergency departments are overcrowded and often have to divert patients to other hospitals.

In recent years, there has been a reduction in the overall number of hospitals, hospital beds, and emergency rooms. During an epidemic, the healthcare workforce would be greatly reduced. Healthcare workers would face a high risk of infection because of contact with infected patients; many would need to stay home to care for sick relatives, and, in the absence of vaccine, others might fear coming to work lest they bring a lethal infection home to their families. The provision of medical services to both COVID-19 and non–COVID-19 patients may be adversely affected in most communities.

Detailed modeling projections for COVID-19 have not yet been released by the US government or WHO; however, the US Department of Health and Human Services (HHS) released official planning assumptions for pandemic influenza, ranging from a moderate pandemic like 1968 or 1957, to one based on a very severe pandemic like 1918.[2] These may be the best tools we have at the moment. They differ by more than 10-fold in the number expected to need hospitalization, intensive care, and mechanical ventilation (see Table 1).

Table 1
HHS pandemic planning assumptions

Moderate Scenario (1968-like)	**Very Severe Scenario** (1918-like)
38 M needing medical care	38 M needing medical care
1 M hospitalizations	9.6 M hospitalizations
200,000 needing ICU	2.9 M needing ICU

As a comparison, there are about 46,500 medical ICU beds in the United States and perhaps an equal number of other ICU beds that could be used in a crisis. Even spread out over several months, the mismatch between demand and resources is clear.

Some patients in China have been treated with extracorporeal membrane oxygenation (ECMO), and some US medical centers with this technology are preparing to use it as well. For US hospitals with this capability, it would be prudent to think through how this scarce resource would be allocated if demand exceeds resources.

Preparedness Defined

Based on such calculations, it would seem that preparing for a pandemic of even moderate severity is a difficult challenge. For the purpose of this analysis, we use the following definition of preparedness:

Every hospital, in collaboration with other hospitals and public health agencies, will be able to provide appropriate care to COVID-19 patients requiring hospitalization while maintaining other

essential medical services in the community, both during and after a pandemic.

This definition recognizes that what constitutes "appropriate care" and the criteria for hospital admission may well change during a pandemic.

The Top Priorities

Individual hospitals and groups of hospitals involved in regional coordination of pandemic preparedness should focus their initial preparedness efforts in the following priority areas:

1. Comprehensive and realistic planning based on actual CDC FluSurge projections in each hospital, and collaborative planning among all hospitals in a region (eg, healthcare coalitions).
2. Limiting the nosocomial spread of the virus to (1) protect the healthcare workers and, thus, maintain a hospital workforce; (2) prevent the hospital from being a disease amplifier; and (3) protect the non–COVID-19 patients from infection, so as to maintain the ability to provide essential non–COVID-19 health care.
3. Maintaining, augmenting, and stretching the hospital workforce.
4. Allocating limited healthcare resources in a rational, ethical, and organized way so as to do the greatest good for the greatest number.

Specific Priority Actions to Be Taken

To implement the priority goals above, hospitals should undertake the following specific actions:

1. Employing a comprehensive and realistic planning process:

- Employ at least 1 full-time hospital emergency manager in each hospital.
- Dedicate a full-time infection prevention practitioner to work on infection prevention aspects of the preparations, including education, training, and exercises.
- Designate a medical director to work closely with the emergency manager and infection prevention practitioner.
- Create a pandemic preparedness committee (or use an existing emergency management committee) that includes representatives of all clinical and support departments as well as senior administrators.
- Participate in a local healthcare coalition, which includes neighboring hospitals, local public health agencies, and emergency management. Members of multi-hospital health systems should integrate system-wide planning with local planning with other local hospitals.
- We do not yet have modeling tools or planning assumptions for COVID-19. CDC has developed FluSurge 2.0, which can be used in conjunction with HHS planning assumptions to guide planning for both a moderate and severe pandemic.[3] Note that the default assumptions in FluSurge are based on a 1968-like pandemic. To model a severe pandemic, FluSurge allows the assumed number of hospitalizations to be modified to correspond to the HHS planning assumptions for a severe pandemic.
- Be able to make 30% of licensed bed capacity available for COVID-19 patients on 1 week's notice. About 10-20% of a hospital's bed capacity can be mobilized within a few hours by expediting discharges, using discharge holding areas, converting single rooms to double rooms, and opening closed areas, if staffing is available. Another 10% can be obtained within a few days by converting flat spaces, such as lobbies, waiting areas, and classrooms.[4]
- Collaborate in regional plans to be able to make at least 200% of licensed bed capacity in the region available for COVID-19 patients on 2 weeks' notice.
- Use telephone and internet-based advice lines to reduce unnecessary visits to the hospital emergency department.

2. Limiting the nosocomial spread of the virus:

- The CDC has provided good technical guidance on infection control for COVID-19 in healthcare facilities.[5]
- Limit the accidental contamination of the hospital environment by implementing respiratory etiquette and by using simple surgical masks for everyone entering the facility (staff, patients, and visitors) during a pandemic. Assuming re-supply may be difficult during a pandemic, stockpile enough masks for 3 weeks.
- Prevent staff from getting infected by training healthcare workers on the use of personal

protective equipment (PPE) and infection control procedures and by stockpiling a supply of PPE. PPE availability is currently limited, but hospitals should purchase what they can, recognizing that a local outbreak could last at least several weeks to several months. Given the preeminent need to protect healthcare workers, we feel the highest level of protection available should be used. We call for the use of N95 respirators for healthcare workers with direct contact with COVID-19 patients. This is in concert with the CDC's COVID-19 guidelines. Powered air-purifying respirators (PAPRs) should be available for use in high-risk aerosol-generating procedures.

- Limit the number of staff who are exposed to COVID-19 patients by cohorting (dedicated staff in dedicated units) (see Figure 1). Utilize overtime and long shifts for staff in the COVID-19 units to limit the number of staff needed. When possible, use staff who are immune (recovered) in the COVID-19 units.
- Prevent infected staff from working (except with COVID-19 patients) by tracking staff who are sick and testing for COVID-19, if possible, and keeping a log of staff who have had confirmed COVID-19.

Figure 1
Cohorting

3. Maintaining, augmenting, and stretching the hospital workforce:

- Vaccinate all staff for influenza to reduce the burden of that disease.
- Organize in-home childcare for well children of healthcare workers if schools are closed,

using screened volunteers.
- Provide medical daycare for sick family members.
- Allay fear through open, honest, and transparent planning and careful training.
- Shift clinical staff to highest-need areas from areas that may be closed or quiet; employ "just in time" education and "buddy teaming."
- Augment clinical staff with nontraditional personnel, employing "just in time" education and "buddy teaming." Use (1) medical professionals with prior clinical experience (eg, administrators, researchers, retirees, etc); (2) related health professionals (eg, dentists, veterinarians, emergency medical technicians, etc); (3) nonclinical hospital personnel; and (4) nonclinical outside personnel. Specific training and operating procedures for each group must be created in advance.
- Coordinate plans with other hospitals in the region to recruit and use volunteers.

4. Allocating limited healthcare resources in a rational, ethical, and organized way so as to do the greatest good for the greatest number through deferral of nonemergency care and, if necessary, institution of alternative patient care routines.

- Prioritize which services and types of procedures can be deferred, for how long, and with what consequences and create an alternative plan for patients who will be deferred. Create a process for refining and updating this plan as circumstances change. Create a process to track deferred patients.
- Plan for the graceful transition to contingency and crisis standards of care. In a severe pandemic, not all patients in need of intensive care will be able to be accommodated in the ICU. Normal staffing ratios and standard operating procedures will not be able to be maintained.
- Plan for alternative sites to provide ICU-like care within the hospital (eg, catheterization lab, catheterization recovery, OR, PACU, endoscopy units, etc).
- Implement contingency and crisis standards, which will be justified when conventional standards cannot be maintained despite the use of all available resources, including mutual aid arrangements. The legal and ethical framework for these decisions should be considered well in advance of a crisis. Alterations in hospital policy and procedures should be implemented by an active decision of the hospital leadership in consultation with the medical staff and civil authorities.
- Create criteria/clinical guidelines for use (or denial) of resource-intensive services (eg, admission, mechanical ventilation, invasive monitoring) based on national guidelines, such as the Crisis Standards of Care report[6] in regional collaboration with other hospitals.
- Establish a process for triage of patients competing for limited resources, including admission, early discharge, and life support. These decisions should not be made solely by 1 person. The criteria used to make these decisions should be created in advance and formally sanctioned by the medical staff and hospital administration.

How to Proceed

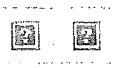

Although a COVID-19 pandemic seems all but inevitable, there is still uncertainty about its severity in the United States. Time will tell, but, in the meantime, hospitals should not delay. In the event of a pandemic, the predictable costs of not preparing, in human, societal, and political terms, would be huge. Decision makers at all levels—including hospital CEOs and their boards and state and federal officials—should consider these issues and how to proceed. Several of the first priority items (comprehensive and collaborative planning, discussing allocation of scarce resources, and planning education and training) take substantial time. Hospitals should begin these actions now.

Tomas,

Thanks, but that sentence does not take into account the new patient in Solano/Sacto.

I am going to use the sentence Grant approved, which allows for more modes of transmission.

Risk for the novel coronavirus is based on travel history, contacts and exposure to the virus.

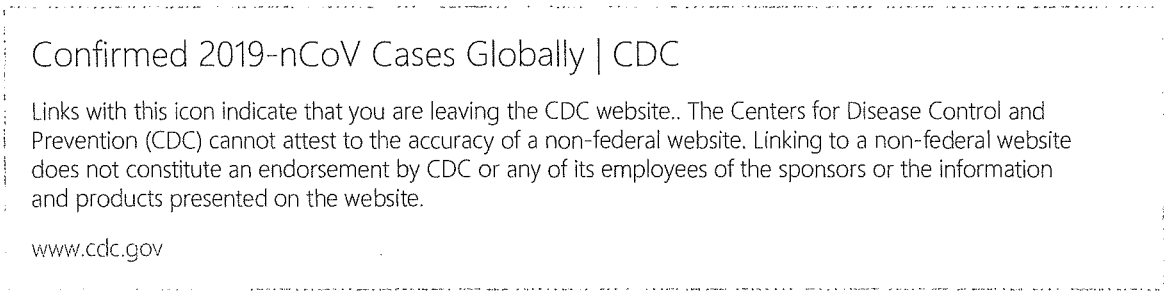

Thanks, Rachael

How about something like:

Risk of infection is based on exposure to the novel coronavirus in locations where it has spread (now 30+ countries), or by close contact to a confirmed case.

Country count is here:
https://www.cdc.gov/coronavirus/2019-ncov/locations-confirmed-cases.html

Tomas

Subject: help with language in light of new case

Hi team,

So much happening. I'd like to draw your attention to one particular question (among many).

In terms of the xenophobia and discrimination theme, we have been saying: This virus is not about race, ethnicity or culture. The risk of getting COVID-19 is based on travel history, and contacts with people who are sick.

In light of the new California case having no travel history and no known contacts with travelers or people who are sick, how would we modify our statement? I realize we don't have all the answers right now, but the Mayor and Carmen Chu are submitting an op-ed **tomorrow** about discrimination, and I am helping them update this language. How about:

Risk for the novel coronavirus is based on travel history, contacts and exposure to the virus.

Is that safe to say? Note that this is not a clinical piece, but we still want to be accurate.

Thank you,

Rachael

CDC Confirms Possible First Instance of COVID-19 Community Transmission in California

SACRAMENTO – The U.S. Centers for Disease Control and Prevention today confirmed a possible first case of person-to-person transmission of COVID-19 in California in the general public. The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.

California has a strong health care system and public health infrastructure. California has prepared for the potential spread of diseases, such as H1N1, in the past and is prepared and actively responding to the potential community spread of COVID-19. Contact tracing in this case has already begun.

The health risk from novel coronavirus to the general public remains low at this time. While COVID-19 has a high transmission rate, it has a low mortality rate. From the international data we have, of those who have tested positive for COVID-19, approximately 80 percent do not exhibit symptoms that would require hospitalization. There have been no confirmed deaths related to COVID-19 in the United States to date. California is carefully assessing the situation as it evolves.

"Keeping Californians safe and healthy is our number one priority," said Dr. Sonia Angell, Director of the California Department of Public Health and State Public Health Officer. "This has been an evolving situation, which California has been monitoring and responding to since COVID-19 cases first emerged in China last year. This is a new virus, and while we are still learning about it, there is a lot we already know. We have been anticipating the potential for such a case in the U.S., and given our close familial, social and business relationships with China, it is not unexpected that the first case in the U.S. would be in California. That's why California has been working closely with federal and local partners, including health care providers and hospitals, since the outbreak was first reported in China -- and we are already responding."

As in any public health emergency, the Department of Public Health's Emergency Operations

Center has been actively coordinating response efforts across the state and preparing for possible community transmission. California continues to prepare and respond in coordination with federal and local partners.

This would be the first known instance of person-to-person transmission in the general public in the United States. Previously known instances of person-to-person transmission in the United States include one instance in Chicago, Illinois, and one in San Benito County, California. Both cases were after close, prolonged interaction with a family member who returned from Wuhan, China and had tested positive for COVID-19, the disease caused by novel coronavirus. As of today, including this case, California has had 7 travel-related cases, one close contact case, and now one community transmission.

As with any virus, especially during the flu season, the Health Department reminds you there are a number of steps you can take to protect your health and those around you:

- Washing hands with soap and water.
- Avoiding touching eyes, nose or mouth with unwashed hands.
- Avoiding close contact with people who are sick are all ways to reduce the risk of infection with a number of different viruses.
- Staying away from work, school or other people if you become sick with respiratory symptoms like fever and cough.

The California Department of Public Health will not be providing additional information about this patient due to patient confidentiality. For more information about novel coronavirus, please visit the CDPH website.

Subject: Fw: News Alert: First U.S coronavirus case of unknown origin confirmed in Northern California, a sign the virus may be spreading in a local area

Dear Susan, Naveena and Julie,
Curtis and I listened to the CAHAN call today late afternoon where the first case of community transmission in Solano county was described. The CDPH call with regard to official facts was vague. My understanding from unofficial communications with colleagues is that the case was transferred from another facility to UC Davis, is critically ill with ARDs, and was tested as a PUI under the footnote in the CDC criteria of "severe respiratory illness of unknown etiology". The patient has no known epidemiologic risk factors including travel out of country or exposure to a known COVID-19 case or other ill exposures, and it sounds like contact investigation was performed thoroughly.

Since many on this email are participating on many statewide, national or hospital calls, if there is further information that anyone hears about this case please share with the Clinical Consultation Team. We have been basing much of our PUI screening criteria on epidemiologic risk (e.g. travel from an area with sustained community transmission). However, if after communicating with other county partners we confirm that this case truly had no known travel or exposure, I recommend we consider broadening our PUI definition to include any severely ill patient with pneumonia (e.g. hospitalized or in an ICU) regardless of travel history.

Since there were many astute clinicians asking questions on the CAHAN call, I anticipate that tomorrow we will have many inquiries along the same lines with regard to broadening our

testing criteria, as well as requests for testing, requests for guidance, concerns about unprotected exposures in healthcare workers, PUIs, and specimen collection and testing (aside from worried well calls). Based on the available information it seems reasonable to broaden testing, but
I want to make sure we all agree and that we are prepared for the influx and extra staffing we may need to handle it.

Janice

First U.S coronavirus case of unknown origin confirmed in Northern California, a sign the virus may be spreading in a local area

The Centers for Disease Control and Prevention has been informed of the first case

of the coronavirus in a person who did not recently return from a foreign country or have contact with a confirmed case, according to a person briefed on the case. Officials have begun tracing the contacts of the resident to find out how the person may have been infected and who else might have been exposed.

CDC Confirms Possible First Instance of COVID-19 Community Transmission in California

SACRAMENTO – The U.S. Centers for Disease Control and Prevention today confirmed a possible first case of person-to-person transmission of COVID-19 in California in the general public. The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.

California has a strong health care system and public health infrastructure. California has prepared for the potential spread of diseases, such as H1N1, in the past and is prepared and actively responding to the potential community spread of COVID-19. Contact tracing in this case has already begun.

The health risk from novel coronavirus to the general public remains low at this time. While COVID-19 has a high transmission rate, it has a low mortality rate. From the international data we have, of those who have tested positive for COVID-19, approximately 80 percent do not exhibit symptoms that would require hospitalization. There have been no confirmed deaths related to COVID-19 in the United States to date. California is carefully assessing the situation as it evolves.

"Keeping Californians safe and healthy is our number one priority," said Dr. Sonia Angell, Director of the California Department of Public Health and State Public Health Officer. "This has been an evolving situation, which California has been monitoring and responding to since COVID-19 cases first emerged in China last year. This is a new virus, and while we are still learning about it, there is a lot we already know. We have been anticipating the potential for such a case in the U.S., and given our close familial, social and business relationships with China, it is not unexpected that the first case in the U.S. would be in California. That's why California has been working closely with federal and local partners, including health care providers and hospitals, since the outbreak was first reported in China -- and we are already responding."

As in any public health emergency, the Department of Public Health's Emergency Operations Center has been actively coordinating response efforts across the state and preparing for possible community transmission. California continues to prepare and respond in coordination with federal and local partners.

This would be the first known instance of person-to-person transmission in the general public in the United States. Previously known instances of person-to-person transmission in the United States include one instance in Chicago, Illinois, and one in San Benito County, California. Both cases were after close, prolonged interaction with a family member who returned from Wuhan, China and had tested positive for COVID-19, the disease caused by novel coronavirus. CDC Confirms Possible First Instance of COVID-19 Community Transmission in California

SACRAMENTO – The U.S. Centers for Disease Control and Prevention today confirmed a possible first case of person-to-person transmission of COVID-19 in California in the general public. The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.

California has a strong health care system and public health infrastructure. California has prepared for the potential spread of diseases, such as H1N1, in the past and is prepared and actively responding to the potential community spread of COVID-19. Contact tracing in this case has already begun.

The health risk from novel coronavirus to the general public remains low at this time. While COVID-19 has a high transmission rate, it has a low mortality rate. From the international data we have, of those who have tested positive for COVID-19, approximately 80 percent do not exhibit symptoms that would require hospitalization. There have been no confirmed deaths related to COVID-19 in the United States to date. California is carefully assessing the situation as it evolves.

"Keeping Californians safe and healthy is our number one priority," said Dr. Sonia Angell, Director of the California Department of Public Health and State Public Health Officer. "This has been an evolving situation, which California has been monitoring and

responding to since COVID-19 cases first emerged in China last year. This is a new virus, and while we are still learning about it, there is a lot we already know. We have been anticipating the potential for such a case in the U.S., and given our close familial, social and business relationships with China, it is not unexpected that the first case in the U.S. would be in California. That's why California has been working closely with federal and local partners, including health care providers and hospitals, since the outbreak was first reported in China -- and we are already responding."

As in any public health emergency, the Department of Public Health's Emergency Operations Center has been actively coordinating response efforts across the state and preparing for possible community transmission. California continues to prepare and respond in coordination with federal and local partners.

This would be the first known instance of person-to-person transmission in the general public in the United States. Previously known instances of person-to-person transmission in the United States include one instance in Chicago, Illinois, and one in San Benito County, California. Both cases were after close, prolonged interaction with a family member who returned from Wuhan, China and had tested positive for COVID-19, the disease caused by novel coronavirus. As of today, including this case, California has had 7 travel-related cases, one close contact case, and now one community transmission.

As with any virus, especially during the flu season, the Health Department reminds you there are a number of steps you can take to protect your health and those around you:

- Washing hands with soap and water.
- Avoiding touching eyes, nose or mouth with unwashed hands.
- Avoiding close contact with people who are sick are all ways to reduce the risk of infection with a number of different viruses.
- Staying away from work, school or other people if you become sick with respiratory symptoms like fever and cough.

The California Department of Public Health will not be providing additional information about this patient due to patient confidentiality. For more information about novel coronavirus, please visit the CDPH website.

CDC Confirms Possible First Instance of COVID-19 Community Transmission in California

SACRAMENTO – The U.S. Centers for Disease Control and Prevention today confirmed a possible first case of person-to-person transmission of COVID-19 in California in the general public. The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.

California has a strong health care system and public health infrastructure. California has prepared for the potential spread of diseases, such as H1N1, in the past and is prepared and actively responding to the potential community spread of COVID-19. Contact tracing in this case has already begun.

The health risk from novel coronavirus to the general public remains low at this time. While COVID-19 has a high transmission rate, it has a low mortality rate. From the international data

we have, of those who have tested positive for COVID-19, approximately 80 percent do not exhibit symptoms that would require hospitalization. There have been no confirmed deaths related to COVID-19 in the United States to date. California is carefully assessing the situation as it evolves.

"Keeping Californians safe and healthy is our number one priority," said Dr. Sonia Angell, Director of the California Department of Public Health and State Public Health Officer. "This has been an evolving situation, which California has been monitoring and responding to since COVID-19 cases first emerged in China last year. This is a new virus, and while we are still learning about it, there is a lot we already know. We have been anticipating the potential for such a case in the U.S., and given our close familial, social and business relationships with China, it is not unexpected that the first case in the U.S. would be in California. That's why California has been working closely with federal and local partners, including health care providers and hospitals, since the outbreak was first reported in China -- and we are already responding."

As in any public health emergency, the Department of Public Health's Emergency Operations Center has been actively coordinating response efforts across the state and preparing for possible community transmission. California continues to prepare and respond in coordination with federal and local partners.

This would be the first known instance of person-to-person transmission in the general public in the United States. Previously known instances of person-to-person transmission in the United States include one instance in Chicago, Illinois, and one in San Benito County, California. Both cases were after close, prolonged interaction with a family member who returned from Wuhan, China and had tested positive for COVID-19, the disease caused by novel coronavirus. As of today, including this case, California has had 7 travel-related cases, one close contact case, and now one community transmission.

As with any virus, especially during the flu season, the Health Department reminds you there are a number of steps you can take to protect your health and those around you:

- Washing hands with soap and water.
- Avoiding touching eyes, nose or mouth with unwashed hands.
- Avoiding close contact with people who are sick are all ways to reduce the risk of infection with a number of different viruses.
- Staying away from work, school or other people if you become sick with respiratory symptoms like fever and cough.

Updates and Response:

SFDPH
Summary of actions

- Mayor London Breed declared a local emergency 02/25/20, allowing CCSF to access additional resources to prepare for potential COVID-19 cases in SF.
- SFDPH DOC expanded community outreach and mitigation efforts, working closely with the CCSF

Emergency Operations Center (EOC) in anticipation of increased inquiries due to the declaration of a local emergency.

- SFDPH is focusing on providing a comprehensive picture of past and current preparation and mitigation efforts, forward leaning departmental objectives, and the data and information being used to guide the work.
- SFDPH and the EOC are collaborating to create a process for routing briefing and other informational requests (from media and non-media sources) to the appropriate channels.
- SFDPH drafted guidelines for housing plans for confirmed COVID-19 cases, potential COVID-19 cases, and medium risk individuals who live in congregate living situations including Single Room Occupancies (SROs).
- SFDPH completed a preparedness consultation site visit to Chinese Hospital 02/25/20 and UCSF Mission Bay today 02/26/20.
- SF Public Health Laboratory is strengthening their safety measures for lab personnel, including enhanced Personal Protective Equipment (PPE) requirements.
- SF Public Health Laboratory is still awaiting delivery of CDC testing kits. CDC reported they will have a ship date for the testing kits by the end of this week.
- SFDPH is updating their COVID-19 Fact Sheet to include the most recent updates and align messaging and information across DPH and CCSF sites.
- SFDPH Public Information Office recently completed a COVID-19 prevention focused informational poster, which will soon be displayed on BART Trains.
- SFDPH CDCP information: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-_%20%20%20coronavirus/

CDC-

- CDC updated their travel advisory to include South Korea. https://wwwnc.cdc.gov/travel/notices/warning/coronavirus-south-korea
- CDC reports that to date 445 people have been tested in the U.S.
- https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html

WHO (World Health Organization)-

- WHO stated that 4 new countries (Algeria, Austria, Croatia, and Switzerland) reported cases of COVID-19 in the past 24 hours. (as of 02/26/20)
- https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports

CDPH (California Department of Public Health)-

- CDPH reported new cases of COVID-19 in CA in the 24 hours. Number of confirmed cases in CA remains at 10.
- https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data-

- 81,322 confirmed cases globally.
- 78,064 confirmed cases in mainland China; 3,258 confirmed cases outside of mainland China, in 46 countries.
- 2,719 deaths in mainland China + 51 additional deaths (Afghanistan, Bahrain, Iraq, Oman, Iran, Italy,

Philippines, Hong Kong, Taiwan, Japan, France, South Korea, Diamond Princess Cruise)

- Confirmed cases outside of China across 36 countries/regions (includes regions of Hong Kong and Taiwan, outside of mainland China)

National (U.S.) data:

- 59 confirmed cases currently in the U.S. (42 from Diamond Princess cruise ship, from unassigned locations) cases in 5 states.
- https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6

NOTE: Information may vary as events and reporting are rapidly evolving.

Subject:	NEW NUMBER and NEW TIME - Solano County Novel Coronavirus Call with Healthcare and EMS Partners (nonproprietary)

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

We apologize for the short notice and for changing the meeting time again this week, but we are moving this afternoon's call to tomorrow from 11:30-12:30.

Thank you all for your understanding!!

This is the weekly call for Solano County Healthcare and EMS partners. We've also invited surrounding counties and hospitals affected by the Diamond Princess evacuee response as well as State and Federal partners.

Thanks.

Solano Public Health

SFDPH DOC COVID-19 Situation Status Report (02/25/2020)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths (dated 02/25/20)
Worldwide: 80,350 Cases / 2,705 Deaths *(John Hopkins CSSE, link below)*
US: 53 Cases (see notes below)**/ 0 Deaths** (CDC)
CA: 10 Cases / 0 Deaths (CDPH)
SF: 0 Cases
https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6

Updates and Response:

CCSF

- The Mayor has declared a local emergency due to COVID-19. Although there are still zero confirmed cases in San Francisco residents, the global picture is changing rapidly. Given the high volume of travel between SF and mainland China, and the spread of the virus in other countries, there is a growing likelihood that San Francisco will see cases eventually. The declaration of a local emergency will mobilize city resources, accelerate emergency planning, streamline staffing, coordinate agencies across the city, allow for future

reimbursement by the state and federal governments and raise awareness throughout San Francisco about how everyone can prepare in the event that COVID-19 (novel coronavirus) appears in San Francisco.

SFDPH

Summary of actions

- SFDPH DOC Call Center has attempted contact to all return travelers from China in need of follow-up.
- SFDPH is maintaining global, national, and local situational awareness as South Korea, Japan, and Italy have reported significant increases in the number of confirmed COVID-19 cases.
- SFDPH is preparing to update stakeholder messaging in anticipation of new CDC guidance.
- SFDPH is working closely with the Department of Emergency Management's (DEM) Emergency Operations Center (EOC) on community outreach, care and shelter for potential COVID-19 cases.
- SFDPH, the Mayor, DEM, and Chinese Community leaders provided updates to the public on SF's preparedness efforts.
- SFDPH completed preparedness consultation site visits to 5 major SF hospitals, with plans to visit 2 additional sites. DPH will hold a tabletop exercise and discussion with SF hospital partners on preparing for COVID-19 cases.
- SFDPH CDCP information: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-_%20%20%20coronavirus/

CDC-

- CDC is operationalizing its pandemic preparedness and response plans, including measures to prepare communities to respond to local transmission of COVID-19. There is an abundance of pandemic guidance developed and adapted for a COVID-19 pandemic.
- CDC updated travel guidance on 02/23/20 recommending travelers avoid all nonessential travel to the People's Republic of China (this does not include Hong Kong, Macau, or the island of Taiwan). https://wwwnc.cdc.gov/travel/destinations/traveler/none/china#travel-notices
- No changes in number of U.S. confirmed cases reported since 02/24/20.
- https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html

WHO (World Health Organization)-

- WHO has an online course titled "Infection Prevention and Control for COVID-19." The course provides information on how facilities can prepare to respond to emerging respiratory viruses such as COVID-19. https://openwho.org/courses/COVID-19-IPC-EN
- The WHO-China joint mission concluded on 02/24/20 and released findings about the transmissibility and severity of COVID-19, and the impact of the measures taken. https://www.fmprc.gov.cn/mfa_eng/topics_665678/kjgzbdfyyq/t1749176.shtml
- WHO and European Centre for Disease Prevention and Control (ECDC) mission arrived in Italy on 02/24/20 to support Italian authorities on the COVID-19 situation.
- WHO stated that 4 new countries (Afghanistan, Bahrain, Iraq, and Oman) reported confirmed cases of COVID-19 in the past 24 hours (as of 02/25/20).
- https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports

CDPH (California Department of Public Health)-

CDPH lab in Richmond, CA is currently testing potential (PUI) cases quarantined at Travis Air Force Base. This lab is not providing testing for local jurisdictions at this time.

- https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data-

- 80,350 confirmed cases globally
- 77,660 confirmed cases in mainland China (96.7% of all confirmed cases globally).
- 2,660 deaths in mainland China + 45 additional deaths (Afghanistan, Bahrain, Iraq, Oman, Iran, Italy, Philippines, Hong Kong, Taiwan, Japan, France, South Korea, Diamond Princess Cruise)
- 2,747 confirmed cases outside of China across 36 countries/regions (includes regions of Hong Kong and Taiwan, outside of mainland China)

National (U.S.) data:

- 53 confirmed cases currently in the U.S. (36 from Diamond Princess cruise ship, from unassigned locations) cases in 7 states.
- https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6

NOTE: Information may vary as events and reporting are rapidly evolving.

Attachments:	CDPH Guidance for Monitoring Returning Travelers Feb 2020.pdf

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear Local Health Officers and Communicable Disease Control Officers,

Attached is the CDPH Guidance for Monitoring Returning Travelers where we restate and clarify CDC risk assessment and guidelines for monitoring and movement of returned travelers considered at high, medium, and low risk. At this time, this CDPH guidance only addresses persons who have returned from China within 14 days and therefore may be revised with new updates from CDC. Given the rapidly changing global situation, we will try to update guidances as needed in a timely manner.

Sincerely,
Duc

Duc J. Vugia, MD MPH

SFDPH DOC COVID-19 Situation Status Report (02/25/2020)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths (dated 02/25/20)
Worldwide: 80,350 Cases / 2,705 Deaths *(John Hopkins CSSE, link below)*
US: 53 Cases (see notes below)**/ 0 Deaths** (CDC)
CA: 10 Cases / 0 Deaths (CDPH)
SF: 0 Cases
https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6

Updates and Response:

CCSF

- The Mayor has declared a local emergency due to COVID-19. Although there are still zero confirmed cases in San Francisco residents, the global picture is changing rapidly. Given the high volume of travel between SF and mainland China, and the spread of the virus in other countries, there is a growing likelihood that San Francisco will see cases eventually. The declaration of a local emergency will mobilize city resources, accelerate emergency planning, streamline staffing, coordinate agencies across the city, allow for future reimbursement by the state and federal governments and raise awareness throughout San Francisco about how everyone can prepare in the event that COVID-19 (novel coronavirus) appears in San Francisco.

SFDPH

Summary of actions

- SFDPH DOC Call Center has attempted contact to all return travelers from China in need of follow-up.
- SFDPH is maintaining global, national, and local situational awareness as South Korea, Japan, and Italy have reported significant increases in the number of confirmed COVID-19 cases.
- SFDPH is preparing to update stakeholder messaging in anticipation of new CDC guidance.
- SFDPH is working closely with the Department of Emergency Management's (DEM) Emergency Operations Center (EOC) on community outreach, care and shelter for potential COVID-19 cases.
- SFDPH, the Mayor, DEM, and Chinese Community leaders provided updates to the public on SF's preparedness efforts.
- SFDPH completed preparedness consultation site visits to 5 major SF hospitals, with plans to visit 2 additional sites. DPH will hold a tabletop exercise and discussion with SF hospital partners on preparing for COVID-19 cases.
- SFDPH CDCP information: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-_%20%20%20coronavirus/

CDC-

- CDC is operationalizing its pandemic preparedness and response plans, including measures to prepare communities to respond to local transmission of COVID-19. There is an abundance of pandemic

guidance developed and adapted for a COVID-19 pandemic.

- CDC updated travel guidance on 02/23/20 recommending travelers avoid all nonessential travel to the People's Republic of China (this does not include Hong Kong, Macau, or the island of Taiwan). https://wwwnc.cdc.gov/travel/destinations/traveler/none/china#travel-notices
- No changes in number of U.S. confirmed cases reported since 02/24/20.
- https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html

WHO (World Health Organization)-

- WHO has an online course titled "Infection Prevention and Control for COVID-19." The course provides information on how facilities can prepare to respond to emerging respiratory viruses such as COVID-19. https://openwho.org/courses/COVID-19-IPC-EN
- The WHO-China joint mission concluded on 02/24/20 and released findings about the transmissibility and severity of COVID-19, and the impact of the measures taken. https://www.fmprc.gov.cn/mfa_eng/topics_665678/kjgzbdfyyq/t1749176.shtml
- WHO and European Centre for Disease Prevention and Control (ECDC) mission arrived in Italy on 02/24/20 to support Italian authorities on the COVID-19 situation.
- WHO stated that 4 new countries (Afghanistan, Bahrain, Iraq, and Oman) reported confirmed cases of COVID-19 in the past 24 hours (as of 02/25/20).
- https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports

CDPH (California Department of Public Health)-

- CDPH lab in Richmond, CA is currently testing potential (PUI) cases quarantined at Travis Air Force Base. This lab is not providing testing for local jurisdictions at this time.
- https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data-

- 80,350 confirmed cases globally
- 77,660 confirmed cases in mainland China (96.7% of all confirmed cases globally).
- 2,660 deaths in mainland China + 45 additional deaths (Afghanistan, Bahrain, Iraq, Oman, Iran, Italy, Philippines, Hong Kong, Taiwan, Japan, France, South Korea, Diamond Princess Cruise)
- 2,747 confirmed cases outside of China across 36 countries/regions (includes regions of Hong Kong and Taiwan, outside of mainland China)

National (U.S.) data:

- 53 confirmed cases currently in the U.S. (36 from Diamond Princess cruise ship, from unassigned locations) cases in 7 states.
- https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6

Requester,

We have conducted a diligent search for records responsive to your request. We have located responsive records, which are available to you here and have also been uploaded to NextRequest case #20-1076/ SOTF File 20059. Due to the need to continue reviewing, we will produce any additional responsive records on a rolling basis.

Thank you.

Subject: Public Records Request #20-1076

Hello,
I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2"

"2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

Subject: CDC Text Illness Monitoring (T.I.M) System Update
Date: Friday, February 28, 2020 11:56:57 AM
Attachments: T.I.M. FAQ forPH 02.27.2020.pdf

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear Colleagues,

The Text Illness Monitoring (T.I.M.) system has recently been modified to allow county-level campaigns to be added under state campaigns. This allows for local use of T.I.M. for COVID-19 symptom monitoring.

If a state would like to add county-level users in T.I.M., they should provide the names of the counties that should be activated. Once the T.I.M. support team activates these counties, states may then add county-level users as appropriate.

Local jurisdictions will be assigned at the county level and will have access to the data for that county only, and states will have access to all data within the state.

Local jurisdictions should coordinate with their state for access. States may send the list of counties they wish to activate in T.I.M. to eocevent340@cdc.gov.

Thank you,

State Coordination Task Force

Thursday (3/05/2020)
-Warriors vs. Raptors @ Chase Center, 7:30pm to 11:00pm

Friday (3/06/2020)
-No Large events scheduled

Critical Branch Updates:

CCSF Transportation Branch:
- SFMTA Muni Alert messages: https://www.sfmta.com

CCSF Infrastructure Branch:
- Nothing significant to report.

CCSF Public Safety Branch:
- Nothing significant to report.

CCSF Health and Human Services Branch:
- The San Francisco Department of Public Health continues to coordinate with partner agencies to monitor the COVID-19 (novel coronavirus-2019) situation.

CCSF Community Branch:
- Community Branch has activated to provide COVID-19 information to city partners, schools and the private sector.

Domestic and International News:

Earthquake shakes Lake County area, felt as far as Petaluma

A magnitude 3.5 earthquake rattled a remote area of Lake County near Cobb Thursday afternoon, according to officials with the U.S. Geological Survey. The small quake struck at 3:27 p.m. in the area south of Clear Lake, about four miles northwest of Cobb, the USGS reported. Some reported feeling the earthquake as far south as Petaluma, which is 60 miles south of Cobb. The USGS characterized its intensity as a light earthquake.

https://www.sacbee.com/news/local/article240712501.html

8,400 people in Calif. are being monitored for coronavirus, Gov. Newsom says

California Governor Gavin Newsom said in a press conference Thursday that at least 8,400 people are being monitored for new coronavirus in the state. The news comes a day after the Centers for Disease Control announced what's being called the first American case of unknown origin. That Solano County resident is being treated at UC Davis Medical Center near Sacramento. State and federal health officials are trying to locate everyone who came in contact with the Northern California woman. She had no known connection to individuals who traveled abroad or other known causes. The woman lives in Solano County, home to Travis Air Force Base, where dozens of people infected in China or on cruise ships have been treated. But Sonia Angell, director of the California Department of Public Health, said there was no evidence the woman had any connection to the base. "We are not overreacting, but we are not underreacting," Newsom said. "Yesterday's case generated a lot of attention, but we all knew this was inevitable." Newsom declined comment when asked by reporters to name the community in Solano County where the woman is from. He urged people to take precautions while emphasizing that the risks to public health are low. He said there was no need to declare a public health emergency. "Everybody in this country is rightfully anxious about this moment," Newsom said. "I think they should know we are meeting this moment with the kind of urgency that is necessary and I don't want to over extend the anxiety."

Congress eyes billions in funding to fight coronavirus

WASHINGTON (AP) — Capitol Hill negotiations on emergency spending to combat the coronavirus outbreak are likely to produce a bill that's double or even triple the $2.5 billion plan requested by President Donald Trump just days ago. Lawmakers and aides involved in the talks say they are proceeding well and are likely to produce legislation in the $6 billion to $8 billion range. Both the Democratic-controlled House and GOP-held Senate are eager to complete work on the measure in the next two weeks.

Situation Report - Update - COVID-19

Department of Emergency Management
Division of Emergency Services

02-27-2020 - 19:24:02

Change Since Last Situation Report:

Situation Update:

- **International data:**
  - 82,557 confirmed cases; 78,497 cases in mainland China; 2,745 deaths in mainland China; 65 deaths outside mainland China
  - 4,053 confirmed cases outside of mainland China across 51 countries/regions. (*total includes 705 cases on the Diamond Princess cruise ship docked at Yokohama, Japan*)
- **National (U.S.) data:**
  - 60 total confirmed cases in the USA (*includes repatriation flights to Travis AFB, Lockland AFB, Providence Sacred Heart-Spokane & University of Nebraska-Omaha*)
    - 9 total confirmed cases in California
    - **The U.S. Centers for Disease Control and Prevention (CDC) yesterday confirmed a possible first case of person-to-person transmission of COVID-19 in California among the general public.**
      - *The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.*
- https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6
  - *NOTE: Information may vary as events and reporting are rapidly evolving. Differences in number of confirmed cases may vary due to the following reporting methods:*
    - *Global cases sourced from Jonhs Hopkins University CSSE site.*
    - *U.S. cases sourced from CDC site.*
    - *CA cases sourced from CDPH site.*

- **There are no confirmed cases among San Francisco residents.**
- **There are no recommendations to cancel events.**

- **We are in flu season. The San Francisco Department of Public Health (DPH) recommends that persons with symptoms stay home from work, school and social gatherings. Practice hand-washing precautions. It is not too late to get the flu vaccine.**
- The City and County of San Francisco, led by the Health Department, is working on preventing the virus,

containing its spread, and reducing harm in the community. We are focused on the most vulnerable groups, including children, people in congregate settings and the elderly. However, every sector has a role to play to ensure community health and safety. The health care system, schools, businesses and individuals can all do their part.

SFDEM (Department of Emergency Management) Activities:

- To support the Department of Public Health response, the Department of Emergency Management continues expanded activation of San Francisco's Emergency Operations Center (EOC) to assist with coordination of resources and established a Community Branch comprised of community, faith, business and education partners. As a result, community and government partners can work together to identify and coordinate our response to emerging issues.
- Mayor Breed made an emergency declaration to strengthen the City's preparedness and to surge resources and capabilities, and ensure San Francisco is as ready as possible in the event that the new virus comes to our community. The declaration was announced by the Mayor during a press conference on February 25, 2020.
- The declaration of a local emergency will mobilize city resources, accelerate emergency planning, streamline staffing, coordinate agencies across the city, allow for future reimbursement by the state and federal governments and raise awareness throughout San Francisco about how everyone can prepare in the event that COVID-19 (novel coronavirus) appears in our community.

SFDPH (Department of Public Health) Activities:

- CDC has expanded its COVID-19 Persons Under Investigation (PUI) criteria, and SFDPH will be sending out an expanded definition to healthcare providers.
- SF Public Health Laboratories are finalizing preparations to start COVID-19 testing in SF, with the goal of starting testing soon.
- SFDPH Department Operations Center (DOC) is seeing a surge in clinical consultation calls in the last 24 hours. The DOC is working to identify more staff resources to the clinical consultation unit.
- A meeting has been scheduled with key City and County of San Francisco (CCSF) stakeholders to provide information and updates regarding what the city's COVID-19 response
- The SFDPH DOC and the Department of Emergency Management's (DEM) EOC are collaborating to strengthen engagement with the community, including the Chinese community, and support ongoing communication.
- SFDPH is responding to requests from out of network health facilities for masks.
- The DPH DOC finalized cleaning/disinfection guidance (based on CDC guidelines) for businesses and organizations such as BART and MUNI.
- SFDPH Call Center Agents implemented a process for 7 and 14 Day follow up with return travelers from China. They will align processes with CDC guidance, as the follow up model may change.
- SFDPH Communicable Disease Control and Prevention information: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-__%20%20%20coronavirus/

Public Information Activities:

- SFDPH and the San Francisco Department of Emergency Management (DEM) continue to operate the Joint Information Center to develop and disseminate accurate, timely, relevant and accessible public

information about COVID-19 (Novel Coronavirus). The Joint Information Center will expand to include additional regular members from other city agencies.

- Public Information Objectives:

  <!--[if !supportLists]-->1. <!--[endif]-->Rumor Control

  <!--[if !supportLists]-->2. <!--[endif]-->Engagement and Outreach with the multilingual communities

  <!--[if !supportLists]-->3. <!--[endif]-->Manage media inquiries and requests

  <!--[if !supportLists]-->4. <!--[endif]-->Develop simplified and accessible public information education materials

  <!--[if !supportLists]-->5. <!--[endif]-->Create a COVID-19 communications toolkit for NGOs and community serving organizations to increase public information and education among diverse and at risk communities

- DPH and DEM have public announcement plans should a San Francisco resident contract COVID-19. The Office of Civic Engagement and Immigrant Affairs (OCEIA) continues to translate emerging materials in all threshold languages.
- Talking points were updated to include key messages regarding the San Francisco emergency declaration and continued emphasis on preparedness
- DPH and DEM Public Information Officers (PIOs) continue to respond to media inquiries and prioritize Chinese language media. Public messaging also highlights ongoing preparedness work for possible COVID-19 cases in San Francisco in the future.
- 311 has received an increase of incoming call volume due to the mayor's proclamation announced on Tuesday.
- Upcoming External Affairs Outreach Events:
  - **District 9** – 2/28/20 – 10:00-11:00a; **Family Connections Portola** (2565 San Bruno Ave); Audience: Families; 30-50 families expected in attendance.
  - **District 1** – 2/29/20 – 10:30-12:30; **Fulton Street Safety Project** – Argonne Elementary School (680 18th St); Audience: MTA, SFPD, & the Public; 200-300 expected attendance; 10-20 minute presentation.
  - **District 11** – 2/29/20 – 11:00-15:00; **Annual Lunar New Year Celebration & Summer Resource Fair** – Minnie & Lovie Ward Recreation Center (650 Capitol Ave); Audience: Public; 400 expected attendance; tabling event.

CDPH (California Department of Public Health):

- CDPH reported 1 new confirmed case of COVID-19 in Solano County, CA as of 02/27/20. CA now has 9 confirmed cases. This Solano County case is the first possible community transmission case. Contact tracing and investigation has begun. https://www.cdph.ca.gov/Programs/OPA/Pages/NR20-006.aspx[NB1] [KL2]
- CDPH reports there are 33 positive cases in California: 24 are from repatriation flights. The other 9 confirmed cases include 7 that are travel related, one due to person-to-person exposure from a very close contact (a spouse) and one from an unknown source.
- CDPH reported that approximately 80% of global COVID-19 confirmed cases have not exhibited symptoms requiring hospitalization.
- https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

CDC (U.S. Centers for Disease Control & Prevention):

- CDC provides links to National Pandemic Flu plans and Pandemic plans for businesses. These policies were within the last couple of years and are research and evidence based. https://www.cdc.gov/flu/pandemic-resources/national-strategy/index.html

Situation Summary:

- CDC is closely monitoring an outbreak of respiratory illness caused by COVID-19 that was first detected in Wuhan City, Hubei Province, China and which continues to expand.
- Chinese health officials have reported thousands of infections with COVID-19 in China, with the virus reportedly spreading from person-to-person in many parts of that country.
- Infections with COVID-19, most of them associated with travel from Wuhan, also are being reported in a

growing number of international locations, including the United States.

Updates and Response:

SFDPH

Summary of actions

- SF Public Health Laboratories are finalizing preparations to start COVID-19 testing in SF, with the goal of starting testing soon.
- SFDPH DOC is seeing a surge in clinical consultation calls in the last 24 hours. The DOC is working to identify more staff resources to the clinical consultation unit.
- SFDPH consultation units are reporting an increase in calls after the Mayor's declaration of a local emergency.
- A meeting has been scheduled with key CCSF stakeholders to provide information and updates regarding what the city's COVID-19 response
- The SFDPH DOC and the Department of Emergency Management's (DEM) EOC are collaborating to strengthen engagement with the community, including the Chinese community, and support ongoing communication.
- SFDPH is responding to requests from out of network health facilities for masks.
- The DPH DOC finalized cleaning/disinfection guidance (based on CDC guidelines) for businesses and organizations such as BART and MUNI.
- SFDPH Call Center Agents implemented a process for 7 and 14 Day follow up with return travelers from China. They will align processes with CDC guidance, as the follow up model may change.
- SFDPH CDCP information: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-_%20%20%20coronavirus/

How about something like:

Risk of infection is based on exposure to the novel coronavirus in locations where it has spread (now 30+ countries), or by close contact to a confirmed case.

Country count is here:
https://www.cdc.gov/coronavirus/2019-ncov/locations-confirmed-cases.html

Subject: help with language in light of new case

Hi team,

So much happening. I'd like to draw your attention to one particular question (among many).

In terms of the xenophobia and discrimination theme, we have been saying: This virus is not about race, ethnicity or culture. The risk of getting COVID-19 is based on travel history, and contacts with people who are sick.

In light of the new California case having no travel history and no known contacts with travelers or people who are sick, how would we modify our statement? I realize we don't have all the answers right now, but the Mayor and Carmen Chu are submitting an op-ed **tomorrow** about discrimination, and I am helping them update this language. How about:

Risk for the novel coronavirus is based on travel history, contacts and exposure to the virus.

Is that safe to say? Note that this is not a clinical piece, but we still want to be accurate.

