Requester,

We have conducted a diligent search for records responsive to your request. We have located responsive records, which are available to you here and have also been uploaded to NextRequest case #20-1076/ SOTF File 20059. We have redacted parts of the records provided in response to your request here because such records contain protected health information. Cal. Govt. Code Secs. 6254(c), 6254(k); Health Insurance and Accountability Act of 1996, 45 C.F.R. Secs.160, 164; Cal. Civ. Code Secs. 56 et seq.; California Constitution, Art. I, Sec. 1.

Due to the need to continue reviewing, we will produce any additional responsive records on a rolling basis.

Thank you.

Subject: Public Records Request #20-1076

Hello,

I am responding on behalf of SFDPH regarding public records request #20-1076. We first wanted to offer our sincere our apologies. We were not aware that you did not have access to the NextRequest system to view the Department's response to your request. Your experience in the NextRequest system was the first we had heard of it being inaccessible and that you were unable to view our response to your records request seeking clarification. It was never our intention to withhold information.

DPH has identified a voluminous number of emails potentially responsive to your request. We would appreciate any narrowing down of the request. Could you please provide specific names of individuals that you'd request the information?

In the meantime, until we hear from you, to the best of abilities of our abilities, we will begin processing this request based on the narrowing by individuals as opposed to the entire Department. We will provide these documents to you on a rolling basis.

We have included the original request below for reference.

All communications with CDC or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCoV" "nCoV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present. For solely this request, any format showing all participants (TO,

FROM, CC; and BCC for items sent by City employees) and preserving the body, attachments and images is sufficient.

2. All communications to or from the California DPH or its employees (email, text, or chat) with any of the following insensitive keywords: "coronavirus" "wuhan" "SARS" "COVID" "COVID19" "COVID-19" "SARS-CoV-2" "2019-nCoV" "nCoV" "severe acute respiratory syndrome" "viral pneumonia" "pneumonia of unknown origin" "novel pneumonia" from Nov 14, 2019 to present (request submitted: 2/28/20).

Thank you,
DPH Sunshine Team

CDCHAN-0428

Update and Interim Guidance on Outbreak of Coronavirus Disease 2019 (COVID-19)

Summary

The Centers for Disease Control and Prevention (CDC) continues to closely monitor and respond to the COVID-19 outbreak caused by the novel coronavirus, SARS-CoV-2.

This CDC Health Alert Network (HAN) Update provides updated guidance on evaluating and testing persons under investigation (PUIs) for COVID-19. It supersedes guidance provided in CDC's HAN 427 distributed on February 1, 2020. The outbreak that began in Wuhan, Hubei Province, has now spread throughout China and to 46 other countries and territories, including the United States. As of February 27, 2020, there were 78,497 reported cases in China and 3,797 cases in locations outside China. In addition to sustained transmission in China, there is evidence of community spread in several additional countries. CDC has updated travel guidance to reflect this information (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_2019-2Dncov_travelers_index.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=5wQ4u1pyd3huRECG9FIF26fQM1GrI8RKwn_cdgfZhM&e=).

To date, there has been limited spread of COVID-19 in the United States. As of February 26, 2020, there were a total of 61 cases within the United States, 46 of these were among repatriated persons from high-risk settings. The other 15 cases were diagnosed in the United States; 12 were persons with a history of recent travel in China and 2 were persons in close household contact with a COVID-19 patient (i.e., person-to-person spread). One patient with COVID-19 who had no travel history or links to other known cases was reported on February 26, 2020, in California. The California Department of Public Health, local health departments, clinicians, and CDC are working together to investigate this case and are identifying contacts with whom this individual interacted.

CDC, state and local health departments, other federal agencies, and other partners have been implementing measures to slow and contain transmission of COVID-19 in the United States. These measures include assessing, monitoring, and caring for travelers arriving from areas with substantial COVID-19 transmission and identifying cases and contacts of cases in the United States.

Recognizing persons at risk for COVID-19 is a critical component of identifying cases and preventing further transmission. With expanding spread of COVID-19, additional areas of geographic risk are being identified and PUI criteria are being updated to reflect this spread. To prepare for possible additional person-to-person spread of COVID-19 in the United States, CDC continues to recommend that clinicians and state and local health departments consider COVID-19 in patients with severe respiratory illness even in the absence of travel history to affected areas or known exposure to another case.