Thank you,

Rachael

CDPH **News Release**

CALIFORNIA DEPARTMENT OF PUBLIC HEALTH

FOR IMMEDIATE RELEASE
February 26, 2020
PH20-006

CONTACT: Corey Egel | 916.440.7259 | CDPHpress@cdph.ca.gov

CDC Confirms Possible First Instance of COVID-19 Community Transmission in California

SACRAMENTO – The U.S. Centers for Disease Control and Prevention today confirmed a possible first case of person-to-person transmission of COVID-19 in California in the general public. The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.

California has a strong health care system and public health infrastructure. California has prepared for the potential spread of diseases, such as H1N1, in the past and is prepared and actively responding to the potential community spread of COVID-19. Contact tracing in this case has already begun.

The health risk from novel coronavirus to the general public remains low at this time. While COVID-19 has a high transmission rate, it has a low mortality rate. From the international data we have, of those who have tested positive for COVID-19, approximately 80 percent do not exhibit symptoms that would require hospitalization. There have been no confirmed deaths related to COVID-19 in the United States to date. California is carefully assessing the situation as it evolves.

"Keeping Californians safe and healthy is our number one priority," said Dr. Sonia Angell, Director of the California Department of Public Health and State Public Health Officer. "This has been an evolving situation, which California has been monitoring and responding to since COVID-19 cases first emerged in China last year. This is a new virus, and while we are still learning about it, there is a lot we already know. We have been anticipating the potential for such a case in the U.S., and given our close familial, social and business relationships with China, it is not unexpected that the first case in the U.S. would be in California. That's why California has been working closely with federal and local partners, including health care providers and hospitals, since the outbreak was first reported in China -- and we are already responding."

As in any public health emergency, the Department of Public Health's Emergency Operations Center has been actively coordinating response efforts across the state and preparing for possible community transmission. California continues to prepare and respond in coordination with federal and local partners.

This would be the first known instance of person-to-person transmission in the general public in the United States. Previously known instances of person-to-person transmission in the United States include one instance in Chicago, Illinois, and one in San Benito County, California. Both cases were after close, prolonged interaction with a family member who returned from Wuhan, China and had tested positive for COVID-19, the disease caused by novel coronavirus. As of today, including this case, California has had 7 travel-related cases, one close contact case, and now one community transmission.

As with any virus, especially during the flu season, the Health Department reminds you there are a number of steps you can take to protect your health and those around you:

- Washing hands with soap and water.
- Avoiding touching eyes, nose or mouth with unwashed hands.
- Avoiding close contact with people who are sick are all ways to reduce the risk of infection with a number of different viruses.
- Staying away from work, school or other people if you become sick with respiratory

symptoms like fever and cough.

The California Department of Public Health will not be providing additional information about this patient due to patient confidentiality. For more information about novel coronavirus, please visit the CDPH website.

Situation Report - Update - COVID-19 (#18)

Department of Emergency Management
Division of Emergency Services

02-26-2020 - 19:50:40

Change Since Last Situation Report:

Situation Update:

- **International data:**
  - 81,322 confirmed cases; 78,064 cases in mainland China; 2,719 deaths in mainland China; 55 deaths outside mainland China
  - 3,258 confirmed cases outside of China across 47 countries/regions. (*total includes 705 cases on the Diamond Princess cruise ship docked at Yokohama, Japan*)
- **National (U.S.) data:**
  - 15 total confirmed cases in the USA (*does not include 42 patients repatriated from the Diamond Princess to Travis AFB, Lockland AFB, Providence Sacred Heart-Spokane or the University of Nebraska-Omaha or the 3 repatriated form Wuhan*)
- **There are no confirmed cases among San Francisco residents.**
  - The risk of COVID-19 in California remains low.
- https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6
  - *NOTE: Information may vary as events and reporting are rapidly evolving.*
- The U.S. Centers for Disease Control and Prevention today confirmed a possible first case of person-to-person transmission of COVID-19 in California in the general public. The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.
- **There are no recommendations to cancel events.**
- **We are in flu season. The San Francisco Department of Public Health (DPH) recommends that persons with symptoms stay home from work, school and social gatherings. Practice hand-washing precautions. It is not too late to get the flu vaccine.**

- The City and County of San Francisco, led by the Health Department, is working on preventing the virus, containing its spread, and reducing harm in the community. We are focused on the most vulnerable groups, including children, people in congregate settings and the elderly. However, every sector has a role to play to ensure community health and safety. The health care system, schools, businesses and individuals can all do their part.

SFDEM Activities:

- To support the Department of Public Health response, the Department of Emergency Management continues expanded activation of San Francisco's Emergency Operations Center to assist with coordination of resources and established a Community Branch comprised of community, faith, business and education partners. As a result, community and government partners can work together to identify and coordinate our response to emerging issues.
- Mayor Breed made an emergency declaration to strengthen the City's preparedness and to surge

resources and capabilities, and ensure San Francisco is as ready as possible in the event that the new virus comes to our community. The declaration was announced by the Mayor during a press conference on February 25, 2020.

- The declaration of a local emergency will mobilize city resources, accelerate emergency planning, streamline staffing, coordinate agencies across the city, allow for future reimbursement by the state and federal governments and raise awareness throughout San Francisco about how everyone can prepare in the event that COVID-19 appears in our community.

SFDPH Activities:

- SFDPH DOC expanded community outreach and mitigation efforts, working closely with the CCSF Emergency Operations Center (EOC) in anticipation of increased inquiries due to the declaration of a local emergency.
- SFDPH is focusing on providing a comprehensive picture of past and current preparation and mitigation efforts, forward leaning departmental objectives, and the data and information being used to guide the work.
- SFDPH and the EOC are collaborating to create a process for routing briefing and other informational requests (from media and non-media sources) to the appropriate channels.
- SFDPH drafted guidelines for housing plans for confirmed COVID-19 cases, potential COVID-19 cases, and medium risk individuals who live in congregate living situations including Single Room Occupancies (SROs).
- SFDPH completed a preparedness consultation site visit to Chinese Hospital 02/25/20 and UCSF Mission Bay today 02/26/20.
- SF Public Health Laboratory is strengthening their safety measures for lab personnel, including enhanced Personal Protective Equipment (PPE) requirements.
- SF Public Health Laboratory is still awaiting delivery of CDC testing kits. CDC reported they will have a ship date for the testing kits by the end of this week.
- SFDPH is updating their COVID-19 Fact Sheet to include the most recent updates and align messaging and information across DPH and CCSF sites.
- SFDPH Public Information Office recently completed a COVID-19 prevention focused informational poster, which will soon be displayed on BART Trains.
- SFDPH CDCP information: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-_%20%20%20coronavirus/

Public Information:

- SFDPH and the San Francisco Department of Emergency Management (DEM) continue to operate the Joint Information Center to develop and disseminate accurate, timely, relevant and accessible public information about COVID-19. The Joint Information Center will expand to include additional regular members from other city agencies.
- Public Information Objectives:

  1. Rumor Control
  2. Engagement and Outreach with the multilingual communities
  3. Manage media inquiries and requests
  4. Develop simplified and accessible public information education materials
  5. Create a COVID-19 communications toolkit for NGOs and community serving organizations to increase public information and education among diverse and at risk communities

- DPH and DEM have public announcement plans should a San Francisco resident contract COVID-19. The Office of Civic Engagement and Immigrant Affairs (OCEIA) continues to translate emerging materials in all threshold languages.
- Talking points were updated to include key messages regarding the San Francisco emergency declaration and continued emphasis on preparedness
- DPH and DEM Public Information Officers (PIOs) continue to respond to media inquiries and prioritize Chinese language media. Public messaging also highlights ongoing preparedness work for possible COVID-19 cases in San Francisco in the future.
- 311 has received an increase of incoming call volume due to the emergency declaration announced Tuesday

CDPH (California Department of Public Health):

CDPH reported new cases of COVID-19 in CA in the 24 hours. Number of confirmed cases in CA: 7 travel-related, 1 close contact case and 1 community case.
- https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

CDC (U.S. Centers for Disease Control & Prevention):

- CDC updated their travel advisory to include South Korea. https://wwwnc.cdc.gov/travel/notices/warning/coronavirus-south-korea
- CDC reports that to date 445 people have been tested in the U.S.
- https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html

WHO (World Health Organization):

- WHO stated that 4 new countries (Algeria, Austria, Croatia, and Switzerland) reported cases of COVID-19 in the past 24 hours. (as of 02/26/20)
- https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports

Situation Summary:

- CDC is closely monitoring an outbreak of respiratory illness caused by COVID-19 that was first detected in Wuhan City, Hubei Province, China and which continues to expand.
- Chinese health officials have reported thousands of infections with COVID-19 in China, with the virus reportedly spreading from person-to-person in many parts of that country.
- Infections with COVID-19, most of them associated with travel from Wuhan, also are being reported in a growing number of international locations, including the United States.

CDC Returning Traveler Discussion

CDC's 2019 Novel Coronavirus (COVID-19) response team will host a recurring call series from 3 p.m. to 4 p.m. EST every Wednesday's and Friday's, to discuss plans for returning travelers, including movement & monitoring, quarantine, data reporting, and status reports or concerns.

Invited participants include state, local, and territorial preparedness directors, state epidemiologists, state health officials, public health laboratory directors, emergency management officials and nongovernmental partner leadership. In order to ensure and maintain the appropriate target audience, please have ONE representative from each CORE function listed participate from your jurisdiction. Participant information can be found below.

Domestic and International News:

Air Force officials: Coronavirus patients will not stay at Fairfield base

The group of coronavirus patients whisked to Travis Air Force Base in Fairfield late Sunday after evacuating a Japanese cruise ship did not linger for long at the California military facility. While the base opened its gates for uninfected passengers who had been quarantined aboard the cruise ship, military officials said they would not be treating coronavirus patients at the airfield. Instead, the infected people were transported by the State Department to medical facilities in California and Nebraska. "None of the passengers currently on the installation have tested positive for (coronavirus) or are symptomatic," Travis officials said in a statement Monday. "If any passenger displays symptoms, they will be transported to an off-base hospital for containment and specialized care." In all, 328 Americans were evacuated from the Diamond Princess cruise ship, 177 of whom went to Travis. Seven of those had been diagnosed with the

virus, and three more were isolated for feverish conditions during the flight. Four people who tested positive for coronavirus, but have not yet presented symptoms, were taken to health care facilities near the base, a State Department official said.

Hospital workers in Santa Clara County to rally against staffing shortages

SANTA CLARA COUNTY, Calif. (KRON) – Hospital workers in Santa Clara County on Tuesday will gather to rally against staffing shortages. Valley Medical Center employees say the staffing shortage causes increased wait times for patients. This comes months after the labor agreement between the county and the workers' union expired. Today's rally will happen at noon at Valley Medical Center in San Jose.

https://www.kron4.com/news/bay-area/hospital-workers-in-santa-clara-county-to-rally-against-staffing-shortages/

Despite coronavirus fears, San Francisco expects record number of cruise ships in 2020

This year was supposed to be huge for the San Francisco cruise industry. More ships than ever before — 117, up from 85 last year — are calling at the port. But the pall cast by the coronavirus over the cruise industry may affect the city. Vessels come here primarily from other U.S. ports, as well as from Mexico and Canada, and the Port of San Francisco doesn't expect any ships to stay away. Nonetheless, the virus is preoccupying travelers — especially since a cruise ship stationed off Japan has had hundreds of passengers infected and far more stuck in quarantine. The 117 cruise calls scheduled for the city this year involve 32 vessels from 19 cruise lines. Many of the ships return to the city several times. The Carnival Miracle, which is set to make its maiden voyage to San Francisco in March, plans to make a total of 28 calls in San Francisco, accounting for much of the increase the city will see this year. The ship usually departs from Long Beach and heads to Hawaii and Mexico. Port officials are monitoring the coronavirus situation, which has caused many travelers to cancel vacations and cruise companies' stocks to tank, but they say that so far they expect no decrease in passengers.

Domestic and International News:

Knowing fact from fiction as Northern California base becomes coronavirus quarantine site

Fairfield's Travis Air Force Base was named Saturday as the first quarantine site in Northern California for international travelers who may have come in contact with a new coronavirus that originated in Wuhan, China, according to a statement posted on the base's Facebook page. Travis, located just 32 miles southwest of Sacramento, is one of four military installations in the United States setting aside housing for the travelers at the request of U.S. Secretary of Defense Mark Esper, who is making room for a combined 1,000 travelers to assist the federal Department of Health and Human Services. They are expected to be quarantined for 14 days because public health officials believe it can take that long before symptoms of the virus manifest. This means that California will have three sites housing people who potentially have had exposure to the outbreak. March Air Reserve Base in Riverside already is housing U.S. government employees evacuated out of Wuhan, and could be joined by Travis as well as Marine Corps Air Station, Miramar, near San Diego. "At this time, Travis Air Force Base will only provide housing support, while HHS will be responsible for all care, transportation, and security of the evacuees," the release said. "Travis airmen and personnel will not be directly in contact with the evacuees and evacuees will not have access to any base location other than their assigned housing."

U.S. universities set up front-line defenses to keep coronavirus at bay

On its sprawling campus in America's heartland, thousands of miles from China, the University of Illinois at Urbana-Champaign has taken aggressive steps to keep the fast-spreading coronavirus away from its classrooms and students. The school, with one of the highest percentages of Chinese students among U.S. universities, has suspended academic programs in China for the spring semester and banned students from traveling to the country for academic-related matters. It has advised faculty and staff to follow federal travel advisories that, as of Friday, warned against going to China. "We want to take all of the precautions we can so, in the worst-case scenario, we keep our community healthy," said Robin Kaler, associate chancellor for public affairs at the University of Illinois, 135 miles (217 km) south of Chicago, where the first human-to-human transmission of the disease in the United States was confirmed last week. More than 350,000 Chinese students are pursuing higher education in the United States and 10,000 American students are enrolled in

academic programs in China. The sheer number of the students, many of whom have traveled to their home country in recent weeks, makes schools a potential incubator for a widespread outbreak in the United States, given the close proximity of dormitory life. At University of Illinois, with some 5,800 Chinese students, Kaler sees a challenge in keeping the campus free of the new coronavirus without infringing on rights or fanning xenophobia. There is a need to strike a "delicate balance" between public safety and personal freedom when dealing with a growing public health issue, Kaler said. Even so, officials would prefer to err on the side of caution. "If they want to come and fuss at us later, we would rather have them be alive to be able to come fuss at us than not," she said. USC, where 6,600 students from China attend college, has taken similar steps in banning students from traveling to China and strongly advising against faculty making the trip.

Panic buying of face masks is unwarranted and could pose risks for health workers, experts say

Epidemiologists and infectious diseases experts have cautioned against panic as the number of cases linked to the new coronavirus in China continues to rise. Some warn that the widespread scramble for face masks is unwarranted. In fact, they cautioned that hoarding behavior by those who do not exhibit respiratory symptoms have sparked concerns in medical circles that there could be a possible shortage of personal protective equipment in the coming weeks."Panic purchases of face masks in low-risk countries like the U.S. is not warranted. People who are well should refrain from hoarding masks 'just in case' they need it, as this may lead to a lack of masks in settings that really need it," said Annelies Wilder-Smith, a professor of emerging infectious diseases at the London School of Hygiene and Tropical Medicine. "While we should take the outbreak seriously, we mustn't panic and behave in a manner that is disproportionate to the threat we are confronted with," said Wilder-Smith, who was a front-line clinician at Singapore's Tan Tock Seng Hospital during the severe acute respiratory syndrome outbreak in 2003. In the United States and Canada — halfway around the world from the novel coronavirus' epicenter in central China — major retailers and medical supply stores have been reporting medical mask shortages since the start of this week. It comes even as the number of confirmed cases in both countries remain relatively low — [eight] in the U.S. and three in Canada.

https://www.cnbc.com/2020/01/31/china-coronavirus-shortage-of-face-masks-could-pose-risks-for-healthcare-workers.html

Memorandum from Infection Prevention and Control

TO: All Staff - please forward as needed to ensure widest appropriate distribution to include nurse practitioners, residents and medical students

Re: Wuhan Coronavirus (2019-nCoV) – Wuhan City, China

As you may have heard, an outbreak of respiratory illnesses associated with a novel coronavirus has been identified in Wuhan City, Hubei Province, China. There have been about 300 cases to date, with many of the cases linked to exposure to a seafood and animal market. There is some suggestion of possible limited person-to-person spread. CDC has reported a single case of this novel coronavirus in a Washington state patient who had traveled around the region near Wuhan, China. While CDC considers this is a serious public health concern, based on current information, the immediate health risk from 2019-nCoV to the general American public is considered low at this time. As a proactive measure, CDC is expanding travel screening for flights returning from China to 5 airports: JFK, SFO, LAX, Atlanta and Chicago. At this time patients who screen positive as a potential "suspected case" are being transported to San Mateo County for further evaluation. Asymptomatic travelers from Wuhan are being given education and counseling to seek care if they develop symptoms.

CDC has a website with updated information: https://www.cdc.gov/coronavirus/novel-coronavirus-2019.html

ZSFG, in accordance with direction from SF DPH and CDC, has initiated the following measures:

For any patient whom you suspect could have Wuhan virus:

Instruct patient to wear a yellow, ear loop, isolation mask as soon as they are identified

- Promptly place patient in a private room with the door closed, ideally a negative pressure isolation room if available.
- Place **High Level Respiratory Isolation and Contact Isolation signs** on the door to room
- Patient disposition to be determined in consultation with SF DPH (e.g. if patient condition allows discharge the plan must be pre-approved by SF DPH)

For Healthcare personnel: don the following items when entering the room:

- **N95 respirator mask**
- **Isolation gown**
- **Gloves**
- **Eye protection (e.g., goggles or a face shield).**

Report immediately by phone to the following:

- AOD
- Infection Control Team, pager 415-443-1566
- SFDPH Communicable Disease Control Unit at (415) 554-2830. If calling after hours, call

(415) 554-3613 to reach the SFDPH on-call physician.

Collect Laboratory Specimens:

- **Respiratory Pathogen Panel (RPP) at a minimum**, additional specimens will be determined in consultation with SF DPH provider.
- **RPP Results interpretation:**
  - Positive test results – may lower the level of suspicion for Wuhan virus, but not conclusive. Additional testing likely to be requested.
  - Negative test results – maintain higher level of suspicion; additional testing will be required.

Criteria to Guide Evaluation of Patients Under Investigation (PUI) for 2019-nCoV:

Clinical Features	&	Epidemiologic Risk
Fever **and** symptoms of lower respiratory illness (e.g., cough, difficulty breathing)	and	In the last 14 days before symptom onset, a history of travel from Wuhan City, China. *– or –* In the last 14 days before symptom onset, close contact with a person who is under investigation for 2019-nCoV while that person was ill.
Fever **or** symptoms of lower respiratory illness (e.g., cough, difficulty breathing)	and	In the last 14 days, close contact with an ill laboratory-confirmed 2019-nCoV patient.

- **Fever may not be present** in some patients, such as those who are very young, elderly,immunosuppressed, or taking certain fever-lowering medications. Clinical judgment should be used to guide testing of patients in such situations.
- **Close contact is defined as—**

a) being within approximately 6 feet (2 meters), or within the room or care area, of a novel coronavirus case for a prolonged period of time while not wearing recommended personal protective equipment or PPE (e.g., gowns, gloves, NIOSH-certified disposable N95 respirator, eye protection); close contact can include caring for, living with, visiting, or sharing a healthcare waiting area or room with a novel coronavirus case.
– or –

b) having direct contact with infectious secretions of a novel coronavirus case (e.g., being coughed on) while not wearing recommended personal protective equipment.

The situation is dynamic and will likely change over the coming days to weeks, as more information becomes available. Please contact infection control if there are any questions.

Subject: DEM 24-Hour Daily Situational Awareness Report - 01-22-2020
Date: Wednesday, January 22, 2020 10:02:10 AM

Report Date: 01-22-2020

24-Hour Daily Situational Awareness Report

Priority Information / Current Notable Local Incidents:

The Centers for Disease Control and Prevention (CDC) continues to closely monitor an outbreak of a 2019 Novel Coronavirus (2019-nCoV) in Wuhan City, Hubei Province, China that began in December 2019. Since yesterday, the CDC is screening passengers on direct and connecting flights from Wuhan China at San Francisco International Airport. The CDC continues to coordinate with their partners and may adjust response activities as the outbreak investigation continues and more is learned about the newly emerging virus.

- It is possible that more cases will be identified in the coming days. This is an ongoing investigation and given previous experience with MERS-CoV and SARS-CoV, it is possible that person-person spread may occur. There is much more to learn about the transmissibility, severity, and other features associated with 2019-nCoV as the investigations in China, Thailand, and Japan continue. Additional information about this novel virus is needed to better inform population risk.

- CDC information: https://www.cdc.gov/coronavirus/2019-nCoV/summary.html.

- Additional Coronavirus information is available at: https://.cdc.gov/coronavirus/2019-ncov/index.html or by calling 800-CDC- INFO | (800-232-4636) | TTY: (888) 232-6348

CCSF Community Branch:
- Nothing significant to report.

Domestic and International News:

WHO to decide whether China coronavirus is a global health emergency — Here's what that means

The World Health Organization on Wednesday will convene a panel of experts in Geneva, Switzerland, to consider whether a mysterious coronavirus that has sickened hundreds of people in China should be a global health emergency. The meeting comes two days after global health officials said that the respiratory illness, which has evoked memories of the 2003 outbreak of severe acute respiratory syndrome, or SARS, is capable of spreading from person to person. This weekend, the U.S. Centers for Disease Control and Prevention and Homeland Security began screening people traveling to the United States from Wuhan, China, where the outbreak is believed to have started. WHO doesn't enact these emergencies easily, public health officials say. The international health agency has only applied the emergency designation five times since the rules were implemented in the mid-2000s. WHO

defines the emergency, also known as a Public Health Emergency of International Concern, as an "extraordinary event" that is "serious, unusual or unexpected." Declaring an emergency gives WHO Director-General Tedros Adhanom Ghebreyesus power to issue recommendations, including asking countries not to implement any travel or trade bans.The designation can also prompt outside help to raise money and other assistance.

https://www.cnbc.com/2020/01/21/who-to-decide-whether-china-coronavirus-is-a-global-health-emergency.html

Anti-5G group plans global protest

The U.S. government and cell service providers -- particularly the Federal Communications Commission (FCC) and AT&T -- have been making strides to catch up with China's ever-growing 5G technology, which is expected to be the new global wireless standard since it will deliver significantly faster and more precise internet connections to users than the 4G technology the U.S. uses today. But some activists are worried about the "biological and health effects of electromagnetic fields" related to wireless technology, saying it can lead to radiation that causes cancer, and a group called the NYC 5G Wake-Up Call is taking its concerns to the public on Jan. 25, the Global Day of Protest to Stop 5G on Earth and in Space. "This is a really big mistake," health and environmental activist Camilla Rees told FOX Business of 5G. "Follow the money and you find that it's also about the mass collection of data." Rees and Grassroots Environmental Education Associate Director Doug Wood brought up a 2018 study conducted by the Department of Health and Human Services' National Toxicology Program that found "clear evidence" of cancer linked to cellphone radiofrequency. Tumors were found in the brains, hearts and adrenal glands of male rats exposed to cellphone frequency, and DNA damage was found in female rats. "There's not one study that shows what happens to rats in an experiment won't happen to humans," Wood said. While there haven't been studies specifically linking 5G to radiation and other damaging health effects because it is too early in the world of 5G wireless to conduct such research, there are other studies linking the biological effects of cellphone radiowaves, Rees said.

San Francisco police say crime is down; not everyone is convinced

San Francisco police have crunched the numbers and say crime is down in the city,

but some San Franciscans are saying if that's the case, they're not seeing changes on the streets. In a city the size of San Francisco crime is a reality. Now, three weeks into the new year, San Francisco police have data comparing 2019 to 2018, and the chief says the news is good. "We're pleased with the way our statistics trended in 2019, particularly with violent crime," said Chief Bill Scott. The department says violent crime is down 6%. Homicides are down 11%. Rapes are down 15%. Robberies and aggravated assaults are down as well. It's the same story with property crimes. Burglaries are down 14%, and auto burglaries down 2%. At 7th and Market streets, many say they may hear that crime is down, but that doesn't match up with what they're seeing. "What I do see is an absence of a police presence, here on one of the more challenging corners," said a fifth generation San Franciscan named Ellen, who did not give a last name. "What I see is a plethora of drug use, and drug dealing. That's just a fact." Chief Scott said he hears those concerns, and is working to take the data learned over the last year, and apply that going forward, with a focus on some of the city's hot spots. "We're going to further increase our foot patrols, and focus continually on the Mid-Market area," said Chief Scott. He says his officers will continue to work to make San Francisco a safer place, and make it feel like a safer place to those who live and work here.

DOC OBJECTIVES

1. EVENT NAME:	2. DATE / TIME:	3. OPERATIONAL PERIOD (Date/Time):
COVID-19 Activation	Feb 28, 2020 / 12:00	Mar 2, 2020 – Mar 8, 2020

4. SITUATIONAL UPDATE FOR DPH DOC RESPONSE:

Situation Background (updated 2020-02-26)
Sources: https://www.cdc.gov/coronavirus/2019-nCoV/summary.html
https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports/

CDC is closely monitoring an outbreak of respiratory disease caused by a novel (new) coronavirus that was first detected in Wuhan City, Hubei Province, China and which continues to expand. On February 11, 2020, the World Health Organization named the disease coronavirus disease 2019 (abbreviated "COVID-19"). Chinese health officials have reported tens of thousands of cases of COVID-19 in China, with the virus reportedly spreading from person-to-person in parts of that country. COVID-19 illnesses, most of them associated with travel from Wuhan, also are being reported in a growing number of international locations, including the United States. Some person-to-person spread of this virus outside China has been detected. The United States reported the first confirmed instance of person-to-person spread with this virus on January 30, 2020.

On January 30, 2020, the International Health Regulations Emergency Committee of the World Health Organization declared the outbreak a "public health emergency of international concern" (PHEIC). On January 31, 2020, Health and Human Services Secretary Alex M. Azar II declared a public health emergency (PHE) for the United States to aid the nation's healthcare community in responding to COVID-19. Also on January 31, the President of the United States signed a presidential "Proclamation on Suspension of Entry as Immigrants and Nonimmigrants of Persons who Pose a Risk of Transmitting 2019 Novel Coronavirus." These measures were announced at a press briefing by members of the President's Coronavirus Task Force.

On February 25, 2020, San Francisco Mayor London Breed declared a local emergency due to COVID-19. Although there are still zero confirmed cases in San Francisco residents, the global picture is changing rapidly. On February 24, 2020, the WHO-China joint commission determined although new cases are declining in China, a sudden increase in new cases globally is concerning. Given the high volume of travel between SF and mainland China, and the global spread of the virus, there is a growing likelihood San Francisco will see cases eventually. The declaration of a local emergency will mobilize city resources, accelerate emergency planning, streamline staffing, coordinate agencies across the city, allow for future reimbursement by the state and federal governments and raise awareness throughout San Francisco about how everyone can prepare in the event that COVID-19 (novel coronavirus) appears in San Francisco.

Coronaviruses are a large family of viruses that are common in many different species of animals, including camels, cattle, cats, and bats. Rarely, animal coronaviruses can infect people and then spread between people such as with MERS-CoV and SARS-CoV.

There are ongoing investigations to learn more. **This is a rapidly evolving situation and information will be updated as it becomes available.**

Estimation of total number of cases (updated 2020-02-28 at 11:11 PST)

https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

of Cases/Deaths – Data from JHU CSSE Map
Worldwide: 83, 867 Cases/2,867 Deaths
US: 60 Cases/0 Deaths
CA: 11 cases/0 Deaths
SF: 0 Cases/0 Deaths

Situation Summary in U.S. (CDC updated 2020-02-27)
Source: https://www.cdc.gov/coronavirus/2019-nCoV/summary.html

Imported cases of COVID-19 infection in travelers have been detected in the U.S. Person-to-person spread of COVID-19 also has been seen among close contacts of returned travelers from Wuhan, but at this time, this virus is NOT currently spreading in the community in the United States.

CDC Response (updated 2020-02-27)
Source: https://www.cdc.gov/coronavirus/2019-nCoV/summary.html

The federal government is working closely with state, local, tribal, and territorial partners as well as public health partners to respond to this public health threat. The public health response is multi-layered, with the goal of detecting and minimizing introductions of this virus in the United States so as to reduce the spread and the impact of this virus.

- CDC established a COVID-19 Incident Management Structure on January 7, 2020. On January 21, 2020, CDC activated its Emergency Operations Center to better provide ongoing support to the COVID-19 response.
- The U.S. government has taken unprecedented steps with respect to **travel** in response to the growing public health threat posed by this new coronavirus:
    - Effective February 2, 2020 at 5pm, the U.S. government suspended entry of foreign nationals who have been in China within the past 14 days.
    - U.S. citizens, residents and their immediate family members who have been in Hubei province and other parts of mainland China are allowed to enter the United States, but they are subject to health monitoring and possible quarantine for up to 14 days.
    - CDC has issued the following travel guidance related to COVID-19:
        - China — Level 3, Avoid Nonessential Travel — updated February 22
        - South Korea — Level 3, Avoid Nonessential Travel — updated February 24
- CDC is issuing **clinical guidance**, including:
    - CDC issued an interim Health Alert Network (HAN) Update to inform state and local health departments and healthcare professionals about this outbreak on February 1, 2020.
    - On January 30, 2020, CDC published guidance for healthcare professionals on the clinical care of COVID-19 patients. Updated February 12, 2020.
    - On February 3, 2020, CDC posted guidance for assessing the potential risk for various exposures to COVID-19 and managing those people appropriately. Updated February 8, 2020.
- CDC has deployed multidisciplinary teams to Washington, Illinois, California, and Arizona to assist health departments with clinical management, contact tracing, and communications.

- CDC **laboratories** have supported the COVID-19 response, including:
  - CDC has developed a real time Reverse Transcription-Polymerase Chain Reaction (rRT-PCR) test that can diagnose COVID-19 in respiratory and serum samples from clinical specimens. On January 24, 2020, CDC publicly posted the assay protocol for this test. Currently, testing for this virus must take place at CDC.
  - CDC has been uploading the entire genome of the viruses from reported cases in the United States to GenBank as sequencing was completed.
  - CDC has grown the COVID-19 virus in cell culture, which is necessary for further studies, including for additional genetic characterization. The cell-grown virus was sent to NIH's BEI Resources Repository for use by the broad scientific community.
  - CDC submitted an Emergency Use Authorization (EUA) package to the U.S. Food and Drugs Administration on February 3, 2020.
  - FDA approved the EUA, on February 4, 2020. On February 5, 2020, CDC test kits were available for ordering by domestic and international partners through the agency's International Reagent Resource.

Situation Summary in San Francisco (updated 2020-02-27)

There are zero confirmed coronavirus cases at this time in SF. The SF Department of Public Health (DPH) is working closely with the U.S. Centers for Disease Control and Prevention (CDC) and the California Department of Public Health, monitoring the outbreak and preparing a response that protects the public.

DPH activated the DOC on 1/21/2020. CCSF activated the EOC on 1/27/2020. A local emergency was declared on 02/25/2020.

DPH continues to coordinate with federal, state, regional, City agencies and community partners on COVID-19 response efforts. Areas of focus include: working with key stakeholders to implement federal quarantine orders; conducting evaluation of returning travelers; identifying PUI housing options; providing public information that is accurate and accessible; providing guidance to clinicians; and coordinating with local healthcare facilities and assessing hospital readiness.

SFDPH DOC Response Activities during previous operational period (updated 2020-02-28)

- DPH DOC Operational Period reporting has changed to Saturday-Friday reporting.
- A comprehensive and extensive plan has been developed with multiple DPH and CCSF inter-agency partners to provide guidance, consultation, and instruction to healthcare providers, hospitals, outpatient healthcare facilities, and field teams to prepare them for potential COVID-19 patients, as DPH continues to follow-up with returned travelers from mainland China.
- DPH continues to monitor return travelers from China, with a goal of contact within 72 hours. Line lists of returning travelers have been coming in and a system has been established by Epi and Surveillance Branch to manage and track follow up with these travelers.
- DPH is tracking and following up with return travelers from China by phone and/or community outreach if needed. Children under 19 years of age (and their respective family members) and other populations who frequent congregate spaces are being prioritized for follow up.
- Mayor London Breed declared a local emergency 02/25/20, allowing CCSF to access additional resources to prepare for potential COVID-19 cases in SF.
- SFDPH DOC expanded community outreach and mitigation efforts, working closely with the CCSF Emergency Operations Center (EOC) in anticipation of increased inquiries due to the declaration of a local emergency.

- SFDPH is focusing on providing a comprehensive picture of past and current preparation and mitigation efforts, forward leaning departmental objectives, and the data and information being used to guide the work.
- SFDPH and the EOC are collaborating to create a process for routing briefing and other informational requests (from media and non-media sources) to the appropriate channels.
- SFDPH drafted guidelines for housing plans for confirmed COVID-19 cases, potential COVID-19 cases, and medium risk individuals who live in congregate living situations including Single Room Occupancies (SROs).
- SFDPH completed a preparedness consultation site visit to Chinese Hospital 02/25/20 and UCSF Mission Bay today 02/26/20.
- SF Public Health Laboratory is strengthening their safety measures for lab personnel, including enhanced Personal Protective Equipment (PPE) requirements.
- SF Public Health Laboratory is still awaiting delivery of CDC testing kits. CDC reported they will have a ship date for the testing kits by the end of this week.
- SFDPH is updating their COVID-19 Fact Sheet to include the most recent updates and align messaging and information across DPH and CCSF sites.
- SFDPH Public Information Office recently completed a COVID-19 prevention focused informational poster, which will soon be displayed on BART Trains.
- SFDPH CDCP information: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/

5. OBJECTIVES/ACTIVITIES FOR OPERATIONAL PERIOD (overarching departmental citywide objectives)

OBJECTIVE	ACTIVITIES	RESPONSIBLE SECTION/UNIT/BRANCH	Status
1. Protect the public and vulnerable populations	1.1 Transmission containment 1.2 Develop notification and referral process for SF healthcare facilities 1.3 Review and adapt CDC healthcare and infection control guidelines 1.4 Develop EMS transport plan 1.5 Identify personnel to fill the role of Equity Officer to ensure protection of impacted communities 1.6 Identify Community Outreach Branch roles, responsibilities and staff 1.7 Develop guidance to inform plans that address vulnerable populations in congregate settings 1.8 Develop policy decisions specific to closures, e.g. schools, public events, etc.	1.1 Containment Branch 1.2 Medical Branch 1.3 Info & Guidance 1.4 Medical Branch/EMS 1.5 Plans/IC 1.6 Plans/IC 1.7 Info & Guidance/ Community/ESF 6 1.8 Policy Group/IC/ Community	1.1 In Progress 1.2 In Progress 1.3 In Progress 1.4 In Progress 1.5 In Progress 1.6 In Progress 1.7 In Progress 1.8 Not Started

2. Support the Communicable Disease surveillance and laboratory testing infrastructure.	2.1 Maintain tracking system and develop line list for PUIs 2.2 Conduct verification test for CDC-provided COVID-19 test kit, upon receiving the test kit 2.3 Perform COVID-19 lab tests on PUI samples (contingent on completion of Objective 2.3) 2.4 Expedite resource requests and hiring process for additional staff to support Operations activities 2.5 Provide guidance to clinicians and conduct patient follow up 2.6 Identify additional nurse staff for field investigation teams to deploy for patient follow-up 2.7 Coordinate and provide PPE training and fit testing to field teams 2.8 Develop clinician FAQs sheet and talking points to support Clinical Consult Team 2.9 Build infrastructure to contact, interview, and monitor returning travelers 2.10 Develop and prioritize all healthcare system guidance 2.11 Develop EMS advisory guidelines 2.12 Develop infrastructure to receive, answer and manage data requests	2.1 Epi & Surveillance 2.2 Lab 2.3 Lab 2.4 Logistics 2.5 Clinical Consult Team 2.6 Info & Guidance/ Logistics/ Medical Branch 2.7 OSH/Medical Branch 2.8 Info & Guidance/ Medical Branch 2.9 IC/Operations/ Logistics 2.10 Info & Guidance 2.11 Info & Guidance 2.12 Epi & Surveillance/ Logs	2.1 Ongoing 2.2 In Progress 2.3 Not Started 2.4 In progress 2.5 Ongoing 2.6 In Progress 2.7 In Progress 2.8 In Progress 2.9 Ongoing 2.10 In Progress 2.11 Ongoing 2.12 Not Started
3. Maintain situational awareness and provide messaging to the public	3.1 Establish regular communication with key partners (EMS, DEM, CDPH, Healthcare Facilities) 3.2 Coordinate with ABAHO JIC on regional media messages, 3.3 Develop communications, education, and outreach plan for Chinese Community 3.4 Update public information on digital sources, as needed 3.5 Refine the DHR messaging for City staff to include DPH HR	3.1 IC/Plans/Med Health 3.2 PIO 3.3 PIO 3.4 PIO 3.5 PIO/DPH HR 3.6 PIO/JIC 3.7 PIO/JIC 3.8 PIO/JIC 3.9 PIO/JIC 3.10 Plans	3.1 Ongoing 3.2 Ongoing 3.3 Ongoing 3.4 Ongoing 3.5 In Progress 3.6 Ongoing 3.7 Ongoing 3.8 Ongoing 3.9 Ongoing 3.10 In progress

	messaging and disseminate to DPH staff 3.6 Provide updates to elected officials 3.7 Rumor control – ensure that accurate information is posted on various media outlets 3.8 Provide preparedness info to the public through the media, published materials and outreach 3.9 Assess and meet needs for public information – for example, masks, discrimination, cancelling events, defining the virus, rules for returning travelers 3.10 Coordinate with DEM to align communications, meetings, info sharing.		
4. Maintain situational awareness on medical surge and support healthcare facilities	4.1 Develop clinical guidelines 4.2 Develop a dissemination strategy 4.3 Monitor and prepare the healthcare system (Hospitals, EMS) for potential surge 4.4 Provide information on hospital readiness to CDPH 4.5 Engage primary care and outpatient clinics to mitigate hospital surge 4.6 Develop messaging and guidance to health care facilities around N95 masks and appropriate screening procedures	4.1 Info & Guidance 4.2 IC/Operations 4.3 Medical Branch 4.4 Medical Branch 4.5 Medical Branch 4.6 PIO/ Info & Guidance/ Medical Branch	4.1 In Progress 4.2 In Progress 4.3 In Progress 4.4 In Progress 4.5 In Progress 4.6 In Progress
5. Develop advance planning strategy	5.1 Identify events/or conditions likely to occur for future operational periods and anticipated resource needs 5.2 Identify potential impacts if COVID-19 establishes itself in San Francisco 5.3 Maintain DPH's continuity of operations 5.4 Develop policy and criteria for potential special event	5.1 Plans Section 5.2 Advance Planning Team 5.3 IC/Command 5.4 IC	5.1 In progress 5.2 In progress 5.3 In progress 5.4 In progress

	cancellation		

6. MAJOR DECISIONS/POLICY CHANGES

- City attorney has adopted modified isolation & home quarantine orders.
- There is a need to further expand DOC capacity to meet operational objectives.
- Additional DOC positions will be activated and DPH staff identified to fill these roles.
- The DOC will also begin to schedule shift changes to provide activated staff with rest periods.
- The CDC has shifted its messaging to prepare for the possible community transmission. DPH will begin to shift its messaging to align with CDC.
- Mayor London Breed declared a local emergency on February 25, 2020.

7. DPH DOC SAFETY MESSAGE

DOC staff – Remember to take breaks, eat, and hydrate, as needed, to avoid fatigue
Field teams – work with the DOC Safety Officer regarding PPE requirements

8. DPH DOC DOCUMENTS/PRODUCTS DEVELOPED (*Include title, name of Branch/Group that developed, and location of document)* All final documents uploaded onto TEAMs site

a. DOC Staff Tracking | Logistics | Teams/Files/Logistics/Personnel/Staffing
b. 214 Timekeeping Workflow | Finance | Teams/Files/Finance
c. 2019 Novel Coronavirus Guidance for Child Care and Preschool Settings | Teams/Files/Operations/Containment
d. Preparing Your Clinic for COVID-19 (2/14/20)
e. COVID-19 Clinical Intake Form and Worksheet (2/18/20)
f. Process for 7 + 14 Day Check-In and Generating Release Letter | Teams/Files/Operations/Containment
g. Release 14-Day Letter | Teams/Files/Operations/Containment
h. Frequently Asked Questions from Return Travelers | Teams/Files/Operations/Containment
i. Housing Options by Risk Tiers Grid | Teams/Files/Operations/Containment
j. Timeline_Master DPH COVID19 starting 2020-01-20 updated 2020-02-25.xls | Teams/Files/Plans/Documentation/Timeline

9. MAJOR PROBLEMS OR CONCERNS

DOC Staffing
Additional staffing is needed in multiple DOC sections to meet expanding operational objectives and planned shift changes.

- DOC staff redundancy immediate need for:
  - Operations Chief
  - Operations Deputy
  - Medical Health Branch Lead
  - Logistics Chief
  - Investigation Group Lead

Logistics section should be expanded to assist with Call Center staffing and scheduling.

PUI Housing
PUIs who are symptomatic but not sick enough to be hospitalized will need housing options. DPH DOC, in

collaboration with other City Agencies and partners, need to solidify housing options for SF PUI's and potentially non-SF residents identified at airport who may need to be housed locally. A minor plan is in place and a follow-up meeting will be scheduled to identify additional options.

DPH needs to identify a team to work on how housing will be provided to PUIs who cannot home isolate. Once formed, DPH team will work with City Agencies through the EOC as part of the Care and Shelter Branch to operationalize plan and identify possible locations.

PUI Protocol

There are gaps in developing the PUI protocol in the following areas: safe transport (to/from SFO airport, patient homes, medical facilities, and housing facilities), methods to track all contacts, and data entry.

DPH DOC

There is a need to evaluate the physical location of our DOC, Clinical Consultation call center, and Returning Traveler Call Center. Both are currently reserved through the end of February; extension of current room reservations or alternate physical locations should be addressed.

Recommendation to use DOC emails to assist with transition of communication and knowledge as shift changes.

DPH DOC PLANNING

There is a need to better track the progress DOC Objectives and Activities. The Objectives and Activities are being worked on but we need to implement tracking systems that allow us to better report our status and actions.

Resource Allocation

Travis AFB is one of the designated federal quarantine sites for persons repatriated to the US. Notification processes to transport persons from Travis AFB to local hospitals are unclear. Federal, state, and local agencies are working to identify gaps in the notification process to ensure communication with local jurisdiction and consideration for resource allocation at the state and local levels.

DOC Physical Location

Need to evaluate physical location of Call Centers and DOC workstations. Additional meeting room is needed. Considerations include relocation of workstations from 5th floor conference room to space at 30 Van Ness. Will need to consider reserving all conference rooms in 25 Van Ness for DOC use.

Operations Challenges and Concerns

- Operations branch leaders must be on the line or in attendance at meetings
- Need to be prepared for possible strategy change in consideration of the following:
  - **Community transmission**
  - PUI criteria change
  - Positive SF cases
- Containment Branch Concerns/Questions:
  - Should the Returning Traveler Call Center remain open on weekends?
  - Decisions regarding the 7-day check in process

FOR OFFICIAL USE ONLY

a. How many attempts at each check in: 3 attempts on both day 7 and day 14; or 1 attempt on day 7 and 3 attempts on day 14
b. How we should group the return travelers who are currently between 7 and 14 days
c. When we should begin the 7-day check in process, since we just started piloting the 14 day.

- Where and how to document branch SMART goals
- Need guidance document for long term care facilities (highest risk patients)
  a. Need to reach out to contacts at these facilities
- Not getting enough federal community outreach guidance
- CPMC Van Ness isolation mask supply short
- PUI Transportation Plan
  a. Will need to be documented
  b. Should include various possibilities including
     i. Self-transport
     ii. Ride-share transport
  c. Question if county cars can use used for transport?
     i. Must consider:
        1. Safety
        2. Training
        3. Availability
- Out of jurisdiction patient transport to SF without adequate notification to SF Health Officer
- Need to identify return travelers who may have identified SRO as place of stay
- Lab testing limitations
- Questions that arose:
  a. Can nurses serve quarantine/isolation orders?
  b. What lab kit is CDPH using?
  c. Can we use same lab-kit as CDPH?
- EH input needed regarding SROs

Finance

Some employees only submit time on a bi-weekly basis which could be confusing alongside instructions to submit 214 forms according to the weekly activation period. For now, guidance is to prepare 214 forms in alignment with the activation period (weekly) and submit them at the same time as you submit your time.

10. Weather Conditions/Forecast/Events

How about something like:

Risk of infection is based on exposure to the novel coronavirus in locations where it has spread (now 30+ countries), or by close contact to a confirmed case.

Country count is here:
https://www.cdc.gov/coronavirus/2019-ncov/locations-confirmed-cases.html

Subject: help with language in light of new case

Hi team,

So much happening. I'd like to draw your attention to one particular question (among many).

In terms of the xenophobia and discrimination theme, we have been saying: This virus is not about race, ethnicity or culture. The risk of getting COVID-19 is based on travel history, and contacts with people who are sick.

In light of the new California case having no travel history and no known contacts with travelers or people who are sick, how would we modify our statement? I realize we don't have all the answers right now, but the Mayor and Carmen Chu are submitting an op-ed **tomorrow** about discrimination, and I am helping them update this language. How about:

Risk for the novel coronavirus is based on travel history, contacts and exposure to the virus.

Is that safe to say? Note that this is not a clinical piece, but we still want to be accurate.

Thank you,

Rachael

CDC Confirms Possible First Instance of COVID-19 Community Transmission in California

SACRAMENTO – The U.S. Centers for Disease Control and Prevention today confirmed a possible first case of person-to-person transmission of COVID-19 in California in the general public. The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.

California has a strong health care system and public health infrastructure. California has prepared for the potential spread of diseases, such as H1N1, in the past and is prepared and actively responding to the potential community spread of COVID-19. Contact tracing in this case has already begun.

The health risk from novel coronavirus to the general public remains low at this time. While COVID-19 has a high transmission rate, it has a low mortality rate. From the international data we have, of those who have tested positive for COVID-19, approximately 80 percent do not exhibit symptoms that would require hospitalization. There have been no confirmed deaths related to COVID-19 in the United States to date. California is carefully assessing the situation as it evolves.

"Keeping Californians safe and healthy is our number one priority," said Dr. Sonia Angell, Director of the California Department of Public Health and State Public Health Officer. "This has been an evolving situation, which California has been monitoring and responding to since COVID-19 cases first emerged in China last year. This is a new virus, and while we are still learning about it, there is a lot we already know. We have been anticipating the potential for such a case in the U.S., and given our close familial, social and business relationships with China, it is not unexpected that the first case in the U.S. would be in California. That's why California has been working closely with federal and local partners, including health care providers and hospitals, since the outbreak was first reported in China -- and we are already responding."

As in any public health emergency, the Department of Public Health's Emergency Operations Center has been actively coordinating response efforts across the state and preparing for possible community transmission. California continues to prepare and respond in coordination with federal and local partners.

This would be the first known instance of person-to-person transmission in the general public in the United States. Previously known instances of person-to-person transmission in the United States include one instance in Chicago, Illinois, and one in San Benito County, California. Both cases were after close, prolonged interaction with a family member who returned from Wuhan, China and had tested positive for COVID-19, the disease caused by novel coronavirus. As of today, including this case, California has had 7 travel-related cases, one close contact case, and now one community transmission.

As with any virus, especially during the flu season, the Health Department reminds you there are a number of steps you can take to protect your health and those around you:

- Washing hands with soap and water.
- Avoiding touching eyes, nose or mouth with unwashed hands.
- Avoiding close contact with people who are sick are all ways to reduce the risk of infection with a number of different viruses.
- Staying away from work, school or other people if you become sick with respiratory

symptoms like fever and cough.

The California Department of Public Health will not be providing additional information about this patient due to patient confidentiality. For more information about novel coronavirus, please visit the CDPH website.

Situation Report - Update - COVID-19 (#18)

Department of Emergency Management
Division of Emergency Services

02-26-2020 - 19:50:40

Change Since Last Situation Report:

Situation Update:

- **International data:**
  - 81,322 confirmed cases; 78,064 cases in mainland China; 2,719 deaths in mainland China; 55 deaths outside mainland China
  - 3,258 confirmed cases outside of China across 47 countries/regions. (*total includes 705 cases on the Diamond Princess cruise ship docked at Yokohama, Japan*)
- **National (U.S.) data:**
  - 15 total confirmed cases in the USA (*does not include 42 patients repatriated from the Diamond Princess to Travis AFB, Lockland AFB, Providence Sacred Heart-Spokane or the University of Nebraska-Omaha or the 3 repatriated form Wuhan*)
- **There are no confirmed cases among San Francisco residents.**
  - The risk of COVID-19 in California remains low.
- https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6
  - *NOTE: Information may vary as events and reporting are rapidly evolving.*
- The U.S. Centers for Disease Control and Prevention today confirmed a possible first case of person-to-person transmission of COVID-19 in California in the general public. The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.
- **There are no recommendations to cancel events.**
- **We are in flu season. The San Francisco Department of Public Health (DPH) recommends that persons with symptoms stay home from work, school and social gatherings. Practice hand-washing precautions. It is not too late to get the flu vaccine.**

- The City and County of San Francisco, led by the Health Department, is working on preventing the virus, containing its spread, and reducing harm in the community. We are focused on the most vulnerable groups, including children, people in congregate settings and the elderly. However, every sector has a role to play to ensure community health and safety. The health care system, schools, businesses and individuals can all do their part.

SFDEM Activities:

- To support the Department of Public Health response, the Department of Emergency Management continues expanded activation of San Francisco's Emergency Operations Center to assist with coordination of resources and established a Community Branch comprised of community, faith, business and education partners. As a result, community and government partners can work together to identify and coordinate our response to emerging issues.
- Mayor Breed made an emergency declaration to strengthen the City's preparedness and to surge

resources and capabilities, and ensure San Francisco is as ready as possible in the event that the new virus comes to our community. The declaration was announced by the Mayor during a press conference on February 25, 2020.

- The declaration of a local emergency will mobilize city resources, accelerate emergency planning, streamline staffing, coordinate agencies across the city, allow for future reimbursement by the state and federal governments and raise awareness throughout San Francisco about how everyone can prepare in the event that COVID-19 appears in our community.

SFDPH Activities:

- SFDPH DOC expanded community outreach and mitigation efforts, working closely with the CCSF Emergency Operations Center (EOC) in anticipation of increased inquiries due to the declaration of a local emergency.
- SFDPH is focusing on providing a comprehensive picture of past and current preparation and mitigation efforts, forward leaning departmental objectives, and the data and information being used to guide the work.
- SFDPH and the EOC are collaborating to create a process for routing briefing and other informational requests (from media and non-media sources) to the appropriate channels.
- SFDPH drafted guidelines for housing plans for confirmed COVID-19 cases, potential COVID-19 cases, and medium risk individuals who live in congregate living situations including Single Room Occupancies (SROs).
- SFDPH completed a preparedness consultation site visit to Chinese Hospital 02/25/20 and UCSF Mission Bay today 02/26/20.
- SF Public Health Laboratory is strengthening their safety measures for lab personnel, including enhanced Personal Protective Equipment (PPE) requirements.
- SF Public Health Laboratory is still awaiting delivery of CDC testing kits. CDC reported they will have a ship date for the testing kits by the end of this week.
- SFDPH is updating their COVID-19 Fact Sheet to include the most recent updates and align messaging and information across DPH and CCSF sites.
- SFDPH Public Information Office recently completed a COVID-19 prevention focused informational poster, which will soon be displayed on BART Trains.
- SFDPH CDCP information: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-_%20%20%20coronavirus/

Public Information:

- SFDPH and the San Francisco Department of Emergency Management (DEM) continue to operate the Joint Information Center to develop and disseminate accurate, timely, relevant and accessible public information about COVID-19. The Joint Information Center will expand to include additional regular members from other city agencies.
- Public Information Objectives:

  1. Rumor Control
  2. Engagement and Outreach with the multilingual communities
  3. Manage media inquiries and requests
  4. Develop simplified and accessible public information education materials
  5. Create a COVID-19 communications toolkit for NGOs and community serving organizations to increase public information and education among diverse and at risk communities

- DPH and DEM have public announcement plans should a San Francisco resident contract COVID-19. The Office of Civic Engagement and Immigrant Affairs (OCEIA) continues to translate emerging materials in all threshold languages.
- Talking points were updated to include key messages regarding the San Francisco emergency declaration and continued emphasis on preparedness
- DPH and DEM Public Information Officers (PIOs) continue to respond to media inquiries and prioritize Chinese language media. Public messaging also highlights ongoing preparedness work for possible COVID-19 cases in San Francisco in the future.
- 311 has received an increase of incoming call volume due to the emergency declaration announced Tuesday

CDPH (California Department of Public Health):

CDPH reported new cases of COVID-19 in CA in the 24 hours. Number of confirmed cases in CA: 7 travel-related, 1 close contact case and 1 community case.
- https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

CDC (U.S. Centers for Disease Control & Prevention):

- CDC updated their travel advisory to include South Korea. https://wwwnc.cdc.gov/travel/notices/warning/coronavirus-south-korea
- CDC reports that to date 445 people have been tested in the U.S.
- https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html

WHO (World Health Organization):

- WHO stated that 4 new countries (Algeria, Austria, Croatia, and Switzerland) reported cases of COVID-19 in the past 24 hours. (as of 02/26/20)
- https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports

Situation Summary:

- CDC is closely monitoring an outbreak of respiratory illness caused by COVID-19 that was first detected in Wuhan City, Hubei Province, China and which continues to expand.
- Chinese health officials have reported thousands of infections with COVID-19 in China, with the virus reportedly spreading from person-to-person in many parts of that country.
- Infections with COVID-19, most of them associated with travel from Wuhan, also are being reported in a growing number of international locations, including the United States.

Attachments:	TomasAragon_CDPHemails_Batch3.pdf

Requester,

We have conducted a diligent search for records responsive to your request. We have located responsive records, which are available to you here and have also been uploaded to NextRequest case #20-1076/ SOTF File 20059. Due to the need to continue reviewing, we will produce any additional responsive records on a rolling basis.

Thank you.

Subject: Public Records Request #20-1076

Hello,
I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2"

"2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

Subject:	Request for nCoV notification contacts
Date:	Wednesday, February 5, 2020 2:38:26 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

CACDC Members: please see important message from our CDPH partners regarding novel coronavirus (nCOV). This is going to other statewide groups, but only one response per LHD is necessary -Matt

Dear colleagues,

We would like to compile a list of individuals in each local health jurisdiction (LHJ) who should receive novel coronavirus (nCoV) notifications from CDPH. Examples of notifications include nCoV laboratory results, returning traveler lists, flight contact notifications, and interjurisdiction transfers.

Please send the following information to novelvirus@cdph.ca.gov with the subject: 'Novel coronavirus notification contacts for [enter your local health jurisdiction]'

Name(s):
Email address(s):
Phone number(s) to call after-hours:

Thank you!

Lauren Stockman, MPH

Subject:	REQUEST FOR AN EXTENSTION TO SUBMIT THE DOCUMENTS FOR INFECTIOUS DISEASE PREVENTION AND CONTROL LOCAL INFRASTRUCTURE FUNDS
Date:	Wednesday, February 5, 2020 1:54:54 PM

Hello Taylor St. Mary and Bill Rhinehart,

I am writing on behalf of the San Francisco Department of Public Health to request an extension on submitting the required documents for the Infectious Disease Prevention and Control infrastructure funds. We request this extension due to our local activation of the Novel Coronavirus. Please let me know if you have any questions.

Best

Israel

SFDPH DOC nCoV Situation Status report #10 (02/04/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths
Worldwide: 20,704 cases/427 Deaths *(John Hopkins CSSE, link below)*
US: 11 Cases/0 Deaths
CA: 6 Cases/0 Deaths

Updates and Response:
SFDPH
Summary of actions

- DPH outreach to the Chinese community remains a top priority. Round table meeting held today with Chinese Community stakeholders, including 50 different organizations, family associations, merchants, and community leaders.
- SFDPH Department Operation Center (DOC) continues to expand to accommodate operational, logistical, and administrative needs.
- DPH Supply Unit is actively locating and securing adequate Personal Protective Equipment (PPE) for staff; PPE is in high demand at this time from commercial suppliers, which may impact availability and/or order turnaround time.
- Collaboration at the regional level to coordinate messaging and guidance to pre-hospital providers (aligning with Health Officers' strategies), as well as 911 dispatch screening parameters and standards.
- DPH Primary Care personnel are bringing PPE training and guidance to outpatient clinics.
- CCSF Departments outside of DPH have been working together to accommodate space, time, and staff for the DOC. Resources are being identified and made available to support the nCoV-2019 activation response
- DPH is engaging with hospital partners to coordinate placement of PUI cases and confirmed cases, develop standard protocols for transport and relocation across the city, region and the State.
- CCSF Laboratories are preparing to receive and test specimen (if needed) 7 days a week.
- 2 San Benito confirmed cases continue to be hospitalized in in San Francisco. The SF community is not at risk as proper transport and isolation techniques are being followed.
  SFDPH Page: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/

CDC

- CDC reports of number of PUIs in the U.S. - 11 positive, 167 negative, and 82 pending tests. 36 states with PUIs (unchanged from 02/03/20).
- CDC reported that nCoV-2019 is not spreading in the U.S. community at this time.
- CDC Infection Control Guidance for 2019-nCoV revised 02/03/20.
- CDC plans to release guidance on quarantine of medium and high-risk travelers returning to the U.S. from

affected areas, as related to the Federal Quarantine Orders that went into effect over the weekend. Interim guidance can be found here: https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html
CDC nCoV page:
https://www.cdc.gov/coronavirus/2019-ncov/index.html

WHO (World Health Organization)-

- WHO stated that no new countries reported cases of 2019-nCoV since 02/03/20.
- WHO developed a protocol for the investigation of early cases: https://www.who.int/publications-detail/the-first-few-x-(ffx)-cases-and-contact-investigation-protocol-for-2019-novel-coronavirus-(2019-ncov)-infection
- WHO prepared a disease commodity package that includes an essential list of biomedical equipment, medicines and supplies necessary to care for patients with 2019-nCoV: https://www.who.int/publications-detail/disease-commodity-package---novel-coronavirus-(ncov)

WHO nCoV-2019 page: https://www.who.int/emergencies/diseases/novel-coronavirus-2019

CDPH (California Department of Public Health)-

- Confirmed 6 cases in California: Santa Clara County (2), San Benito (2), Los Angeles (1), Orange County (1).
- As of 1800 hours on February 3, 2020 there have been 79 persons in California tested for 2019- nCoV. Six test results were positive, 50 test results were negative, and the remaining 23 results are pending.
- Currently coordinating with Federal authorities around quarantine orders for returning travelers from Hubei Province, coming through FO or LAX.
  CDPH nCoV page:
  https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)
International data:

- 20,704 confirmed cases (99% of all confirmed cases globally) and 427 deaths in China (an increase of 66 cases since yesterday). 2.1% of confirmed cases in China have resulted in death.
- 2 additional deaths in the Philippines and Hong Kong.
- 212 confirmed cases outside of China (an increase of 29 cases since yesterday) across 27 countries.

National (U.S.) data:

- 11 confirmed cases in the U.S. (Seattle, Chicago - 2, Tempe, LA County, Orange County, Santa Clara County -2, San Benito County -2, Boston).
- 167 negative PUIs; 82 Pending PUIs; 6.2% of PUIs have come back positive. PUIs in 36 states.

> There will be more on the website in the days to come, I think. I sent my webmaster one thing today (yesterday here in Australia – but I'm keeping my thinking on NYC time), but she obviously didn't post it. I have two more things I've written but won't post till they're published or it's clear they won't be. And Jody and I have a long list of additional things we want to write/say if and when we get to them.
>
> In spite of all that, most of what we have to say is a recycling of things we have said before. If I were going to recommend two old articles to Dr. Angell or anyone, they would be "Fear Is Spreading Faster than SARS": And So It Should! and Containment as Signal: Swine Flu Risk Miscommunication. Sadly, we may end up having need as well for What to Say When a Pandemic Looks Imminent:

Messaging for WHO Phases Four and Five, though that was written with H5N1 in mind, and the imminent coronavirus pandemic looks like it will be orders of magnitude less severe. Some of what I wrote about stigma also seems on target, especially Coping with Ebola stigma.

(It's kind of neat that the four links I thought of first as relevant to this coronavirus were from SARS, swine flu, bird flu, and Ebola.)

I'd be grateful for your thinking on what risk communication problems you're seeing this time around.

Below a broader summary I sent yesterday to a shipmate. I'd appreciate your feedback on anything I should change next time some friend asks me what I think is going on. Here it is:

In a teeny-tiny nutshell:

<!--[if !supportLists]-->1. <!--[endif]-->The experts we respect pretty much all think the coronavirus will almost certainly go pandemic. That means it will infect a lot of people in a lot of places over a relatively short period. It's not impossible that it will burn itself out. It's not impossible that a developed country like the U.S. can manage to keep it from spreading. But both are long shots.

<!--[if !supportLists]-->2. <!--[endif]-->I think most of the experts are signaling that they think this pandemic will be mild. Jody thinks they're signaling that it won't be horrendously severe. Either way, they have weaker grounds for hypotheses about severity than about infectiousness. They really don't know. Still, they're sounding significantly less worried about likely severity than they sounded a few days ago.

<!--[if !supportLists]-->3. <!--[endif]-->Even a pandemic that isn't severe can kill a lot of people, just because it's infecting so many. And even a pandemic that isn't severe can cause disruptions of all sorts: hospital overcrowding, supply chain problems, absenteeism, etc. The less severe it is, obviously, the less disruption. And the slower it moves, the less disruption.

<!--[if !supportLists]-->4. <!--[endif]-->The things that make sense to try to stop or slow an emerging infectious disease (isolating patients, tracing and monitoring contacts, restricting travel, etc.) no longer make sense once it's clear they have failed and the pandemic has arrived. This doesn't necessarily mean governments won't keep doing them.

All the best.

--Peter

You may find this commentary by Peter Sandman, an expert in risk communication (now semi-retired), to be interesting.
"No Reason for Alarm" Is a Foolishly Over-Reassuring Message about the Novel Coronavirus Spreading from Wuhan, China
http://www.psandman.com/articles/Corona1.htm

We've been corresponding for years and when I saw this post I emailed him last night. Here is his response, which he said I could share (he mentions his wife. Jody Lanard is also a risk communication expert):

Lovely to hear from you, Kathy. I thought I might. Lots of former colleagues, clients, friends, media contacts, etc. have been reaching out.

With some reluctance, Jody and I have been reaching back.

There will be more on the website in the days to come, I think. I sent my webmaster one thing today (yesterday here in Australia – but I'm keeping my thinking on NYC time), but she obviously didn't post it. I have two more things I've written but won't post till they're published or it's clear they won't be. And Jody and I have a long list of additional things we want to write/say if and when we get to them.

In spite of all that, most of what we have to say is a recycling of things we have said before. If I were going to recommend two old articles to Dr. Angell or anyone, they would be "Fear Is Spreading Faster than SARS": And So It Should! and Containment as Signal: Swine Flu Risk Miscommunication. Sadly, we may end up having need as well for What to Say When a Pandemic Looks Imminent: Messaging for WHO Phases Four and Five, though that was written with H5N1 in mind, and the imminent coronavirus pandemic looks like it will be orders of magnitude less severe. Some of what I wrote about stigma also seems on target, especially Coping with Ebola stigma.

(It's kind of neat that the four links I thought of first as relevant to this coronavirus were from SARS, swine flu, bird flu, and Ebola.)

I'd be grateful for your thinking on what risk communication problems you're seeing this time around.

Below a broader summary I sent yesterday to a shipmate. I'd appreciate your feedback on

anything I should change next time some friend asks me what I think is going on. Here it is:

In a teeny-tiny nutshell:

1. The experts we respect pretty much all think the coronavirus will almost certainly go pandemic. That means it will infect a lot of people in a lot of places over a relatively short period. It's not impossible that it will burn itself out. It's not impossible that a developed country like the U.S. can manage to keep it from spreading. But both are long shots.

2. I think most of the experts are signaling that they think this pandemic will be mild. Jody thinks they're signaling that it won't be horrendously severe. Either way, they have weaker grounds for hypotheses about severity than about infectiousness. They really don't know. Still, they're sounding significantly less worried about likely severity than they sounded a few days ago.

3. Even a pandemic that isn't severe can kill a lot of people, just because it's infecting so many. And even a pandemic that isn't severe can cause disruptions of all sorts: hospital overcrowding, supply chain problems, absenteeism, etc. The less severe it is, obviously, the less disruption. And the slower it moves, the less disruption.

4. The things that make sense to try to stop or slow an emerging infectious disease (isolating patients, tracing and monitoring contacts, restricting travel, etc.) no longer make sense once it's clear they have failed and the pandemic has arrived. This doesn't necessarily mean governments won't keep doing them.

All the best.

Hi All,

The purpose of this call is to figure out coordination primarily for the San Benito and San Francisco efforts in case and contact tracking.

For your information, I've attached the packet of information with the case and contact investigation materials.

Thanks,

Olivia

Dear Thomas,

I received your request to plan for coronavirus and desire to have a program flex to the regulations to create an isolation room. Please work with Diana Marana at the SF District Office on submitting a program flex request so the team there can make sure you have that immediately set up.

I've copied her on this email so the two of you can connect.

Thank you
Heidi

Dear Sonia, We think we need a **waiver from CDPH Licensing and Certification** to re-purpose

some of our SNF isolation rooms for nCoV.

Who is the person w authority to answer:

- do we need waiver?
- if not, how to we get it asap?

This would be a huge help in re-purposing our assets for our shared nCoV containment goals.

Thanks for your consideration.

With gratitude,

Tomas

Subject: RE: Use of isolation rooms at ZSFGH and Laguna Honda

Adrian,
Thank you so much for talking today. A few quick notes from our conversation to get others up to speed (please correct or add if needed). I've added Janice and Tiffany from our Operations Section, and Kelly who has been helping us think through placement.

- Any person who is diagnosed with novel Coronavirus (nCoV) **and** meets usual criteria for acute hospital admission could be taken at ZSFG (no change)
- We discussed that for now, CDC guidance has been to admit all cases for isolation and also serial specimen collection, even if they do not meet usual clinical criteria for admission to an acute bed. Adrian will check on this, but feels given CDC guidance

and the national and international public health emergency declarations, admitting an asymptomatic case should be possible if coordinated through the Administrator on Duty (AOD).

- For LHH, there are two issues (we clarified that we are NOT currently considering placing cases at LHH, only possibly persons under investigation (PUIs) while awaiting test results.
    - Most of their isolation rooms are licensed as a SNF. PUIs would not meet SNF licensing requirements for admission, so the CDPH Licensing and Certification district office would have to grant a waiver. Adrian is checking on possible procedures for how this could be done. Adrian agreed that **It would be helpful to have our CDPH CD and HO colleagues also talk to the L&C to reiterate the need for this flexibility, Tomas could you ask Sonia Angell about this?**
    - LHH is almost full and don't have bed capacity for isolation rooms. Adrian is also going to check on this. I let Adrian know that Kelly had said she was available to help problem solve to free up beds, if needed – thank you, Kelly. I'm also happy to get on a call to explain how we are envisioning this process potentially working, and get feedback from the LHH team to further refine this.
- In parallel, we are working to add nursing staff and capability to our ICS Operations team to collect specimens in people's homes (for those who can be separated from others in their home and do not need ongoing medical care). We are reaching out to hospital and clinical partners to explore all options, but will certainly work to use these other options and reserve beds as much as possible!

Subject: Use of isolation rooms at ZSFGH and Laguna Honda
Importance: High

Hi All,

Naveena asked Tomas and I to follow-up with Adrian Smith (Director of Regulator Affairs at ZSFGH & Chief Quality Officer at Laguna Honda) to discuss the process for getting waivers to use licensed beds for anything other than approved use. He indicated that when know we need the rooms (either at ZSFGH or LHH) we need to page him at (415) 327-1820. He will then contact the District Administrator at the State to get a waiver - usually get answer the same day. We discussed the need to prioritize rooms for sick patients that cannot be isolated at home or other settings.

He indicated that ZSFGH respiratory isolation room availability is slim because they are normally always in use. However, there is often rooms available at Laguna Honda.

Subject: RE: Use of isolation rooms at ZSFGH and Laguna Honda

Adrian,
Thank you so much for talking today. A few quick notes from our conversation to get others up to speed (please correct or add if needed). I've added Janice and Tiffany from our Operations Section, and Kelly who has been helping us think through placement.

- Any person who is diagnosed with novel Coronavirus (nCoV) **and** meets usual criteria for acute hospital admission could be taken at ZSFG (no change)
- We discussed that for now, CDC guidance has been to admit all cases for isolation and also serial specimen collection, even if they do not meet usual clinical criteria for admission to an acute bed. Adrian will check on this, but feels given CDC guidance and the national and international public health emergency declarations, admitting an asymptomatic case should be possible if coordinated through the Administrator on Duty (AOD).
- For LHH, there are two issues (we clarified that we are NOT currently considering placing cases at LHH, only possibly persons under investigation (PUIs) while awaiting test results.
    - Most of their isolation rooms are licensed as a SNF. PUIs would not meet SNF licensing requirements for admission, so the CDPH Licensing and Certification district office would have to grant a waiver. Adrian is checking on possible procedures for how this could be done. Adrian agreed that **It would be helpful to have our CDPH CD and HO**

colleagues also talk to the L&C to reiterate the need for this flexibility, Tomas could you ask Sonia Angell about this?

- LHH is almost full and don't have bed capacity for isolation rooms. Adrian is also going to check on this. I let Adrian know that Kelly had said she was available to help problem solve to free up beds, if needed – thank you, Kelly. I'm also happy to get on a call to explain how we are envisioning this process potentially working, and get feedback from the LHH team to further refine this.

- In parallel, we are working to add nursing staff and capability to our ICS Operations team to collect specimens in people's homes (for those who can be separated from others in their home and do not need ongoing medical care). We are reaching out to hospital and clinical partners to explore all options, but will certainly work to use these other options and reserve beds as much as possible!

Susan

Thank you – but we will need the permission immediately once we identify a person who needs this care.

Adrian, really appreciate your help and I'll reach out to you today to discuss. If we can proceed with placing someone, and then retroactively get the waiver that would likely be OK. If not, we will need to ask the state for advance permission.

Subject: Use of isolation rooms at ZSFGH and Laguna Honda
Importance: High

Hi All,

Naveena asked Tomas and I to follow-up with Adrian Smith (Director of Regulator Affairs at ZSFGH & Chief Quality Officer at Laguna Honda) to discuss the process for getting waivers to use licensed beds for anything other than approved use. He indicated that when know we need the rooms (either at ZSFGH or LHH) we need to page him at (415) 327-1820. He will

then contact the District Administrator at the State to get a waiver - usually get answer the same day. We discussed the need to prioritize rooms for sick patients that cannot be isolated at home or other settings.

He indicated that ZSFGH respiratory isolation room availability is slim because they are normally always in use. However, there is often rooms available at Laguna Honda.

Adrian's contact number is below:

Adrian Smith, RN, MSN
ZSFGH Director of Regulatory Affairs
Laguna Honda Chief Quality Officer
Phone #: (628) 206-6449
Pager #: (415) 327-1820

** Our office has moved. Please note new address & phone #.*

Attachments:	image001.png

Thanks,

Nothing hugely earth-shattering in the message. Basic ATD standard (8 CCR 5199) compliance, including:
- the selection and provision of personal protective equipment (PPE),
- training of staff on the selected PPE including proper donning and doffing technique, and
- medical qualification for respirator use and respirator fit testing,
are all moving forward.

Complicated by a fast-evolving case definition its going to take a bit time, but sooner, rather than later, basic training to all front-line staff who may have initial (incoming) patient contact, not just providers, will be needed on what steps are needed when a suspect patient presents. Contents might include where (which room) etc the patient should be placed, who should be notified, and some general risk communication and hazard mitigation steps (close door to patient room, post sign, etc) specific to each facility will be needed. OSH staff who were in the PPE "train the trainer" session this afternoon indicate that clinic staff present voiced some concern about "not knowing what's going on", a common problem when you move further away from the DOC.

Cal/OSHA Issues Guidance on Requirements to Protect Health Care Workers from 2019 Novel Coronavirus

Oakland— Cal/OSHA is issuing guidance on protecting health care workers from exposure to 2019 Novel Coronavirus (2019-nCoV). The guidance covers the safety requirements when providing care for suspected or confirmed patients of the respiratory disease or when handling pathogens in laboratory settings in California.

"It is vital that employers take the necessary steps to protect workers in health care settings where they may be at risk of exposure to 2019 Novel Coronavirus," said Cal/OSHA Chief Doug Parker. "Cal/OSHA will provide guidance and resources on how to protect workers from this airborne infectious disease."

The risk for infection is higher in health care settings such as hospitals and clinical laboratories. The U.S. Centers for Disease Control and Prevention (CDC) is providing updates and closely monitoring suspected cases of 2019-nCoV infection and transmission.

2019-nCoV is an airborne infectious disease covered by Cal/OSHA's Aerosol Transmissible Diseases (ATD) standard, which requires employers to protect workers from diseases and pathogens transmitted by aerosols and droplets.

The ATD standard requires employers to have an ATD Exposure Control Plan with procedures to identify 2019-n-CoV cases or suspected cases as soon as possible and protect employees from infection.

The ATD standard further requires employers to provide training on the:

- Signs and symptoms of 2019-nCoV.
- Modes of transmission of the disease and source control procedures.
- Tasks and activities that may expose the employee to 2019-nCoV.
- Use and limitations of methods to prevent or reduce exposure to the disease including decontamination and disinfection procedures.
- Selection of personal protective equipment, its uses and limitations, and the types, proper use, location, removal, handling, cleaning, decontamination and disposal of protective equipment.
- Proper use of respirators.
- Available vaccines, when they become available.
- Employer's plan if an exposure incident occurs and surge plan, if applicable.

Employers must use feasible engineering and work practice controls to minimize employee exposure to 2019-nCoV. Examples of engineering controls include airborne infection isolation rooms or areas, exhaust ventilation, air filtration and air disinfection. Work practice controls include procedures for safely moving patients through the operation or facility, handwashing, personal protective equipment donning and doffing procedures, the use of anterooms, and cleaning and disinfecting contaminated surfaces, protective equipment, articles and linens.

Visit Cal/OSHA's webpage for further interim guidance on 2019-nCoV exposure in health care settings. In order to help employers comply with the ATD standard, Cal/OSHA has posted several publications including The California Workplace Guide to Aerosol Transmissible Diseases and fillable ATD model exposure control and laboratory biosafety plans.

Several occupational safety and health standards, including Cal/OSHA's Bloodborne Pathogens Standard adopted in 1992 and the ATD Standard adopted in 2009, address worker protections when exposure to infectious diseases including coronavirus may occur in health care settings. The standards apply to hospital workers and emergency medical services, as well as workers in biological laboratories, decontamination workers, public health workers, or public safety employees who may be exposed to infectious disease hazards.

Cal/OSHA reminds all employers and workers that any suspected cases of 2019-nCoV must be promptly reported to the local public health department.

The California Department of Public Health has updated information on 2019-nCoV and reporting requirements. The Centers for Disease Control and Prevention has also posted specific information for health care workers and laboratory settings.

The California Division of Occupational Safety and Health, or Cal/OSHA, is the division

within the Department of Industrial Relations (DIR) that helps protect California's workers from health and safety hazards on the job in almost every workplace. Cal/OSHA's Consultation Services Branch provides free and voluntary assistance to employers to improve their safety and health programs. Employers should call (800) 963-9424 for assistance from Cal/OSHA Consultation Services.

Employees with work-related questions or complaints may contact DIR's Call Center in English or Spanish at 844-LABOR-DIR (844-522-6734).

Cal/OSHA Issues Guidance on Requirements to Protect Health Care Workers from 2019 Novel Coronavirus

Oakland— Cal/OSHA is issuing guidance on protecting health care workers from exposure to 2019 Novel Coronavirus (2019-nCoV). The guidance covers the safety requirements when providing care for suspected or confirmed patients of the respiratory disease or when handling pathogens in laboratory settings in California.

"It is vital that employers take the necessary steps to protect workers in health care settings where they may be at risk of exposure to 2019 Novel Coronavirus," said Cal/OSHA Chief Doug Parker. "Cal/OSHA will provide guidance and resources on how to protect workers from this airborne infectious disease."

The risk for infection is higher in health care settings such as hospitals and clinical laboratories. The U.S. Centers for Disease Control and Prevention (CDC) is providing updates and closely monitoring suspected cases of 2019-nCoV infection and transmission.

2019-nCoV is an airborne infectious disease covered by Cal/OSHA's Aerosol Transmissible Diseases (ATD) standard, which requires employers to protect workers from diseases and pathogens transmitted by aerosols and droplets.

The ATD standard requires employers to have an ATD Exposure Control Plan with procedures to identify 2019-n-CoV cases or suspected cases as soon as

possible and protect employees from infection.

The ATD standard further requires employers to provide training on the:

- Signs and symptoms of 2019-nCoV.
- Modes of transmission of the disease and source control procedures.
- Tasks and activities that may expose the employee to 2019-nCoV.
- Use and limitations of methods to prevent or reduce exposure to the disease including decontamination and disinfection procedures.
- Selection of personal protective equipment, its uses and limitations, and the types, proper use, location, removal, handling, cleaning, decontamination and disposal of protective equipment.
- Proper use of respirators.
- Available vaccines, when they become available.
- Employer's plan if an exposure incident occurs and surge plan, if applicable.

Employers must use feasible engineering and work practice controls to minimize employee exposure to 2019-nCoV. Examples of engineering controls include airborne infection isolation rooms or areas, exhaust ventilation, air filtration and air disinfection. Work practice controls include procedures for safely moving patients through the operation or facility, handwashing, personal protective equipment donning and doffing procedures, the use of anterooms, and cleaning and disinfecting contaminated surfaces, protective equipment, articles and linens.

Visit Cal/OSHA's webpage for further interim guidance on 2019-nCoV exposure in health care settings. In order to help employers comply with the ATD standard, Cal/OSHA has posted several publications including The California Workplace Guide to Aerosol Transmissible Diseases and fillable ATD model exposure control and laboratory biosafety plans.

Several occupational safety and health standards, including Cal/OSHA's Bloodborne Pathogens Standard adopted in 1992 and the ATD Standard adopted in 2009, address worker protections when exposure to infectious diseases including coronavirus may occur in health care settings. The standards apply to hospital workers and emergency medical services, as well as workers in biological laboratories, decontamination workers, public health workers, or public safety employees who may be exposed to infectious disease hazards.

Cal/OSHA reminds all employers and workers that any suspected cases of 2019-nCoV must be promptly reported to the local public health department.

The California Department of Public Health has updated information on 2019-nCoV and reporting requirements. The Centers for Disease Control and Prevention has also posted specific information for health care workers and laboratory settings.

The California Division of Occupational Safety and Health, or Cal/OSHA, is the division within the Department of Industrial Relations (DIR) that helps protect California's workers from health and safety hazards on the job in almost every workplace. Cal/OSHA's Consultation Services Branch provides free and voluntary assistance to employers to improve their safety and health programs. Employers should call (800) 963-9424 for assistance from Cal/OSHA Consultation Services.

Employees with work-related questions or complaints may contact DIR's Call Center in English or Spanish at 844-LABOR-DIR (844-522-6734).

Subject: Cal/OSHA Issues Guidance on Requirements to Protect Health Care Workers from 2019 Novel Coronavirus

Date: Monday, February 3, 2020 7:16:38 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

NEWS RELEASE

Release Number: 2020-08
February 3, 2020

Cal/OSHA Issues Guidance on Requirements to Protect Health Care Workers from 2019 Novel Coronavirus

Oakland— Cal/OSHA is issuing guidance on protecting health care workers from exposure to 2019 Novel Coronavirus (2019-nCoV). The guidance covers the safety requirements when providing care for suspected or confirmed patients of the respiratory disease or when handling pathogens in laboratory settings in California.

"It is vital that employers take the necessary steps to protect workers in health care settings where they may be at risk of exposure to 2019 Novel Coronavirus," said Cal/OSHA Chief Doug Parker. "Cal/OSHA will provide guidance and resources on how to protect workers from this airborne infectious disease."

The risk for infection is higher in health care settings such as hospitals and clinical laboratories. The U.S. Centers for Disease Control and Prevention (CDC) is providing updates and closely monitoring suspected cases of 2019-nCoV infection and transmission.

2019-nCoV is an airborne infectious disease covered by Cal/OSHA's Aerosol Transmissible Diseases (ATD) standard, which requires employers to protect workers from diseases and pathogens transmitted by aerosols and droplets.

The ATD standard requires employers to have an ATD Exposure Control Plan with procedures to identify 2019-n-CoV cases or suspected cases as soon as possible and protect employees from infection.

The ATD standard further requires employers to provide training on the:

- Signs and symptoms of 2019-nCoV.
- Modes of transmission of the disease and source control procedures.
- Tasks and activities that may expose the employee to 2019-nCoV.
- Use and limitations of methods to prevent or reduce exposure to the disease including decontamination and disinfection procedures.
- Selection of personal protective equipment, its uses and limitations, and the types, proper use, location, removal, handling, cleaning, decontamination and disposal of protective equipment.
- Proper use of respirators.
- Available vaccines, when they become available.

Requester,

We have conducted a diligent search for records responsive to your request. We have located responsive records, which are available to you here and have also been uploaded to NextRequest case #20-1076/ SOTF File 20059. Due to the need to continue reviewing, we will produce any additional responsive records on a rolling basis.

Thank you.

Subject: Public Records Request #20-1076

Hello,
I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2"

"2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

SFDPH DOC nCoV Situation Status report #8 (01/31/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths

Worldwide: 9,925 Cases/213 Deaths *(John Hopkins CSSE, link below)*
US: 6 Cases/0 Deaths
CA: 2 Cases/0 Deaths

Updates and Response:

SFDPH

Summary of actions

- DPH top priority: outreach to the Chinese community. This includes culturally competent messaging re: masks, in person visits to Chinese media outlets, and convening Chinese community leaders and elected officials with CCSF city leaders (DPH, DEM, Mayor's office).
- DPH met with 6 different SF Chinese Media outlets today to build communications relationships and provide additional validated and updated information.
- DPH is working with Chinese Hospital and other community partners who are planning a press conference next week, to talk about donation efforts.
- Coordinating planning efforts and sharing resources with privately operated and consortium urgent care and outpatient health care clinics across SF.
- Secured 1 SF facility that can house up to 15 PUIS; no restrictions on who can be housed, including children, and wrap around services are available at the site.
- DPH DOC continues to expand to accommodate finance needs, tracking of staff hours, and work with other agencies supporting DOC and response work.
- Training modules are being developed and administered to support staff by DPH and DEM, to support ongoing operations.
- Collaboration is happening at the regional level re: containment planning and guidance.
- DPH is assessing placement of PUIs within a spectrum of different types of available housing options (i.e. acute hospitals vs. outpatient sites/shelters).

SFDPH Page: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/

CDC

- CDC coordinating with State Health Departments to provide guidance on monitoring individuals in their jurisdiction for the 14-day incubation period of the 2019-nCoV.
- CDC issued new criteria for defining a "PUI." New component broadens the travel history to anywhere in mainland China (within 14 days of onset of symptoms) if the person requires hospitalization. Discussions occurring on whether this definition may result in missing some of the less severe, but still infectious cases.

CDC report of number of PUIs in the U.S. As of 01/31/20: 6 positive, 114 negative, and 121 pending tests. 36 states with PUIs.

CDC nCoV page:

https://www.cdc.gov/coronavirus/2019-ncov/index.html

WHO (World Health Organization)-

- On January 30, 2020 WHO determined the rapidly spreading 2019-nCoV outbreak constitutes a "Public Health Emergency of International Concern."
  WHO nCoV page:
  https://www.who.int/emergencies/diseases/novel-coronavirus-2019

CDPH (California Department of Public Health)-

- On January 30, 2020 the State Department issued updated travel guidance, recommending travelers avoid travel to China entirely. https://travel.state.gov/content/travel/en/traveladvisories/traveladvisories/china-travel-advisory.html
- CDPH's Medical and Health Coordination Center (MHCC) activated at a Level 2 (with Level 1 being the highest) operating from 0700 to 1900 hours daily.
- CDPH MHCC established a Joint Information Center (JIC) to monitor all media, respond to inquiries (149 received so far), and develop risk communications (FAQs, talking points, etc.).
- Centers for Infectious Disease (CID) reports there have been 58 persons in California tested for 2019- nCoV. Two test results were positive, 27 test results were negative, and the remaining 29 results are pending.
- CDPH has been asked to provide representation at an upcoming press conference (date TBD). CDPH is aligning their messaging and shared information with the State and local jurisdictions, by referring requests to the local health officer, directing them to Frequently Asked Questions on the CDPH website, and to the Centers for Disease Control (CDC) website.

CDPH nCoV page:
https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates)

- Data sources- WHO, CDC, NHC, and DXY.
- 9,925 cases globally
- In China: 9,658 cases; 222 deaths.
- 118 cases confirmed outside of China in 22 countries.

Subject: Novel Coronavirus Messaging and Guidance

Good evening,

This email is to provide you with updated information and messaging around novel coronavirus. We have heard from many of you about communication challenges and want you to know we are working hard to address your needs.

1. We have posted the following statement on our website:

   The California Department of Public Health's (Health Department) recommendations regarding quarantine of returning travelers have not changed. The Health Department does NOT recommend routine quarantine of returning travelers from China. Furthermore,

we are not recommending the cancelation of public events at this time.

The immediate health risk from novel coronavirus to the general public in California is low. There is no evidence of sustained person-to-person transmission of the virus in our US. One instance of person-to-person transmission was confirmed today in Chicago, but it was with a close household contact.

We still consider this a serious public health concern. We are actively working with the CDC, with local governments and health care providers across the state to protect your health.

Please see the Coronavirus webpage for this new statement.

2. Attached is a DRAFT Quicksheet – we have sent out conference call information to CCLHO and CHEAC for 1 pm tomorrow to get your feedback on this draft document. We recognize this may need to be updated when new guidance comes out from CDC. We also invite those who have confirmed cases and/or have prepared for repatriation to share a little of their experience.

3. CDPH has scheduled a PIO call for 2 pm tomorrow (following the CCLHO and CHEAC call on the DRAFT Quicksheet). We will share additional ideas for public messaging.

Thank you for your patience as we continue to work through these issues and do not hesitate to raise additional needs with us.

Thank you.

Susan

Susan Fanelli

Attachments:	Revised CDPH 2019-nCoV Quicksheet_1_31V4.docx

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Good afternoon,

Response to novel Coronavirus continues to evolve, the agenda for today's call will be:

1. Review of Updated CDC Guidance
    - New PUI definition (See attached updated Quicksheet
    - CDC decision to Quarantine at March AFB (repatriation)
    - Asymptomatic Transmission

2. Review of revised Quicksheet (see updated version attached) – we will focus on key issues not the technical pieces such as lab specimens and reporting

3. Sharing for local colleagues who have had a positive case or prepared for repatriation – if time we will allow questions after their presentations.

Thanks we look forward to talking with you.

Susan

Subject: Novel Coronavirus Messaging and Guidance

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Good evening,

This email is to provide you with updated information and messaging around novel coronavirus. We have heard from many of you about communication challenges and want you to know we are working hard to address your needs.

1. We have posted the following statement on our website:

   The California Department of Public Health's (Health Department) recommendations regarding quarantine of returning travelers have not changed. The Health Department does NOT recommend routine quarantine of returning travelers from China. Furthermore, we are not recommending the cancelation of public events at this time.

   The immediate health risk from novel coronavirus to the general public in California is low. There is no evidence of sustained person-to-person transmission of the virus in our US. One instance of person-to-person transmission was confirmed today in Chicago, but it was with a close household contact.

   We still consider this a serious public health concern. We are actively working with the

CDC, with local governments and health care providers across the state to protect your health.

Please see theCoronavirus webpage for this new statement.

2. Attached is a DRAFT Quicksheet – we have sent out conference call information to CCLHO and CHEAC for 1 pm tomorrow to get your feedback on this draft document. We recognize this may need to be updated when new guidance comes out from CDC. We also invite those who have confirmed cases and/or have prepared for repatriation to share a little of their experience.

3. CDPH has scheduled a PIO call for 2 pm tomorrow (following the CCLHO and CHEAC call on the DRAFT Quicksheet). We will share additional ideas for public messaging.

Thank you for your patience as we continue to work through these issues and do not hesitate to raise additional needs with us.

Thank you.

Susan

Date: Thursday, January 30, 2020 3:13:39 PM

SFDPH DOC nCoV Situation Status report #7 (01/30/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths

Worldwide: 8,235 Cases/171 Deaths
US: 5 Cases/0 Deaths
CA: 2 Cases/0 Deaths

Updates and Response:

SFDPH

Summary of actions

- CCSF's Department of Emergency Management (DEM) and the DPH DOC met with Director of Health Dr. Grant Colfax to strategize and support plans for an extended response period for emergency response staff.
- Public Information Office has increased staffing and is currently providing real time updates online, via social media, and to Chinese language media sources in 4 threshold languages.
- Outreach has been enhanced to Health Care Providers, Elected Officials, CBOs, and Media in the Chinese Community. Messaging re: use of masks as a protective measure are in development.
- DPH is developing a basic outline and framework for the care and shelter of varying levels of PUIs. In this process DPH is coordinating with SF hospitals and outpatient clinics to identify resources and capacity.
- A field team is being developed to support current and potential future Communicable Disease needs, including testing and outreach to PUIs.
- PUI surge housing has been identified at 1 site in SF and plans are to work with the Mayor's Office on Housing and the Volunteer Organizations Active in a Disaster (SF VOAD) to identify additional housing sites.
- 911 dispatch implemented a new screening process that can be used any time a caller volunteers information re: travel to Wuhan or contact with a confirmed nCoV-2019 case.
- DEM working with DPH to develop daily messaging for citywide situational awareness to outside CCSF agencies.

SFDPH Page: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/

CDC

- CDC providing the number of PUIs in the U.S. As of 01/30/20: 5 positive, 68 negative, and 92 pending tests. This is unchanged from yesterday's report.
- CDC is hospitalizing and/or isolating PUI cases testing positive for nCoV-2019. Serial PCRs (testing at a molecular level to confirm infection) are being conducted on PUIs and PUI contacts.
- CDC has confirmed the first U.S. person to person transmission in Chicago, IL.

CDC nCoV page:

https://www.cdc.gov/coronavirus/2019-ncov/index.html

WHO (World Health Organization)- 01/30/20

- First confirmed cases of 2019-nCoV in Finland, India and Philippines; all had travel history to Wuhan City.
- International Health Regulations is meeting today to discuss whether the outbreak constitutes a "public health emergency of international concern."
- WHO recommends that the interim name of the disease should be "2019-nCoV acute respiratory disease." This name complies with the WHO Best Practices for Naming of New Human Infectious Diseases. Naming is still undecided at this point.
- WHO working on enhancing global diagnostic capacity for 2019-nCoV by enhancing availability of tests, national capacity, and creating a network of key expert laboratories.

Subject:	RE: Cancellation: FBI Sponsored Smallpox Workshop 19 February 2020
Date:	Thursday, January 30, 2020 9:35:52 AM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Bay Area BAC,

Please see message from the FBI Smallpox Workshop Planning Team below:

Due to the recent outbreak of the novel coronavirus (nCoV) the California Smallpox Response Workshop has been postponed. The Smallpox Response Workshop is intended to bring together and enhance coordination and awareness of representatives from Federal, State and Local Public Health and Law Enforcement Agencies in response to a Smallpox incident in the United States. Progressing forward with the February 19 workshop date would not yield the desired outcome, as many of the Local, State and Federal representatives from Public Health Departments and Agencies are activated, engaged and responding to the nCoV outbreak. There is no desire to hamper any real-world response and therefore the unanimous decision to postpone the workshop was made.

We will reconvene planning in the coming weeks and work to coordinate and identify new dates, and discuss new options for workshop conduct that will be beneficial to all participants at the three areas of responsibility (Bay Area, South Coast, and San Diego).

We appreciate your time, effort, and patience thus far, and look forward to working with you all again soon.

Respectfully,

Thanks Hali.

We are doing aggressive rumor control, but it is hard to be air tight. It is the nature of these things. I hope you told your patient that was not accurate, that there are no confirmed cases in SF, and that we will make an announcement of that changes.

We have also done:
Social media monitoring and correcting rumors.
Two all-staff messages to ZSFG.
One all-DPH staff message from Grant.
Circulated multilingual fact sheets and those are up on SFDPH.org, SFGOV, and SF72.org.
Held 2 press conferences.
Done multiple media interviews and answered inquiries, including Chinese media.
Updated the BOS several times.

I am including the full PIO team working on this issue.

Thanks
Rachael

SFDPH DOC nCoV Situation Status report #6 (01/29/20)

Status: Yellow

Outlook: Worsening

Need: None

of Cases/Deaths

Worldwide: 6,065 Cases/132 Deaths

US: 5 Cases/0 Deaths

CA: 2 Cases/0 Deaths

Updates and Response:

SFDPH

Summary of actions

- SFDPH Health Officer Dr. Tomas Aragon gave an interview in Spanish to KIQI.
- Public FAQ for https://www.sfcdcp.org/developed and out for review. The site is now separated into a page for the public and a page for clinicians.
- DPH Operations continues to expand significantly to support functions of information and guidance dissemination, clinician guidance, and containment planning. Training is being provided where needed.
- DPH HR is working on an expedited process to secure additional RN support.
- Refining messaging about masks for the community, in collaboration with the DOC, CHEP, and SFHN.
- FAQs for the SF 311 call center have been revised and updated by PIOs.
- The SF City Attorney is currently reviewing (draft) Health Officer orders.
- Plans in development for PPE deployment (if needed) and preparing for respirator users who do not routinely use N95 respirators (i.e. setting up medical screening, fit testing, and training)
- Staff worked on tailoring prevention messages to the Chinese community especially with respect to face masks.
- Efforts are expanding to a city-wide level around housing and resource support for PUIs. DPH is working with DEM and HSA to identify options.
- Continued monitoring of social media, to be able to respond in real time to unvalidated or misleading information.
- DPH launched a new social media message around prevention.

SFDPH Page: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/

CDC

- CDC is posting and updating the number of PUIs in the U.S. As of 01/29/20: 5 positive, 68 negative, and 92 pending tests.
- Working with CDPH to make lab testing possible at the local level. Currently CDC continues to the source for all CA nCoV-2019 testing.