Criteria to Guide Evaluation and Testing of Patients Under Investigation (PUI) for COVID-19 Local or state health departments, in consultation with clinicians, should determine whether a patient is a PUI for COVID-19. The CDC clinical criteria for COVID-19 PUIs have been developed based on available information about this novel virus, as well as what is known about Severe Acute Respiratory Syndrome (SARS) (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_sars_clinical_guidance.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=Ybw1Zg47KVi_h3WTKNftX3r2GeXQz0qbQYPAD-cRvDM&e=) and Middle East Respiratory Syndrome (MERS) (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_mers_interim-2Dguidance.html-23evaluation&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=xnTIEF3HGjcvZj-WiNTuoHQC4OQErVICpHRHPR7K7o&e=). These criteria are subject to change as additional information becomes available.

Clinical Features

Epidemiologic Risk

Fever¹ or signs/symptoms of lower respiratory illness (e.g., cough or shortness of breath) AND Any person, including healthcare personnel², who has had close contact³ with a laboratory-confirmed⁴ COVID-19 patient within 14 days of symptom onset.
Fever¹ and signs/symptoms of a lower respiratory illness (e.g., cough or shortness of breath) requiring hospitalization AND A history of travel from affected geographic areas⁵, within 14 days of symptom onset.
Fever¹ with severe acute lower respiratory illness (e.g., pneumonia, ARDS (acute respiratory distress syndrome) requiring hospitalization and without an alternative explanatory diagnosis (e.g., influenza) ⁶ AND No identified source of exposure.

These criteria are intended to serve as guidance for evaluation. In consultation with public health departments, patients should be evaluated on a case-by-case basis to determine the need for testing. Testing may be considered for deceased persons who would otherwise meet the PUI criteria.

¹ Fever may be subjective or confirmed.

² For healthcare personnel, testing may be considered if there has been exposure to a person with suspected COVID-19 without laboratory confirmation. Because of their often extensive and close contact with vulnerable patients in healthcare settings, even mild signs and symptoms (e.g., sore throat) of COVID-19 should be evaluated among potentially exposed healthcare personnel. Additional information is available in CDC's Interim U.S. Guidance for Risk Assessment and Public Health Management of Healthcare Personnel with Potential Exposure in a Healthcare Setting to Patients with Coronavirus Disease 2019 (COVID-19) (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_2019-2Dncov_hcp_guidance-2Drisk-2Dassessment-2Dhcp.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-).

GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=KstLNjCnfqcd23o6UD1ZcRn4S4Ho4HFn1udVea84io&e=)

3Close contact is defined as—

a) being within approximately 6 feet (2 meters) of a COVID-19 case for a prolonged period; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case – or –

b) having direct contact with infectious secretions of a COVID-19 case (e.g., being coughed on) If such contact occurs while not wearing recommended personal protective equipment (PPE) (e.g., gowns, gloves, NIOSH-certified disposable N95 respirator, eye protection), criteria for PUI consideration are met

Additional information is available in CDC's updated Interim Healthcare Infection Prevention and Control Recommendations for Patients with Confirmed COVID-19 or Persons Under Investigation for COVID-19 in Healthcare Settings (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_2019-2Dncov_infection-2Dcontrol_control-2Drecommendations.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=wNynx5KIW2oIA3rbVwoQBOKuauNlYR5Zkj_DmFLsUsA&e=)

Data to inform the definition of close contact are limited. Considerations when assessing close contact include the duration of exposure (e.g., longer exposure time likely increases exposure risk) and the clinical symptoms of the person with COVID-19 (e.g., coughing likely increases exposure risk, as does exposure to a severely ill patient). Special consideration should be given to healthcare personnel exposed in healthcare settings, as described in CDC's Interim U.S. Guidance for Risk Assessment and Public Health Management of Healthcare Personnel with Potential Exposure in a Healthcare Setting to Patients with COVID-19 (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_2019-2Dncov_hcp_guidance-2Drisk-2Dassessment-2Dhcp.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=KstLNjCnfqcd23o6UD1ZcRn4S4Ho4HFn1udVea84io&e=)

4Documentation of laboratory-confirmation of COVID-19 may not be possible for travelers or persons caring for COVID-19 patients in other countries

5Affected areas are defined as geographic regions where sustained community transmission has been identified. Relevant affected areas will be defined as a country with at least a CDC Level 2 Travel Health Notice. Current information is available in CDC's COVID-19 Travel Health Notices (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_2019-2Dncov_travelers&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=2qm4mGT9w53NATPI3vHXQ-mCsXyY550snSeonTd8uhY&e=)

6Category includes single or clusters of patients with severe acute lower respiratory illness (e.g., pneumonia, ARDS (acute respiratory distress syndrome) of unknown etiology in which COVID-19 is being considered

Recommendations for Reporting, Testing, and Specimen Collection Clinicians should immediately implement recommended infection prevention and control practices (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_2019-2Dncov_infection-2Dcontrol_control-2