CDC nCoV page:

https://www.cdc.gov/coronavirus/2019-ncov/index.html

WHO (World Health Organization)- 01/29/20

- 4 newly confirmed cases reported in United Arab Emirates, in individuals traveling from Wuhan City.
- WHO has set up a public private collaboration called "The Pandemic Supply Chain Network (PSCN)". It is a Market Network that seeks to provide a platform for data sharing, market visibility, and operational coordination and connecting.
- PSCN develop a market capacity and risk assessment for personal protective equipment (PPE) to be used in matching the global demand for PPE with the global supply. Expected to be completed by 5 February 2020.
- Global confirmed cases 6065, China 5997 confirmed cases. 1239 severe cases, 132 deaths.
- Outside of China- 68 confirmed cases in 15 countries.
- 9239 PUIs.

WHO nCoV page:

https://www.who.int/emergencies/diseases/novel-coronavirus-2019

CDPH (California Department of Public Health) 01/28/20

- CDPH is using the California Health Alert Network (CAHAN) and hosting

conference calls to ensure that local health departments and healthcare providers are aware and kept abreast of updated information as it becomes available.

- As of 0800 hours on January 27, 2020 there have been 33 persons in California tested for novel coronavirus. Two test results were positive, 18 test results were negative, and the remaining 13 results are pending.
- CDPH Office of Public Affairs (OPA)has responded to 11 media inquiries. Inquiries include updates on confirmed cases and PUIs.
- Preparing for the release of the 2019-nCoV laboratory assay within the next two weeks. Currently making appropriate staffing and equipment plans to perform the 2019-nCoV assay. Current priorities are to report all lab reports from CDC to CID leadership, provide up-to-date communication to the California Local Public Health Lab Network on 2019-nCoV laboratory procedures as they become available, and assisting local Public Health Labs to prepare for testing at the local level.

Hi all. Not exactly social media, but I did want to pass on what I heard from two patients in evening clinic at the General today: these were patients who have the upper respiratory infection that we've seen so much of over the past month. After I did my assessment, they told me how relieved they were to know that they don't have coronavirus. They said that "word on the street" in the Mission is that there are two patients at the General with confirmed virus, and the city is waiting to break the news so it's done in a way that won't cause panic.
Not sure what more we can do to dispel these myths, and I think our job is made more difficult because so many people are suffering from respiratory symptoms right now.

Requester,

We have conducted a diligent search for records responsive to your request. We have located responsive records, which are available to you here and have also been uploaded to NextRequest case #20-1076/ SOTF File 20059. Due to the need to continue reviewing, we will produce any additional responsive records on a rolling basis.

Thank you.

Subject: Public Records Request #20-1076

Hello,
I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2"

"2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

Subject: Fw: 2019 Novel Coronavirus - process/communications to refer Wuhan travelers for assessment
Date: Sunday, January 19, 2020 8:45:02 PM

Hi Tomas,

Forwarding this email correspondence. I understand that there was a change of plans and the San Mateo DPH on-call number is not being provided to incoming passengers after all. Erica Pan requested that CDC create a triage line for incoming passengers from Wuhan if they develop symptoms; the SFO officer-in-charge at the quarantine station, Susan Dwyer, responded below that she would bring it up with her leadership.

Also, you likely saw this, but there was a large increase in cases reported by China today - https://www.statnews.com/2020/01/19/china-reports-sharp-rise-in-case-of-novel-virus-amid-growing-concerns-of-person-to-person-transmission/

CDPH has requested a call with CDC for 10am tomorrow (Monday) - I don't know if that is happening yet or not - the last I heard the call was currently on hold. I will send you the call-in information if I receive it (if it ends up being scheduled).

Thanks,
Julie

Erica,

Thank you for this suggestion and idea. My current thought is that we're having such challenges organizing, training, and scheduling badging for the deployed staff that it's too much for me/us to consider setting up a phone line here at the Q station for the calls which might come in. But as tide continues, and depending on how quickly it bubbles, and the fact that this will be decided above our QS level, we'd want to support this suggestion. I'll talk more tomorrow with our Preparedness and Policy Coordination Lead, who's with us until Tuesday.

Thank you again,
Susan

PS. Vanessa just took a job with DTBE and begins Tuesday in Richmond. We're sad, but happy for her and California!

Subject: RE: 2019 Novel Coronavirus - process/communications to refer Wuhan travelers for assessment

Hi Susan & Vanessa,

I am sure you are both completely swamped with this situation, but wanted to pitch an idea/proposal to you all at DGMQ at SFO. (and possibly the other 2 DGMQ sites?)

I got an update from Scott Morrow today about the discussion/considerations of what instructions to give incoming travelers from Wuhan if they do develop symptoms, and I understand the current plan is to hand out these cards/messages attached to the CAHAN alert below which tell the traveler to "seek medical care right away and call ahead." (and not call the San Mateo or other local PH CD Control #).

I do have concerns after we had started to discuss in our county scenarios of travelers being assessed at some of our less resourced sites in our jurisdiction about appropriate infection control management, notifications, etc.

Is there a possibility of CDC setting up a phone # at each of the 3 DGMQ sites for travelers to call that could receive calls and then appropriately triage them to the local jurisdiction where the traveler is at that time? That way we could ideally do some communication and coordination of appropriate assessment (including ensuring there is an AIIR at the receiving facility) and transport if needed to a site that is prepared and can implement appropriate infection control precautions immediately. It seems like a potential compromise between the specific individual traveler notifications we did for Ebola and just leaving the assessment up to a more unpredictable evaluation.
Maybe this could be discussed at the Tuesday update call? (Or I'm happy to discuss the idea sooner over the weekend if you think this is something CDC could have some of the deployed staff do.) Let us know, but if LHDs can be notified (we/or likely CDPH can share the list of CD Control contact #s/after hour #s for CDC staff to call?) we know our facilities and can try to arrange as smooth as an assessment as possible and may also help with public information/media management as well. Just thinking of some of the false alarms and hospital/clinic reactions during Ebola (as well as some concerning infection control practices in some locations) and want to work with everyone to figure out how we can best feasibly manage these situations.

Thanks!

Erica

Update and Interim Guidance on Outbreak of 2019 Novel Coronavirus (2019-nCoV) in Wuhan, China

Summary
The Centers for Disease Control and Prevention (CDC) continues to closely monitor an outbreak of a 2019 novel coronavirus (2019-nCoV) in Wuhan City, Hubei Province, China that began in December 2019. CDC has established an Incident Management System to coordinate a domestic and international public health response.

Coronaviruses are a large family of viruses. Some cause illness in people; numerous other coronaviruses circulate among animals, including camels, cats, and bats. Rarely, animal coronaviruses can evolve and infect people and then spread between people such as has been seen with Middle Eastern Respiratory Syndrome Coronavirus (MERS-CoV) (https://www.cdc.gov/coronavirus/mers/index.html) and Severe Acute Respiratory Syndrome Coronavirus (SARS-CoV) (https://www.cdc.gov/sars/index.html).

Chinese authorities report most patients in the Wuhan City outbreak have been epidemiologically linked to a large seafood and animal market, suggesting a possible zoonotic origin to the outbreak. Chinese authorities additionally report that they are monitoring several hundred healthcare workers who are caring for outbreak patients; no spread of this virus from patients to healthcare personnel has been reported to date. Chinese authorities are reporting no ongoing spread of this virus in the community, but they cannot rule out that some limited person-to-person spread may be occurring. China has reported that two of the patients have died, including one with pre-existing medical conditions. Chinese health officials publicly posted the genetic sequence of the 2019-nCoV on January 12, 2020. This will facilitate identification of infections with this virus and development of specific diagnostic tests.

Thailand and Japan have confirmed additional cases of 2019-nCoV in travelers from Wuhan, China. It is possible that more cases will be identified in the coming days. This is an ongoing investigation and given previous experience with MERS-CoV and SARS-CoV, it is possible that person-person spread may occur. There is much more to learn about the transmissibility, severity, and other features associated with 2019-nCoV as the investigations in China, Thailand, and Japan continue. Additional information about this novel virus is needed to better inform population risk.

This HAN Update provides a situational update and guidance to state and local health departments and healthcare providers that supersedes guidance in CDC's HAN Advisory 424 distributed on January 8, 2020. This HAN Update adds guidance for evaluation of patients under investigation (PUI) for 2019-nCoV, prevention and infection control guidance, including the addition of an eye protection recommendation, and additional information on specimen collection.

Background
An outbreak of pneumonia of unknown etiology in Wuhan City was initially reported to WHO on December 31, 2019. Chinese health authorities have confirmed more than 40 infections with a novel

coronavirus as the cause of the outbreak. Reportedly, most patients had epidemiological links to a large seafood and animal market. The market was closed on January 1, 2020. Currently, Chinese health authorities report no community spread of this virus, and no transmission among healthcare personnel caring for outbreak patients. No additional cases of infection with 2019-nCoV have been identified in China since January 3, 2020.

On January 13, 2020 public health officials in Thailand confirmed detection of a human infection with 2019-nCoV in a traveler from Wuhan, China. This was the first confirmed case of 2019-nCoV documented outside China. On January 17, 2020 a second case was confirmed in Thailand, also in a returned traveler from Wuhan City. On January 15, 2020 health officials in Japan confirmed 2019-nCoV infection in a returned traveler from Wuhan City. These persons had onset dates after January 3, 2020. These cases did not report visiting the large seafood and animal market to which many cases in China have been linked.

On January 11, 2020, CDC updated the level 1 travel health notice ("practice usual precautions") for Wuhan City, Hubei Province, China with additional information (originally issued on January 6, 2020): https://wwwnc.cdc.gov/travel/notices/watch/novel-coronavirus-china.

Recommendations for Healthcare Providers
Limited information is available to characterize the spectrum of clinical illness associated with 2019-nCoV. No vaccine or specific treatment for 2019-nCoV infection is available; care is supportive.

The CDC clinical criteria for a 2019-nCoV patient under investigation (PUI) have been developed based on what is known about MERS-CoV and SARS-CoV and are subject to change as additional information becomes available.

Healthcare providers should obtain a detailed travel history for patients being evaluated with fever and acute respiratory illness. CDC guidance for evaluating and reporting a PUI for MERS-CoV remains unchanged.

Criteria to Guide Evaluation of Patients Under Investigation (PUI) for 2019-nCoV
Patients in the United States who meet the following criteria should be evaluated as a PUI in association with the outbreak of 2019-nCoV in Wuhan City, China.

1) Fever[1] AND symptoms of lower respiratory illness (e.g., cough, shortness of breath)
–and in the last 14 days before symptom onset,
- History of travel from Wuhan City, China

-or-

- Close contact[2] with a person who is under investigation for 2019-nCOV while that person was ill.

2. Fever[1] OR symptoms of lower respiratory illness (e.g., cough, shortness of breath)
–and in the last 14 days before symptom onset,
- Close contact[2] with an ill laboratory-confirmed 2019-nCoV patient.

The above criteria are also available at https://www.cdc.gov/coronavirus/novel-coronavirus-2019/clinical-criteria.html. The criteria are intended to serve as guidance for evaluation. Patients should be evaluated and discussed with public health departments on a case-by-case basis if their clinical presentation or exposure history is equivocal (e.g., uncertain travel or exposure).

Recommendations for Reporting, Testing, and Specimen Collection
Healthcare providers should **immediately** notify both infection control personnel at their healthcare facility and their local or state health department in the event of a PUI for 2019-nCoV. State health departments that have identified a PUI should immediately contact CDC's Emergency Operations Center (EOC) at 770-488-7100 and complete a 2019-nCoV PUI case investigation form available at https://www.cdc.gov/coronavirus/novel-coronavirus-2019/downloads/pui-form.pdf. CDC's EOC will assist local/state health departments to collect, store, and ship specimens appropriately to CDC, including

during afterhours or on weekends/holidays. At this time, diagnostic testing for 2019-nCoV can be conducted only at CDC. Testing for other respiratory pathogens should not delay specimen shipping to CDC. If a PUI tests positive for another respiratory pathogen, after clinical evaluation and consultation with public health authorities, they may no longer be considered a PUI. This may evolve as more information becomes available on possible 2019 nCoV co-infections.

For biosafety reasons, it is not recommended to perform virus isolation in cell culture or initial characterization of viral agents recovered in cultures of specimens from a PUI for 2019-nCoV. To increase the likelihood of detecting 2019-nCoV infection, CDC recommends collecting and testing multiple clinical specimens from different sites, including all three specimen types—lower respiratory, upper respiratory, and serum specimens. Additional specimen types (e.g., stool, urine) may be collected and stored. Specimens should be collected as soon as possible once a PUI is identified regardless of time of symptom onset. Additional guidance for collection, handling, and testing of clinical specimens is available at https://www.cdc.gov/coronavirus/2019-nCoV/.

Interim Healthcare Infection Prevention and Control Recommendations for Patients Under Investigation for 2019-nCoV

Although the transmission dynamics have yet to be determined, CDC currently recommends a cautious approach to patients under investigation for 2019-nCoV (https://www.cdc.gov/coronavirus/2019-nCoV/clinical-criteria.html). Such patients should be asked to wear a surgical mask as soon as they are identified and be evaluated in a private room with the door closed, ideally an airborne infection isolation room if available. Healthcare personnel entering the room should use standard precautions, contact precautions, airborne precautions, and use eye protection (e.g., goggles or a face shield). Immediately notify your healthcare facility's infection control personnel and local health department.

Additional Infection Control Practices Resources

- Guideline for Isolation Precautions: Preventing Transmission of Infectious Agents in Healthcare Settings (https://www.cdc.gov/infectioncontrol/guidelines/isolation/index.html)

Notes

[1]Fever may not be present in some patients, such as those who are very young, elderly, immunosuppressed, or taking certain fever-lowering medications. Clinical judgment should be used to guide testing of patients in such situations.

[2]Close contact with a person who is under investigation for 2019-nCOV.

Close contact is defined as—

a) being within approximately 6 feet (2 meters), or within the room or care area, of a novel coronavirus case for a prolonged period of time while not wearing recommended personal protective equipment or PPE (e.g., gowns, gloves, NIOSH-certified disposable N95 respirator, eye protection); close contact can include caring for, living with, visiting, or sharing a healthcare waiting area or room with a novel coronavirus case.

– or –

b) having direct contact with infectious secretions of a novel coronavirus case (e.g., being coughed on) while not wearing recommended personal protective equipment.

See CDC's Interim Healthcare Infection Prevention and Control Recommendations for Patients Under Investigation for 2019 Novel Coronavirus (https://www.cdc.gov/coronavirus/2019-nCoV/infection-control.html).

Data to inform the definition of close contact are limited. Considerations when assessing close contact include the duration of exposure (e.g., longer exposure time likely increases exposure risk) and the clinical symptoms of the person with novel coronavirus (e.g., coughing likely increases exposure risk as does exposure to a severely ill patient). Special consideration should be given to those exposed in healthcare settings.

For More Information

More information is available at https://.cdc.gov/coronavirus/2019-ncov/index.html or by calling 800-CDC-INFO | (800-232-4636) | TTY: (888) 232-6348

The Centers for Disease Control and Prevention (CDC) protects people's health and safety by preventing and controlling diseases and injuries; enhances health decisions by providing credible information on critical health issues; and promotes healthy living through strong partnerships with local, national, and international organizations.

Categories of Health Alert Network messages:
Health Alert Requires immediate action or attention; highest level of importance
Health Advisory May not require immediate action; provides important information for a specific incident or situation
Health Update Unlikely to require immediate action; provides updated information regarding an incident or situation
HAN Info Service Does not require immediate action; provides general public health information

##This message was distributed to state and local health officers, state and local epidemiologists, state and local laboratory directors, public information officers, epidemiologists, HAN coordinators, and clinician organizations##

The Centers for Disease Control and Prevention (CDC) and the Department of Homeland Security's Customs and Border Protection (CBP) will implement enhanced health screenings to detect ill travelers traveling to the United States on direct or connecting flights from Wuhan, China. This activity is in response to an outbreak in China caused by a novel (new) coronavirus (2019 nCoV), with exported cases to Thailand and Japan.

Starting January 17, 2020, travelers from Wuhan to the United States will undergo entry screening for symptoms associated with 2019-nCoV at three U.S. airports that receive most of the travelers from Wuhan, China: San Francisco (SFO), New York (JFK), and Los Angeles (LAX) airports.

"To further protect the health of the American public during the emergence of this novel coronavirus, CDC is beginning entry screening at three ports of entry. Investigations into this novel coronavirus are ongoing and we are monitoring and responding to this evolving situation," said Martin Cetron, M.D., Director of CDC's Division of Global Migration and Quarantine.

Based on current information, the risk from 2019-nCoV to the American public is currently deemed to be low. Nevertheless, CDC is taking proactive preparedness precautions.

Entry screening is part of a layered approach used with other public health measures already in place to detect arriving travelers who are sick (such as detection and reporting of ill travelers by airlines during travel and referral of ill travelers arriving at a US port of entry by CBP) to slow and reduce the spread of any disease into the United States.

CDC is deploying about 100 additional staff to the three airports (SFO, JFK, and LAX) to supplement existing staff at CDC quarantine stations located at those airports.

Public Health Screening to Begin at 3 U.S. Airports for 2019 Novel Coronavirus ("2019-nCoV")

The Centers for Disease Control and Prevention (CDC) and the Department of Homeland Security's Customs and Border Protection (CBP) will implement enhanced health screenings to detect ill travelers traveling to the United States on direct or connecting flights from Wuhan, China. This activity is in response to an outbreak in China caused by a novel (new) coronavirus (2019 nCoV), with exported cases to Thailand and Japan.

Starting January 17, 2020, travelers from Wuhan to the United States will undergo entry screening for symptoms associated with 2019-nCoV at three U.S. airports that receive most of the travelers from Wuhan, China: San Francisco (SFO), New York (JFK), and Los Angeles (LAX) airports.

"To further protect the health of the American public during the emergence of this novel coronavirus, CDC is beginning entry screening at three ports of entry. Investigations into this novel coronavirus are ongoing and we are monitoring and responding to this evolving situation," said Martin Cetron, M.D., Director of CDC's Division of Global Migration and Quarantine.

Based on current information, the risk from 2019-nCoV to the American public is currently deemed to be low. Nevertheless, CDC is taking proactive preparedness precautions.

Entry screening is part of a layered approach used with other public health measures already in place to detect arriving travelers who are sick (such as detection and reporting of ill travelers by airlines during travel and referral of ill travelers arriving at a US port of entry by CBP) to slow and reduce the spread of any disease into the United States.

CDC is deploying about 100 additional staff to the three airports (SFO, JFK, and LAX) to supplement existing staff at CDC quarantine stations located at those airports.

CDC is actively monitoring this situation for pertinent information about the source of outbreak, and risk for further spread through person-to-person or animal-to-person transmission. CDC may adjust screening procedures and other response activities as this outbreak investigation continues and more is learned about the newly emerging virus. Entry screening alone is not a guarantee against the possible importation of this new virus but is an important public health tool during periods of uncertainty and part of a multilayered government response strategy. As new information emerges, CDC will reassess entry screening measures and could scale activities up or down accordingly.

On Jan. 11, 2020, CDC updated a Level 1 Travel Health Notice ("practice usual precautions") for travelers to Wuhan City and an updated Health Alert to health care professionals and public health partners with new and updated guidance is forthcoming.

China health officials report that most of the patients infected with 2019-nCoV have had exposure to a large market where live animals were present, suggesting this is a novel virus that has jumped the species barrier to infect people. Chinese authorities additionally report that several hundred health care workers caring for outbreak patients are being monitored and no spread of this virus from patients to health care workers has been seen. They report no sustained spread of this virus in the community, however there are indications that some limited person-to-person spread may have occurred. CDC is responding to this outbreak out of an abundance of caution, ready to detect people infected with 2019-CoV.

For the latest information on the outbreak, visit CDC's Novel Coronavirus 2019 website.

Public Health Screening to Begin at 3 U.S. Airports for 2019 Novel Coronavirus ("2019-nCoV")

The Centers for Disease Control and Prevention (CDC) and the Department of Homeland Security's Customs and Border Protection (CBP) will implement enhanced health screenings to detect ill travelers traveling to the United States on direct or connecting flights from Wuhan, China. This activity is in response to an outbreak in China caused by a novel (new) coronavirus (2019 nCoV), with exported cases to Thailand and Japan.

Starting January 17, 2020, travelers from Wuhan to the United States will undergo entry screening for symptoms associated with 2019-nCoV at three U.S. airports that receive most of the travelers from Wuhan, China: San Francisco (SFO), New York (JFK), and Los Angeles (LAX) airports.

"To further protect the health of the American public during the emergence of this novel coronavirus, CDC is beginning entry screening at three ports of entry. Investigations into this novel coronavirus are ongoing and we are monitoring and responding to this evolving situation," said Martin Cetron, M.D., Director of CDC's Division of Global Migration and Quarantine.

Based on current information, the risk from 2019-nCoV to the American public is currently deemed to be low. Nevertheless, CDC is taking proactive preparedness precautions.

Entry screening is part of a layered approach used with other public health measures already in place to detect arriving travelers who are sick (such as detection and reporting of ill travelers by airlines during travel and referral of ill travelers arriving at a US port of entry by CBP) to slow and reduce the spread of any disease into the United States.

CDC is deploying about 100 additional staff to the three airports (SFO, JFK, and LAX) to supplement existing staff at CDC quarantine stations located at those airports.

CDC is actively monitoring this situation for pertinent information about the source of outbreak, and risk for further spread through person-to-person or animal-to-person transmission. CDC may adjust screening procedures and other response activities as this outbreak investigation continues and more is learned about the newly emerging virus. Entry

screening alone is not a guarantee against the possible importation of this new virus but is an important public health tool during periods of uncertainty and part of a multilayered government response strategy. As new information emerges, CDC will reassess entry screening measures and could scale activities up or down accordingly.

On Jan. 11, 2020, CDC updated a Level 1 Travel Health Notice ("practice usual precautions") for travelers to Wuhan City and an updated Health Alert to health care professionals and public health partners with new and updated guidance is forthcoming.

China health officials report that most of the patients infected with 2019-nCoV have had exposure to a large market where live animals were present, suggesting this is a novel virus that has jumped the species barrier to infect people. Chinese authorities additionally report that several hundred health care workers caring for outbreak patients are being monitored and no spread of this virus from patients to health care workers has been seen. They report no sustained spread of this virus in the community, however there are indications that some limited person-to-person spread may have occurred. CDC is responding to this outbreak out of an abundance of caution, ready to detect people infected with 2019-CoV.

Subject: CDC 2019 Novel Coronavirus (2019-nCoV) call today at 1:00 pm

Date: Friday, January 17, 2020 10:32:30 AM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

CDC's 2019 Novel Coronavirus (2019-nCoV) response team will host an update call from 1 p.m. to 2 p.m. PST on Friday, January 17, to provide state and local partners with the latest information on the novel coronavirus outbreak and US preparedness efforts.

Invited participants include state, local, and territorial preparedness directors, state epidemiologists, state health officials, public health laboratory directors, and nongovernmental partners. Participant information can be found below.

All—
I just sent an email to Marty Cetron and Clive Brown to echo Kathy's concerns regarding referring well passengers from Wuhan City to "their doctor."
Please see below.
Thanks.
Cath

Lockett <clockett@smcgov.org>
Subject: Entry screen and information card given to passengers at SFO

Dear Drs Brown and Martin,

I am writing to echo the concerns that were brought forth by Dr. Harriman.

As you may remember, SFO airport is located in San Mateo County (not in San Francisco County) and we have health jurisdiction once passengers pass the border into the US. Since they pass directly into our county, we and our healthcare partners are on the front lines once the entry screening process begins.

The passengers who will be identified as being PUIs during entry screening processes at SFO will be directed to Mills Peninsula, the closest hospital. While Mills Peninsula does not have the capacity to receive potential Ebola patients, it is able and willing to isolate, evaluate and test passengers from Wuhan City who may be infected with the novel Coronavirus.

However, many health care facilities in our county are not in a position to do so and we share Dr Harriman's concerns in terms of the information provided on the card that will be given to well travelers from Wuhan.

From our perspective, asking tourists who will not have a primary care physician to call their doctor will lead to problems, including but not limited to passengers showing up at facilities (i.e. private offices and small urgent care centers) that will not be prepared to safely evaluate and test the ill passenger(s) due to a lack of AIIRs and testing capability, which will potentially lead to many avoidable patient and staff exposures as well as unnecessary transport between facilities.

Additionally, as Dr Harriman said in her email, while we have the capacity to contact many facilities in our county to relay guidance from CDC, we do not have a good way to communicate information with many of our urgent care clinics, which will be unprepared to receive the passengers that may show up at their doors based on the information contained on the card that will be given to them upon entry.

We think it is preferable to ask well passengers to contact Public Health. While the passengers' destination may be somewhere else in the Bay Area or California, since the passengers will be flying into SFO, we suggest that the card refer passengers to the San Mateo County Communicable Disease Control Program. We will then advise the passenger(s) as to where it would be appropriate to seek care or contact the appropriate jurisdiction, should they no longer be in San Mateo County.

We certainly understand that this is a complicated matter and that other jurisdictions may disagree but we hope that you will consider our rationale and allow Public Health to be the point of contact for Wuhan City passengers visiting the San Francisco Bay Area. All it would take to tailor the card to our local needs and preferences would be to tell well passengers to contact Public Health instead of referring them to their doctor. We are happy to provide you with the appropriate contact information, should you decide to follow our suggestion.

Sincerely,

Catherine Sallenave, MD
Infectious Diseases Staff Physician
Communicable Diseases Controller
San Mateo County Health

Scott Morrow, MD
San Mateo County Health Officer

Cassius Lockett, Ph.D
San Mateo County Public Health Director

Hi Marty and Clive,
We're having an all-county call today at 3:00 PT, and I asked Susan Dwyer at the SFO quarantine station if she had any information about what would be contained on the information card that will be given to well travelers from Wuhan after they're screened at the airport. She said she hadn't seen the card but believed that passengers would be told to call their doctor if symptoms develop.

It this is what is planned, it is very problematic for several reasons:

1. Most passengers from Wuhan will be Chinese nationals who do not have a physician in the US, or even know how to find one.
2. If ill passengers aren't instructed otherwise, it's likely they'd show up in an urgent care clinic or hospital ED, which is problematic because:
    a. We want ill passengers to be referred to a hospital ED with an airborne infection isolation room and the capacity for multiplex viral PCR, and if the facility does not have an ED AIIR or appropriate lab capacity, we would want them transferred to a facility that did.
    b. We do not have a good way to communicate with urgent care clinics in California unless they are part of a healthcare system (and most aren't) so in addition to the fact that they typically don't have AIIRs and PCR capacity, we would not be able to easily provide them with information about appropriate evaluation of PUIs.

In California, we want public health to be able to refer ill passengers to an appropriate

healthcare facility for evaluation and testing. Thank you for your consideration in this matter.
Kathy

Hi all,
As you know, a novel coronavirus has been identified as the cause of a cluster of pneumonia cases among residents of Wuhan, China. Yesterday CDC's Division of Global Migration and Quarantine (DGMQ) announced that screening of passengers whose travel originated in Wuhan will be screened upon arrival at JFK, LAX and SFO airports. CDC intends to issue a HAN on this today or tomorrow.

We have a call set up for **3:00 tomorrow afternoon, January 15, to discuss the implication of this airport screening**. If for some reason, the CDC HAN has not been issued by the time of the call, we'll reschedule the call for Thursday. This will be a statewide call since passengers from Wuhan who are well at the time of airport screening could develop symptoms later while in other locations in California (or other states).

Phone #: **888-411-5128**
Participant Code: **3312382#**

Current situation:
As of Monday, January 13, 2020, the numbers of patients in Wuhan with pneumonia remained at 59, but 41 had been confirmed with the novel coronavirus and one patient had died. This patient had a number of underlying conditions. There have been no cases in China with symptom onset dates after December 29, 2019. No information has been provided to CDC about animal testing at the originally affected wet market. It does not appear that animals at

that market were depopulated so they could have been transferred to other wet markets in Wuhan.

Over the weekend, information was released that a 61 yo female resident of Wuhan, China who had traveled to Thailand on vacation was confirmed in Thailand as being infected with the novel coronavirus. Thailand has been screening passengers arriving on direct flights from Wuhan since January 3, 2020 and as of January 13, had identified 12 ill passengers; 8 of whom have been cleared. Of note, is that the symptom onset date of the new confirmed case was January 5, 2020, and she had not visited the Wuhan wet market implicated in the other cases. She had, however, visited other wet markets during her presumed exposure period. This new case has resulted in the CDC elevating their level of concern about travelers from Wuhan.

Because of this increased concern, CDC, including DGMQ, held a call yesterday morning with public health representatives from state, county, and city health departments in the vicinity of JFK, LAX, and SFO airports. A second call was held yesterday afternoon for all state health departments. Seventy-five percent of passengers who initiate travel in Wuhan, China, arrive in the US at JFK, LAX and SFO via direct or indirect flights. We are trying to obtain estimates of the number of passengers from Wuhan who arrive on direct and indirect flights to LAX and SFO each week.

Actions that will be taken:

1. Pilots on flights with passengers from Wuhan will be asked to complete documents stating that passengers appeared well. This is expected to enhance identification of ill passengers both before and during flights.
2. All passengers with travel originating in Wuhan on direct or indirect flights who are arriving at JFK, LAX or SFO will identified at arrival and screened for fever and respiratory symptoms by DGMQ staff. This screening is expected to begin on Thursday, January 16, 2020 and continue for at least two weeks through the Chinese New Year travel period. Chinese New Year is January 25, 2020.
3. Any passenger from Wuhan with fever or respiratory symptoms will be evaluated by DGMQ medical staff and potentially referred to a hospital.
4. Passengers referred to the hospital will be tested for standard respiratory viruses and potentially for the new coronavirus, which CDC now has the ability to do. Test kits are being developed for state health departments, but they are not yet available.
5. Recommended infection control precautions for passengers referred to a healthcare setting are standard + contact + airborne precautions + eye protection.
6. Passengers without symptoms at US entry will be given information on symptoms to watch for over the next 14 days as well as how to self-isolate, contact public health and obtain healthcare if symptoms occur. There will be no active monitoring of these passengers at this time. Passenger information will be provided in Mandarin and English.
7. It would be optimal for ill passengers to be referred to a hospital with negative pressure

rooms in its ED, and the capacity to perform rapid multiplex PCR testing for viral pathogens, eg, Biofire or similar testing.

8. The CDC HAN will contain additional information that will hopefully clarify testing protocols, etc.

This patient had a number of underlying conditions. There have been no cases in China with symptom onset dates after December 29, 2019. No information has been provided to CDC about animal testing at the originally affected wet market. It does not appear that animals at that market were depopulated so they could have been transferred to other wet markets in Wuhan.

Over the weekend, information was released that a 61 yo female resident of Wuhan, China who had traveled to Thailand on vacation was confirmed in Thailand as being infected with the novel coronavirus. Thailand has been screening passengers arriving on direct flights from Wuhan since January 3, 2020 and as of January 13, had identified 12 ill passengers; 8 of whom have been cleared. Of note, is that the symptom onset date of the new confirmed case was January 5, 2020, and she had not visited the Wuhan wet market implicated in the other cases. She had, however, visited other wet markets during her presumed exposure period. This new case has resulted in the CDC elevating their level of concern about travelers from Wuhan.

Because of this increased concern, CDC, including DGMQ, held a call yesterday morning with public health representatives from state, county, and city health departments in the vicinity of JFK, LAX, and SFO airports. A second call was held yesterday afternoon for all state health departments. Seventy-five percent of passengers who initiate travel in Wuhan, China, arrive in the US at JFK, LAX and SFO via direct or indirect flights. We are trying to obtain estimates of the number of passengers from Wuhan who arrive on direct and indirect flights to LAX and SFO each week.

Actions that will be taken:

1. Pilots on flights with passengers from Wuhan will be asked to complete documents stating that passengers appeared well. This is expected to enhance identification of ill passengers both before and during flights.

2. All passengers with travel originating in Wuhan on direct or indirect flights who are arriving at JFK, LAX or SFO will identified at arrival and screened for fever and respiratory symptoms by DGMQ staff. This screening is expected to begin on Thursday, January 16, 2020 and continue for at least two weeks through the Chinese New Year travel period. Chinese New Year is January 25, 2020.

3. Any passenger from Wuhan with fever or respiratory symptoms will be evaluated by DGMQ medical staff and potentially referred to a hospital.

4. Passengers referred to the hospital will be tested for standard respiratory viruses and potentially for the new coronavirus, which CDC now has the ability to do. Test kits are being developed for state health departments, but they are not yet available.

5. Recommended infection control precautions for passengers referred to a healthcare setting are standard + contact + airborne precautions + eye protection.

6. Passengers without symptoms at US entry will be given information on symptoms to watch for over the next 14 days as well as how to self-isolate, contact public health and obtain healthcare if symptoms occur. There will be no active monitoring of these passengers at this time. Passenger information will be provided in Mandarin and English.

7. It would be optimal for ill passengers to be referred to a hospital with negative pressure rooms in its ED, and the capacity to perform rapid multiplex PCR testing for viral pathogens, eg, Biofire or similar testing.

8. The CDC HAN will contain additional information that will hopefully clarify testing protocols, etc.

Subject: RE: Wuhan China pneumonia cluster and Port of Entry Activities

Hi all,

The call took place earlier today. It was conducted by CDC DGMQ director Dr. Marty Cetron, along with Dr. Clive Brown (chief of quarantine branch). Other participants included CDPH, San Mateo county, Alameda county, LA county, NYC, and quarantine station officers at JFK, LAX, and SFO. The purpose of the call was to provide a high-level situation report and describe their thinking in terms of managing potential importation based on the current risk assessment.

There are reports of an outbreak of pneumonia in Wuhan, China, potentially due to a novel coronavirus thought to be related to an exposure at a seafood and live animal market in Wuhan. The market has been closed and undergone disinfection. The first case was reported as occurring around Dec 12, and the last case was reported occurring around 12/29. Total case count is 59 cases, 7 of which were reported as severe. Most cases were described as bilateral pneumonias consistent with a viral etiology. Last report of any cases was on 1/5/2020; no updated reports since then. The information is primarily coming from Wuhan city health officials reporting to the China CDC (not the U.S. CDC office in China); there is relatively limited epi information available – no detailed clinical description of patients has been provided, no epi curve with onset dates other than the first and latest occurrences.

Recent news has described a novel coronavirus in the SARS-like family but distinct from SARS and MERS. The new coronavirus has been identified by pcr in 15 of the patients, and the whole genome was sequenced from one of the patients. CDC has not received any sequences or specimens yet. Chinese authorities have reportedly created a diagnostic PCR. Coronaviruses often have animal reservoirs, and investigations are underway to identify an animal reservoir in this case, but at this time it is unknown. Other testing that was reported negative by Wuhan health authorities include: seasonal flu, avian flu, adenovirus, SARS CoV 2003, MERS CoV.

There have been no reports of sustained person-to-person transmission. No reports of HCW illness or nosocomially acquired infection. No confirmed reports of person to person spread among the 150 or so contacts that have been followed. No known cases identified outside of Wuhan.

There are about 4 million travelers every year from China to the U.S. Main US destination ports on an annual basis are SFO, LAX, and JFK. From Wuhan specifically, there are about 58,000 travelers to the U.S. over the course of the year. LAX, SFO, and JFK receive almost 75% of the incoming passengers from Wuhan (Wuhan city itself has over 10 million residents). January tends to be one of the busier months for travel because of the Chinese new year. In January 2019, there were 1,447 passengers who traveled directly from Wuhan into SFO (this represented about a quarter of all travelers from Wuhan into the U.S. that month) – they anticipate that there will be a similar number of travelers this month. There is a nonstop China Southern Airlines flight from Wuhan to SFO three times a week, that arrives on Tu/Th/Sat around 11am (there are other airlines that provide service from Wuhan with connecting flights). There is no active exit screening occurring in Wuhan, although CDC has offered assistance with this and is awaiting a response. Some countries have implemented entry screening for persons coming from Wuhan (Taiwan, Singapore, Hong Kong, some of the Russian border provinces, among others). CDC at this time is not planning on implementing formal entry screening from Wuhan, however they are planning to educate CBP officers and reach out to the main airlines to watch out for individuals who are visibly ill and are traveling from Wuhan. CDC has stood up their incident management structure to provide a central coordinated response but have not activated EOC at this time. They are in the process of developing additional infection control guidance, management information, case definition, and a PUI hotline; they are also planning more clinician and health dept calls.

Current CDC threat assessment is that in the absence of confirmed sustained human-to-human transmission and without newly reported incident cases since the closure of the market, the risk for

international spread to the US is thought to be low. CDC is still waiting on additional epi information to further inform their assessment, but the thought is that if there were sustained multigenerational spread that occurred readily, they would have expected to hear about other cases outside of Wuhan by now. Potential triggers for moving into active entry screening would include evidence of sustained multigenerational human-to-human transmission, rapid increases in case counts, internationally exported cases. Given that we are in the midst of flu season, there is concern that there would be a large number of false positives if screening were to be implemented now.

Generally the situation is dynamic, and CDC has some ongoing communication with China CDC, but not necessarily on a daily basis, and they are currently awaiting additional information.

Please let me know if you have questions.
Thanks,
Julie

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Good-day,
I know everyone has been following with interest the reports out of Wuhan, China regarding a cluster of Cluster of Pneumonia Cases, possibly related to a novel coronavirus. The WHO issued the following statement:
https://www.who.int/china/news/detail/09-01-2020-who-statement-regarding-cluster-of-pneumonia-cases-in-wuhan-china

DGMQ has a report confirming that Russia has strengthened Quarantine control on its border with China due to the outbreak; this was partly done in anticipation of increased travel volume for the upcoming celebration of the Chinese New Year on January 25. The report did not specify the nature of border control activities. We have also heard through a variety of channels that other nearby countries have implemented border control actions for persons arriving from China.

As is usual in these situations, the US CDC, specifically DGMQ, aims to implement border control measures commensurate with the estimated risk, while continually evaluating the situation to determine the need to adjust our actions. In addition to publishing a Travel Health Notice: https://wwwnc.cdc.gov/travel/notices/watch/pneumonia-china, (please continually check for updates), we're working to provide enhanced communications to our partners and the public at our ports of entry.

While travelers from Wuhan, China arrive at a number of US Ports of Entry, a large proportion of those travelers arrive via San Francisco (SFO), Los Angeles (LAX) and NYC (JFK), including direct flights 3-days per week to (1) SFO via China Southern (with apparent codeshares with American Airlines and Delta) and (2) JFK via China Southern.

As part of our preparedness discussions, Marty Cetron and I would like to host a teleconference to update you on potential plans and activities at our Ports of Entry. If possible we would like to have this meeting either Friday January 10 or Monday January 13, let's say 10:30am or later to ensure participation by our West Coast partners.

Could you please provide Laquanda Lee cc'd here, with possible times on those days, and she will coordinate with Marty's schedule.

Once the meeting is scheduled, I will invite my staff from SFO, LAX and JFK so that they will also be on the call.

Thank you and please let me know if there are any questions.

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Hi All,

You may already have this by now, but I thought I'd send Clive's update...

Sorry for the late evening update, but will likely be in the news tomorrow, if not already. (6:29pm Friday)

The **case count has been updated** by authorities in China and **a death** has now been reported. Also note what seems to be **a later date of onset**; OD says late today the SMEs reported they were told a new last date of onset of **Dec 31**, this report seems to suggest, but is somewhat unclear, that it's **Jan 3**. If that's the case and we assume the incubation period is 14 days (which is still unknown since it's a new virus), that would mean **observation for new cases should continue until at least Jan 17** next Friday. They still report no HCW illnesses and no suggestion of efficient person to person transmission. However it's most likely we would still watch for another IP until Jan 31, to make absolutely sure there were unbroken chains of transmission.

> **The SMEs note that they will need to work to confirm the accuracy of this new information.**

The report from Wuhan states in summary:

> *"... initial diagnosis of a new coronavirus infection of pneumonia cases 41 cases, of*

which 2 cases have been discharged from the hospital, 7 cases of severe illness, 1 case of death, the remaining patients stable condition. No new cases have been detected since 3 January 2020. At present, no medical personnel infection has been found, no clear human-to-human evidence has been found.

Translated summary *(translation appears when you open the link on your device.: http://wjw.wuhan.gov.cn/front/web/showDetail/2020011109035)*:

Sorry for the late evening update, but will likely be in the news tomorrow, if not already.

- The new name for the response is: **Novel Coronavirus (nCoV) 2019 Response.** Please use this moving forward especially for any documents we develop.
- **There is a new CDC Website** for the response which can be found at: https://www.cdc.gov/coronavirus/novel-coronavirus-2019.html
- **For any lab guru's among you; Sequence notice**: http://virological.org/t/initial-genome-release-of-novel-coronavirus/319

This morning from Clive: (1/11/20)

Updated info from Wuhan:

- Illness onset dates adjusted to 12/8/2019 to 1/2/2020.
- Since 1/3 they have not found any additional infected cases.
    - So Jan 2 seems to be the last date of onset. Assuming 14 day incubation period (IP) watching for one IP would end on Jan 16, 2-IP would end Jan 30. If no more cases, assuming there is no other source, all clear on Jan 31.
- Clinical presentation...Fever, fatigue accompanied by dry cough, hospitalized patients often had respiratory distress. The majority came into the hospital with stable vital signs.
- The one Wuhan reported death had co-morbidities (see more details below).
- Still no confirmed person to person transmission.
    - Based on the investigation, most cases have exposure history to the Hua NaN Market.
    - No confirmed person to person transmission.
    - Additionally, no cases have been found among close contacts or healthcare workers
    - Continuing epidemiological and laboratory investigation.

Particularly for the QMOs:

- Description of the death:
    - *61 year old man with stomach cancer and chronic liver disease who came into the hospital with respiratory failure and severe pneumonia. He was a purchaser at the Hua Nan Market for many years. In the hospital he was given treatment and antimicrobials and respiratory support, and ECMO but his symptoms did not improve. On the evening of 1/9 he had a cardiac arrest, was unable to be resuscitated and died. He was PCR positive for the novel coronavirus. At death he was diagnosed with severe pneumonia, acute respiratory failure, septic shock, multiorgan failure, acid base disturbance, and cirrhosis. Primary cause of death was respiratory and circulatory collapse*

- Late last night, WHO posted its guidance package and other information at https://www.who.int/health-topics/coronavirus
    - Their technical documents for novel coronavirus includes:

Case definitions
- Laboratory guidance
- Infection prevention and control
- Risk communications
- Readiness checklist
- Disease commodity package for novel coronavirus

Particularly of note for Z-Team:

- The sequencing suggests a **bat CoV related to SARS**. The novel CoV GSD appears to been released publicly on virological.org

Subject: Wuhan China pneumonia cluster and Port of Entry Activities

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Good-day,
I know everyone has been following with interest the reports out of Wuhan, China regarding a cluster of Cluster of Pneumonia Cases, possibly related to a novel coronavirus. The WHO issued the following statement:
https://www.who.int/china/news/detail/09-01-2020-who-statement-regarding-cluster-of-pneumonia-cases-in-wuhan-china

DGMQ has a report confirming that Russia has strengthened Quarantine control on its border with China due to the outbreak; this was partly done in anticipation of increased travel volume for the upcoming celebration of the Chinese New Year on January 25. The report did not specify the

nature of border control activities. We have also heard through a variety of channels that other nearby countries have implemented border control actions for persons arriving from China.

As is usual in these situations, the US CDC, specifically DGMQ, aims to implement border control measures commensurate with the estimated risk, while continually evaluating the situation to determine the need to adjust our actions. In addition to publishing a Travel Health Notice: https://wwwnc.cdc.gov/travel/notices/watch/pneumonia-china, (please continually check for updates), we're working to provide enhanced communications to our partners and the public at our ports of entry.

While travelers from Wuhan, China arrive at a number of US Ports of Entry, a large proportion of those travelers arrive via San Francisco (SFO), Los Angeles (LAX) and NYC (JFK), including direct flights 3-days per week to (1) SFO via China Southern (with apparent codeshares with American Airlines and Delta) and (2) JFK via China Southern.

As part of our preparedness discussions, Marty Cetron and I would like to host a teleconference to update you on potential plans and activities at our Ports of Entry. If possible we would like to have this meeting either Friday January 10 or Monday January 13, let's say 10:30am or later to ensure participation by our West Coast partners.

Could you please provide Laquanda Lee cc'd here, with possible times on those days, and she will coordinate with Marty's schedule.

Once the meeting is scheduled, I will invite my staff from SFO, LAX and JFK so that they will also be on the call.

Thank you and please let me know if there are any questions.

Clive

Hi all,

The call took place earlier today. It was conducted by CDC DGMQ director Dr. Marty Cetron, along with Dr. Clive Brown (chief of quarantine branch). Other participants included CDPH, San Mateo county, Alameda county, LA county, NYC, and quarantine station officers at JFK, LAX, and SFO. The purpose of the call was to provide a high-level situation report and describe their thinking in terms of managing potential importation based on the current risk assessment.

There are reports of an outbreak of pneumonia in Wuhan, China, potentially due to a novel coronavirus thought to be related to an exposure at a seafood and live animal market in Wuhan. The market has been closed and undergone disinfection. The first case was reported as occurring around Dec 12, and the last case was reported occurring around 12/29. Total case count is 59 cases, 7 of which were reported as severe. Most cases were described as bilateral pneumonias consistent with a viral etiology. Last report of any cases was on 1/5/2020; no updated reports since then. The information is primarily coming from Wuhan city health officials reporting to the China CDC (not the U.S. CDC office in China); there is relatively limited epi information available – no detailed clinical description of patients has been provided, no epi curve with onset dates other than the first and latest occurrences.

Recent news has described a novel coronavirus in the SARS-like family but distinct from SARS and MERS. The new coronavirus has been identified by pcr in 15 of the patients, and the whole genome was sequenced from one of the patients. CDC has not received any sequences or specimens yet. Chinese authorities have reportedly created a diagnostic PCR. Coronaviruses often have animal reservoirs, and investigations are underway to identify an animal reservoir in this case, but at this time it is unknown. Other testing that was reported negative by Wuhan health authorities include: seasonal flu, avian flu, adenovirus, SARS CoV 2003, MERS CoV.

There have been no reports of sustained person-to-person transmission. No reports of HCW illness or nosocomially acquired infection. No confirmed reports of person to person spread among the 150 or so contacts that have been followed. No known cases identified outside of Wuhan.

There are about 4 million travelers every year from China to the U.S. Main US destination ports on an annual basis are SFO, LAX, and JFK. From Wuhan specifically, there are about 58,000 travelers to the U.S. over the course of the year. LAX, SFO, and JFK receive almost 75% of the incoming passengers from Wuhan (Wuhan city itself has over 10 million residents). January tends to be one of the busier months for travel because of the Chinese new year. In January 2019, there were 1,447 passengers who traveled directly from Wuhan into SFO (this represented about a quarter of all travelers from Wuhan into the U.S. that month) – they anticipate that there will be a similar number of travelers this month. There is a nonstop China Southern Airlines flight from Wuhan to SFO three times a week, that arrives on Tu/Th/Sat around 11am (there are other airlines that provide service from Wuhan with connecting flights). There is no active exit screening occurring in Wuhan,

although CDC has offered assistance with this and is awaiting a response. Some countries have implemented entry screening for persons coming from Wuhan (Taiwan, Singapore, Hong Kong, some of the Russian border provinces, among others). CDC at this time is not planning on implementing formal entry screening from Wuhan, however they are planning to educate CBP officers and reach out to the main airlines to watch out for individuals who are visibly ill and are traveling from Wuhan. CDC has stood up their incident management structure to provide a central coordinated response but have not activated EOC at this time. They are in the process of developing additional infection control guidance, management information, case definition, and a PUI hotline; they are also planning more clinician and health dept calls.

Current CDC threat assessment is that in the absence of confirmed sustained human-to-human transmission and without newly reported incident cases since the closure of the market, the risk for international spread to the US is thought to be low. CDC is still waiting on additional epi information to further inform their assessment, but the thought is that if there were sustained multigenerational spread that occurred readily, they would have expected to hear about other cases outside of Wuhan by now. Potential triggers for moving into active entry screening would include evidence of sustained multigenerational human-to-human transmission, rapid increases in case counts, internationally exported cases. Given that we are in the midst of flu season, there is concern that there would be a large number of false positives if screening were to be implemented now.

Generally the situation is dynamic, and CDC has some ongoing communication with China CDC, but not necessarily on a daily basis, and they are currently awaiting additional information.

Please let me know if you have questions.
Thanks,
Julie

From:	California Health Alert Network
To:	Aragon, Tomas (DPH)
Subject:	CAHAN Disease Notification -- CDC HAN 424: Outbreak of Pneumonia of Unknown Etiology (PUE) in Wuhan, China
Date:	Wednesday, January 8, 2020 3:03:15 PM
Attachments:	CDC+HAN+424_Pneumonia+Outbreak+in+Wuhan+China_01.08.2020.pdf

The Centers for Disease Control and Prevention (CDC) is closely monitoring a reported cluster of pneumonia of unknown etiology (PUE) with possible epidemiologic links to a large wholesale fish and live animal market in Wuhan City, Hubei Province, China. An outbreak investigation by local officials is ongoing in China; the World Health Organization (WHO) is the lead international public health agency. Currently, there are no known U.S. cases nor have cases been reported in countries other than China. CDC has established an Incident Management Structure to optimize domestic and international coordination if additional public health actions are required.

This Health Alert Network (HAN) Advisory informs state and local health departments and health care providers about this outbreak and requests that health care providers ask patients with severe respiratory disease about travel history to Wuhan City. Wuhan City is a major transportation hub about 700 miles south of Beijing with a population of more than 11 million people.

The full health alert is attached and available at the following link:
https://emergency.cdc.gov/han/HAN00424.asp

Requester,

We have conducted a diligent search for records responsive to your request. We have located responsive records, which are available to you here and have also been uploaded to NextRequest case #20-1076/ SOTF File 20059. Due to the need to continue reviewing, we will produce any additional responsive records on a rolling basis.

Thank you.

Subject: Public Records Request #20-1076

Hello,
I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2"

"2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

Hello all, Sorry for the brief email. On BART heading to Child Care Planning and Advisory Council (CPAC) meeting.

Curtis, thank you so much for the summary of Child Care Health Program activities thus far.

Tomas, thank you for sharing the guidance document for Child Care/ECE. This is extremely helpful!

I am looping in Elenita Silva, CCHP PHN as she has been activated in a clinical consultation role. and will be pausing many of her regular CCHP duties to assist with the response.

I am looping in Xin (Katie) Liu, CCHP PHN as she serves many ECE sites supporting the Chinese/Chinese American community and has insight to the education needs and requests at her sites.

Curtis, let's meet this afternoon. What time works for you? I will be there as well as possibly Anna, Ellen, and Katie Liu.

See you this afternoon, Katie

Katie DellaMaria, MSN, PHN, RN

Subject: Guidance for Child Care Centers re Coronavirus?

Hi Tomas and Susan:

What have you heard from CDPH regarding guidance for "childcare" or "early childhood education"?

Katie Dellamaria, Nurse Manager of the Childcare Health Program (of PHNs, Health Workers, &PH specialist) have been gathering concerns from the child care community, summarizing key information from CDC, CDPH, and SFDPH, and will provide a brief update to ECE leaders this morning at the Child Care Planning and Advisory Council are perfect. Katie will emphasize hearing the concerns and suggestions of the child care community and their families. With community information gathered by Child Care Health Program, SFDPH can consider these concerns and suggestions in context with our local epidemiology and other disease prevention measures to provide the best guidance possible as the situation evolves.

Sample of questions that childcare community has asked just one of several PHN (Katie Liu, RN) until 2/5:

1/15/20 - Anna (Director) from **Little Footprint**

- Question about families and teachers coming from China/quarantine?
- Route of contact for Coronavirus
- Incubation time and if the virus can be transmitted during incubation time.

1/27/20 – Gloria Tang (executive director)from **Gum Moon (AWRC)**

- Question about families and teachers coming from China/quarantine needed?

1/27/20 – Nakita Chow (Operational Manager) from **CCFC**

- Question about if children and teachers coming back from China can come back to the center right away.

1/28/20 – Helen (Site manager) from **Little Footprint**

- Question about families and teachers coming from China/quarantine?
- Route of contact for Coronavirus
- Incubation time and if the virus can be transmitted during incubation time.

1/31/20 – Sandra Davis (Director)from **1st Place 2 Start**

- Concern about second confirmed case in Santa Clara and if there is special preventative measures that the school needed to take.

2/3/20 – Marianne Reyneker (Director) from **Story Book Preschool**

- Concerns about families and children returning from China, if they can return to school.

2/5/20 – April Bacsafra (FCCHN Manager, used to be FACCESF Hayes Valley manager) from **FACESSF**

- Concerns about families and children returning from China, if they can return to school.

I'm very grateful and inspired to read/hear how well CCHP staff have kept updated on public health guidelines, and answered complex questions for the child care community. As people return from China with 14-day home quarantine, there will surely be many more questions for young children. I plan to find a time when Diane, Katie, and her team are available today to meet. We can update each other about the situation at childcare centers, SFUSD, the method of collecting key questions, process to coordinate an approach between SFDPH - SFUSD - OECE in answering questions, and some short-term outcomes to support the childcare community (e.g., contextualizing/distributing CDPH FAQ for childcare or schools).

Thanks,
curtis

Tomas,

The meeting with SFUSD from 1:30-3:30pm today will be at: 1515 Quintara St, (cross with 24th Avenue).

Director of Public Health Nursing will be joining us, and I'll invite Katie Dellamaria, Nurse Manager of the Child Care Health Program to attend too.

Mary Jue and I had set-aside this 2-hour block to review/update/sign the Medical/Nursing protocols for SFUSD, so I may stay a little bit longer to review those documents. Everyone else is welcome to stay (until 4:30?) to review those too.

Thanks,
curtis

Subject: Re: Fw: CAHAN Disease Guidance Notification – 2019 Novel Coronavirus Guidance for Schools and School Districts

Hi,

I'm sorry for the confusion. Tomas, I gave SFUSD a copy of the CDPH Draft Guidance we had, along with the LHD/school district from other Bay Area jurisdictions.

I would consider **NOT** including that language because:

- It's from DRAFT guidance that has has been replaced with official guidance on February 7th. I presume they struck out that language for good reasons.
- I'm not sure about the extent in which both parts of the statement are totally true. "Persons who have arrived from China prior to February 3, 2020 are at lower risk and do not need to be excluded." That does seem to be simplified logic *implied* by the CDC guidance on February 3rdhttps://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html,

but the science of that date being as a cut-off is not very clear to me. Although I respect and agree with Feb 3rd as a cut-off date, I don't think that we should repeatedly emphasize that date.

- The SFDPH/SFUSD approach, instead, acknowledges the variability of the February 3rd cut-off, and provide additional measures for those who returned before February 3rd:
  - Travelers who returned from China in the two-weeks**before** February 3rd have been **added** to the Low-Risk category.
  - The San Francisco Department of Public Health recommends that travelers who returned from China **BEFORE February 3** monitor themselves for 14 days after their last day in China. If symptoms (fever, cough, or shortness of breath) occur during that time, please contact your health provider, inform them of your travel history and self-isolate at home pending their advice. Do not go to work, school or social events if you have these symptoms. https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/ https://www.sfcdcp.org/wp-content/uploads/2020/02/Interim-Guidance-on-Monitoring-and-Movement-for-San-Franciscans-and-Travel-Before-Feb-3rd-SFDPH-FINAL-02.07.2020.pdf (is very excellent)
  - ??? SFUSD is enhancing its school and nursing protocols for students with respiratory illness, such as fever and cough. Enhancements include additional training, equipment, and procedures. The additional procedures include assessing if students had been away for prolonged travel (e.g., >3 days by school attendance); and if so, asking if they've traveled out of the U.S. and in endemic areas.
  - ??? I don't know if SFUSD has made plans for returning travelers to participate in school education away from school.

Thank you.

Yours,
curtis

This is correct:
"Persons who have arrived from China prior to February 3, 2020 are at lower risk and do not need to be excluded."

Other Bay Area health departments are using this guidance.

Curtis, anything to add.

Thanks for the phone call today, Curtis. I appreciate going deeper into these discussions and peeling apart the layers.

I wanted to confirm that you believe the CDPH guidance for schools and school districts is OK for sharing. That said, the language in the DRAFT guidance that you shared (in the packet of info) has language that might also be helpful: "Persons who have arrived from China prior to February 3, 2020 are at lower risk and do not need to be excluded."Would it be OK to use that language, in addition to distributing the CDPH guidelines?

Based on our conversation, we will continue to follow SF DPH and CDPH guidance. I hope DPH will be able to come up with a speak for the Lau/Parker/Newcomer community meeting. Please keep me posted.

See you tomorrow!

>
> Thank you very much for your great work in communicating with your school district's students and families; and your ongoing communications with the San Francisco Department of Public Health. We appreciate all of your excellent questions and thoughtful approaches to some complex cases.
>
> Today, Dr. Aragon and I discussed the excellent response of SFUSD, the letter that SFUSD sent to families (last updated February 5th). As you can compare with other letters sent from school districts/ health departments, the SFUSD letter was comprehensive and very clear.

As I was relating the draft CDPH guidance with you earlier, local health departments have been planning with each other and with CDPH to respond to this emerging threat of an epidemic. The Chinese and U.S. governments https://www.cdc.gov/coronavirus/2019-ncov have issued an unprecedented scale of quarantine orders, so public health experts are still determining how such orders and guidelines should be recommended. The California Department of Public Health guideline that planned for release on Wednesday-Thursday was finally released this evening. I am forwarding it to you now.

As you can read, the new CDPH guidance is very much aligned with the SFUSD (2/5/2020) and SFDPHwww.sfcdcp.org guidance. The new CDPH guidance emphasizes some actionable steps that schools may need to prepare for or consider include:

- Separate sick students and staff from others until they can go home. When feasible, identify a "sick room" through which others do not regularly pass.
- A note about face masks: face masks are most useful for preventing disease spread when they are worn by people who have symptoms. This is why people are asked to wear a mask at doctors' offices and hospitals if they are coughing or sneezing.
- Update emergency plans to ensure they are in place before an outbreak occurs.
- Please note that there have been reports of students and others being stigmatized. We urge schools to ensure students' and staffs' privacy to help prevent discrimination.

Whereas you've helped lead an excellent response for our many public school students and their families in San Francisco in this first-week of responding to the federal quarantine guidelines, I think that school "emergency plans" (e.g., for infectious diseases and pandemics) will be very useful to consider soon. With people continuing to return from China and more capacity for laboratories to test 2019 Novel Coronavirus, there is an increasing possibility of cases in San Francisco and even the virus circulating. Plans for student/staff safety and the continuity of education would need to be implemented. These are issues that all schools will need to grapple with in California, so I look forward to discussing with you and supporting best-practices with you.

I'm hopeful that issues are stable at the school district over the weekend, but feel free to call me anytime on my personal cell 650-580-2335.

Thank you so much for protecting the health and safety of students in San Francisco.

In health,

Date:	Wednesday, February 12, 2020 8:08:05 AM

Hi Tomas and Susan:

What have you heard from CDPH regarding guidance for "childcare" or "early childhood education"?

Katie Dellamaria, Nurse Manager of the Childcare Health Program (of PHNs, Health Workers, &PH specialist) have been gathering concerns from the child care community, summarizing key information from CDC, CDPH, and SFDPH, and will provide a brief update to ECE leaders this morning at the Child Care Planning and Advisory Council are perfect. Katie will emphasize hearing the concerns and suggestions of the child care community and their families. With community information gathered by Child Care Health Program, SFDPH can consider these concerns and suggestions in context with our local epidemiology and other disease prevention measures to provide the best guidance possible as the situation evolves.

Sample of questions that childcare community has asked just one of several PHN (Katie Liu, RN) until 2/5:

1/15/20 - Anna (Director) from **Little Footprint**

- Question about families and teachers coming from China/quarantine?
- Route of contact for Coronavirus
- Incubation time and if the virus can be transmitted during incubation time.

1/27/20 – Gloria Tang (executive director)from **Gum Moon (AWRC)**

- Question about families and teachers coming from China/quarantine needed?

1/27/20 – Nakita Chow (Operational Manager) from **CCFC**

- Question about if children and teachers coming back from China can come back to the center right away.

1/28/20 – Helen (Site manager) from **Little Footprint**

- Question about families and teachers coming from China/quarantine?
- Route of contact for Coronavirus
- Incubation time and if the virus can be transmitted during incubation time.

1/31/20 – Sandra Davis (Director)from **1st Place 2 Start**

- Concern about second confirmed case in Santa Clara and if there is special preventative measures that the school needed to take.

2/3/20 – Marianne Reyneker (Director) from **Story Book Preschool**

- Concerns about families and children returning from China, if they can return to school.

2/5/20 – April Bacsafra (FCCHN Manager, used to be FACCESF Hayes Valley manager) from **FACESSF**

- Concerns about families and children returning from China, if they can return to school.

I'm very grateful and inspired to read/hear how well CCHP staff have kept updated on public health guidelines, and answered complex questions for the child care community. As people return from China with 14-day home quarantine, there will surely be many more questions for young children. I plan to find a time when Diane, Katie, and her team are available today to meet. We can update each other about the situation at childcare centers, SFUSD, the method of collecting key questions, process to coordinate an approach between SFDPH - SFUSD - OECE in answering questions, and some short-term outcomes to support the childcare community (e.g., contextualizing/distributing CDPH FAQ for childcare or schools).

Thanks,
curtis

Curtis,
I'm sorry I could not join you today for the meeting with SFUSD. I look forward to hearing the outcome and seeing the updated protocols.

Child Care Health Program continues to compile questions PHNs are fielding from ECE

community members, and I hope to provide a very brief update to ECE leaders at the Child Care Planning and Advisory Council (CPAC) Meeting tomorrow morning.

Please feel free to let me know if there are any pressing items you would like me to share/ask at the CPAC meeting tomorrow.

Tomas,

The meeting with SFUSD from 1:30-3:30pm today will be at: 1515 Quintara St, (cross with 24th Avenue).

Director of Public Health Nursing will be joining us, and I'll invite Katie Dellamaria, Nurse Manager of the Child Care Health Program to attend too.

Mary Jue and I had set-aside this 2-hour block to review/update/sign the Medical/Nursing protocols for SFUSD, so I may stay a little bit longer to review those documents. Everyone else is welcome to stay (until 4:30?) to review those too.

Thanks,
curtis

Subject: Re: Fw: CAHAN Disease Guidance Notification – 2019 Novel Coronavirus Guidance for Schools and School Districts

Hi,

I'm sorry for the confusion. Tomas, I gave SFUSD a copy of the CDPH Draft Guidance we had, along with the LHD/school district from other Bay Area jurisdictions.

I would consider **NOT** including that language because:

- It's from DRAFT guidance that has has been replaced with official guidance on February 7th. I presume they struck out that language for good reasons.
- I'm not sure about the extent in which both parts of the statement are totally true. "Persons who have arrived from China prior to February 3, 2020 are at lower risk and do not need to be excluded." That does seem to be simplified logic *implied* by the CDC guidance on February 3rdhttps://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html, but the science of that date being as a cut-off is not very clear to me. Although I respect and agree with Feb 3rd as a cut-off date, I don't think that we should repeatedly emphasize that date.

- The SFDPH/SFUSD approach, instead, acknowledges the variability of the February 3rd cut-off, and provide additional measures for those who returned before February 3rd:
    - Travelers who returned from China in the two-weeks**before** February 3rd have been **added** to the Low-Risk category.
    - The San Francisco Department of Public Health recommends that travelers who returned from China **BEFORE February 3** monitor themselves for 14 days after their last day in China. If symptoms (fever, cough, or shortness of breath) occur during that time, please contact your health provider, inform them of your travel history and self-isolate at home pending their advice. Do not go to work, school or social events if you have these symptoms. https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/ https://www.sfcdcp.org/wp-content/uploads/2020/02/Interim-Guidance-on-Monitoring-and-Movement-for-

San-Franciscans-and-Travel-Before-Feb-3rd-SFDPH-FINAL-02.07.2020.pdf (is very excellent)

- ??? SFUSD is enhancing its school and nursing protocols for students with respiratory illness, such as fever and cough. Enhancements include additional training, equipment, and procedures. The additional procedures include assessing if students had been away for prolonged travel (e.g., >3 days by school attendance); and if so, asking if they've traveled out of the U.S. and in endemic areas.
- ??? I don't know if SFUSD has made plans for returning travelers to participate in school education away from school.

Thank you.

Yours,
curtis

This is correct:
"Persons who have arrived from China prior to February 3, 2020 are at lower risk and do not need to be excluded."

Other Bay Area health departments are using this guidance.

Curtis, anything to add.

Tomas

Thanks for the phone call today, Curtis. I appreciate going deeper into these discussions and peeling apart the layers.

I wanted to confirm that you believe the CDPH guidance for schools and school districts is OK for sharing. That said, the language in the DRAFT guidance that you shared (in the packet of info) has language that might also be helpful: "Persons who have arrived from China prior to February 3, 2020 are at lower risk and do not need to be excluded."Would it be OK to use that language, in addition to distributing the CDPH guidelines?

Based on our conversation, we will continue to follow SF DPH and CDPH guidance. I hope DPH will be able to come up with a speak for the Lau/Parker/Newcomer community meeting. Please keep me posted.

See you tomorrow!

On Fri, Feb 7, 2020 at 8:35 PM Chan, Curtis (DPH) <curtis.chan@sfdph.org> wrote:

Dear SFUSD Health Team:

Thank you very much for your great work in communicating with your school district's students and families; and your ongoing communications with the San Francisco Department of Public Health. We appreciate all of your excellent questions and thoughtful approaches to some complex cases.

Today, Dr. Aragon and I discussed the excellent response of SFUSD, the letter that SFUSD sent to families (last updated February 5th). As you can compare with other letters sent from school districts/ health departments, the SFUSD letter was comprehensive and very clear.

As I was relating the draft CDPH guidance with you earlier, local health departments have been planning with each other and with CDPH to respond to this emerging threat of an epidemic. The Chinese and U.S. governments https://www.cdc.gov/coronavirus/2019-ncov have issued an unprecedented scale of quarantine orders, so public health experts are still determining how such orders and guidelines should be recommended. The California Department of Public Health guideline that planned for release on Wednesday-Thursday was finally released this evening. I am forwarding it to you now.

As you can read, the new CDPH guidance is very much aligned with the SFUSD (2/5/2020) and SFDPHwww.sfcdcp.org guidance. The new CDPH guidance emphasizes some actionable steps that schools may need to prepare for or consider include:

- Separate sick students and staff from others until they can go home. When feasible, identify a "sick room" through which others do not regularly pass.
- A note about face masks: face masks are most useful for preventing disease spread when they are worn by people who have symptoms. This is why people are asked to wear a mask at doctors' offices and hospitals if they are coughing or sneezing.
- Update emergency plans to ensure they are in place before an outbreak occurs.
- Please note that there have been reports of students and others being stigmatized. We urge schools to ensure students' and staffs' privacy to help prevent

discrimination.

Whereas you've helped lead an excellent response for our many public school students and their families in San Francisco in this first-week of responding to the federal quarantine guidelines, I think that school "emergency plans" (e.g., for infectious diseases and pandemics) will be very useful to consider soon. With people continuing to return from China and more capacity for laboratories to test 2019 Novel Coronavirus, there is an increasing possibility of cases in San Francisco and even the virus circulating. Plans for student/staff safety and the continuity of education would need to be implemented. These are issues that all schools will need to grapple with in California, so I look forward to discussing with you and supporting best-practices with you.

I'm hopeful that issues are stable at the school district over the weekend, but feel free to call me anytime on my personal cell 650-580-2335.

Thank you so much for protecting the health and safety of students in San Francisco.

In health,
curtis

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Hi Dr. Aragón,

Thanks for your question about the coronavirus schools guidance. Our advice would be for schools to have a low threshold for contacting their local health department if any symptomatic individuals with recent travel to China are identified. So in this case, fever OR cough would be the most appropriate way to operationalize. This is also in line with the CDC movement and monitoring criteria, which defines "symptomatic" (with associated recommended actions) as fever, cough, or difficulty breathing.

Please let me know if you have any additional questions.

Thanks,
Amy

The guidance has this section

"In the unusual event that a student or staff member is identified who:
• has symptoms of respiratory illness, such as fever and cough, AND
• traveled from mainland China in the prior 14 days,"

Is this operationalized as "fever **and** cough" or "fever or cough".

Please advise,

Tomas
p.s. plz excuse typos

SFDPH DOC nCoV Situation Status Report (02/11/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths
Worldwide: 43,143 cases / 1,018 Deaths *(John Hopkins CSSE, link below)*
US: 13 Cases / 0 Deaths
CA: 6 Cases / 0 Deaths
SF: 0 Cases

Updates and Response:

SFDPH
Summary of actions

- DPH is tracking and following up with return travelers from China by phone and/or community outreach if needed. Children under 19 years of age (and their respective family members) and other populations who frequent congregate spaces are being prioritized for follow up.
- DPH and Department of Emergency Management (DEM) are working to address growing staffing needs for clinical consultation and non-clinical inquiries from the public.
- DPH is creating a DOC "Community Branch" to expand community presence, messaging, and outreach to SF residents and the Chinese community.
- DPH DOC Supply Unit is working with community agencies to access a cache of isolation (mask) respirators for use in hospitals.

https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-__%20%20%20coronavirus/

CDC-

- CDC report on testing in the U.S. • 398 persons tested • 13 confirmed cases • 318 negative results • 68 pending results
- CDC announced the new name for nCoV-2019: "Covid-19"
- CDC released four guidance documents regarding Covid-19:
    1. Interim Guidance for Emergency Medical Services (EMS) Systems
    2. 9-1-1 Public Safety Answering Points (PSAPs) for Covid-19 in the U.S.
    3. Interim Cleaning Recommendations Related to People with Exposures to Covid-19, Under Observation While Quarantined in Non-Home Residential Settings
    4. Interim Guidance Related to the Airport Ground Transport of People Subject to Mandatory Quarantine for 2019 Novel Coronavirus (2019-nCoV) Exposure

https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html

WHO (World Health Organization)-

- WHO and International Air Transport Association (IATA) have developed guidance for cabin crew and airport workers, based on country queries. The guidance can be found on the IATA webpage. https://www.who.int/emergencies/diseases/novel-coronavirus-2019

CDPH (California Department of Public Health)-

- CDPH reports 1 new Covid-19 case under Federal Quarantine in San Diego County has been confirmed. This increases the U.S. total to 13 confirmed cases, however **the CA confirmed case count remains at 6.**
- CDPH report on testing in CA • 134 persons tested • 7 confirmed cases (*includes 1 person under Federal Quarantine*) • 102 negative results • 25 pending results
- CDPH placed an order for 300,000 N95 respirators, ETA April 2020.
- CDPH is in discussion with the National Institute for Occupational Safety and Health (NIOSH) to address N95 supply shortages. You can find information on respirator supply issues, ways to conserve, and alternatives to N95 respirators here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/healthcare-supply-ppe.html
- CDPH site- https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)
International data:

- 43,143 confirmed cases globally
- 42,670 confirmed cases in China (99% of all confirmed cases globally)
- 1,016 deaths in China + 2 additional deaths (Philippines and Hong Kong)
- 2.4 % of confirmed cases in China have resulted in death (the majority are older adults and persons with underlying health conditions or compromised immune systems)
- 474 confirmed cases outside of China across 27 countries (total includes 135 cases on a Japanese cruise ship)

National (U.S.) data:

- 13 total confirmed cases in the U.S. 1 new case reported in CA, U.S.
- 318 negative PUIs
- 67 Pending PUIs
- 3.9% of PUIs have come back positive
- PUIs in 37 states and territories

EPIC Exchange

Don't keep this great resource to yourself! Please share it with your colleagues and networks. If you would like more information on Emergency Preparedness and Response, visit CDC's Emergency Preparedness & Response website.

2019 Novel Coronavirus

The Centers for Disease Control and Prevention (CDC) is closely monitoring an outbreak of respiratory illness caused by a novel (new) coronavirus first identified in Wuhan, Hubei Province, China. CDC features a FAQ webpage that can answer many questions you may have and a microsite that contains updated information and guidance as they become available.

EPIC Webinar

CDC EPIC Webinar February 19 at 1 p.m. ET: Fundamentals of Emergency Planning for Schools with REMS TA Center

Emergency planning is critical for all, but especially for at-risk populations, as they depend on others planning for them and helping to keep them safe. Schools are a primary example; our youth spend most of their time during the year within the custody of schools and school personnel. Developing a high-quality school emergency operations plan is critical to keep youth safe. These plans should account for all settings and all times and include all possible threats and hazards. They also need to account for access and functional needs for the whole school community. Such plans should be supported by leadership, built through a collaborative process, and customized to the building level.

The U.S. Department of Education's Office of Safe and Supportive Schools administers the Readiness and Emergency Management for Schools Technical Assistance (REMS TA) Center—the national TA center serving public and nonpublic education agencies with their comprehensive school preparedness efforts (including school safety, security, and emergency management). Please join us on **February 19 at 1 p.m. ET** for a webinar with the REMS TA Center's Project Director and Deputy Project Director, and the U.S. Department of Education's project administrator. They will share information on the fundamentals of emergency planning for schools and resources available to support comprehensive planning efforts.

Learning Opportunities and Resources

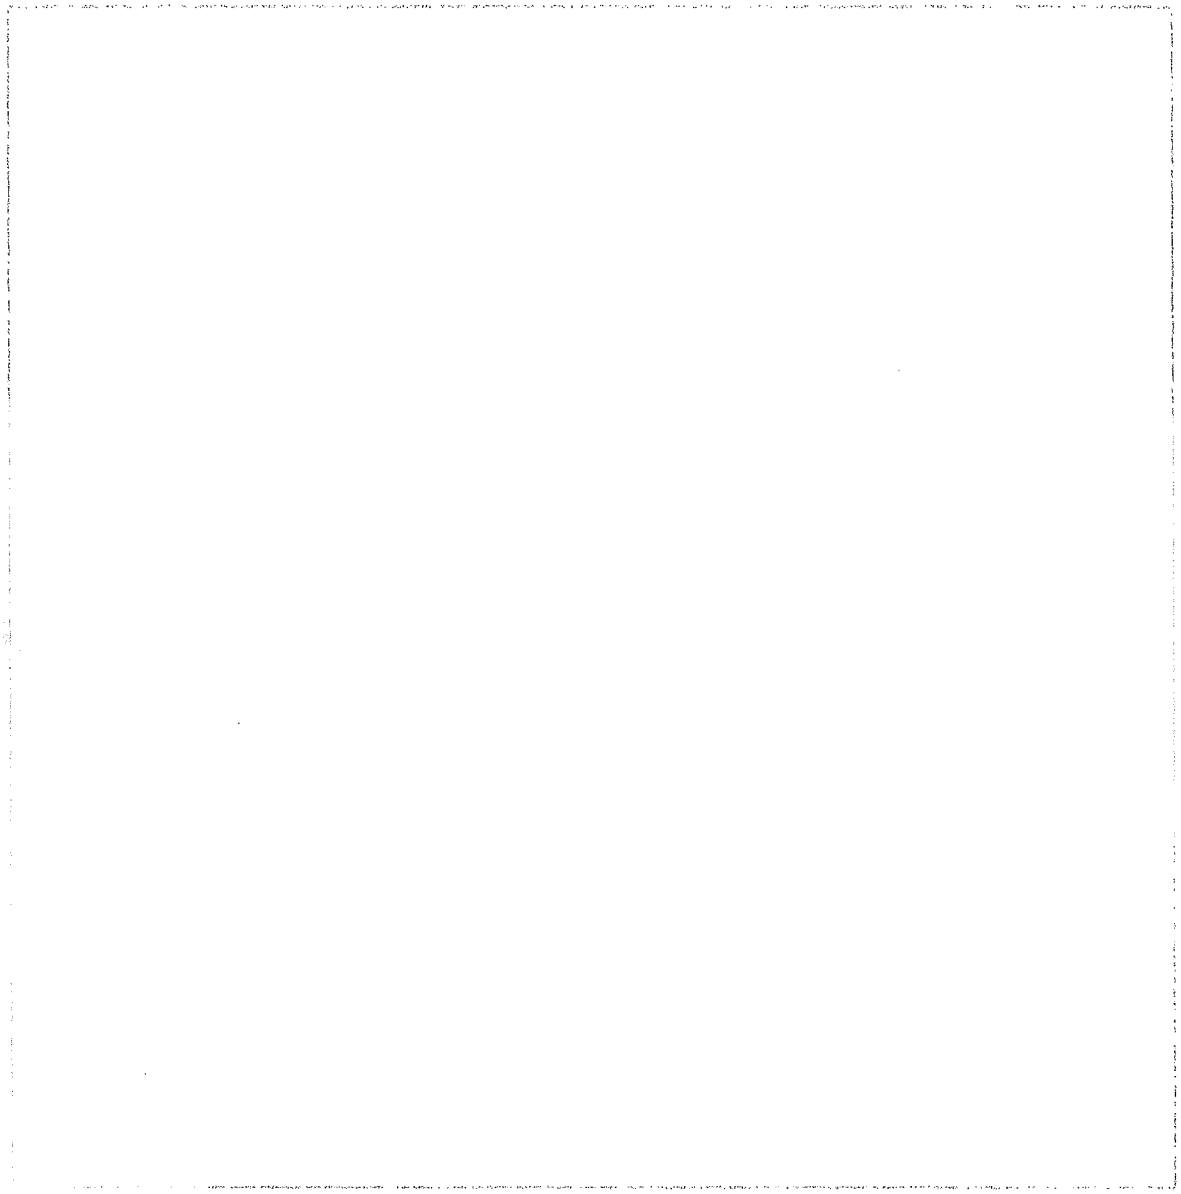

NPHIC Outbreak Communications Guide

When a disease outbreak occurs, public health communicators need to be prepared. The National Public Health Information Coalition (NPHIC) developed this Outbreak Communications Guide as part of its cooperative agreement with CDC's National Center for Immunization and Respiratory Diseases. This guide may not cover every aspect of an outbreak; however, it is a good place to start. The steps outlined will help guide your actions before, during, and after an outbreak.

Crisis & Emergency Risk Communication Webinars

Crisis and Emergency Risk Communication (CERC) training can help responders and public health professionals prepare to communicate in an emergency. CERC trainings are based on lessons learned during public health emergencies and evidence-based practices from the fields of risk and crisis communication, and psychology. **CE accreditation for CERC *webinar* offerings will expire May 1, 2020**, and will not be renewed. CERC web-based training will continue to offer CEUs and CHES Category I continuing education contact hours.

EPIC Exclusive: Corporation for National Community Service

What is the mission of your organization?

The Corporation for National and Community Service (CNCS) is a federal agency that engages millions of Americans in service through its AmeriCorps and Senior Corps programs and leads the nation's volunteering and service efforts. CNCS's mission is to improve lives, strengthen communities, and foster civic engagement through service and volunteering.

What is the role of your organization in a public health emergency?

Our Disaster Services Unit leads and coordinates National Service support between our programs, FEMA, state service commissions, and other partners and stakeholders during disasters and emergencies. While CNCS is not officially tasked with public health emergencies, through our National Service programs, our members and volunteers may assist with public health information distribution and support services at the local, state, and national level. During the Flint, Michigan Water Crisis, National Service members and volunteers distributed water, assisted with water filtration supply access and installation, and supported information distribution to all parts of the community.

How do you plan for emergencies?

We have a broad approach to planning for emergencies:

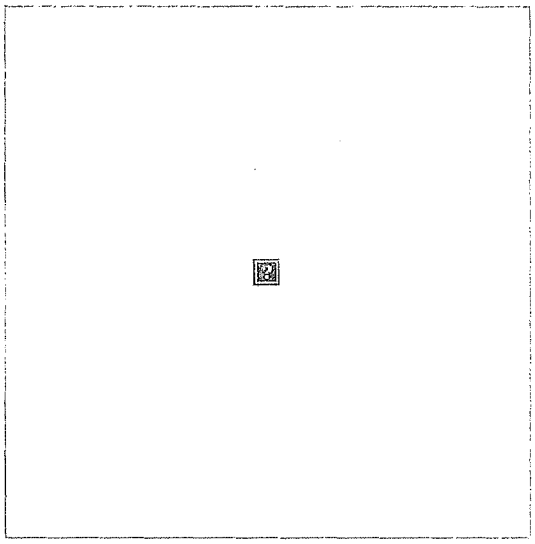

- We have an internal Disaster Services Framework for our agency that outlines the roles and responsibilities for our programs and departments during times of disaster.
- After every disaster response operation, we hold after-action meetings to identify lessons learned, inform our future planning, and identify and develop "improvement projects" to enhance our future operations.
- We participate in national level exercises and simulations with our federal and state partners.
- We develop and deliver training to our network and partners on disaster response, recovery, and preparedness. We also participate in National VOAD and other conferences to share information about National Service support in times of disaster.

What is one experience or lesson-learned that you have from an emergency response?

As an agency, we have had several responses that taught us a great deal, but perhaps the biggest watershed moment of learning for us was Hurricane Sandy. Responding to this storm was unique in many ways; it challenged our AmeriCorps Disaster Response Teams (A-DRTs), who were used to rural response, with heightened planning and logistics necessary for an urban response. We learned that in order to be successful and efficient, our A-DRTs needed to work more cohesively and share common operating standards. This response pushed us to adapt the Incident Command System for our operations, create common training for all our A-DRTs, and reinvigorate our staff to provide on-the-ground support to our teams through our CNCS Disaster Cadre program. As a result, the unprecedented 2017 hurricane season found our Disaster Services Unit, a team of three people at the time, capably managing over 500 A-DRT personnel a day for many months in four locations (TX, FL, PR, USVI) at the highest level of operations complexity and magnitude.

What is one piece of advice that you would give to other EPIC partners?

Commit to the planning cycle: make the plan, exercise the plan, learn from real-world implementation, and revise the plan. The time and energy we devoted to planning after Hurricane Sandy was vital to our overwhelmingly successful 2017 hurricane responses.

Domestic and International News:

Coronavirus disease named Covid-19

The World Health Organization says the official name for the disease caused by the new coronavirus is Covid-2019. "We now have a name for the disease and it's Covid-19," WHO chief Tedros Adhanom Ghebreyesus told reporters in Geneva. It comes after the death toll from the virus passed 1,000. Tens of thousands of people have been infected. The word coronavirus refers to the group of viruses it belongs to, rather than the latest strain. Researchers have been calling for an official name to avoid confusion and stigmatisation of any group or country. "We had to find a name that did not refer to a geographical location, an animal, an individual or group of people, and which is also pronounceable and related to the disease," the WHO chief said. "Having a name matters to prevent the use of other names that can be inaccurate or stigmatising. It also gives us a standard format to use for any future coronavirus outbreaks." The new name is taken from the words "corona", "virus" and "disease", with 2019 representing the year that it emerged (the outbreak was reported to the WHO on 31 December).

https://www.bbc.com/news/world-asia-china-51466362

First Coronavirus Case Confirmed in San Diego County

A woman is being treated for coronavirus at UC San Diego Medical Center in Hillcrest, a spokesperson for the Centers for Disease Control and Prevention (CDC) confirmed. It is the first confirmed case in the county since the deadly outbreak began. The patient was among the 232 Americans evacuated from Wuhan, China, last week and flown to Marine Corps Air Station Miramar where they were placed in a 14-day federal quarantine. A plane carrying 167 U.S. citizens landed at the base Wednesday, and a second plane carrying 65 more landed Friday. By Sunday, seven people -- all passengers of the first plane -- had at one point been removed from quarantine at the base and placed in isolation at area hospitals for further coronavirus testing. Four were removed Wednesday when the flight landed, two to UC San Diego Medical Center and a father and daughter to Rady Children's Hospital; a fifth was sent to UC San Diego Medical Center Thursday afternoon; and two were isolated on Friday, one at UC San Diego Medical Center and one at Rady Children's Hospital. Those passengers had fevers or coughs that warranted further examination, the CDC said. On Sunday, the CDC said the four patients brought to UC San Diego Medical Center tested negative for the virus and discharged them back to the base, hospital spokesperson Michelle Brubaker said. Soon after the woman was discharged the CDC notified her that her test results were mislabeled and she, in fact, tested positive for the virus, according to a local health official with knowledge of the case.

Suicide bombing shatters relative calm in Kabul, killing six

KABUL — After months of relative calm in the Afghan capital, a suicide bombing on Tuesday morning outside a military academy left at least six dead and 12 wounded, according to the Interior Ministry. Bombings in Kabul have dropped off in recent months as peace talks between the United States and Taliban insurgents have reached a critical stage. In addition, large-scale military operations in the country's east have disrupted the extremist Islamic State group's ability to plan and carry out attacks. The military academy in Kabul that was attacked Tuesday has been the target of attacks in the past claimed by the Islamic State. No group immediately claimed responsibility for the latest attack. Two civilians and four military personnel were among the dead, the ministry said in a statement. Afghan security forces cordoned off the area, and ambulances rushed in and out to evacuate casualties. The demand for a reduction in violence in Afghanistan has become central to now-stalled peace talks between the United States and the Taliban.

https://www.washingtonpost.com/world/suicide-bombing-shatters-relative-calm-in-kabul-killing-six/2020/02/11/750a22ae-4c8b-11ea-967b-e074d302c7d4_story.html

Pediatric Flu Vacc Algorithm 2019-20.pptx
TPMG Influenza Guidelines Post P&T.pdf

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Flu A is still slowly dropping and Flu B season is ending in Northern California. There were 6264 total respiratory viral tests done in week 6. 1474 tests were positive for Flu A or 24% positive, down slightly again for the second week. Flu B fell to 521 positive tests or 8% positive. This makes the total Flu positivity 32%. Call Center volume (second graph) and overall number of respiratory viral tests were lower in week 6 than week 5. That is good news and all indicate **we may be past the Flu peak for the 2019-2020 season**. Age distribution of the viruses remains similar to past weeks and all medical centers are still seeing similar viral activity. Nationally flu % positive is still rising up from week four's 28.4% positive to week five's 29.8%. 48 states are reporting the highest level of Flu activity, widespread. The good news nationally is that in week five 95.7% of all Flu A isolates tested were H1N1. Last year we had 2 Flu A waves, so far there is no evidence that a second Flu A strain is coming. Sorry for the day delay but the news is good (at least for Flu).

Testing and treatment

- The rates of influenza are high enough to consider empiric use of the antivirals at this time on patients. Do not wait for test results but testing should still be considered.
- Patients who are frail, elderly or pregnant with symptoms of fever, cough and myalgia needs to especially be considered for having Influenza treatment.
- All **patients being admitted** to the hospital with fever and respiratory symptoms **should be tested.** Place patients with suspected flu in respiratory isolation, until the test is negative. Treatment of hospitalized patients with an antiviral should be given .
- Our antiviral medication for this season is expected to once again be the neuraminidase inhibitors. **Oseltamivir or Tamiflu is the primary medication**. We have a good overall supply at this point and we should be able to provide all the needed medication to our members. The new flu medication, baloxavir (Xofluza) was approved by the FDA and is being marketed heavily as "faster acting," which it is not. Our Pharmacy and Therapeutics Committee and ID Chiefs continue to review the data but it is unlikely we will be offering Xofluza at this time, and it remains non-formulary. Xofluza at this point would only provide a benefit if there are shortages of Tamiflu or if the flu virus this year becomes resistant to oseltamivir, which is unlikely.

TPMG Influenza treatment guideline is attached.

Specimen Collection

- Only swab specimens are acceptable
- Nasal or nasopharyngeal swab specimens can be collected.
- Specimens from other sources such as the throat are sub -optimal
- A nasopharyngeal or nares swab are the optimal specimens and the only FDA approved sources for testing.
- BAL fluid for RVP should be placed in a sterile container and NOT a UVT tube.

Please see attached link below for proper collection for Flu RSV PCR

https://lablink.ca.kp.org/Client-Services/techBulletins/pdf/MICRO_TB_2019_7_Influenza%20A_Influenza_B_and_Respiratory_Syncytial_Virus_by_PCR_Eff_10_16_2019.pdf

- Vaccines: **Our flu vaccine supply is now sufficient for all products** except the intranasal flu vaccine FluMist. Our preparation of high potency vaccine for members over 65 years – **Fluzone High Dose** did experience production delays but **we have now received our entire request and all facilities should have an adequate supply. No member over 65 who requests a dose of high dose vaccine should be turned away. If your facility does not presently have high dose Fluzone please contact Joya Guha to help you get additional supply.**

Pediatric Influenza Vaccine. The pediatric algorithm is the same as last year. Basically any child 6 months through 8 years of age who has received 2 or more doses of any kind of flu vaccine before July 1, 2019 only needs 1 dose of a flu vaccine this year.

Requester,

We have conducted a diligent search for records responsive to your request. We have located responsive records, which are available to you here and have also been uploaded to NextRequest case #20-1076/ SOTF File 20059. Due to the need to continue reviewing, we will produce any additional responsive records on a rolling basis.

Thank you.

Subject: Public Records Request #20-1076

Hello,
I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.

2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

Hi Katie and leaders from CCHP team:

The 3 email blasts from the SFDPH Child Care Health Program and questions from 7 childcare agencies (to one PHN) illustrate the important role of public health staff in gathering key information and providing valuable guidance.

As attached to this email, the K-12 Guidance from CDPH was just released Friday night. I imagine that the child care community will be starting to read it soon, and have lots of excellent questions about how it should be applied to child care.

I'm available this afternoon after 2:30pm to meet/ hear more of your comments.

Yours,
curtis

Subject: Fw: Coronavirus Questions in ECE community

Dear Curtis,

Last week I asked CCHP PHNs to begin tracking coronavirus-related questions coming from CCHP-ECE sites. I want to share Katie Liu's initial response below. I will keep Katie Liu on this email chain in the event you have any feedback. Katie L. has done a wonderful job serving many sites, including those serving the Chinese/Chinese-American community. (Thank you, Katie L.!)

I am looping in Anna Clayton here, as moving forward she is available to assist in coordinating the CCHP response to the ECE community. (Thank you, Anna!)

I am also looping Elenita Silva here, as she is volunteering at the call center and is part of the MCAH PHN team response. (Thank you, Ellen!) My hope is to keep all lines of communication open across the CCHP team!

Sincerely, Katie

Subject: RE: Coronavirus Questions in ECE community

Hello Katie,

I had a couple sites I served in the past contacted me. I've been sharing advice from the SFDPH and CDC. There has been some changes to their recommendation for quarantine (e.g 14 day quarantine was only recommended for people coming from Wuhan, people who had contact with people from Wuhan, or people coming back from China with s/sx of illness in Jan, but now it is everyone coming from China). I have been sending email blasts to all my sites about the changes and sharing flyers. Please see the following time line. If you would like more details, I can share during our meeting tomorrow ☺

1/15/20 - Anna (Director) from **Little Footprint**

- Question about families and teachers coming from China/quarantine?
- Route of contact for Coronavirus
- Incubation time and if the virus can be transmitted during incubation time.

1/27/20 – Gloria Tang (executive director)from **Gum Moon (AWRC)**

- Question about families and teachers coming from China/quarantine needed?

1/27/20 – Nakita Chow (Operational Manager) from **CCFC**

- Question about if children and teachers coming back from China can come back to the center right away.

1/28/20 – Helen (Site manager) from **Little Footprint**

- Question about families and teachers coming from China/quarantine?
- Route of contact for Coronavirus
- Incubation time and if the virus can be transmitted during incubation time.

1/31/20 – Sandra Davis (Director)from **1st Place 2 Start**

- Concern about second confirmed case in Santa Clara and if there is special preventative measures that the school needed to take.

2/3/20 – Marianne Reyneker (Director) from **Story Book Preschool**

- Concerns about families and children returning from China, if they can return to school.

2/5/20 – April Bacsafra (FCCHN Manager, used to be FACCESF Hayes Valley manager) from **FACESSF**

- Concerns about families and children returning from China, if they can return to school.

The following email blast was sent on 1/28/20:
Hello all,

Some of you had inquired about the Novel Coronavirus outbreak and steps for prevention. Here are

two useful websites to get the most up-to-date information about the situation:
https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/
https://www.cdc.gov/coronavirus/2019-ncov/index.html

Currently, there is no recommendation from DPH to restrict clients coming from China to visit public places unless the person has recently traveled to Wuhan and having symptoms of illness (e.g cough, malaise, shortness of breath etc). San Francisco currently has no confirmed cases yet, but DPH is monitoring the outbreak closely. I will share information as soon as we receive any updates on the situation.

At this time, It's important to practice preventative measures such as sharing basic information to the public, encouraging the staff and families to practice frequent handwashing, staying home when sick, covering coughs, and frequent disinfecting of surfaces. The attached flyers have great info about FAQs. Please post out the attached flyers at your centers.

For suspected clients, it's important to instruct them to contact their primary physician and not to come to the public.

Please let me know if you have further questions.

The following email blast was sent on 1/31/20:
Hello all,

Please see the following update of the Coronavirus. There has been one confirmed case in Santa Clara County.

If you know anyone who is travelling from China within the last 2 weeks **AND** is having symptom (fever, cough, fatigue, diarrhea, etc), please advise them to stay home (do not go out public before consulting with medical provider) and contact the Communicable Disease Unit. Please see the phone number below for reporting.

Report suspected cases of novel or variant influenza immediately to Communicable Disease Control at **(415) 554-2830**. After hours, weekends and holidays, please follow the instructions to page the on-call physician.

Please continue to practice preventative measures and disinfect surfaces as appropriate. I will be happy to answer any question you may have.

The following email blast was sent on 2/3/20:
Hello all,

There are 2 confirmed cases of coronavirus in Santa Clara County, but none at San Francisco at this time. The risk of outbreak in S.F remains to be low and using face mask is not recommended at this time. Please review the attached flyers and post out at your center. I will provide more info if there is more updates. Thank you.

Regards,

Xin (Katie) Liu, RN | Public Health Nurse Consultant | Child Care Health Program | San Francisco Department of Public Health | 30 Van Ness Avenue, Suite 210, San Francisco, CA 94102 | Phone: 415-575-5733 | xin.liu@sfdph.org

Subject: Coronavirus Questions in ECE community

Hello Public Health Nurses,

As you know, we are currently experiencing a very large public health response related to the novel Coronavirus. Since families and children at ECE sites could potentially be affected or at minimum could have many questions, it is prudent that we organize the questions being asked and begin to clarify answers.

Starting today and until further notice, I will begin compiling the types of questions you are being asked by the ECE community, FRCs, families, etc. When you are asked a question, or requests are made related to the coronavirus, please email me with the following information:

1. Who made the request or asked the question
2. Date of question
3. Gist of the question asked
4. Your current response (it's okay if the answer is "I don't know" as information is rapidly changing)

I will be happy to compile this information in a spreadsheet. If I learn that we need to collect additional information, I will let you know as soon as possible! Thanks for your efforts, and feel free

to let me know if you have questions!

Best, Katie

Subject: Coronavirus Questions in ECE community

Hello Public Health Nurses,

As you know, we are currently experiencing a very large public health response related to the novel Coronavirus. Since families and children at ECE sites could potentially be affected or at minimum could have many questions, it is prudent that we organize the questions being asked and begin to clarify answers.

Starting today and until further notice, I will begin compiling the types of questions you are being asked by the ECE community, FRCs, families, etc. When you are asked a question, or requests are made related to the coronavirus, please email me with the following information:

1. Who made the request or asked the question
2. Date of question
3. Gist of the question asked
4. Your current response (it's okay if the answer is "I don't know" as information is rapidly changing)

I will be happy to compile this information in a spreadsheet. If I learn that we need to collect additional information, I will let you know as soon as possible! Thanks for your efforts, and feel free to let me know if you have questions!

Best, Katie

Katie DellaMaria, MSN, PHN, RN
Nurse Manager
Child Care Health Program
San Francisco Department of Public Health
Maternal, Child, and Adolescent Health Section
30 Van Ness Avenue, Suite 210, SF, CA 94102

Subject: CDC Returning Traveler Discussion for F11 Jurisdictions
When: Monday, February 10, 2020 3:00 PM-4:00 PM.
Where: Bridgeline: 1(888)455-7719 Passcode: 5108469 or Bldg. 21 3rd Floor 3025B

CDC Returning Traveler Discussion for F11 Jurisdictions
CDC's 2019 Novel Coronavirus (2019-nCoV) response team will host a call from 3 p.m. to 4 p.m. EST for the duration of this week, to discuss plans for returning travelers **within the eleven funneling jurisdictions**, status reports and concerns. Feel free to include your state epidemiologist, preparedness director, state/city emergency management official, and other core team members.

Bridgeline: 1(888)455-7719
Passcode: 5108469

Attached, please see attached CDC guidance which was developed for the public health departments serving the F11 locations. **We request you keep this guidance CLOSE HOLD, as the following documents are not posted on CDC's nCoV response webpage. At this time, we are only sharing these documents with F11.** Lastly, please be mindful this is interim guidance and as the response continues and we learn more guidance will be adjusted accordingly.

1. **"Interim Cleaning Recommendations Related to People with Exposures to 2019 Novel Coronavirus Under Observation while Quarantined in Non-Home Residential Settings** - This guidance is intended to address recommended cleaning and disinfection practices for non-home residential quarantine locations, as well as associated worker protection practices according to expected job tasks.

2. **"Interim Guidance Related to the Airport Ground Transport of People Subject to Mandatory Quarantine for 2019 Novel Coronavirus Exposure"** - is intended to address recommended worker protection practices for drivers of ground transport passenger vehicles and those workers who perform routine cleaning of the vehicles.

Subject: DRAFT SFDPH DOC nCoV Situation Status report (02/10/20)-for review!
Date: Monday, February 10, 2020 11:56:11 AM

SFDPH DOC nCoV Situation Status report #15 (02/10/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths
Worldwide: 40,645 cases / 910 Deaths *(John Hopkins CSSE, link below)*
US: 12 Cases / 0 Deaths
CA: 6 Cases / 0 Deaths
SF: 0 Cases

Updates and Response:

SFDPH
Summary of actions

- DPH collaborated with other Bay Area counties to finalize a policy in regards to SF residents who returned from travel to China before 02/03/20 (before Federal Quarantine Orders were issued). https://www.sfcdcp.org/wp-content/uploads/2020/02/Interim-Guidance-on-Monitoring-and-Movement-for-San-Franciscans-and-Travel-Before-Feb-3rd-SFDPH-FINAL-02.07.2020.pdf
- A comprehensive and extensive plan has been developed with multiple DPH and CCSF inter-agency partners to provide guidance, consultation, and instruction to healthcare providers, hospitals, outpatient healthcare facilities, and field teams to prepare them for potential nCoV patients, as DPH starts follow up with returned travelers from mainland China.
- DPH OSH developed guidance for clinics regarding environmental and infection control requirements and requirements to wear N95 respirators. Available soon.
- DPH working to expand staffing of the DOC, requiring collaboration and coordination across CCSF agencies.
- DPH Public Health Labs received the 2019-nCoV test reagents from the CDC on Friday 02/07/20 and have been working throughout the weekend to make testing possible within SF.
- Approximately 15 SF clinic staff members have been trained to perform respirator fit tests, resulting in approximately 50 staff members being fitted.
- DPH Supply Unit/OSH developing plans to bring alternate N95 respirators into our supply chain.

https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/

CDC

- CDC data on nCoV-2019 testing- 12 positive test results, 318 negative test results, and 68 pending test results. 3.6 % of PUIs have come back positive. PUIs in 37 U.S. States and Territories.
- On 02/08/20 the CDC reported the first U.S. citizen death in Wuhan, China.

https://www.cdc.gov/coronavirus/2019-ncov/index.html

WHO (World Health Organization)-

- WHO reported- On 02/09/20 a Japanese cruise ship was harboured in Yokohama, Japan for a 14-day quarantine period following confirmation of a case of 2019-nCoV. 64 individuals on board were found to have been infected with 2019-nCoV. All individuals testing positive were disembarked and admitted for medical care in infectious disease hospitals in the Yokohama area. Close contacts of the infected passengers are asked to remain in quarantine for 14 days from last contact with a confirmed case. Thus, the quarantine period will be extended beyond the 19 February as appropriate only for close contacts of newly confirmed cases. Epidemiological and environmental investigations are ongoing.
- WHO developed and delivered 2 online trainings to support the response to the 2019-nCoV outbreak that are available on the open learning platform, OpenWHO.org. https://www.who.int/emergencies/diseases/novel-coronavirus-2019

CDPH (California Department of Public Health)-

- CDPH released their guidance for CA Schools: http://www.publichealth.lacounty.gov/media/Coronavirus/StateGuidanceForSchools.pdf
- CDPH site- https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)
International data:

- 40,645 confirmed cases globally; 40,196 cases in mainland China; 908 deaths in mainland China
- 449 confirmed cases outside of China across 27 countries/regions (total includes 135 cases on a Japanese cruise ship).

National (U.S.) data:

- 12 total confirmed cases in the U.S. No new confirmed cases reported. https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6

NOTE: Information may vary as events and reporting are rapidly evolving.

Subject: CAHAN Disease Notification – CDC Interim Guidance for 2019-nCoV: EMS Systems, 911 PSAPs, Cleaning Recommendations Related to People While Quarantined in Non-Home Residential Settings, and Airport Ground Transport of People Subject to Mandatory Quarantine

The Centers for Disease Control has released four guidance documents regarding the 2019 Novel Coronavirus (2019-nCoV):

Interim Guidance for Emergency Medical Services (EMS) Systems: Care and transport by EMS presents unique challenges because of the nature of the setting, enclosed space during transport, frequent need for rapid medical decision-making, interventions with limited information, and a varying range of patient acuity and jurisdictional healthcare resources. Please see the attached assessment flowchart.

911 Public Safety Answering Points (PSAPs) for 2019-nCoV in the United States: Municipalities and local EMS authorities should coordinate with state and local public health, PSAPs, and other emergency call centers to determine need for modified caller queries about 2019-nCoV. The full interim guidance can be found here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-for-ems.html

Interim Cleaning Recommendations Related to People with Exposures to 2019 Novel Coronavirus Under Observation While Quarantined in Non-Home

Residential Settings: This guidance is intended to address recommended cleaning and disinfection practices for non-home residential quarantine locations, as well as associated worker protection practices according to expected job tasks. Please see attached interim recommendations.

Interim Guidance Related to the Airport Ground Transport of People Subject to Mandatory Quarantine for 2019 Novel Coronavirus Exposure: is intended to address recommended worker protection practices for drivers of ground transport passenger vehicles and those workers who perform routine cleaning of the vehicles. Please see attached interim guidance attached.

Domestic and International News:

Despite coronavirus concerns, thousands turn out for SF Chinese New Year parade

Despite some concern this week that the coronavirus scare would keep people away, thousands still showed up to the Chinese Lunar New Year Parade. It's an event bursting with sound, color, and energy. San Francisco's parade is the largest of its kind outside of Asia, attracting a diverse crowd of more than a hundred thousand each year. "I love all the excitement and the energy and I love celebrating our culture," said Gloria Lee. There were concerns some people wouldn't show up this year, due to fear of the coronavirus. But with nearly 2,400 bleacher seat tickets sold -- similar to last year -- organizers say they've seen no negative effect on attendance. "If there is, you could have fooled me because everyone out here it looks like they're enjoying themselves, ready for a good time, and yeah, there doesn't seem to be any kind of impact at all," said William Gee, parade organizer. Something new this year, nearly one hundred young dancers wearing gowns representing the different provinces in China. They were part of the 1.3 mile procession, meant to be a form of visual and auditory education. "It's the atmosphere that we want to try to invite everyone to learn more about Chinese culture and we're happy to share it with everyone," said Gee. That goal seemed to be fulfilled with a woman who drove from Sacramento to be part of the celebration. "I love embracing, learning, experiencing like new cultures and experiences, so it's absolutely amazing, and I'm learning so much," said Chevelle. Whether watching from the sidelines or the vantage point of one of the 4,200 participants, it's an energy filled night of excitement. "It feels great, amazing, all the adrenaline, amazing," said parade participant Jeslyn Chun. This year Organizers had to work extra hard leading up to the parade to dispel fears about the coronavirus. It appears that work paid off. Miss the 2020 Southwest Airlines Chinese New Year Parade? Watch the entire event here.

65 More Coronavirus Cases On Diamond Princess Cruise Ship Stuck In Japan

There are 65 new coronavirus cases aboard the Diamond Princess cruise ship that's been under a quarantine since last week, Japan's health ministry announced Monday. With the latest cases, a total of 135 people from the ship have been confirmed to have the respiratory virus. Those newly diagnosed include 45 Japanese and 11 Americans, as well as smaller numbers of people from Australia, Canada, England, the Philippines and Ukraine, according to Princess Cruises. Even before the latest cases were confirmed, the cruise ship already represented the largest cluster of Wuhan coronavirus cases outside mainland China. The virus, identified as 2019-nCoV, has killed more than 900 people in China, where more than 40,000 people have been infected since it emerged in the city of Wuhan, in Hubei province. Sydney's heaviest rain in 30 years put out bush fires that have been burning for months

Heavy rainfall in Australia's New South Wales has forced the evacuation of several towns and the closure of more than 50 schools, but also extinguished some of the persistent bush fires that have devastated the state. The country's Bureau of Meteorology said the region has seen more than 200 millimeters (7.9 inches) of rainfall in the past 24 hours. In Sydney, preliminary information from the bureau showed that 391.6 millimeters (15.4 inches) of rain fell over the past four days -- the city's heaviest rainfall since 1990. According to New South Wales Rural Fire Service media officer James Morris, the torrential rain helped put out the Currowan fire on Saturday. That particular fire burned 499,621 hectares of land over 74 days. Morris said the ongoing rain was expected to put out the five remaining uncontrolled fires in the state.

CDC Returning Traveler Discussion for F11 Jurisdictions

CDC's 2019 Novel Coronavirus (2019-nCoV) response team will host a call from 3 p.m. to 4 p.m. EST for the duration of this week, to discuss plans for returning travelers within the eleven funneling jurisdictions, status reports and concerns. Feel free to include your state epidemiologist, preparedness director, state/city emergency management official, and other core team members.

Bridgeline: 1(888)455-7719

Passcode: 5108469

Attached, please see attached CDC guidance which was developed for the public health departments serving the F11 locations. We request you keep this guidance CLOSE HOLD, as the following documents are not posted on CDC's nCoV response webpage. At this time, we are only sharing these documents with F11. Lastly, please be mindful this is interim guidance and as the response continues and we learn more guidance will be adjusted accordingly.

1. "Interim Cleaning Recommendations Related to People with Exposures to 2019 Novel Coronavirus Under Observation while Quarantined in Non-Home Residential Settings - This guidance is intended to address recommended cleaning and disinfection practices for non-home residential quarantine locations, as well as associated worker protection practices according to expected job tasks.

2. "Interim Guidance Related to the Airport Ground Transport of People Subject to Mandatory Quarantine for 2019 Novel Coronavirus Exposure" - is intended to address recommended worker protection practices for drivers of ground transport passenger vehicles and those workers who perform

routine cleaning of the vehicles.

SFUSD Announcement_Coronavirus_20200205.docx
SFUSD Announcement_Coronavirus_20200205.pdf
Coronavirus+K-12+Schools+Guidance+2_7_20+FINAL.cleaned.pdf

Great. I can be available now and at these times today:

- Now until 9am
- 10:30-11a
- Noon-1pm
- After 2pm

My biggest questions are:

- Meeting with SFUSD: Your availability to meet with SFUSD Monday-Wed? Where would you like to meet at SFDPH, SFUSD on Quinatara (School Health), SFUSD on Franklin (walking distance in Civic Center)? Who else should we include (Janice, David Stier,) /activate?
- Adjustments to SFUSD Announcement https://www.sfusd.edu/announcements/2020-01-27-update-cold-flu-and-coronavirus .
- Any further clarifications for SFUSD regarding students who returned before February 3rd?
    - The San Francisco Department of Public Health recommends that travelers who returned from China **BEFORE February 3,**monitor themselves for 14 days after their last day in China. If symptoms (fever, cough, or shortness of breath) occur during that time, please contact your health provider, inform them of your travel history and self-isolate at home pending their advice. Do not go to work, school or social events if you have these symptoms. https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/ (As 1/27 was 14 days ago, this would mean for travelers who returned the week of 1/27 - 2/2)
    - If symptoms occur at school, follow CDPH guidance:
        - Separate the individual from others as much as possible and
        - Make arrangements for the individual to go home, and
        - Contact your local health department immediately
        - (The issues to consider include:)
            - How to include language on face mask? It makes sense to add that language to me. However, considerations for

written recommendations include: availability, type of facemask, severity of symptoms, stigma)
- Notify doctor (CDC and SFDPH) and/or notify health department
  - I think that both should be done
  - School principals notify SFUSD Health, SFUSD notifies SFDPH.
    - SFDPH should be prepared to:
      - Interview patient/school about exposures
      - Definitions of contacts to inform
      - Communications to contacts/school

Thanks Tomas!

Subject: Re: CAHAN Disease Guidance Notification – 2019 Novel Coronavirus Guidance for Schools and School Districts

Tomas:

Thanks for replying to Mary and your thoughtful leadership. Are those steps written anywhere?

Are those 5 points you listed referenced elsewhere in documents?

- put face mask on them,
- separate them from others,
- call parents to take them home,
- they should notify their doctor, and
- contact the health department (415-554-2830)

There seem to be the steps for travelers who returned before February 3rd: https://www.sfcdcp.org/wp-content/uploads/2020/02/Interim-Guidance-on-Monitoring-and-Movement-for-San-Franciscans-and-Travel-Before-Feb-3rd-SFDPH-FINAL-02.07.2020.pdfThere are several additional steps

I have or I had fever[1], cough, or shortness of breath within 14 days of leaving China	Call your medical provider and let them know your travel history and that you have been self-monitoring.	Stay at home and do not go to school or work. Avoid contact with others and public activities by practicing **social distancing‡ (SEE BELOW)** until you no longer have these symptoms for 24 hours[3]	Do not fly on commercial flights or take local public transportation (e.g., bus, subway, taxi, ride share like Lyft and Uber) until you no longer have symptoms for 24 hours[3]

I think the "placing face mask" and "isolating symptomatic students" is reasonable, but how would you like this in writing to schools (e.g., to school nurses or to families)? Is this for cough and fever, or "any symptoms". Are we asking anyone who returned before and after February 3rd to call 554-2830 if they have any symptoms? Or, are they supposed to contact their medical provider. PUIs would be then be reported to health department.

This is a complex situation that requires discussion with the school district. How soon do you want your listed 5 points to be implemented?

Thank you Tomas.

Yours,
curtis

Subject: Re: CAHAN Disease Guidance Notification – 2019 Novel Coronavirus Guidance for Schools and School Districts

Hi Mary, see my responses in green.

1. The statement "The risk of exposure to this new coronavirus in China is increasing over time" is alarming and may need to be qualified. In my mind, it seems to conflict with the statement about the risk in the US being low. Is this statement actually true in the US, given the new containment measures?

The first sentence applies to China, not US.

2. The position on facemasks is confusing because thought it's stated "face masks are most useful for preventing disease spread when they are worn by people who have symptoms," face masks is not mentioned in the recommendations for schools when a student who recently traveled from China comes down with symptoms.

Let's discuss to clarify. Here is summary: If a students develops symptoms *and* was in mainland China within the past 14 days (these would be those that arrived before 2/3), then

- put face mask on them,
- separate them from others,
- call parents to take them home,
- they should notify their doctor, and
- contact the health department (415-554-2830)

3. It's mentioned to contact "your health department" but probably best if a specific department or phone number is provided.

See above.

4. Could there be more specific guidance for how emergency plans should be updated for this situation?

There will be many more questions, so we need to set up regular meeting. I will have our Plans staff work on this.

Tomas

Curtis and Tomas - A couple of comments/questions on the new guidance documents.

1. The statement "The risk of exposure to this new coronavirus in China is increasing over time" is alarming and may need to be qualified. In my mind, it seems to conflict with the statement about the risk in the US being low. Is this statement actually true in the US, given the new containment measures?
2. The position on facemasks is confusing because thought it's stated "face masks are most useful for preventing disease spread when they are worn by people who have symptoms," face masks is not mentioned in the recommendations for schools when a student who recently traveled from China comes down with symptoms.
3. It's mentioned to contact "your health department" but probably best if a specific department or phone number is provided.

4. Could there be more specific guidance for how emergency plans should be updated for this situation?

Thank you!

> >
> > Today, Dr. Aragon and I discussed the excellent response of SFUSD, the letter that SFUSD sent to families (last updated February 5th). As you can compare with other letters sent from school districts/ health departments, the SFUSD letter was comprehensive and very clear.

As I was relating the draft CDPH guidance with you earlier, local health departments have been planning with each other and with CDPH to respond to this emerging threat of an epidemic. The Chinese and U.S. governments https://www.cdc.gov/coronavirus/2019-ncov have issued an unprecedented scale of quarantine orders, so public health experts are still determining how such orders and guidelines should be recommended. The California Department of Public Health guideline that planned for release on Wednesday-Thursday was finally released this evening. I am forwarding it to you now.

As you can read, the new CDPH guidance is very much aligned with the SFUSD (2/5/2020) and SFDPH www.sfcdcp.org guidance. The new CDPH guidance emphasizes some actionable steps that schools may need to prepare for or consider include:

- Separate sick students and staff from others until they can go home. When feasible, identify a "sick room" through which others do not regularly pass.
- A note about face masks: face masks are most useful for preventing disease spread when they are worn by people who have symptoms. This is why people are asked to wear a mask at doctors' offices and hospitals if they are coughing or sneezing.
- Update emergency plans to ensure they are in place before an outbreak occurs.
- Please note that there have been reports of students and others being stigmatized. We urge schools to ensure students' and staffs' privacy to help prevent discrimination.

Whereas you've helped lead an excellent response for our many public school students and their families in San Francisco in this first-week of responding to the federal quarantine guidelines, I think that school "emergency plans" (e.g., for infectious diseases and pandemics) will be very useful to consider soon. With people continuing to return from China and more capacity for laboratories to test 2019 Novel Coronavirus, there is an increasing possibility of cases in San Francisco and even the virus circulating. Plans for student/staff safety and the continuity of education would need to be implemented. These are issues that all schools will need to grapple with in California, so I look forward to discussing with you and supporting best-practices with you.

I'm hopeful that issues are stable at the school district over the weekend, but feel free to call me anytime on my personal cell 650-580-2335.

Thank you so much for protecting the health and safety of students in San

Francisco.

In health,
curtis

Definitely! Curtis and I have a meeting scheduled tomorrow for our annual discussion of our clinical protocols, and plan to touch on coronavirus guidelines, but I can also make myself available to meet another time for a fuller conversation. Just let me know what dates and times are best for you all.

Thanks for your reply, Tomas!
1. My mistake. My first read was that the risk of exposure was increasing all over, not just in China.
2. I agree with the recommendations and we have been putting them into practice. But the document does not list among the actions to take with recent arrivals (before 2/3/20) the use of facemasks or calling their health care provider so maybe those steps should be added.
3. Thanks for the specific DPH # to call.
4. I look forward to speaking further with Curtis about this. I have a scheduled meeting with him on Tuesday!

On Sun, Feb 9, 2020 at 8:29 PM Aragon, Tomas (DPH) <tomas.aragon@sfdph.org> wrote:
> Hi Mary, see my responses in green.

1. The statement "The risk of exposure to this new coronavirus in China is increasing over time" is alarming and may need to be qualified. In my mind, it seems to conflict with the statement about the risk in the US being low. Is this statement actually true in the US, given the new containment measures?

The first sentence applies to China, not US.

2. The position on facemasks is confusing because thought it's stated "face masks are most useful for preventing disease spread when they are worn by people who have symptoms," face masks is not mentioned in the recommendations for schools when a student who recently traveled from China comes down with symptoms.

Let's discuss to clarify. Here is summary: If a students develops symptoms *and* was in mainland China within the past 14 days (these would be those that arrived before 2/3), then

- put face mask on them,
- separate them from others,
- call parents to take them home,
- they should notify their doctor, and
- contact the health department (415-554-2830)

3. It's mentioned to contact "your health department" but probably best if a specific department or phone number is provided.

See above.

4. Could there be more specific guidance for how emergency plans should be updated for this situation?

There will be many more questions, so we need to set up regular meeting. I will have our Plans staff work on this.

Tomas

Tomas:

Thanks for replying to Mary and your thoughtful leadership. Are those steps written anywhere?

Are those 5 points you listed referenced elsewhere in documents?

- put face mask on them,
- separate them from others,
- call parents to take them home,
- they should notify their doctor, and
- contact the health department (415-554-2830)

There seem to be the steps for travelers who returned before February 3rd: https://www.sfcdcp.org/wp-content/uploads/2020/02/Interim-Guidance-on-Monitoring-and-Movement-for-San-Franciscans-and-Travel-Before-Feb-3rd-SFDPH-FINAL-02.07.2020.pdfThere are several additional steps

I have or I had fever[1], cough, or shortness of breath within 14 days of leaving China	Call your medical provider and let them know your travel history and that you have been self-monitoring.	Stay at home and do not go to school or work. Avoid contact with others and public activities by practicing **social distancing‡ (SEE BELOW)** until you no longer have these symptoms for 24 hours[3]	Do not fly on commercial flights or take local public transportation (e.g., bus, subway, taxi, ride share like Lyft and Uber) until you no longer have symptoms for 24 hours[3]

I think the "placing face mask" and "isolating symptomatic students" is reasonable, but how would you like this in writing to schools (e.g., to school nurses or to families)? Is this for cough and fever, or "any symptoms". Are we asking anyone who returned before and after February 3rd to call 554-2830 if they have any symptoms? Or, are they supposed to contact their medical provider. PUIs would be then be reported to health department.

This is a complex situation that requires discussion with the school district. How soon do you want your listed 5 points to be implemented?

Thank you Tomas.

Yours,
curtis

Subject: Re: CAHAN Disease Guidance Notification – 2019 Novel Coronavirus Guidance for Schools and School Districts

Hi Mary, see my responses in green.

1. The statement "The risk of exposure to this new coronavirus in China is increasing over time" is alarming and may need to be qualified. In my mind, it seems to conflict with the statement about the risk in the US being low. Is this statement actually true in the US, given the new containment measures?

The first sentence applies to China, not US.

2. The position on facemasks is confusing because thought it's stated "face masks are most useful for preventing disease spread when they are worn by people who have symptoms," face masks is not mentioned in the recommendations for schools when a student who recently traveled from China comes down with symptoms.

Let's discuss to clarify. Here is summary: If a students develops symptoms *and* was in mainland China within the past 14 days (these would be those that arrived before 2/3), then

- put face mask on them,
- separate them from others,
- call parents to take them home,
- they should notify their doctor, and
- contact the health department (415-554-2830)

3. It's mentioned to contact "your health department" but probably best if a specific department or phone number is provided.

See above.

4. Could there be more specific guidance for how emergency plans should be updated for this situation?

There will be many more questions, so we need to set up regular meeting. I will have our Plans staff work on this.

Hello,
I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2"

"2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

Subject:	CDPH Provides Health Update and Interim Guidance for Health Care Providers Regarding 2019 Novel Coronavirus (nCoV)
Date:	Thursday, February 6, 2020 2:53:25 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

The Medical Board of California is contacting you on behalf of the California Department of Public Health (CDPH), please see the message below:

CDPH Provides Health Update and Interim Guidance for Health Care Providers Regarding 2019 Novel Coronavirus (nCoV)

The California Department of Public Health (CDPH) has issued a health update on the coronavirus situation in California and has provided infection control guidance, criteria for evaluation of Patients Under Investigation (PUIs), and recommendations for reporting, specimen collection, and testing. It is likely that the Centers for Disease Control and Prevention (CDC) will update its guidance in the coming weeks, so please check for updates on CDC's 2019-nCoV webpage.

To date, CDPH has identified two cases of coronavirus in Orange and Los Angeles counties. Testing was requested on 23 potential cases in California and 10 have been ruled out, with the 13 remaining cases pending results. CDPH asserts that the coronavirus situation is rapidly changing, and efforts to screen travelers who arrive in California from Wuhan, China, which is said to be the source of the coronavirus outbreak, are underway. CDPH requests California health facilities to voluntarily complete a state-wide infection control resource assessment for coordinated emergency response planning. CDPH has also provided materials for facilities to prepare for the 2019 Novel Coronavirus (2010-nCoV)

Healthcare providers are encouraged to sign up for California Health Alert Network (CAHAN) alerts to receive updates by emailing CAHANinfo@cdph.ca.gov

For additional information view the All Facilities Letter issued by CDPH dated January 23, 2020.

Attention: Please do NOT reply to this email. If you have any questions or require further assistance, please contact the Board at webmaster@mbc.ca.gov.

Hi all, thank you for the call today.
Just curious if anyone has any guidance for public safety, mostly police. We have the guidance and updates from first responders and EMS, but the Police Department is asking for some guidance and any precautionary methods.
Thank you.

Subject: Guidance for The Temporary Reassignment of State, Tribal, and Local Personnel During a Declared Federal Public Health Emergency

Dear Colleague,

As a follow-up to the communication sent on January 31, 2020 regarding the public health emergency for the novel Coronavirus (2019-nCoV), CDC understands that it may require that you mobilize public health capabilities, including the reassignment of personnel from their normal duties including those funded by CDC grants.

The purpose of this correspondence is to clarify the process for requesting temporary reassignment of state, tribal, and local personnel during an HHS Secretary declared public health emergency. This authority terminates September 30, 2023.

Section 701 of the Pandemic and All-Hazards Preparedness and Advancing Innovation Act of 2019 (PAHPAI), 42 USC 201, Public Law 116-22 amends section 319 of the Public Health Service (PHS) Act to provide the Secretary of the Department of Health and Human Services (HHS) with discretion to authorize the temporary reassignment of state, tribal, and local personnel during a declared federal public health emergency upon request by a state or tribal organization. The temporary reassignment provision is applicable to state, tribal, and local public health department or agency personnel whose positions are funded, in full or part, under PHS programs and allows such personnel to immediately respond to the public health emergency in the affected jurisdiction. Funds provided under the award may be used to support personnel who are temporarily reassigned in accordance with section 319(e).

A Governor of a state, local or tribal organization or their designee may request to temporarily reassign state and local public health department, tribal, or agency personnel funded in whole or in part through programs authorized under the PHS Act to immediately address a public health emergency in the state or Indian tribe during the period of the emergency. The following reassignment conditions apply:

- Reassignment must be voluntary;
- Locations for reassignment must be covered under the public health emergency; and
- Any reassignment over 30 days must be reauthorized.

In the case of submission by a designee, a copy of the designation must be included. Please note that reassignments are not authorized until HHS approval is received.

Detailed information, including Guidance for Temporary Reassignment of State and Local Personnel during a Public Health Emergency, is available on the Assistant Secretary for Preparedness and Response (ASPR) website via http://www.phe.gov/Preparedness/legal/pahpa/section201/Pages/default.aspx. To request the temporary reassignment of personnel, a state governor, tribal leader, or designee must complete the Request for the Temporary Reassignment of State, Tribal, and Local Personnel During a Public Health Emergency Declared by the HHS Secretary and submit it to TemporaryReassignment@hhs.gov.

Once the request to temporarily reassign staff has been approved, state, local, or tribal staff should continue to coordinate with their CDC Grants Management Officer (GMO) and Project Officer (PO) assigned to the grant or cooperative agreements. This will ensure that all parties are clear regarding the potential impact to their program, including the extent and the duration of the planned assignment(s). Other requests for programmatic or financial modification of CDC grants and cooperative agreements will be carried out with full consideration.

The following is an outline of the process from the receipt of a request.

1	ASPR will receive a written request for authorization to temporarily reassign personnel from the state or tribal locality via email (temporaryreassignment@hhs.gov).
2	The Secretary's Operations Center (SOC,) acting as the ASPR Coordinator, will respond to the state or tribal organization via email to confirm receipt of the request.
3	The SOC will relay the request to the appropriate authorizing HHS OPDIV or STAFFDIV within one business day via email.
4	The HHS OPDIV or STAFFDIV POC will confirm receipt of the request to the ASPR Coordinator.
5	Upon completion of the review, the OPDIV or STAFFDIV will provide the decision to the ASPR Coordinator, who will inform the applicant of the OPDIV/STAFFDIV's decision within one business day of receipt.
6	The ASPR Coordinator will record decisions to ensure senior Departmental leadership is aware of the use of the authority to support public health emergencies.
	If the state or tribal locality needs an extension to submit the report, the state or tribal locality

7	must notify the ASPR Coordinator by email.
8	The ASPR Coordinator will alert the HHS OPDIV or STAFFDIV POC of the report extension request within 48 hours by email.

SFDPH DOC nCoV Situation Status report #12 (02/06/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths
Worldwide: 28,353 cases / 565 Deaths *(John Hopkins CSSE, link below)*
US: 12 Cases / 0 Deaths
CA: 6 Cases / 0 Deaths
SF: 0 Cases

Updates and Response:

SFDPH
Summary of actions

- Drs. Grant Colfax, Tomas Aragon, and Sunny Pak will be attending the Chinese New Year Parade Public Safety Press Conference.
- DPH and multiple CCSF agencies are developing an advanced planning strategy to meet the expanding need for resources and support in the nCoV-2019 response.
- DPH is working to provide additional education to CCSF staff, hospital visitors, and patients to address concerns of nCoV-2019 infection in health care settings.
- DPH is working closely with SF Urgent Care and outpatient facilities to mitigate potential medical surge to hospitals.
- DPH Epidemiologists are leading efforts to systematically track and monitor PUIs.
- DOC Supply Unit is working to address shortage of N95 and surgical masks. An emergency cache of masks has been accessed to support normal

operations. Supply Unit is reaching out to the Office of Contracts Administration (OCA) for their support.

- DPH is not recommending that CCSF staff wear additional Personal Protective Equipment (PPE) outside of their normal job requirements. Guidance on proper method to request and receive PPE is being developed and will be communicated to health care facilities.
- EMS actively working on transport procedures for inner city transfers of confirmed or suspected cases, as designated Infection Control Ambulances are in short supply in the region.
- CCSF Department of Human Resources (DHR) will send out guidance for CCSF employees who are returning from travel to mainland China within the last 14 days.
- DPH recommendation for travelers returning from mainland China 1-14 days before the Federal Quarantine Orders were announced on 02/03/20: if you feel sick with fever, cough, or shortness of breath, seek medical care right away. Before you go to a doctor's office, clinic, or emergency room, call ahead and tell them about your recent travel and your symptoms so that they can prepare for your visit (see link below)-

CDC

- CDC reports the nCoV-2019 virus is in process of being renamed name. Multiple scientists and communications experts have noted the need for a more descriptive, easy to use name that avoids the pitfalls of past naming conventions for pathogens. The new name will be released within a few days.
- CDC nCoV page:

  https://www.cdc.gov/coronavirus/2019-ncov/index.html

WHO (World Health Organization)-

- WHO announced that they have developed a partnership with Google to work to prevent misinformation. Earlier this week Facebook announced that it would take actions to remove misinformation regarding the outbreak from its social media platform.
- WHO nCoV-2019 page: https://www.who.int/emergencies/diseases/novel-coronavirus-2019

CDPH (California Department of Public Health)-

- CDC provided CDPH with a list of 7 potential PUI cases in CA that require local jurisdiction follow up and monitoring. CDPH anticipates receiving a larger list of follow up cases from the CDC in the coming days.
- CDPH nCoV page: https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)
International data:

- 28,353 confirmed cases; 28,088 cases in mainland China; 563 deaths in China
- 227 confirmed cases outside of China across 27 countries/regions.

National (U.S.) data:

- 1 new confirmed U.S. case in Wisconsin; 12 total confirmed cases in the U.S.

CA: 6 Cases/0 Deaths
SF: 0 Cases

Updates and Response:
SFDPH
Summary of actions

- DPH and multiple CCSF agencies are developing an advanced planning strategy to meet the expanding need for resources and support in the nCoV-2019 response.
- DPH is working to provide additional education to CCSF staff, hospital visitors, and patients to address concerns of nCoV-2019 infection in health care settings.
- DPH is working closely with SF Urgent Care and outpatient facilities to mitigate potential medical surge to hospitals.
- DPH Epidemiologists are leading efforts to systematically track and monitor PUIs.
- DOC Supply Unit is working to address shortage of N95 and surgical masks. An emergency cache of masks has been accessed to support normal operations. Supply Unit is reaching out to the Office of Contracts Administration (OCA) for their support.
- DPH is not recommending that CCSF staff wear additional Personal Protective Equipment (PPE) outside of their normal job requirements. Guidance on proper method to request and receive PPE is being developed and will be communicated to health care facilities.
- EMS actively working on transport procedures for inner city transfers of confirmed or suspected cases, as designated Infection Control Ambulances are in short supply in the region.
- CCSF Department of Human Resources (DHR) will send out guidance for CCSF employees who are returning from travel to mainland China within the last 14 days.
- DPH recommendation for travelers returning from mainland China 1-14 days before the Federal Quarantine Orders were announced on 02/03/20: if you feel sick with fever, cough, or shortness of breath, seek medical care right away. Before you go to a doctor's office, clinic, or emergency room, call ahead and tell them about your recent travel and your symptoms so that they can prepare for your visit (see link below)-
- https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/

CDC

- CDC reports the nCoV-2019 virus is in process of being renamed name. Multiple scientists and communications experts have noted the need for a more descriptive, easy to use name that avoids the pitfalls of past naming conventions for pathogens. The new name will be released within a few days.
- CDC nCoV page:

  https://www.cdc.gov/coronavirus/2019-ncov/index.html

WHO (World Health Organization)-

- WHO announced that they have developed a partnership with Google to work to prevent misinformation. Earlier this week Facebook announced that it would take actions to remove misinformation regarding the outbreak from its social media platform.
- WHO nCoV-2019 page: https://www.who.int/emergencies/diseases/novel-coronavirus-2019

CDPH (California Department of Public Health)-

- CDC provided CDPH with a list of 7 PUI cases in CA that require local jurisdiction follow up and close monitoring. CDPH anticipates receiving a larger list of follow up cases from the CDC in the coming days.
- CDPH nCoV page: https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)
International data:

- 28,353 confirmed cases; 28,088 cases in mainland China; 563 deaths in China
- 227 confirmed cases outside of China across 27 countries/regions.

National (U.S.) data:

- 1 new confirmed U.S. case in Wisconsin; 12 total confirmed cases in the U.S.
- https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6

Domestic and International News:

SFO makes changes to coronavirus screenings

SAN FRANCISCO, Calif. (KRON) — For the last several days there have been changes for certain international travelers arriving at SFO due to the coronavirus. "What is different is who is being screened," SFO spokesman Doug Yakel said. "Prior to Sunday, just those who had been in the Wuhan area [were being tested.] Now, anyone who has been in China in the last 14 days." While initially on Sunday that seemed to cause some delays in the customs process, international travelers arriving Tuesday said they were in and out of customs in 15 to 45 minutes. Part of that could be due to the fact that many airlines have stopped or reduced the number of flights to and from mainland China. "It's at a point now where it's a 50% reduction in flying between SFO and mainland China and that could continue," Yakel said. The U.S. government's decision to ban entry to all foreign nationals who have been in mainland China in the last 14 days has reduced demand but among those stranded are full time U.S. workers who are here on visas who are trying to get back.

https://www.kron4.com/health/coronavirus/sfo-makes-changes-to-coronavirus-screenings/

Buffing up San Francisco's historic piers to survive sea level rise

When the now-historic finger piers along San Francisco's Embarcadero were built, you can bet the builders never expected that a century later, there would be engineering studies on how to prepare the gaunt sheds for seas that could rise nearly 7 feet. But that's what the port has done — spending more than $100,000 on conceptual scenarios, such as raising the floors inside the sheds above flood level. Or adding solid railings around the edge of the piers. Or at the very least, waterproofing the lower few feet of a pier's outer walls. The report being released Thursday captures the dilemma facing San Francisco and other coastal cities. In a world where aged waterfronts have become civic treasures, how do we strike a balance between preparing for climate change and protecting the urban environment? "We are committed to holding on to the current waterfront — the historic waterfront — for as long as we can," said Elaine Forbes, executive director of the Port of San Francisco. "Adaptive tools are important, because we face a dynamic force." The focus of the study is the string of finger piers built in the early 20th century along the Embarcadero to the north and south of the Ferry Building.

San Jose hospital workers sent home after coronavirus exposure

Five employees at Good Samaritan Hospital in San Jose were sent home and told to remain isolated after they were exposed to the coronavirus at the end of January, the Santa Clara County Public Health Department said Tuesday. The employees must remain isolated until Feb. 11. The workers helped treat a man who returned from Wuhan, China on Jan. 24 and sought medical attention after falling ill. He was later diagnosed with the coronavirus on Jan. 31. When the man was first diagnosed, officials said the number of people exposed was low, since he only left his house to seek medical attention. "We are quite fortunate in this case, as I think the list of contacts is going to be very short," County Health Officer Dr. Sara Cody said at the time. Santa Clara County is currently handling two cases of coronavirus. A woman was diagnosed on Sunday, but officials do not believe the two cases are related. No announcement has been made regarding individuals who may have come into contact with the woman.

SFDPH DOC nCoV Situation Status report #11 (02/05/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths
Worldwide: 24,631 cases/494 Deaths *(John Hopkins CSSE, link below)*
US: 11 Cases/0 Deaths
CA: 6 Cases/0 Deaths
SF: 0 Cases

Updates and Response:
SFDPH
Summary of actions

- Chinese community stakeholder "round table" on 02/04/20 (hosted by the Mayor's Office, DEM, and DPH) was a great success! CCSF plans to continue robust outreach to the Chinese community to ensure up-to-date public information is accessible.
- CCSF is not recommending the need for Chinese community or cultural events to be cancelled as SF remains at low risk for nCoV-2019 transmission in the community.
- DEM/DPH/HRC have developed anti-discrimination messaging and are working with the Mayor's Office to plan for dissemination.
- DPH developing protocols for operationalizing traveler quarantine orders in SF, to promote safety and in anticipation of growing needs for travelers returning from China and in need of evaluation, including travelers returning from China pre-Federal Quarantine orders (before 02/03/20).
- SF and regional partners identified the need for ongoing Federal support in execution of quarantine orders, as collaboration and coordination across larger regions may be required.
- SF and regional acute care hospitals have identified a critical resource gap for accessing N95 and surgical masks. DPH Supply Unit is actively working on this issue and will provide updates.
- CCSF Laboratories ordered nCoV-2019 testing supplies and instruction kits to enable 7-day a week testing on site. Turn around time for test results will drastically reduce to same day or (maximum) 2 days wait time! Lab is fully staffed, available off hours, and have equipment and supplies to run multiple tests, multiple times a day.
- DPH revisiting protocols for field responders around Corona viruses vs. Novel Corona viruses and providing education and support where needed.
- DEM and DPH are working together to streamline communications and notifications, by identifying a "Health Liaison" to work with the EOC.
  SFDPH Page: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/
- SFDPH DOC held call with Dr. Erica Pan, Health Officer, Alameda County, to discuss aligning local guidelines to CDC guidance regarding returning travelers.

CDC

- CDC reports of number of PUIs in the U.S. - 11 positive, 206 negative, and 76 pending tests. 36 states with PUIs.
- CDC public health response is focused on detection of nCoV-2019 and minimizing its' introduction into the United States.

  CDC nCoV page:
  https://www.cdc.gov/coronavirus/2019-ncov/index.html

WHO (World Health Organization)-

- WHO reported Belgium has 1st confirmed case of nCoV-2019.
- WHO released their "Global Strategic Preparation and Response Plan." Includes public health measures the international community can provide to help mitigate impact in affected countries. file:///C:/Users/kristina%20leonoudakis/Downloads/srp-04022020.cleaned.pdf
- WHO in discussions with travel and tourism industries to address real and perceived risk and recommend measures tom implement for their customers and employees.
- WHO's 3 areas of action:
  1. Rapid international coordination to deliver operational, technical, or strategic support to affected countries.
  2. Help countries scale up their readiness and response.
  3. Accelerate priority research and innovation.
- WHO reported U.S. data- 11 confirmed cases; 8 (new) confirmed cases with travel history to China; 2 (new) confirmed case with possible transmission outside of China; 1 (new) confirmed case with site of transmission under investigation.

  WHO nCoV-2019 page: https://www.who.int/emergencies/diseases/novel-coronavirus-2019

CDPH (California Department of Public Health)-

- SFO continues the established screening process to identify PUI cases and placing them under a 14-day quarantine order; off site, safe housing is provided for the duration when needed.
- 02/04/20 CA received its first repatriation flight of approximately 240 passengers. Repatriation response and support efforts are being led by U.S. Health and Human Services (HHS), and passengers will be quarantined across the state at secured military bases.
- No changes in CDPH CA nCoV-2019 testing data: 79 persons tested; 6 positive test results; 50 negative test results; 23 pending results.

  CDPH nCoV page:
  https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)
International data:

- 24,631 confirmed cases; 24,405 cases in mainland China (99% of all confirmed cases globally); 492 deaths

in China (an increase of 66 cases since yesterday). 1 death in Hong Kong; 1 death in the Philippines.

- 226 confirmed cases outside of China across 27 countries/regions.

National (U.S.) data:

- No new confirmed U.S. cases- number remains at 11 confirmed cases.

Shipping of CDC 2019 Novel Coronavirus Diagnostic Test Kits Begins -- February, 2020

A CDC-developed laboratory test kit to detect 2019 novel coronavirus (2019-nCoV) began shipping yesterday to select qualified U.S. and international laboratories. Distribution of the tests will help improve the global capacity to detect and respond to the 2019 novel coronavirus. Press release available at https://tinyurl.com/vexsrnj.

To: Pan M.D., Erica, Public Health, DCDCP <Erica.Pan@acgov.org>
Subject: Re: Revised SF draft: working draft

Here is near final draft of p 1 of what DHR plans to send to city staff:

Colleagues:

The SF Department of Public Health (SFDPH) is working closely with the U.S. Centers for Disease Control and Prevention (CDC) and the California Department of Public Health to closely monitor the global outbreak of the novel coronavirus and are taking action to protect the public. The situation is quickly evolving, and we are working closely with SFDPH to keep you updated with the latest developments.

Nationwide, there are 11 infections, including six in California (Los Angeles County, Orange County, Santa Clara County, and San Benito County). At this time, there are no confirmed cases of coronavirus infection in San Francisco residents but two patients with the virus were transferred from another county and are now being treated at a San Francisco hospital. The San Francisco Department of Public Health is prepared for the possibility of confirmed cases and is working closely with the CDC and the California Department of Public Health.

The immediate health risk in San Francisco remains low, except for individuals who have recently traveled to Hubei Province or have come in close contact with someone who has confirmed novel coronavirus.

The CDC has expanded the screening of travelers returning from China.

By federal order, as of February 3, 2020:

· Foreign nationals returning from China will not be allowed entry into the U.S. unless they are immediate family of U.S. citizens or permanent residents.

· All U.S. citizens returning from Hubei Province, China will be subject to a mandatory 14-day quarantine by the federal government.

· U.S. citizens returning from other parts of mainland China who DO NOT have fever, cough, or shortness of breath will undergo self-quarantine at home with monitoring by their local health department. This does not include travel to Hong Kong.

· U.S. citizens returning from other parts of mainland China who have fever, cough, or shortness of breath will undergo mandatory quarantine. This does not include travel to Hong Kong. · For more information, visit https://www.cdc.gov/coronavirus/2019-nCoV/summary.html#risk-assessment

The San Francisco Department of Public Health recommends that travelers who returned from China before February 3 monitor themselves for 14 days after their last day in China. If symptoms (fever, cough, or shortness of breath) occur during that time, please contact your health provider, inform them of your travel history and self-isolate at home pending their advice. Do not go to work, school or social events if you have these symptoms.

Locally, we advise employees to take the following actions to protect themselves and their coworkers from infection:

1. Take preventive measures such as frequent hand washing with soap and water for at least 20 seconds or an alcohol-based sanitizer, covering coughs and sneezes, and avoid touching your face.

2. Stay home if you are sick. Employees have standard sick leave available to them should they need to stay home due to illness.

3. Employees who have a mild cough or cold symptoms and are able to work can exercise their telecommuting agreement if they have one in place to avoid infecting others.

CDC Returning Traveler Discussion for F11 Jurisdictions

CDC's 2019 Novel Coronavirus (2019-nCoV) response team will host a call from 3 p.m. to 4 p.m. EST for the duration of this week, to discuss plans for returning travelers within the eleven funneling jurisdictions, status reports and concerns. Feel free to include your state epidemiologist, preparedness director, state/city emergency management official, and other core team members.

Requester,

We have conducted a diligent search for records responsive to your request. We have located responsive records, which are available to you here and have also been uploaded to NextRequest case #20-1076/ SOTF File 20059. This concludes your public records request.

Thank you.

Subject: Public Records Request #20-1076

Hello,
I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2"

"2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

SFDPH DOC nCoV Situation Status report #7 (01/30/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths

Worldwide: 8,235 Cases/171 Deaths
US: 5 Cases/0 Deaths
CA: 2 Cases/0 Deaths

Updates and Response:

SFDPH

Summary of actions

- CCSF's Department of Emergency Management (DEM) and the DPH DOC met with Director of Health Dr. Grant Colfax to strategize and support plans for an extended response period for emergency response staff.
- Public Information Office has increased staffing and is currently providing real time updates online, via social media, and to Chinese language media sources in 4 threshold languages.
- Outreach has been enhanced to Health Care Providers, Elected Officials, CBOs, and Media in the Chinese Community. Messaging re: use of masks as a protective measure are in development.
- DPH is developing a basic outline and framework for the care and shelter of varying levels of PUIs. In this process DPH is coordinating with SF hospitals and outpatient clinics to identify resources and capacity.
- A field team is being developed to support current and potential future Communicable Disease needs, including testing and outreach to PUIs.
- PUI surge housing has been identified at 1 site in SF and plans are to work with the Mayor's Office on Housing and the Volunteer Organizations Active in a Disaster (SF VOAD) to identify additional housing sites.
- 911 dispatch implemented a new screening process that can be used any time a caller volunteers information re: travel to Wuhan or contact with a confirmed nCoV-2019 case.
- DEM working with DPH to develop daily messaging for citywide situational awareness to outside CCSF agencies.

SFDPH Page: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/

CDC

- CDC providing the number of PUIs in the U.S. As of 01/30/20: 5 positive, 68 negative, and 92 pending tests. This is unchanged from yesterday's report.
- CDC is hospitalizing and/or isolating PUI cases testing positive for nCoV-2019. Serial PCRs (testing at a molecular level to confirm infection) are being conducted on PUIs and PUI contacts.
- CDC has confirmed the first U.S. person to person transmission in Chicago, IL.

CDC nCoV page:

https://www.cdc.gov/coronavirus/2019-ncov/index.html

WHO (World Health Organization)- 01/30/20

- First confirmed cases of 2019-nCoV in Finland, India and Philippines; all had travel history to Wuhan City.
- International Health Regulations is meeting today to discuss whether the outbreak constitutes a "public health emergency of international concern."
- WHO recommends that the interim name of the disease should be "2019-nCoV acute respiratory disease." This name complies with the WHO Best Practices for Naming of New Human Infectious Diseases. Naming is still undecided at this point.
- WHO working on enhancing global diagnostic capacity for 2019-nCoV by enhancing availability of tests, national capacity, and creating a network of key expert laboratories.

Johns Hopkins Data Dashboard

- Data sources used are the WHO, CDC, NHC, and DXY.
- Provides updated information in real time.
- 8,235 cases globally (up 2,170 from 01/29/20)
- In China: 8,124 cases (about 99% of total cases globally); 12,167 PUIs; 1,370 severely ill cases; 171 deaths (19% of cases in China are severely ill or have resulted in death).
- 111 cases confirmed outside of China in 21 countries.

Safety Bulletin

January 30, 2020

UCSF Launches Coronavirus Website for Updates on Outbreak Update #1

UC San Francisco continues to monitor developments regarding the global novel coronavirus outbreak, and has launched a website (ucsf.edu/coronavirus) to serve as a source of news and information for the UCSF community.

"We will continue to monitor the emerging situation and are working closely with colleagues at the San Francisco and California Departments of Public Health to coordinate efforts across health facilities," UCSF Health Chief Clinical Officer Josh Adler, MD, said in a statement to the UCSF community.

The website has guidance about symptoms, prevention, patient screening, counseling resources, travel restrictions and recommendations that is specific to UCSF, as well as links to local, state and federal public health agencies, such as the U.S. Centers for Disease Control and Prevention (CDC).

Although the health risk for Bay Area residents remains low at this time, UCSF's Infection Prevention and Emergency Management teams are working together to ensure the campus and UCSF Health are prepared and that members of the UCSF community and patients are informed about the outbreak which the World Health Organization today declared a global health emergency.

Currently, UCSF is unaware of any faculty, staff and learners in China, where there are more than 8,000 confirmed cases. There also are no confirmed cases of patients diagnosed with coronavirus at UCSF or in the Bay Area. UCSF Health is prepared to safely care for patients with suspected or confirmed coronavirus infections using the infection prevention and control practices recommended by the CDC, the California Department of Public Health and the San Francisco Department of Public Health. Adler reminds individuals that they can take a few simple steps to prevent the spread of respiratory infections, including the flu, such as frequent hand washing.

Importantly, if an individual is experiencing a fever or flu symptoms, they should not come to school or to work. Read more about infectious disease prevention and treatment on the CDC website.
UCSF infectious disease expert Charles Chiu, MD, PhD, explained the origins of the Wuhan virus and public health risks in a story posted last week.

To date, five cases of the coronavirus have been confirmed in the United States in Arizona, California, Washington and Illinois. Globally, in addition to China, where the outbreak was first identified in Wuhan City, Hubei Province, about a dozen other countries have confirmed 8,235 cases of coronavirus. The death toll stands at 171. For the most recent numbers and a visual representation of all confirmed cases worldwide, use this interactive tool developed by Johns Hopkins University.

By comparison to the flu, this week the CDC reports that 8,200 people have died from influenza in the United States this season, with 15 million cases counted so far and 140,000 hospitalizations.

UCSF will continue to monitor the coronavirus outbreak and will keep the UCSF community informed as the situation unfolds. Please look to the website for updates.

Help fight crime by reporting suspicious persons and/or suspicious activity to UCSF PD immediately-race, gender, and religious affiliation are NOT considered suspicious. For emergency or in-progress events, dial 9-911 when using on-campus land lines and 415.476-6911 when using cell phones. For non-emergency calls, please dial 415.476-1414.

Domestic and International News:

New cases in China surpass SARS epidemic as infections grow abroad; WHO calls for emergency committee meeting

The World Health Organization will reconvene its emergency committee Thursday to determine whether the coronavirus outbreak amounts to a public health emergency of international concern, as the total number of people infected in mainland China surpassed those infected with SARS during the 2002-2003 epidemic. Experts say a vaccine for the virus is still a long way off. Schools in Beijing have closed indefinitely, and foreigners who have been evacuated from Wuhan, which is at the epicenter of the outbreak, are starting to arrive in their home countries or at temporary screening sites, including via charter flights for Japanese and U.S. citizens. Many countries are curtailing flights to China, with American Airlines suspending several routes scheduled for February and March. British Airways and German carrier Lufthansa also suspended flights, as did airlines in India and Kazakhstan. Here's what we know: The death toll has risen to 170 in China, with more than 7,7oo confirmed cases of infection as of Thursday morning local time — a day-over-day increase of more than

1,500. Other countries in the region also are reporting more people infected — nearly all of them tourists from China.

https://www.washingtonpost.com/world/asia_pacific/coronavirus-china-live-updates/2020/01/29/d49b9194-423b-11ea-b503-2b077c436617_story.html

11 injured, including 3-month-old baby, in West Los Angeles 25-story apartment fire

LOS ANGELES - An estimated 335 firefighters from multiple agencies knocked down a blaze and rescued evacuees at a high-rise apartment building that did not contain a sprinkler system in the Sawtelle neighborhood of West Los Angeles, fire officials said. The fire ignited around 8:30 a.m. on the sixth floor and quickly spread to the seventh floor of The Barrington Plaza Apartments, which is located near the intersection of Wilshire Boulevard and Barrington Avenue. Firefighters who were handling another incident nearby on San Vicente Boulevard were radioed to the building. Eleven people were injured, two critically, including a 3-month-old child who sustained minor injuries, the Los Angeles Fire Department said. Of the 11 people injured, six were taken to the hospital. Firefighters hoisted 15 people to safety from the roof.

Bay Area man among those living in quarantined Wuhan, epicenter of coronavirus

GREENBRAE, Calif. - A 27-year old man from the Bay Area is among those living at the epicenter of the corona-virus outbreak in Wuhan China. His parents told KTVU at their home in Greenbrae in Marin County Wednesday that they are worried about their son's safety in a city that's now under quarantine by the Chinese governments. From his apartment in Wuhan, where he lives with his girlfriend, her brother, and pet lab Cubby, Perez said he only has about three weeks of food and water available. Fortunately said Perez, grocery stores are open for business, but the supply is dwindling. He told his parents that the larger issue is the supply of masks, which is running low.

EPIC Insider

Don't keep this great resource to yourself! Please share it with your colleagues and networks. If you would like more information on Emergency Preparedness and Response, visit CDC's Emergency Preparedness & Response website.

2019 Novel Coronavirus (2019-nCoV)
CDC is closely monitoring an outbreak of respiratory illness caused by a novel (new) coronavirus

(termed "2019-nCoV"). We understand that some people are worried about this virus and how it will impact Americans. The latest situation summary updates are available on CDC's web page 2019 Novel Coronavirus.

Emergency Responders: Tips for Taking Care of Yourself

Responding to disasters is both rewarding and challenging work. Sources of stress for emergency responders may include witnessing human suffering, risk of personal harm, intense workloads, life-and-death decisions, and separation from family. Stress prevention and management is critical for responders to stay well and to continue to help in the situation. There are important steps responders should take before, during, and after an event.

Preparing for a Response:

- Try to learn as much as possible about what your role would be in a response.
- If you will be traveling or working long hours during a response, explain this to loved ones who may want to contact you. Come up with ways you may be able to communicate with them. Keep their expectations realistic and take the pressure off yourself.

- Talk to your supervisor and establish a plan for who will fill any urgent or ongoing work duties unrelated to the disaster while you are engaged in the response.

During a Response: Understand and Identify Burnout and Secondary Traumatic Stress

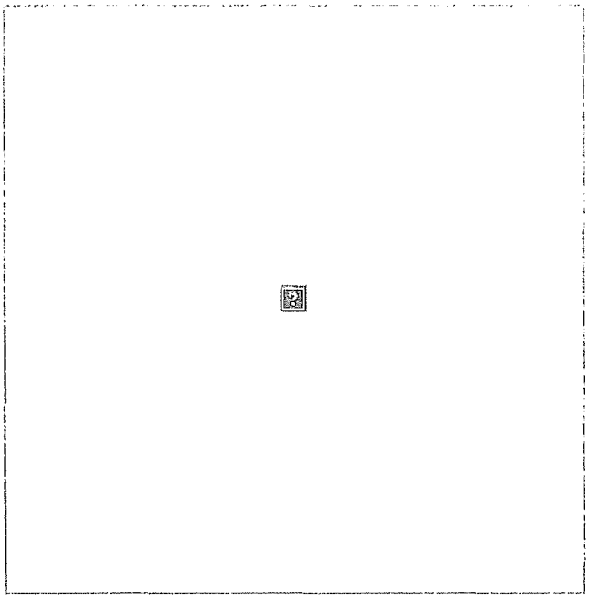

Responders experience stress during a crisis. When stress builds up it can cause—

- Burnout (feelings of extreme exhaustion and being overwhelmed)
- Secondary traumatic stress (stress reactions and symptoms resulting from exposure to another individual's traumatic experiences rather than from direct exposure to a traumatic event)

Coping techniques like taking breaks, eating healthy foods, exercising, and using the buddy system can help prevent and reduce burnout and secondary traumatic stress. Recognize the signs of both conditions in yourself and other responders to be sure those who need a break or need help can address these needs.

Returning Home from a Response (adapted from SAMHSA's Tips for Families of Returning Disaster Responders)

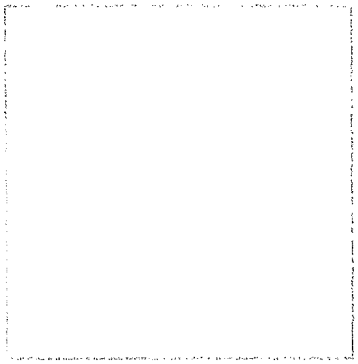

Following disaster assignments away from home, reunions are eagerly anticipated by all. Reconnecting with family can sometimes be harder than we expect, but it can be effectively managed. Remember that homecoming is more than an event; it is a process of reconnection. Consider reading SAMHSA's (Substance Abuse and Mental Health Services Administration) tips for families (also available in Spanish) on adjusting to life at home for more information on how you and your loved ones can make your return home easier.

Updates and Response:

SFDPH

Summary of actions

- SFDPH Health Officer Dr. Tomas Aragon gave an interview in Spanish to KIQI.
- Public FAQ for https://www.sfcdcp.org/developed and out for review. The site is now separated into a page for the public and a page for clinicians.
- DPH Operations continues to expand significantly to support functions of information and guidance dissemination, clinician guidance, and containment planning. Training is being provided where needed.
- DPH HR is working on an expedited process to secure additional RN support.
- Refining messaging about masks for the community, in collaboration with the DOC, CHEP, and SFHN.
- FAQs for the SF 311 call center have been revised and updated by PIOs.
- The SF City Attorney is currently reviewing (draft) Health Officer orders.
- Plans in development for PPE deployment (if needed) and preparing for respirator users who do not routinely use N95 respirators (i.e. setting up medical screening, fit testing, and training)
- Staff worked on tailoring prevention messages to the Chinese community especially with respect to face masks.
- Efforts are expanding to a city-wide level around housing and resource support for PUIs.

DPH is working with DEM and HSA to identify options.

- Continued monitoring of social media, to be able to respond in real time to unvalidated or misleading information.
- DPH launched a new social media message around prevention.
  SFDPH Page: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/

CDC

- CDC is posting and updating the number of PUIs in the U.S. As of 01/29/20: 5 positive, 68 negative, and 92 pending tests.
- Working with CDPH to make lab testing possible at the local level. Currently CDC continues to the source for all CA nCoV-2019 testing.

CDC nCoV page:
https://www.cdc.gov/coronavirus/2019-ncov/index.html

WHO (World Health Organization)- 01/29/20

- 4 newly confirmed cases reported in United Arab Emirates, in individuals traveling from Wuhan City.
- WHO has set up a public private collaboration called "The Pandemic Supply Chain Network (PSCN)". It is a Market Network that seeks to provide a platform for data sharing, market visibility, and operational coordination and connecting.
- PSCN develop a market capacity and risk assessment for personal protective equipment (PPE) to be used in matching the global demand for PPE with the global supply. Expected to be completed by 5 February 2020.
- Global confirmed cases 6065, China 5997 confirmed cases. 1239 severe cases, 132 deaths.
- Outside of China- 68 confirmed cases in 15 countries.
- 9239 PUIs.

WHO nCoV page:

https://www.who.int/emergencies/diseases/novel-coronavirus-2019

CDPH (California Department of Public Health) 01/28/20

- CDPH is using the California Health Alert Network (CAHAN) and hosting conference calls to ensure that local health departments and healthcare providers are aware and kept abreast of updated information as it becomes available.

- As of 0800 hours on January 27, 2020 there have been 33 persons in California tested for novel coronavirus. Two test results were positive, 18 test results were negative, and the remaining 13 results are pending.
- CDPH Office of Public Affairs (OPA)has responded to 11 media inquiries. Inquiries include updates on confirmed cases and PUIs.
- Preparing for the release of the 2019-nCoV laboratory assay within the next two weeks. Currently making appropriate staffing and equipment plans to perform the 2019-nCoV assay. Current priorities are to report all lab reports from CDC to CID leadership, provide up-to-date communication to the California Local Public Health Lab Network on 2019-nCoV laboratory procedures as they become available, and assisting local Public Health Labs to prepare for testing at the local level.

Winter storm lashes Spanish coast, leaves 4 dead, power cuts

MADRID (AP) — A winter storm lashed much of Spain for a third day Tuesday, leaving 200,000 people without electricity, schools closed and roads blocked by snow as it killed four people. Massive waves and gale-force winds smashed into seafront towns, damaging many shops and restaurants and flooding some streets. One video showed a powerful wave crashing over a seafront wall and sending water cascading toward the street and nearby buildings in Cala Ratjada on the Mediterranean island of Mallorca. Ports on the nearby island of Menorca have been closed for two days, the La Vanguardia newspaper said. The storm, which whipped up Sunday, has so far claimed lives of three men and one woman.

Subject:	Re: CAHAN LHD Conference Call Notification – CDC"s 2019 Novel Coronavirus (2019-nCoV) All State Update Conference Call [Today – 1/17/2020 1 pm PST]
Date:	Tuesday, January 21, 2020 8:54:54 AM

Hi Diane,

Thank you and that's the perfect distillation of health officials' questions on Friday's CDC conference call. Tomas's team knows much more than I, but I just thought to give you the FYI on a Friday afternoon of a long-weekend, that it was rapidly becoming front-page news.

From interpretation of Friday's call, the early stage of this response is that CDC will send its staff to assist DGMQ and Customs & Border Protection to conduct (mostly symptomatic) screening at 3 airports (JFK, SFO, and LAX). One of the first questions from local public health was from New York, who asked about public health home surveillance (I'm not sure if "public health nursing" was specifically mentioned). Another health official referenced the "ebola" response. Although the CDC's main emphasis is that this is very early in a rapidly evolving situation, my guess is that public health nurses providing home visiting services would not be activated in the short-term. Most of the initial response will be conducted within the international terminal at the airport. Judging from past experiences and the discussion on Friday's call, the response plan is still mostly at the stage of identifying a "Patient Under Investigation" (PUI); and thinking planning how the institutions that would need to be notified and coordinate a response: CDC, DGMQ, CBP, CDPH, Hospital evaluating patient, Lab testing and specimens, Local Health Department (LHD) with Airport, LHD with hospital, LHD where patient resides. Infinite number of complexities and uncertainties that ultimately the local CD Control Team may need to navigate through.

Anyhow, just a situational update and here are some Key References:

Hi Tomas -
Yes, I scheduled the room and send a calendar invite for this meeting:

Meeting to discuss Coronavirus Current Situation and Response
Tuesday, January 21st from 9am - 10am
25 Van Ness, 5th Floor Conference Room

Please note that I will not be participating in the meeting.

Hope you all had a nice weekend!
Jeannie

Thanks.

We should assume it will develop into sustained human-to-human transmission.

We should also anticipate activating our IDER plan(s).

Jeannie, Do we have a room for Tues at 9am?

Tomas

Hi Tomas,

Forwarding this email correspondence. I understand that there was a change of plans and the San Mateo DPH on-call number is not being provided to incoming passengers after all. Erica Pan requested that CDC create a triage line for incoming passengers from Wuhan if they develop symptoms; the SFO officer-in-charge at the quarantine station, Susan Dwyer, responded below that she would bring it up with her leadership.

Also, you likely saw this, but there was a large increase in cases reported by China today - https://www.statnews.com/2020/01/19/china-reports-sharp-rise-in-case-of-novel-virus-amid-growing-concerns-of-person-to-person-transmission/

CDPH has requested a call with CDC for 10am tomorrow (Monday) - I don't know if that is happening yet or not - the last I heard the call was currently on hold. I will send you the call-in information if I receive it (if it ends up being scheduled).

Thanks,
Julie

Erica,

Thank you for this suggestion and idea. My current thought is that we're having such challenges organizing, training, and scheduling badging for the deployed staff that it's too much for me/us to consider setting up a phone line here at the Q station for the calls which might come in. But as tide continues, and depending on how quickly it bubbles, and the fact that this will be decided above our QS level, we'd want to support this suggestion. I'll talk more tomorrow with our Preparedness and Policy Coordination Lead, who's with us until Tuesday.

Thank you again,
Susan

PS. Vanessa just took a job with DTBE and begins Tuesday in Richmond. We're sad, but happy for her and California!

Subject: RE: 2019 Novel Coronavirus - process/communications to refer Wuhan travelers for assessment

Hi Susan & Vanessa,

I am sure you are both completely swamped with this situation, but wanted to pitch an idea/proposal to you all at DGMQ at SFO. (and possibly the other 2 DGMQ sites?)

I got an update from Scott Morrow today about the discussion/considerations of what instructions to give incoming travelers from Wuhan if they do develop symptoms, and I understand the current plan is to hand out these cards/messages attached to the CAHAN alert below which tell the traveler to "seek medical care right away and call ahead." (and not call the San Mateo or other local PH CD Control #).

I do have concerns after we had started to discuss in our county scenarios of travelers being assessed at some of our less resourced sites in our jurisdiction about appropriate infection control management, notifications, etc.

Is there a possibility of CDC setting up a phone # at each of the 3 DGMQ sites for travelers to call that could receive calls and then appropriately triage them to the local jurisdiction where the traveler is at that time? That way we could ideally do some communication and coordination of appropriate assessment (including ensuring there is an AIIR at the receiving facility) and transport if needed to a site that is prepared and can implement appropriate infection control precautions immediately. It seems like a potential compromise between the specific individual traveler notifications we did for Ebola and just leaving the assessment up to a more unpredictable evaluation.
Maybe this could be discussed at the Tuesday update call? (Or I'm happy to discuss the idea sooner over the weekend if you think this is something CDC could have some of the deployed staff do.) Let us know, but if LHDs can be notified (we/or likely CDPH can share the list of CD Control contact #s/after hour #s for CDC staff to call?) we know our facilities and can try to arrange as smooth as an assessment as possible and may also help with public information/media management as well. Just thinking of some of the false alarms and hospital/clinic reactions during Ebola (as well as some concerning infection control practices in some locations) and want to work with everyone to figure out how we can best feasibly manage these situations.

Thanks!

Date: Sunday, January 19, 2020 10:02:19 AM

Report Date: 01-19-2020

24-Hour Daily Situational Awareness Report

Priority Information / Current Notable Local Incidents:

The Centers for Disease Control and Prevention (CDC) continues to closely monitor an outbreak of a 2019 Novel Coronavirus (2019-nCoV) in Wuhan City, Hubei Province, China that began in December 2019. Since yesterday, the CDC is screening passengers on direct and connecting flights from Wuhan China at San Francisco International Airport. The CDC continues to coordinate with their partners and may adjust response activities as the outbreak investigation continues and more is learned about the newly emerging virus. Chinese authorities are reporting no ongoing spread of this virus in the community, but they cannot rule out that some limited person-to-person spread may be occurring.
Thailand and Japan have confirmed additional cases of 2019-nCoV in travelers from Wuhan, China.

It is possible that more cases will be identified in the coming days. This is an ongoing investigation and given previous experience with MERS-CoV and SARS-CoV, it is possible that person-person spread may occur. There is much more to learn about the transmissibility, severity, and other features associated with 2019-nCoV as the investigations in China, Thailand, and Japan continue. Additional information about this novel virus is needed to better inform population risk.

CDC information can be found at: https://www.cdc.gov/coronavirus/2019-nCoV/summary.html

Additional information is available at:
https://.cdc.gov/coronavirus/2019-ncov/index.html or by calling 800-CDC- INFO | (800-232-4636) | TTY: (888) 232-6348

Information for healthcare providers can be found at:
See CDC's Interim Healthcare Infection Prevention and Control Recommendations for Patients Under
Investigation for 2019 Novel Coronavirus (https://www.cdc.gov/coronavirus/2019-nCoV/infection- control.html).

CCSF Public Safety Branch:
- Nothing significant to report.

CCSF Health and Human Services Branch:
- The San Francisco Department of Public Health is coordinating with partner agencies to monitor the Novel Coronavirus (2019-nCoV) situation. Please see the statement at the beginning of this report for more information.

CCSF Community Branch:
- Nothing significant to report.

Domestic and International News:

Bacteria water samples clear several San Francisco beaches for swimming and surfing

Although the water will be cold this weekend, the San Francisco Public Utilities Commission had some great news for beach goers within the city. The SFPUC

announced that it was taking down 'no swimming' signs at China Beach, Fort Funston, Crissy Field West, and Ocean Beach at Balboa to Fulton and Pacheco to Taravel and Sloat. Officials announced that repeat water samples collected at these locations Friday, had bacteria levels below health concerns. However, Ocean Beach at Lincoln to Noriega and Vicente, Crissy Field East, Mission Creek and Islais Creek remained posted. Officials will take more samples at these locations on Saturday, and will be available on Sunday. Authorities are cautioning beachgoers, that during and immediately after rainstorms, concentrations of bacteria could build up near the shore, since there weren't a combined sewer discharge. San Francisco beach water quality information is available at beaches.sfwater.org, or on the Recreational Water Quality Hotline at (415) 242-2214 or toll free (877) 732-3224. The San Francisco Public Utilities Commission routinely monitors shoreline bacteria at 16 stations in the city, that are popular for swimming and surfing. The SFPUC conducts additional monitoring whenever a treated discharge from the City's combined sewer system occurs that affects a recreational beach.

New coronavirus 'preventable and controllable', China says

The new Chinese virus which has already spread abroad "is still preventable and controllable", China says. Its National Health Commission warned, however, that close monitoring was needed given the source, transmission and mutation methods were unknown. Two people are known to have died from the respiratory illness which appeared in Wuhan city in December. In its first statement since the outbreak, the body promised to step up monitoring during the Lunar new year. Millions of Chinese travel to their families for the holiday - also known as the Spring Festival - beginning next week. There have been more than 60 confirmed cases of the new coronavirus, but UK experts estimate a figure nearer 1,700. Singapore and Hong Kong have been screening air passengers from Wuhan, and US authorities have announced similar measures at three major airports in San Francisco, Los Angeles and New York. While the outbreak is centered on the central Chinese city of Wuhan, there have been two cases in Thailand and one in Japan. Chinese officials say there have been no cases of the virus spreading from one person to another. Instead, they say, the virus has crossed the species barrier and come from infected animals at a seafood and wildlife market in Wuhan. The WHO's China office said the analysis was helpful and would help officials plan the response to the outbreak. "Much remains to be understood about the new coronavirus," it said. "Not enough is known to draw definitive

conclusions about how it is transmitted, the clinical features of the disease, the extent to which it has spread, or its source, which remains unknown."

Hi Lisa,

I have not heard anything about DPH deploying anything to SFO. I have looped in DPH/Incident leadership in case they know otherwise.

Thanks for asking,

Tiffany Rivera, RN, BSN, CEN, TCRN
Deputy Director Emergency Response & Preparedness
San Francisco Department of Public Health
30 Van Ness, Suite 2300
San Francisco, CA 94102

Thanks Tiffany.

I understand DPH is deploying some detection equipment to SFO...is that correct? Anything you need us to brief our leadership (or the City) on?

Lisa

Subject: Input for DEM 24-Hour Daily Situational Awareness Report - 2019 Novel Coronavirus

Morning,

Is there specific language PHEPR would like us to include on our Daily Situational Awareness Report, in regards to the Novel Coronavirus?

Below is what was sent out on Sunday and the Watch Center can do something similar (e.g. updated with the latest info from the CDC) for today and moving forward.

Please let us know by 0900 today if you (1) have specific language you would like us to use or (2) if something similar to the below is sufficient.

Thanks,
Lisa

Report Date: 01-19-2020

24-Hour Daily Situational Awareness Report

Priority Information / Current Notable Local Incidents:

The Centers for Disease Control and Prevention (CDC) continues to closely monitor an outbreak of a 2019 Novel Coronavirus (2019-nCoV) in Wuhan City, Hubei Province, China that began in December 2019. Since yesterday, the CDC is screening passengers on direct and connecting flights from Wuhan China at San Francisco International Airport. The CDC continues to coordinate with their partners and may adjust response activities as the outbreak investigation continues and more is learned about the newly emerging virus.

It is possible that more cases will be identified in the coming days. This is an ongoing investigation and given previous experience with MERS-CoV and SARS-CoV, it is possible that person-person spread may occur. There is much more to learn about the transmissibility, severity, and other features associated with 2019-nCoV as the investigations in China, Thailand, and Japan continue. Additional information about this novel virus is needed to better inform population risk.

CDC information can be found at: https://www.cdc.gov/coronavirus/2019-nCoV/summary.html

Additional information is available at:
https://.cdc.gov/coronavirus/2019-ncov/index.html or by calling 800-CDC- INFO | (800-232-4636) | TTY: (888) 232-6348

Information for healthcare providers can be found at:
See CDC's Interim Healthcare Infection Prevention and Control Recommendations for Patients Under
Investigation for 2019 Novel Coronavirus (https://www.cdc.gov/coronavirus/2019-nCoV/infection- control.html).

Information specific to SFO can be found here:

Subject: Hospital Coordination Call - 2019 nCoV Wuhan

Please join SF Department of Public Health tomorrow afternoon, on a citywide hospital coordination call regarding the 2019 Novel Coronavirus (nCoV) out of Wuhan China. We are sending this invite to the following hospital representatives:

* Infection Control & Prevention Leadership
* Emergency Department Leadership
* Disaster Preparedness Leadership

During the hospital report out, we will ask the following information from your facility: (please coordinate report out with your other facility representatives)

1. Any current responses from your facility
2. Confirm airborne isolation rooms (AIIR) in:

1. ED
2. Inpatient

3. Identification of potential Person Under Investigation (PUI)
4. Ability to conduct respiratory viral PCR test and turnaround time
5. Threshold for activation of Hospital Incident Command
6. What do you need from us?

Below is some further information regarding DPH activation and resources for you:

Dear Colleagues:

The San Francisco Department of Public Health (DPH) has activated the Department Operations Center (DOC) and Communicable Disease Response Plan, in response to the recent outbreak of the 2019 Novel Coronavirus (2019-nCoV) in Wuhan City, Hubei Province, China that began in December 2019. SFDPH is currently monitoring the situation closely and coordinating efforts with the Centers for Disease Control and Prevention (CDC), the State, San Francisco International Airport (SFO), regional public health jurisdictions, and local CCSF Departments. Multiple countries, including the United States, are actively screening incoming travelers from Wuhan City, which includes SFO Airport.

The CDC is monitoring the outbreak and may adjust response activities as the outbreak investigation progresses. As we continue to gather more information, if the SFDPH DOC needs to activate at a higher level, you will receive another alert, which will include additional concrete steps to take.

The situation remains fluid and additional 2019-nCoV information is constantly being updated regarding any risks to the population.

For the latest resources regarding this evolving incident please check the following sources:

* CDC information: https://www.cdc.gov/coronavirus/2019-nCoV/summary.html

* Additional Coronavirus information is available at: https://www.cdc.gov/coronavirus/2019-ncov/index.html or by calling 800-CDC- INFO | (800-232-4636) | TTY: (888) 232-6348

First Travel-related Case of 2019 Novel Coronavirus Detected in United States

The Centers for Disease Control and Prevention (CDC) today confirmed the first case of 2019 Novel Coronavirus (2019-nCoV) in the United States in the state of Washington. The patient recently returned from Wuhan, China, where an outbreak of pneumonia caused by this novel coronavirus has been ongoing since December 2019. While originally thought to be spreading from animal-to-person, there are growing indications that limited person-to-person spread is happening. It's unclear how easily this virus is spreading between people.

The patient from Washington with confirmed 2019-nCoV infection returned to the United States from Wuhan on January 15, 2020. The patient sought care at a medical facility in the state of Washington, where the patient was treated for the illness. Based on the patient's travel history and symptoms, healthcare professionals suspected this new coronavirus. A clinical specimen was collected and sent to CDC overnight, where laboratory testing yesterday confirmed the diagnosis via CDC's Real time Reverse Transcription-Polymerase Chain Reaction (rRT-PCR) test.

CDC has been proactively preparing for the introduction of 2019-nCoV in the United States for weeks, including:

- First alerting clinicians on January 8, 2020, to be on the look-out for patients with respiratory symptoms and a history of travel to Wuhan, China.
- Developing guidance for clinicians for testing and management of 2019-nCoV, as well as guidance for home care of patients with 2019-nCoV.
- Developing a diagnostic test to detect this virus in clinical specimens, accelerating the time it takes to detect infection. Currently, testing for this virus must take place at CDC, but in the coming days and weeks, CDC will share these tests with domestic and international partners
- On January 17, 2020, CDC began implementing public health entry screening at San Francisco (SFO), New York (JFK), and Los Angeles (LAX) airports. This week CDC will add entry health screening at two more airports – Atlanta (ATL) and Chicago (ORD).
- CDC has activated its Emergency Operations Center to better provide ongoing support to the 2019-nCoV response.

CDC is working closely with the state of Washington and local partners. A CDC team has been deployed to support the ongoing investigation in the state of Washington, including potentially tracing close contacts to determine if anyone else has become ill.

Coronaviruses are a large family of viruses, some causing respiratory illness in people and others circulating among animals including camels, cats and bats. Rarely, animal

coronaviruses can evolve and infect people and then spread between people, such as has been seen with Severe Acute Respiratory Syndrome (SARS) and Middle East Respiratory Syndrome (MERS). When person-to-person spread has occurred with SARS and MERS, it is thought to happen via respiratory droplets with close contacts, similar to how influenza and other respiratory pathogens spread. The situation with regard to 2019-nCoV is still unclear. While severe illness, including illness resulting in several deaths, has been reported in China, other patients have had milder illness and been discharged. Symptoms associated with this virus have included fever, cough and trouble breathing. The confirmation that some limited person-to-person spread with this virus is occurring in Asia raises the level of concern about this virus, but CDC continues to believe the risk of 2019-nCoV to the American public at large remains low at this time.

This is a rapidly evolving situation. CDC will continue to update the public as circumstances warrant.

For more information about the current outbreak in China, visit:
https://www.cdc.gov/coronavirus/novel-coronavirus-2019.html

Subject:	CDC nCoV Telecon Call Notes
Date:	Tuesday, January 21, 2020 12:51:38 PM

Update on CDC response; 1/21/2020.
Additional questions can be sent to preparedness@cdc.gov

- 1st case nCoV from Wash State reported and confirmed. Snohomish County. 35 M healthy, traveled to Wuhan, returned 1/15, symptom onset 1/16. Overall illness mild, neg CXR. No exposure to livestock or seafood or animal markets, ill persons. Sought healthcare on 1/19, tested, results reported out 1/20.
- # reported cases in multiple countries to >300.
- CDC has activated DOC
- Plan for scale-up of screening passengers from Wuhan – will add Atlanta and Chicago airports and consider changing travel advisories
- 6 locations Wuhan, Beijing, Guandong, Thailand, So Korea, USA
- Limited person-to-person spread is occurring
- Hearing about HCW illnesses in Wuhan
- 11 countries conducting entry screening, Wuhan is doing exit screening
- Updated traveler health notices for Wuhan city
- Increased screening on direct and connecting flights
- HAN advisory has been released – I didn't hear that there's a plan for another one.
- RT-PCR test has been developed, it's at CDC only for now. Next Gen sequencing is also in place.
- Poss. use of investigational drug Randecivir (?) – can get via EOC at CDC
- 75k passengers annually into US from Wuhan. (out of 360M total entries)
- Other countries doing entry screening – 18 countries/territories. But screening will not identify everyone (some will not be symptomatic)
- SFO, JFK, LAX get the most # passengers. ATL and CHICAGO being added. Working with DHS to route all Wuhan travelers thru these 5 airports, which requires some rebooking.
- Travel health notice raised to level 2. Older adults w/underlying conditions may be at increased risk.
- At entry screening, escorted to screening area, fill out traveler health deck. Staff observes for signs of illness and take temp. If fever, get a more in-depth assessment. If PUI definition is met, coordination with state/local authorities.
- Screening for 4 days so far, screened >1200. 12 have gotten in depth screening, none ID'ed as PUI.

Questions

- PUI epi criteria – extend epi risk factors to travel outside of Wuhan? CDC engaging CSTE for input, working on this.
- Getting serum and LR specimens, any more guidance esp. infection control guidance? No change yet.
- Planning updated HAN?

- If a PUI states they were exposed to someone who's sick in Wuhan, how can we confirm? Call 770-488-7100 = CDC EOC number
- Any demographic info on cases to date? Range 15-80 yo. Other demographic features still pending.
- Incubation period? In general coronaviruses 2d – 14d. Not enough info to zero in further.
- What info is being given to travelers leaving Wuhan? Not sure exactly what's being done with the exit screening which in Wuhan includes buses, trains, ferries. In the US there's a monitor to provide alerting info upon arrival. After screening they get a card with sx to watch for --- fever and any symptoms; call ahead before going into clinic.
- When will test kits be avail to state PH labs? Trying to get Emergency Use Authorization, working with FDA.
- Is there a prioritization for specimen types? UR, LR, sera. If possible store urine, stool, whole blood until more info available.
- Intent to expand airport screening beyond 5 already? No. Will redirect all Wuhan flights to these 5 airports.
- If there's an ill person on a flight, DGMQ will notify State HD/LHD re other passengers who might have been exposed.
- What should be done with those exposed on flights? Asymptomatic air contacts – passive self-monitoring, present for care if symptoms develop. Have other options for scaling up to active, but haven't made that decision yet.
- Those who may have had close contact with ill lab-confirmed pt, if they get fever or other sx within 14 days of contact.
- Shipping specimens as category B. EOC will help coordinate transfer of materials to CDC.
- Unclear whether nCoV is communicable prior to symptom onset, CDC has not taken position yet.
- This is a new beta coronavirus, expected to be similar to SARS and MERS but can't give hard details yet about incubation period.

Dear Colleagues,

Last week, we reached out to let you know that the Centers for Disease Control and Prevention (CDC) is closely monitoring an outbreak caused by a novel (new) coronavirus in Wuhan City, Hubei Province, China. A number of countries, including the U.S., are actively screening incoming travelers from Wuhan.

Starting TODAY, CDC's 2019 Novel Coronavirus (2019-nCoV) response team will host a series of national calls to continue providing state and local partners with the latest information on the novel coronavirus outbreak and U.S. preparedness efforts.

Call Schedule *(all calls scheduled for 3:00-4:00pm EST)*

- Tuesday, January 21
- Monday, January 27
- Monday, February 3
- Monday, February 10
- Monday, February 24
- Monday, March 2

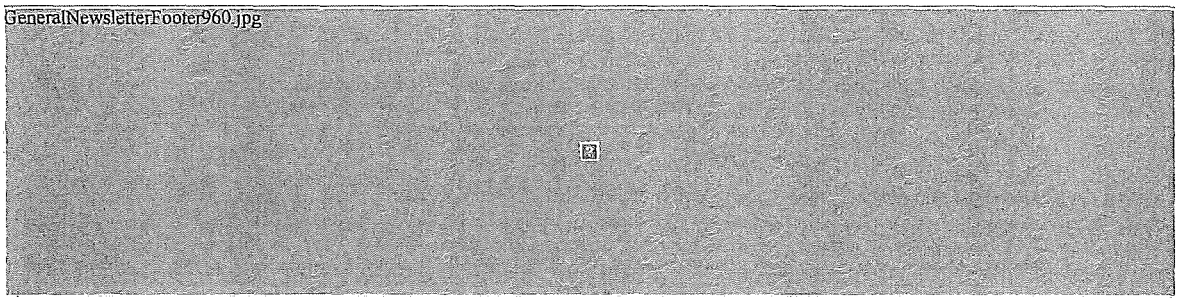

Participant Information

- Bridgeline: 1(800)-857-6697
- Participant Passcode: 1324420

If you have any questions about the call series, please contact the CDC State Coordination Task Force (SCTF) - Operations. NACCHO will continue monitoring the situation and providing updates as they become available.

Best,

Subject: CDC call with nCoV update today at 12:00 (changed from 11:00)

Date: Tuesday, January 21, 2020 10:08:05 AM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

CDC's 2019 Novel Coronavirus (2019-nCoV) response team will host a series of national calls beginning next week, from 3 p.m. to 4 p.m. EST on Tuesday, January 21, to provide state and local partners with the latest information on the novel coronavirus outbreak and U.S. preparedness efforts.

Invited participants include state, local, and territorial preparedness directors, state epidemiologists, state health officials, public health laboratory directors, and nongovernmental partners. Participant information can be found below.

Participant Information

Bridgeline: 1(800)-857-6697
Participant Passcode: 1324420

Please note, this update call is being held on a Tuesday, in lieu of the Martin Luther King Jr. federal holiday. Future calls will be held on Mondays.

For your convenience, call series dates are provided below.

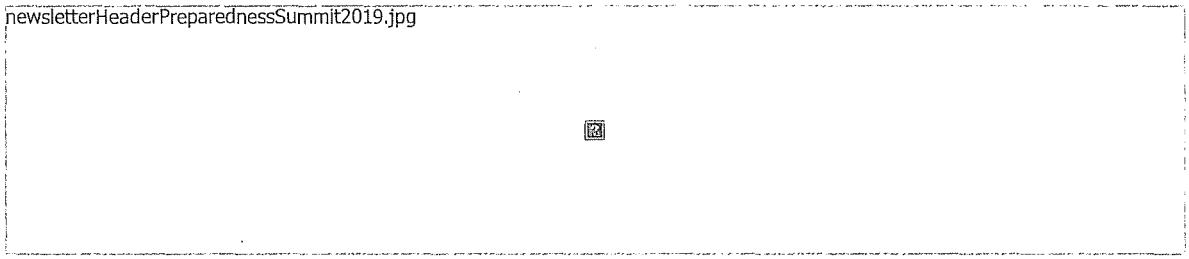

- Monday, January 27
- Monday, February 3
- Monday, February 10
- Monday, February 24
- Monday, March 2

Subject: DEM 24-Hour Daily Situational Awareness Report - 01-21-2020
Date: Tuesday, January 21, 2020 10:00:06 AM

Report Date: 01-21-2020

24-Hour Daily Situational Awareness Report

Priority Information / Current Notable Local Incidents:

The Centers for Disease Control and Prevention (CDC) continues to closely monitor an outbreak of a 2019 Novel Coronavirus (2019-nCoV) in Wuhan City, Hubei Province, China that began in December 2019. Since yesterday, the CDC is screening passengers on direct and connecting flights from Wuhan China at San Francisco International Airport. The CDC continues to coordinate with their partners and may adjust response activities as the outbreak investigation continues and more is learned about the newly emerging virus.

- It is possible that more cases will be identified in the coming days. This is an ongoing investigation and given previous experience with MERS-CoV and SARS-CoV, it is possible that person-person spread may occur. There is much more to learn about the transmissibility, severity, and other features associated with 2019-nCoV as the investigations in China, Thailand, and Japan continue. Additional information about this novel virus is needed to better inform population risk.

- CDC information: https://www.cdc.gov/coronavirus/2019-nCoV/summary.html.

- Additional Coronavirus information is available at: https://.cdc.gov/coronavirus/2019-ncov/index.html or by calling 800-CDC- INFO | (800-232-4636) | TTY: (888) 232-6348

Domestic and International News:

Computers closed at Volusia libraries after attempted cyber hack

VOLUSIA COUNTY, Fla. – Hundreds of library computers were taken offline in response to an attempted cyber intrusion targeting Volusia County Library Services. The attempted security breach was reported Thursday morning and it's believed to have affected 600 computers, including those used by the public and staff. By the next day, about 50 computers were put back online to allow library staff to conduct patron business such as checking books in and out and making reservations. It's expected that all regional libraries will have their computers back online by Friday and community libraries will be restored after that. County officials are investigating the incident.

Chinese officials urge people not to travel in and out of city at center of virus outbreak

BEIJING — Chinese health authorities sought to impose a quasi-quarantine Tuesday around Wuhan, advising people in the city of 11 million people not to leave, as they stepped up efforts to stop the spread of a mystery virus that has claimed six lives. With confirmation that the pneumonialike coronavirus can be transmitted from person to person, and with hundreds of millions of Chinese packing onto public transport to make their annual pilgrimages home for the Lunar New Year, a new sense of panic has erupted here. Long lines formed at pharmacies and convenience stores around the country as people rushed to buy surgical masks, with unlucky customers posting photos on social media of bare shelves. People around the country canceled their trips home for the Spring Festival, as new year celebrations are known, the most important holiday on the Chinese calendar. The Geneva-based World Health Organization said it would call an emergency meeting Wednesday to decide whether to designate the outbreak as an international public health emergency. Australia and the Philippines are the latest countries with suspected cases of the infection, and Taiwan also confirmed one person there had caught it.

https://www.washingtonpost.com/world/asia_pacific/chinese-officials-urge-people-not-to-travel-in-and-out-of-city-at-center-of-virus-outbreak/2020/01/21/60680d3e-3c2d-11ea-afe2-090eb37b60b1_story.html

Video Reveals Unused Earthquake Aid in Puerto Rico: 'We Are Outraged'

Unused emergency aid sat gathering dust in a government property in the city of Ponce, in southern Puerto Rico, as thousands of people prepared to spend their third week sleeping outside to stay safe as a swarm of earthquakes continued to assail the island. The water appeared to be expired, the man on the video said. But there were no signs of emergency workers or any effort to distribute the disaster supplies. The video, streamed on Saturday by Lorenzo Delgado Torres, who calls himself "El León Fiscalizador," or the lion of accountability, immediately exploded on social media.Within hours, Gov. Wanda Vázquez, faced with the biggest crisis of her tenure, had fired Puerto Rico's chief of emergency management, temporarily handed the reins of the agency over to the National Guard and ordered an investigation into why the supplies had not been given to people in need. By Sunday, two more cabinet officials had been dismissed. The governor pledged not to charge any people who

Requester,

We have conducted a diligent search for records responsive to your request. We have located responsive records, which are available to you here and have also been uploaded to NextRequest case #20-1076/ SOTF File 20059. This concludes your public records request.

Thank you.

Subject: Public Records Request #20-1076

Hello,
I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2"

"2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

Critical Branch Updates:

CCSF Transportation Branch:
- Starting today, 1/29, private vehicles will be prohibited from turning onto or using Market in the car free area: westbound from Steuart to VN and eastbound from 10th to Main.
- SFMTA Muni Alert messages: https://www.sfmta.com

CCSF Infrastructure Branch:
- Nothing significant to report.

CCSF Public Safety Branch:
- Nothing significant to report.

CCSF Health and Human Services Branch:
- The San Francisco Department of Public Health continues to coordinate with partner agencies to monitor the Novel Coronavirus (2019-nCoV) situation.

CCSF Community Branch:
- Nothing significant to report.

Domestic and International News:

Virus cases in China jumps to 5,974, surpassing SARS as evacuations begin

BEIJING - Countries began evacuating their citizens Wednesday from the Chinese city hardest-hit by a new virus that has now infected more people in China than were sickened in the country by SARS. The number of confirmed cases jumped to 5,974, surpassing the 5,327 in mainland China during the SARS outbreak in 2002-2003. The death toll rose to 132, which is still lower than the 348 people who were killed in China by SARS. Scientists say there are still many critical questions to be answered about the new virus, including just how transmissible and severe it is. China's latest figures added 26 deaths, all but one in Hubei province and its capital, Wuhan. The number of cases rose 1,459 from the previous day, a smaller increase than the 1,771 new cases reported on Monday. More than 50 infections have been confirmed abroad. The United Arab Emirates, home to long-haul carriers Emirates and Etihad, reported its first cases on Wednesday in members of a family who had come from

Wuhan, the state-run news agency reported. It wasn't immediately clear how many family members were involved.

https://www.ktvu.com/news/virus-cases-in-china-jumps-to-5974-surpassing-sars-as-evacuations-begin

Bay Area public health officials quell false information spread about coronavirus

SAN JOSE, Calif. (KTVU) - While there aren't confirmed cases of the coronavirus in the Bay Area, one county health department scrambled Tuesday to stem false reports of at least one case. A tweet, citing a nurse as the source, blared confirmation of the virus in East San Jose. However, KTVU confirmed the tweet is not true. "We have no confirmed cases in the county of Santa Clara," said county Health Officer Dr. Sara Cody. "We have no evidence that the virus is circulating actually in the U.S., in California, or in the Bay Area." Cody says the county is investigating potential cases, but it's too soon to make the leap, as they may not develop into the virus. "What we're trying to do here in the public health department is to get up to date, accurate information. And make it available for people to access," she said. "And the more accurate information we can put out on multiple channels, the better to counteract information that may not be accurate."

https://www.ktvu.com/news/bay-area-public-health-officials-quell-false-information-spread-about-coronavirus

Caribbean earthquake of 7.7 prompts office evacuations in Miami

A powerful 7.7-magnitude earthquake has struck in the Caribbean, prompting brief tsunami warnings and office evacuations as far away as Florida. The quake hit between Jamaica, the Cayman Islands and Cuba at a depth of 10 km (6.2 miles), the US Geological Survey (USGS) said on Tuesday. Buildings shook and tremors were felt across the Caribbean, but there were no immediate reports of casualties. Some offices were temporarily evacuated in Miami and parts of Jamaica. Warnings by the Pacific Tsunami Warning Center (PTWC) were later withdrawn. The PTWC initially said "hazardous tsunami waves" were possible for coasts located within 300km (186 miles) of the earthquake's epicentre. This included parts of Belize, Cuba, Honduras, Mexico, the Cayman Islands and Jamaica, it said. But in an update at around 20:45 GMT, the PTWC said the "tsunami threat had now largely passed". Seismologist Dr Lucy Jones tweeted: "The M7.7 Jamaican quake produced sideways motion on the fault, so the tsunami risk is low." The epicentre of the quake, initially reported as magnitude-7.3 before being upgraded, was 125 km north-west of Lucea, Jamaica. Shaking was reported in the Cuban capital, Havana, in Kingston, Jamaica and Miami - some some 708 km from the epicentre.

CDC Webinar/Call: Interim Guidance for Clinicians

Friday, January 31, 2020, 11:00 AM – 12:00 PM (PST)

For access to the webinar/call and other information visit,
https://emergency.cdc.gov/coca/calls/2020/callinfo_013120.asp

Clinician Outreach and Communication Activity (COCA) will provide information on the current

epidemiology, infection control and prevention recommendations, specimen collection and testing, and clinical management for patients with 2019-nCoV infection.

There will be only a few introductory slides for this presentation and no slide deck.

It is recommended to join the webinar/call in a few minutes before it starts. Due to the likely high demand participants are asked to access the webinar/call in groups if possible.

For resources for local providers, visit the LAC DPH Coronavirus webpage for Health Professionals http://publichealth.lacounty.gov/acd/nCorona2019.htm

SFDPH DOC nCoV Situation Status report #5 (01/28/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths

Worldwide: 4,593 Cases/106 Deaths
US: 5 Cases/0 Deaths
CA: 2 Cases/0 Deaths

Updates and Response:

SFDPH

Summary of actions

- Public FAQs revised, updated, and new versions have been posted online.
- Guidance developed for Home Care for PUI, non-PUI, and household members/caregivers, translations in process.
- SFDPH DOC continues to expand roles.
- Continued work on PUI housing and resources, now working closely w/local colleges/universities to discuss campus housing for PUI.
- Coordinating needs assessment/communication/providing guidance with internal DPH and external outpatient clinics.
- Transport/EMS collaborating with DEC re: screening at the dispatch level, transport, 911 surge, and monitoring CDC precautions relevant to 911 providers and patient care.
- Accommodations made for additional Nursing Staff to assist the Communicable Disease Branch-reporting tomorrow 01/29/20- multiple work stations at multiple locations secured with IT and other equipment provided.

- The DPH Environmental Health Branch and Lab Branch created disinfection guidance (related to 2019-nCoV) for the general public (personal and residential use).
- OSH is monitoring and reviewing CDC updates to recommended personal protective equipment (PPE), for any staff or workers who may be exposed to nCoV-2019. Planning for PPE deployment and "just-in-time" respirator fit testing, if needed (not needed at this time).
- The Office of the Medical Examiner will maintain a high degree of suspicion for nCoV with any deceased persons who had pneumonia, respiratory distress, ARDS, or shock. This

will add an added layer of monitoring the virus.

- Quicker and more streamlined processes are being completed around nCoV-2019 testing.
  SFDPH Page: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/

CDC

- CDC developed and posted new travel guidance for China: https://wwwnc.cdc.gov/travel/destinations/traveler/none/china#travel-notices
- CDC is monitoring for illness among travelers and providing educational materials for any travelers arriving in the United States from China at 20 U.S. airports with quarantine stations in the United States.
- CDC is posting and updating the number of PUIs in the U.S. As of 01/27/20: 5 positive, 32 negative, and 73 pending tests.

CDC nCoV page:
https://www.cdc.gov/coronavirus/2019-ncov/index.html

WHO (World Health Organization)- 01/28/20

- WHO senior leadership team, met with President Xi Jinping of the People's Republic of China in Beijing. They shared the latest information on the outbreak and reiterated their commitment to bring it under control.
- Focus on improving containment measures in Wuhan, strengthening public health measures in other cities and provinces, conducting further studies on transmissibility of the virus, sharing data, and for China to share biological material with WHO. These measures will advance scientific understanding of the virus and contribute to the development such as vaccines and treatments. https://www.who.int/news-room/detail/28-01-2020-who-china-leaders-discuss-next-steps-in-battle-against-coronavirus-outbreak
- WHO is launching a Global 2019-nCoV Clinical Data Platform to allow Member States to contribute anonymized clinical data in order to inform the public health clinical response.
- Globally 4593 confirmed cases in 14 countries.
- China has reported 4537 confirmed cases, 6973 suspected cases, and 976 severe cases. 106 deaths.
- Areas outside of China reported 56 confirmed cases, no deaths.

Subject: CDC Call on F, 1/31 at 11AM: Outbreak of 2019 Novel Coronavirus (2019-nCoV)—Interim Guidance for Clinicians

Dear Colleagues,

CDC will be hosting a Clinician Outreach and Communication Activity (COCA) call titled Outbreak of 2019 Novel Coronavirus (2019-nCoV)—Interim Guidance for Clinicians on Friday, January 31 at 11:00am (Pacific Time). During this COCA Call, clinicians will learn about the current epidemiology, infection control and prevention recommendations, specimen collection and testing, and clinical management for patients with 2019-nCoV infection.

Call Details

A few minutes before the webinar begins on Friday, January 31, 2020, please click the link below to join the webinar:
https://zoom.us/j/915683484
Or join by iPhone one-tap:

US: +16468769923,,915683484# or +16699006833,,915683484#
Or join by Telephone (for higher quality, dial a number based on your current location):
Dial US: +1 646 876 9923 or +1 669 900 6833
Webinar ID: 915 683 484
International numbers are available: https://zoom.us/u/anixAVglV
Special Request: Due to the high demand we anticipate for this COCA Call, we kindly ask participants to access it in a group format, if at all possible, to allow for the maximum number of participants to attend. Please note, there will be only a few introductory slides for this presentation. The subject matter covered during this webinar will not have an accompanying slide deck.

For more information, visit https://emergency.cdc.gov/coca/calls/2020/callinfo_013120.asp

Please share this email with clinical colleagues as appropriate.
Thank you for your attention.

Subject: SOTF - Notice of Appearance, April 6, 2022 - Sunshine Ordinance Task Force; 4:00 PM; Remote Meeting

Good Afternoon:

You are receiving this notice because you are named as a Complainant or Respondent in the following complaints scheduled before the Sunshine Ordinance Task Force to: 1) hear the merits of the complaint; 2) issue a determination; and/or 3) consider referrals from a Task Force Committee. ***Please confirm your attendance for this hearing with the Sunshine Task Force Administrator.***

Date: April 6, 2022

Location: Remote Meeting

Time: 4:00 p.m.

Complainants: Your attendance is required for this meeting/hearing.

Respondents/Departments: Pursuant to Section 67.21 (e) of the Ordinance, the custodian of records or a representative of your department, who can speak to the matter, is required at the meeting/hearing.

Complaints:

File No. 21085: Complaint filed by Kevin Carroll, the Hotel Council of San Francisco and Matthew C. Alvarez against Angela Calvillo, Clerk of the Board of Supervisors for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.1 and 67.7 by failing to provide fair and equitable access to members of the public (Board of Supervisors, Budget and Finance June 25, 2021, meeting). Action: Shall SOTF continue File No. 21085 to the April 6, 2022, meeting.

File No. 20059: Complaint filed by Anonymous against the Department of Public Health for allegedly violating Administrative Code (Sunshine Ordinance), Section 67.25 by failing to respond to an Immediate Disclosure request in a timely and complete manner.

File No. 21116 Complaint filed by Anonymous against Department of Public Health (DPH) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, by failing respond to a public records request in a timely and/or complete manner.

File No. 21124 Complaint filed by Marc Norton against the Department of Public Health (DPH) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, by failing to respond to a public records request in a timely and/or complete manner.

File No. 21159: Complaint filed by Bob Planthold against the Department of Building Inspection Commission (Access Appeals Commission) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.16 by failing to post meeting minutes (2000 through 2011).

File No. 22017: **CONSENT AGENDA** - The Sunshine Task Force (Committee) shall review File Nos, 21021, 21036, 21087, 21095, 21099, 21103, 21118, to determine if the Sunshine Ordinance Task Force has jurisdiction and determine if the requested records are public pursuant to Administrative Code (Sunshine Ordinance), Sections 67.21(e) and whether or not any person has violated the Sunshine Ordinance, California Public Records Act, or Brown Act pursuant to Administrative Code (Sunshine Ordinance) Section 67.30(c), and, if applicable, to issue an Order of Determination and refer matters to the Compliance and Amendments Committee for monitoring. The Complainant and Respondent are not required to attend the April 6, 2022, Sunshine Task Force meeting but may attend to provide testimony related to the above listed determinations.

a) File No. 21021 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7 and 67.9, by failing to provide meaningful and sufficiently clear agenda descriptions, distribute agenda packets to members of the public, 67.15 by failing to provide an opportunity for public comment on each item on the agenda, and California Public Records Act by failing meeting with quorum and failing to list disability information on the agenda.

b) File No. 21036 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7(a) by failing to post the Agenda 72 hours in advance of the meeting and failure to provide a description of each item of business; 67.7(b) failing to post documents on the website or make available to the public; agenda; 67.9(a) failure to post relevant documents on the internet; 67.15(c) failing to allow public comment; and 67.21(e) failing to make.

c) File No. 21087 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7, 67.9, and 67.15, by failing to make documents available to the public as soon as they are available, by failing to list proposed actions on the agenda, acting on a matter not listed on the agenda and by failing to approve a rule allowing the public to address the body; and California Government Code 54954(a) by failing to provide the time and place for holding regular meetings. (January 20, 2021, February 3, 2021, February 9, 2021, February 18, 2021, and June 12, 2021, meetings).

d) File No. 21095 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7, 67.9, and 67.15 and California Government Code Sections 54953 and 54954(a)(1) by failing to refer/post explanatory documents provided to the policy body, failing to agenda and other documents on file available to the public, failing to provide a brief description of each item of business, failing to make documents available on the internet, failing to take a roll call vote, failing to specify for each item of business the proposed action or statement that the item is for discussion only, failing to adopt a rule providing that each person wishing to speak on an item before the body shall be permitted to be heard once for up to three minutes, failing to include a message for people with disabilities on the agenda, failing to include language on the agenda regarding Sunshine Rights, and failing to include the contact information for the Sunshine Ordinance Task Force. (February 3,2021, February 9, 2021, and February 17, 2021, meetings).

e) File No. 21099 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7, 67.9, and 67.15 and

California Government Code Sections 54953 and 54954(a)(1) by failing to refer/post explanatory documents provided to the policy body, failing to agenda and other documents on file available to the public, failing to provide a brief description of each item of business, failing to make documents available on the internet, failing to take a roll call vote, failing to specify for each item of business the proposed action or statement that the item is for discussion only, failing to adopt a rule providing that each person wishing to speak on an item before the body shall be permitted to be heard once for up to three minutes, failing to include a message for people with disabilities on the agenda, failing to include language on the agenda regarding Sunshine Rights, and failing to include the contact information for the Sunshine Ordinance Task Force. (February 9, 2021, Executive Committee meetings).

f) File No. 21103 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7, 67.9, and 67.15 and California Government Code Sections 54953 and 54954(a)(1) by failing to refer/post explanatory documents provided to the policy body, failing to agenda and other documents on file available to the public, failing to provide a brief description of each item of business, failing to allow an opportunity for public comment on each on the agenda, failing to take a roll call vote, failing to make documents available on the internet, failing to take a roll call vote, failing to specify for each item of business the proposed action or statement that the item is for discussion only, failing to adopt a rule providing that each person wishing to speak on an item before the body shall be permitted to be heard once for up to three minutes, and failing to announce agenda changes at the beginning of the meeting or as soon thereafter as possible. (February 17, 2021, meetings).

g) File No. 21118 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7, 67.9 and 67.15 and California Government Code Sections 54953(a)(b) and 54954(a) by failing to refer/post explanatory documents provided to the policy body, failing to provide a brief description of each item of business, failing to take a roll call vote, and failing to adopt a rule providing that each person wishing to speak on an item before the body shall be permitted to be heard once for up to three minutes,. (March 17, 2021, Behavioral Health Commission and March 9, 2021, Implementation and Executive Committee).

For inclusion in the agenda packet, supplemental/supporting documents must be received by ***5:00 pm, March 31, 2022.***

DPH Written Response to SOTF in advance of April 6, 2022 Hearing

San Francisco Department of Public Health Statement Regarding All 3 Complaints:

The Department of Public Health (DPH) is the lead City agency responsible for San Francisco's ongoing COVID emergency response. At the time these requests were made, a high proportion of DPH employees were deployed as Disaster Service Workers, including our custodians of records. With an average of 50-60 public records requests received by the DPH every week, it has been incredibly challenging to respond to all requests received during the COVID pandemic in a timely manner.

In addition, DPH has had custodian of records turnover which means there has been a significant loss of historical knowledge and context with regards to DPH Public Records Requests. DPH is working to address these staffing challenges as expeditiously as possible. We will be hiring public records staff dedicated solely to public records work, a new model for DPH. We plan to interview candidates for the permanent custodian of records position very soon. In this interim period, we have a team of DPH staff addressing our public records request. We thank the Sunshine Ordinance Taskforce for their patience during this transition.

Please also note that the previous custodians of records who were managing these requests left DPH in September 2021 and December 2021, respectively. The extent of our historical knowledge from that time is limited to what was entered in our NextRequest database.

All 3 complaints on the Agenda concern a lack of DPH timely response during our management of the ongoing public health emergency. Despite staff limitations, we were able to finally gather, review and produce the requested records, these requests are now closed.

File No. 20059: Complaint filed by Anonymous against the Department of Public Health for allegedly violating Administrative Code (Sunshine Ordinance), Section 67.25 by failing to respond to an Immediate Disclosure request in a timely and complete manner.

- On February 28, 2020, DPH received an immediate disclosure public records request from MuckRock.com seeking: All communications with CDC or its employees (email, text, or chat) with 13 keywords related to COVID-19. And all communications to or from the California DPH or its employees (email, text, or chat) with 13 keywords related to COVID-19 from Nov 14, 2019 to present.
- On March 3, 2020, the custodian of records at the time emailed the requestor to indicate that the request that per San Francisco Administrative Code Section 67.25(a) the request would be treated as a standard public records request subject to the normally applicable 10-day response time, with a possible extension.
- On March 11, 2020, the custodian of records, per California Government Code Section 6253(c), invoked an extension of up to 14 days because of the voluminous nature of the request.
- On March 13, 2020, the custodian of records emailed the requestor that DPH had identified approximately 25,000 emails (totaling a currently unknown number of pages) potentially responsive to the request, all in electronic format.

    - We also indicated that DPH would need to review the emails for responsiveness, privilege, and exemptions.
    - We noted that this effort would be time-consuming and, in light of the global coronavirus pandemic, including declared State and local San Francisco emergencies, would involve use of scarce public resources.
- On March 18 2020, the custodian of records emailed asking for clarification on multiple requests received from the same requester with similar requests.
- We never received a response to this request for clarification, and in October 2020, the custodian of records notified the requester via NextRequest that since additional clarification had not been provided, we were unable to conduct a diligent search for responsive records without their guidance, and we considered the request closed.
- This complaint, File No. 20059 filed by the requester, was initially heard at a SOTF Complaint Committee hearing on February 15, 2022. Natalie Pojman attended as DPH's representative.
- On March 1, 2022, DPH provided a written response via email to the requester with a request for clarifying information (PDF attached). The requester has not yet replied to that email.
- Since March 8, 2022, DPH has provided the requester with over four thousand pages of responsive records directly via email as well as via NextRequest (PDF attached). SOTF has been copied on all responsive records provided.
- DPH acknowledges that it did not respond to this request in a timely manner due to staffing shortages, the volume of public records requests received, and the ongoing COVID emergency response; however, we have provided a voluminous number of documents following the February 15 hearing and consider this request completed.

File No. 21116 Complaint filed by Anonymous against Department of Public Health (DPH) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, by failing respond to a public records request in a timely and/or complete manner.

Next Request Record #21-1964:

- On April 24, 2021, the requester opened NextRequest record #21-1964, for "All emails and texts to/from Joseph Pace during calendar year 2020 with the keywords "McCallum" or "Foley" or "Justin."
- DPH did not provide responsive records within the customary 10-day timeframe.
- On September 8, 2021, the requester followed up on the status of their request.
- SOTF File No. 21116 was brought against DPH for failing to respond to a public records request in a timely and/or complete manner.
- This complaint was heard by the Education and Training Committee on January 11, 2022. Natalie Pojman attended the hearing. The requester did not show up to the hearing.
- The Committee requested that DPH pull the following as responsive records:
    - Emails for the month of January 2019 (which the requester had previously asked for in writing, according to the hearing agenda).
    - Texts to/from Joseph Pace with the above keywords.
- The interim DPH Sunshine Team worked with Joseph Pace to search and review responsive records. Responsive records in the form of texts, emails, and email attachments were provided to the requester in batches on March 9th, 17th, and 18th, 2022 (PDF attached). The records were provided both in NextRequest and via direct email to the requester.

- DPH acknowledges that it did not respond to this request in a timely manner due to staffing shortages, the volume of public records requests received, and the ongoing COVID emergency response; however, we fulfilled the requests of the Committee following the January 11 hearing and consider this request completed.

File No. 21124 Complaint filed by Marc Norton against the Department of Public Health (DPH) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, by failing to respond to a public records request in a timely and/or complete manner.

Next Request Record #21-1698:

- On April 12, 2021, DPH received a public records request from Marc Norton seeking: "Any and all written documents between the City and the Giants, Warriors or Bon Appetit regarding reopening protocols at Oracle Park or Chase Center."
- On April 21, 2021, the Custodian of Record, Veronica Vien, contacted Mr. Norton with the following: "In light of the current pandemic and local health emergency, this request will take a great deal of time to process and involve use of scarce public resources. Therefore, we request that you more narrowly tailor your request so we can identify and produce responsive documents...." We made the above request under Sunshine Ordinance Section 67.25 (c), which entitles the City to inquire as to a requester's purpose in order to "suggest alternative sources for the information which may involve less redaction or to otherwise prepare a response to the request."
- On April 23, 2021, Mr. Norton declined to narrow his request.
- On July 1, 2021, DPH contacted Mr. Norton and stated it was still working on identifying responsive records, but that he could refer to NextRequest files #20-1287 and #20-4844 for responsive records related to the Golden State Warriors.
- On September 16, 2021, through the Sunshine Ordinance Task Force, Mr. Norton followed up on his request.
- DPH conducted a search and, on September 25, 2021, provided 41 emails and 24 documents as responsive records. This was done by a new Custodian of Records, Cristina Padilla, as Veronica Vien had separated from DPH by this time.
- Mr. Norton then inquired about additional documents relating to Oracle Park. DPH then went back to the DPH subject matter expert to inquire after any additional records.
- After conducting a further search for records through the subject matter expert, DPH uploaded 63 additional records on October 9, 2021.
- On January 27, 2022, at the request of the Sunshine Ordinance Task Force, DPH uploaded a documents index of the responsive records.
- To date, DPH has provided more than 100 responsive records to Mr. Norton, which included plans, emails, and other documents. DPH has no additional responsive records to provide.
- DPH acknowledges that it did not respond to this request in a timely manner due to staffing shortages, the volume of public records requests received, and the ongoing COVID emergency response; however, our response up to the present time is complete and we consider this request completed.

Requester,

We have conducted a diligent search for records responsive to your request. We have located responsive records, which are available to you here and have also been uploaded to NextRequest case #20-1076. Due to the need to continue reviewing, we will produce any additional responsive records on a rolling basis.

Thank you.

Subject: Public Records Request #20-1076

Hello,
I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2"

"2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2"

"2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

Subject: Public Records Request #20-1076

Hello,
I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.
All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO, FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.
2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCOV" "nCOV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

Requester,

Please be advised, DPH has withheld 4 emails that contain confidential personnel records protected by the California Constitutional right of privacy. (*See*, Cal. Const. Art. I §1; *Hill v. National Collegiate Athletic Assn.*, (1994) 7 Cal.4th 1, 35 (identifying privacy interest in precluding dissemination of sensitive, confidential information); *Teamsters Local 856 v. Priceless, LLC*, (2003) 112 Cal.App.4th 1500, 1512 (public employees have a right to privacy in their personnel files).) This record is also a personal record the disclosure of which would constitute an unwarranted invasion of personal privacy under state law. (*See* (California Government Code § 6254(c) (protecting "[p]ersonnel, medical or similar files, the disclosure of which would constitute an unwarranted invasion of personal privacy"), and § 6254(k) (protecting records which are "exempted or prohibited pursuant to provisions of federal or state law" from disclosure); *see also* S.F. Admin. § 67.1(g).)

Thank you.

Subject: RE: SOTF order in 20059 against you - COVID comms with CDPH/CDC

Dear Requestor,

This is email is follow-up to SOTF File No. 20059. The San Francisco Department of Public Health (DPH) has reopened this request (NextRequest case #20-1076) and is working to provide you additional records. In addition to the records that we have previously provided from the Department's most senior leadership, we have an email out to all 8,000+ DPH employees asking for all responsive records they may have. We will continue to provide documents on a rolling basis. Dr. Tomas Aragon no longer works for the City and County of San Francisco and does not have a CCSF cell phone. Dr. Aragon's texts from that period are no longer accessible.

Please also note that the previous custodians of records who were managing this request separated from DPH in September 2021 and December 2021, respectively. The extent of our historical knowledge from that time is limited to what has been entered in our NextRequest database.

DPH is the lead City agency responsible for San Francisco's ongoing COVID emergency response. At the time these requests were made, a high proportion of DPH employees were deployed as Disaster Service Workers and reassigned from their usual duties to tasks related to the emergency, including our custodians of records. With an average of 50-60 public records requests received by the DPH every week, it has been incredibly challenging to respond to all requests received during the COVID pandemic in a timely manner.

Due to the high turnover of DPH custodians of records there has been a significant loss of historical knowledge and context with regards to overdue DPH Public Records Requests. DPH is working to address these staffing challenges as expeditiously as possible. We will be hiring staff dedicated solely to public records work. In this interim period, we have a team of DPH staff addressing our public records requests. We thank the Sunshine Ordinance Taskforce for their patience during this transition.

Sincerely,
DPH Sunshine Team

Requester,

We have conducted a diligent search for records responsive to your request. We have located responsive records, which are available to you here and have also been uploaded to NextRequest case #20-1076/ SOTF File 20059. Due to the need to continue reviewing, we will produce any additional responsive records on a rolling basis.

Thank you.

SFDPH DOC COVID-19 Situation Status Report (02/20/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths
Worldwide: 76,199 Cases / 2,247 Deaths *(John Hopkins CSSE, link below)*
US: *15 Cases (CDC excluding 14 Cases from Diamond Princess Cruise Ship) / 0 Deaths
CA: 8 Cases / 0 Deaths
SF: 0 Cases

Updates and Response:

SFDPH

Summary of actions

- A suspected case of novel coronavirus (COVID-19) from Travis Air Force Base is being treated in a San Francisco hospital. The individual has no symptoms but tested positive for the virus in Japan and was brought to San Francisco from Travis Air Force Base in Fairfield, where they were quarantined after disembarking a cruise ship.
- On 02-19-2020 SFDPH hosted a conference call with six major SF University and College systems to provide information and guidance on managing return travelers from China that may need follow up.
- SFDPH DOC is identifying reporting needs and requirements for SF return traveler data, to guide analysis and provide a comprehensive picture of the ongoing and completed work.
- SFDPH is utilizing data from incoming clinical consultation calls to guide prioritization of site visits and outreach to community clinics, healthcare facilities, and hospitals in SF. This includes facilities in the SFDPH Safety Net and external and/or private facilities.
- SFDPH Primary Care clinics are universally screening their return traveler patients in clinic and report readiness to safely manage potential COVID-19 PUI cases.
- SFDPH has identified a need to align efforts on quarantine clearance requests from the SF community and employers.
- Public Information Office is focusing on emerging questions from the community about the quarantine process for congregate living settings (Single Room Occupancy units, multi-family homes, etc.).
- SF Mayor, London Breed, will send letter to the RSA cybersecurity conference to 45k participants, reinforcing that risk for COVID-19 remains low.

CDC-

- On February 19, 2020, CDC issued travel guidance for Hong Kong, recommending that travelers practice usual precautions. https://wwwnc.cdc.gov/travel/notices/watch/coronavirus-hong-kong
- CDC reported U.S. testing data: 412 negative PUIs; 52 Pending PUIs.
- https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html

WHO (World Health Organization)-

China has revised their guidance on case classification for COVID-19, removing the classification of "clinically diagnosed" previously used for Hubei province, and retaining only "suspected" and "confirmed" for all areas, the latter requiring laboratory confirmation. Some previously reported "clinically diagnosed" cases are expected to be discarded over the coming days as laboratory testing is conducted and some are found to be COVID-19-negative.

- https://www.who.int/health-topics/coronavirus

CDPH (California Department of Public Health)-

- CDPH announced that 16 laboratories, including the Viral and Rickettsial Disease Laboratory in Richmond, CA, will provide more rapid results than currently available and help to inform public health action and medical care for people who may have been exposed to novel coronavirus. Results from the Centers for Disease Control and Prevention currently take between two to seven days. The Public Health Department lab anticipates it will be able to conduct testing, and report results, within two days of specimen receipt.
- https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)
International data:

- 76,199 confirmed cases globally
- 74,999 confirmed cases in mainland China
- 1,200 confirmed cases outside of China across 29 countries.
- 2,144 deaths in mainland China + 9 additional deaths in 7 countries outside of China (Philippines, Hong Kong, Taiwan, Japan, South Korea, France, Iran).
- 2 deaths from Diamond Princess Cruise Ship.

National (U.S.) data:

- No new confirmed cases reported in the U.S. within the last 24 hours.
- https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6

SFDPH DOC COVID-19 Situation Status Report (02/19/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths
Worldwide: 75,283 Cases / 2,014 Deaths *(John Hopkins CSSE, link below)*
US: 29 Cases / 0 Deaths
CA: 8 Cases / 0 Deaths
SF: 0 Cases

Updates and Response:

SFDPH

Summary of actions

- SFDPH is focused on working with Chinese community groups, commerce, businesses, schools, and media outlets, addressing concerns and providing preventative measures to the community.
- Site visits to SF hospitals continue. DPH is providing consultation to facilities re: level of preparedness of the hospital and EMS, according to guidance.
- SFDPH conferring with SF colleges & universities to provide COVID-19 guidance.
- SFDPH developed a COVID-19 clinical intake form and check list to provide step-by-step guidance when evaluating patients who may have COVID-19, with a goal of preventing the spread of infection and expediting investigation. https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/coronavirus-2019-information-for-healthcare-providers/
- A Hospital FAQ for visitors and patients is currently in development.

General FAQs

CDC-

- CDC is creating a booklet for arriving travelers to record temperatures and symptoms, to replace current CDC temperature logs. CDC is expecting to release the booklet by the end of February 2020.
- CDC reported U.S. testing data: 412 negative PUIs; 52 Pending PUIs.
  https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html

WHO (World Health Organization)-

- WHO is working with an international network of statisticians and mathematical modelers to estimate key epidemiologic parameters of COVID19.
- Online courses have been added to the OpenWHO platform:
  - Critical Care of Severe Acute Respiratory Infections
  - Health and safety briefing for respiratory diseases – ePROTECT
    https://www.who.int/healthacademy/courses/en/
    https://www.who.int/health-topics/coronavirus

CDPH (California Department of Public Health)-

- CDPH is polling regions re: their inventory of Personal Protective Equipment (PPE).
- CDPH announced that 16 laboratories, including the Viral and Rickettsial Disease Laboratory in Richmond, CA, will soon be able to perform COVID-19 testing.

- CDPH reported 02/18/20 CA testing data: 172 persons tested; 8 confirmed cases; 147 negative results; 10 pending results
- https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

Hi, all—

We'd like to have daily check-ins for the next 4-5 days to discuss the SF healthcare worker with (currently) inconclusive COVID-19 lab results. Please forward this invitation as needed to appropriate persons in your organizations (county, state). Our hope is that these meetings will not all need to be an hour long, but I'm scheduling them as such for now. Please see call in information below.

Thanks,

Ginny Bowen

Updates and Response:

SFDPH

Summary of actions

- Mayor London Breed declared a local emergency 02/25/20, allowing CCSF to access additional resources to prepare for potential COVID-19 cases in SF.
- SFDPH DOC expanded community outreach and mitigation efforts, working closely with the CCSF

Emergency Operations Center (EOC) in anticipation of increased inquiries due to the declaration of a local emergency.

- SFDPH is focusing on providing a comprehensive picture of past and current preparation and mitigation efforts, forward leaning departmental objectives, and the data and information being used to guide the work.
- SFDPH and the EOC are collaborating to create a process for routing briefing and other informational requests (from media and non-media sources) to the appropriate channels.
- SFDPH drafted guidelines for housing plans for confirmed COVID-19 cases, potential COVID-19 cases, and medium risk individuals who live in congregate living situations including Single Room Occupancies (SROs).
- SFDPH completed a preparedness consultation site visit to Chinese Hospital 02/25/20 and UCSF Mission Bay today 02/26/20.
- SF Public Health Laboratory is strengthening their safety measures for lab personnel, including enhanced Personal Protective Equipment (PPE) requirements.
- SF Public Health Laboratory is still awaiting delivery of CDC testing kits. CDC reported they will have a ship date for the testing kits by the end of this week.
- SFDPH is updating their COVID-19 Fact Sheet to include the most recent updates and align messaging and information across DPH and CCSF sites.
- SFDPH Public Information Office recently completed a COVID-19 prevention focused informational poster, which will soon be displayed on BART Trains.
- SFDPH CDCP information: https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-_%20%20%20coronavirus/

CDC-

- CDC updated their travel advisory to include South Korea. https://wwwnc.cdc.gov/travel/notices/warning/coronavirus-south-korea
- CDC reports that to date 445 people have been tested in the U.S.
- https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html

WHO (World Health Organization)-

- WHO stated that 4 new countries (Algeria, Austria, Croatia, and Switzerland) reported cases of COVID-19 in the past 24 hours. (as of 02/26/20)
- https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports

CDPH (California Department of Public Health)-

- CDPH reported new cases of COVID-19 in CA in the 24 hours. Number of confirmed cases in CA remains at 10.
- https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data-

- 81,322 confirmed cases globally.
- 78,064 confirmed cases in mainland China; 3,258 confirmed cases outside of mainland China, in 46 countries.
- 2,719 deaths in mainland China + 51 additional deaths (Afghanistan, Bahrain, Iraq, Oman, Iran, Italy,

Philippines, Hong Kong, Taiwan, Japan, France, South Korea, Diamond Princess Cruise)

- Confirmed cases outside of China across 36 countries/regions (includes regions of Hong Kong and Taiwan, outside of mainland China)

National (U.S.) data:

- 59 confirmed cases currently in the U.S. (42 from Diamond Princess cruise ship, from unassigned locations) cases in 5 states.

Updates and Response:

CCSF

- The Mayor has declared a local emergency due to COVID-19. Although there are still zero confirmed cases in San Francisco residents, the global picture is changing rapidly. Given the high volume of travel between SF and mainland China, and the spread of the virus in other countries, there is a growing likelihood that San Francisco will see cases eventually. The declaration of a local emergency will mobilize city resources, accelerate emergency planning, streamline staffing, coordinate agencies across the city, allow for future

Subject:	Fw: News Alert: First U.S coronavirus case of unknown origin confirmed in Northern California, a sign the virus may be spreading in a local area
Date:	Wednesday, February 26, 2020 11:46:45 PM

Dear Susan, Naveena and Julie,
Curtis and I listened to the CAHAN call today late afternoon where the first case of community transmission in Solano county was described. The CDPH call with regard to official facts was vague. My understanding from unofficial communications with colleagues is that the case was transferred from another facility to UC Davis, is critically ill with ARDs, and was tested as a PUI under the footnote in the CDC criteria of "severe respiratory illness of unknown etiology". The patient has no known epidemiologic risk factors including travel out of country or exposure to a known COVID-19 case or other ill exposures, and it sounds like contact investigation was performed thoroughly.

Since many on this email are participating on many statewide, national or hospital calls, if there is further information that anyone hears about this case please share with the Clinical Consultation Team. We have been basing much of our PUI screening criteria on epidemiologic risk (e.g. travel from an area with sustained community transmission). However, if after communicating with other county partners we confirm that this case truly had no known travel or exposure, I recommend we consider broadening our PUI definition to include any severely ill patient with pneumonia (e.g. hospitalized or in an ICU) regardless of travel history.

Since there were many astute clinicians asking questions on the CAHAN call, I anticipate that tomorrow we will have many inquiries along the same lines with regard to broadening our testing criteria, as well as requests for testing, requests for guidance, concerns about unprotected exposures in healthcare workers, PUIs, and specimen collection and testing (aside from worried well calls). Based on the available information it seems reasonable to broaden testing, but
I want to make sure we all agree and that we are prepared for the influx and extra staffing we may need to handle it.

First U.S coronavirus case of unknown origin confirmed in Northern California, a sign the virus may be spreading in a local area

The Centers for Disease Control and Prevention has been informed of the first case of the coronavirus in a person who did not recently return from a foreign country or have contact with a confirmed case, according to a person briefed on the case. Officials have begun tracing the contacts of the resident to find out how the person may have been infected and who else might have been exposed.

Subject:	HIGHLIGHTS | President Trump and Members of the Coronavirus Task Force Hold a News Conference
Date:	Wednesday, February 26, 2020 7:43:29 PM
Attachments:	image005.png image006.png

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

State Leaders and Staff,

This evening, President Donald J. Trump and members of the Coronavirus Task Force briefed reporters on the extensive efforts underway to continue effectively combatting coronavirus. You can see the full video the news conference here. Below you find highlights from that news conference.

During the news conference, Vice President Mike Pence noted the State and local partnership saying, "And we'll also be continuing to reach out to governors, state and local officials. In fact, in the recent days, the White House met with over forty state, county and city health officials from over 30 states and territories to discuss how to respond to this -- to the potential threat of the coronavirus."

You can find Secretary Alex Azar's remarks at the February 25th HHS press briefing on the Administration's response to COVID-19 here.

You can find the latest information at CDC.gov. CDC's Twitter account is also a great resource to echo – you can find it here: twitter.com/CDCgov.

Subject: SFDPH DOC Incident Action Plan (IAP) for Operational Period 7
Date: Friday, February 28, 2020 3:47:01 PM
Attachments: OP7 COVID-19 IAP 2020.02.28 FINAL.pdf

Please find attached SFDPH DOC Incident Action Plan (IAP) for Operational Period 7 (Saturday 2/29/2020 through Friday 3/6/2020).

Regarding Dr. Aragon's texts, the custodians of records who managed this request left the Department in September and December of 2021, respectively. When our current team began to work on responding to public records, Dr. Aragon had been gone from the Department for over a year. Dr. Aragon left DPH during the height of a global pandemic and all City efforts at that time were focused on addressing the task of saving lives. We have conducted a thorough search and do not have Dr. Aragon's texts. We apologize for not preserving these records when the request was made. DPH looks forward to resolution guidance on this matter from the Sunshine Task Force.

Finally, we would like to clarify early conversations that the requester had with DPH in March 2020, regarding whether requester would narrow his request. In the initial exchange between the requester and the then custodian of records, 25,000 was the estimated number for all documents, including duplications, not a final count to be used as a measure of documents to be produced. We will continue searching and providing responsive documents on a rolling basis.

Thank you,
DPH Sunshine Team

Subject: SOTF - Notice of Appearance - Compliance and Amendments Committee; April 26, 2022 4:30 p.m.

Good Afternoon:

You are receiving this notice because you are named as a Complainant or Respondent in one of the following complaints scheduled before the Compliance and Amendments Committee to: 1) hear the merits of the complaint; 2) issue a determination; and/or 3) consider referrals from a Task Force Committee. ***Please confirm your attendance for this hearing.***

Date: **April 26, 2022**
Location: Remote meeting; participant information to be included on the Agenda cover page.
Time: 4:30 p.m.
Complainants: Your attendance is required for this meeting/hearing.
Respondents/Departments: Pursuant to Section 67.21 (e) of the Ordinance, the custodian of records or a representative of your department, who can speak to the matter, is required at the meeting/hearing.
Complaints:
File No. 20059: Complaint filed by Anonymous against the Department of Public Health for allegedly violating Administrative Code (Sunshine Ordinance), Section 67.25 by failing to respond to an Immediate Disclosure request in a timely and complete manner.

File No. 21054: Complaint filed by Patrick Monette-Shaw against Grant Colfax, Veronica Vien and the Department of Public Health for violating Administrative Code (Sunshine Ordinance), Section 67.21 by failing respond to a public records request in a timely and/or complete manner.
File No. 21069: Complaint filed by Mark Sullivan against David Steinberg and the Department of Public Works for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.21(b)(c) by failing to respond to a records request in a timely and/or complete manner and by failing to assist the requester, 67.25(a) by failing to respond to an Immediate Disclosure Request in a timely and/or complete manner, CPRA Section 6253(c) by failing to notify the requestor of the possession of records of the agency and by failing to notify the person making the request of the determination and the reasons for withholding, CPRA Section 6253.1(a)(1) by failing to identify records and information that are responsive to the request or to the purpose of the request.
For a document to be considered, it must be received at least five (5) working days before the hearing (see attached Public Complaint Procedure***). For inclusion into the agenda packet, supplemental/supporting documents must be received by 5:00 pm, April 21, 2022.***

Good Morning:

The Department of Public Health has been named as a Respondent in the attached complaint filed with the Sunshine Ordinance Task Force. Please respond to the attached complaint/request within five business days.

The Respondent is required to submit a written response to the allegations including any and all supporting documents, recordings, electronic media, etc., to the Task Force within five (5) business days of receipt of this notice. This is your opportunity to provide a full explanation to allow the Task Force to be fully informed in considering your response prior its meeting.

Please include the following information in your response if applicable:

1. List all relevant records with descriptions that have been provided pursuant to the Complainant request.
2. Date the relevant records were provided to the Complainant.
3. Description of the method used, along with any relevant search terms used, to search for the relevant records.
4. Statement/declaration that all relevant documents have been provided, does not exist, or has been excluded.
5. Copy of the original request for records (if applicable).

Please refer to the File Number when submitting any new information and/or supporting documents pertaining to this complaint.

The Complainant alleges:
Complaint Attached.

Subject: SOTF - Request for Waiver of 45 day Rule

Dear SOTF Petitioners, Respondents and other Stakeholders:

As you most likely know SOTF operations have been delayed over the last few months due to the Covid-19 emergency. The SOTF have started to conduct remote meetings via videoconference and are working to establish procedures to resume all operations including the processing of complaints.

While the Sunshine Ordinance requires that certain actions be taken within 45 days, the Covid-19 emergency has forced delays and immense new backlogs for complaint hearings. We write today to ask if you are willing to waive the 45 day rule for your complaint.

The SOTF intends to resume hearing complaints *on a limited basis and complaints will be* queued to be heard in the near future. We continue to work to address technical issues posed by remote meetings. We are aware of the time

sensitivity of your records requests. Please be assured that the SOTF appreciates the urgency of your matters and the importance of handling them in a timely manner.

If you have further questions about your files or have other issues, please feel free to email the SOTF Administrator at the email below.

Subject:	SOTF - Complaint Committee hearing, February 15, 2022; 5:30 PM; remote meeting;
Attachments:	SOTF - Complaint Procedure 2019-10-02 FINAL.pdf

Good Morning:

Notice is hereby given that the Complaint Committee (Committee) of the Sunshine Ordinance Task Force (Task Force) shall hold hearings on complaints listed below to: 1) determine if the Task Force has jurisdiction; 2) review the merits of the complaints; and/or 3) issue a report and/or recommendation to the Task Force.

Date: February 15, 2022

Location: Remote Meeting

Time: 5:30 p.m.

Complainants: Your attendance is required for this meeting/hearing.

Respondents/Departments: Pursuant to Section 67.21 (e) of the Ordinance, the custodian of records or a representative of your department, who can speak to the matter, is required at the meeting/hearing.

File No. 20059: Complaint filed by Anonymous against the Department of Public Health for allegedly violating Administrative Code (Sunshine Ordinance), Section 67.25 by failing to respond to an Immediate Disclosure request in a timely and complete manner.

File No. 20053: Complaint filed by Anonymous against Lt. Kathryn Waaland, Police Department, for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.21(b)(l) by failing to respond to a records request in a complete and timely manner, 67.26 withholding of records.

File No. 20124: Complaint filed by Stephen Bejanski against Kevin Guy and the Office of Short-Term Rentals for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.24 for failing to provide public information; 67.25 for failing to respond to an Immediate Disclosure Request in a timely manner, 67.26 for failing to keep withholding to a minimum; 67.27 for failing to justify withholding and 67.29 and failing to provide an index of records.

File No. 22005: Complaint filed by Marc Norton Against the Department of Public Health for allegedly violating Administrator Code (Sunshine Ordinance), Sections 67.21, by failing to respond to a public records request in a timely and/or complete manner.

File No. 22006: Complaint filed by Andrew While against the Department of Police Accountability for allegedly violating Administrator Code (Sunshine Ordinance), Sections 67.1, 67.21, 67.24(d), by failing to respond to a public records request in a timely and/or complete manner.

Documentation (evidence supporting/disputing complaint)

For a document to be considered, it must be received at least five (4) working days before the hearing (see attached Public Complaint Procedure).

For inclusion in the agenda packet, supplemental/supporting documents must be received by ***5:00 pm, February 10, 2022.***

Good Afternoon:

You are receiving this notice because you are named as a Complainant or Respondent in the following complaints scheduled before the Sunshine Ordinance Task Force to: 1) hear the merits of the complaint; 2) issue a determination; and/or 3) consider referrals from a Task Force Committee. ***Please confirm your attendance for this hearing with the Sunshine Task Force Administrator.***

Date: April 6, 2022

Location: Remote Meeting

Time: 4:00 p.m.

Complainants: Your attendance is required for this meeting/hearing.

Respondents/Departments: Pursuant to Section 67.21 (e) of the Ordinance, the custodian of records or a representative of your department, who can speak to the matter, is required at the meeting/hearing.

Complaints:

File No. 21085: Complaint filed by Kevin Carroll, the Hotel Council of San Francisco and Matthew C. Alvarez against Angela Calvillo, Clerk of the Board of Supervisors for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.1 and 67.7 by failing to provide fair and equitable access to members of the public (Board of Supervisors, Budget and Finance June 25, 2021, meeting). Action: Shall SOTF continue File No. 21085 to the April 6, 2022, meeting.

File No. 20059: Complaint filed by Anonymous against the Department of Public Health for allegedly violating Administrative Code (Sunshine Ordinance), Section 67.25 by failing to respond to an Immediate Disclosure request in a timely and complete manner.

File No. 21116 Complaint filed by Anonymous against Department of Public Health (DPH) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, by failing respond to a public records request in a timely and/or complete manner.

File No. 21124 Complaint filed by Marc Norton against the Department of Public Health (DPH) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, by failing to respond to a public records request in a timely and/or complete manner.

File No. 21159: Complaint filed by Bob Planthold against the Department of Building Inspection Commission (Access Appeals Commission) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.16 by failing to post meeting minutes (2000 through 2011).

File No. 22017: **CONSENT AGENDA** - The Sunshine Task Force (Committee) shall review File Nos, 21021, 21036, 21087, 21095, 21099, 21103, 21118, to determine if the Sunshine Ordinance Task Force has jurisdiction and determine if the requested records are public pursuant to Administrative Code (Sunshine Ordinance), Sections 67.21(e) and whether or not any person has violated the Sunshine Ordinance, California Public Records Act, or Brown Act pursuant to Administrative Code (Sunshine Ordinance) Section 67.30(c), and, if applicable, to issue an Order of Determination and refer matters to the Compliance and Amendments Committee for monitoring. The Complainant and Respondent are not required to attend the April 6, 2022, Sunshine Task Force meeting but may attend to provide testimony related to the above listed determinations.

a) File No. 21021 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7 and 67.9, by failing to provide meaningful and sufficiently clear agenda descriptions, distribute agenda packets to members of the public, 67.15 by failing to provide an opportunity for public comment on each item on the agenda, and California Public Records Act by failing meeting with quorum and failing to list disability information on the agenda.

b) File No. 21036 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7(a) by failing to post the Agenda 72 hours in advance of the meeting and failure to provide a description of each item of business; 67.7(b) failing to post documents on the website or make available to the public; agenda; 67.9(a) failure to post relevant documents on the internet; 67.15(c) failing to allow public comment; and 67.21(e) failing to make.

c) File No. 21087 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7, 67.9, and 67.15, by failing to make documents available to the public as soon as they are available, by failing to list proposed actions on the agenda, acting on a matter not listed on the agenda and by failing to approve a rule allowing the public to address the body; and California Government Code 54954(a) by failing to provide the time and place for holding regular meetings. (January 20, 2021, February 3, 2021, February 9, 2021, February 18, 2021, and June 12, 2021, meetings).

d) File No. 21095 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7, 67.9, and 67.15 and California Government Code Sections 54953 and 54954(a)(1) by failing to refer/post explanatory documents provided to the policy body, failing to agenda and other documents on file available to the public, failing to provide a brief description of each item of business, failing to make documents available on the internet, failing to take a roll call vote, failing to specify for each item of business the proposed action or statement that the item is for discussion only, failing to adopt a rule providing that each person wishing to speak on an item before the body shall be permitted to be heard once for up to three minutes, failing to include a message for people with disabilities on the agenda, failing to include language on the agenda regarding Sunshine Rights, and failing to include the contact information for the Sunshine Ordinance Task Force. (February 3,2021, February 9, 2021, and February 17, 2021, meetings).

e) File No. 21099 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7, 67.9, and 67.15 and

California Government Code Sections 54953 and 54954(a)(1) by failing to refer/post explanatory documents provided to the policy body, failing to agenda and other documents on file available to the public, failing to provide a brief description of each item of business, failing to make documents available on the internet, failing to take a roll call vote, failing to specify for each item of business the proposed action or statement that the item is for discussion only, failing to adopt a rule providing that each person wishing to speak on an item before the body shall be permitted to be heard once for up to three minutes, failing to include a message for people with disabilities on the agenda, failing to include language on the agenda regarding Sunshine Rights, and failing to include the contact information for the Sunshine Ordinance Task Force. (February 9, 2021, Executive Committee meetings).

f) File No. 21103 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7, 67.9, and 67.15 and California Government Code Sections 54953 and 54954(a)(1) by failing to refer/post explanatory documents provided to the policy body, failing to agenda and other documents on file available to the public, failing to provide a brief description of each item of business, failing to allow an opportunity for public comment on each on the agenda, failing to take a roll call vote, failing to make documents available on the internet, failing to take a roll call vote, failing to specify for each item of business the proposed action or statement that the item is for discussion only, failing to adopt a rule providing that each person wishing to speak on an item before the body shall be permitted to be heard once for up to three minutes, and failing to announce agenda changes at the beginning of the meeting or as soon thereafter as possible. (February 17, 2021, meetings).

g) File No. 21118 - Complaint filed by Wynship Hillier against the Behavioral Health Commission for allegedly violating Administrative Code (Sunshine Ordinance), Sections 67.7, 67.9 and 67.15 and California Government Code Sections 54953(a)(b) and 54954(a) by failing to refer/post explanatory documents provided to the policy body, failing to provide a brief description of each item of business, failing to take a roll call vote, and failing to adopt a rule providing that each person wishing to speak on an item before the body shall be permitted to be heard once for up to three minutes,. (March 17, 2021, Behavioral Health Commission and March 9, 2021, Implementation and Executive Committee).

For inclusion in the agenda packet, supplemental/supporting documents must be received by ***5:00 pm, March 31, 2022.***

Subject:	Sunshine Task Force Hearing motion for 20059 from the 4/6/22 hearing.

Dear Anonymous #3, Ms. Sophie Tran and Allison Hawkes: Please see the motion below from Wednesday's Sunshine Task Force hearing.

Moved by Vice-Chair Yankee, second by Member Schmidt, that the Department of Public Health violated Sunshine Ordinance, Section(s) 67.21(b) by failing to respond to a public records request in a timely and/or complete manner; 67.25 failing to follow response requirements of an Immediate Disclosure Request, 67.26 by failing to keep withholdings to a minimum and failing to provide email addresses, email attachments, texts and chats, and a redaction log or footnotes. The SOTF orders the department to turn over the remaining records on a rolling basis and to refers the matter to the Compliance and Amendments Committee to monitor compliance with the order.
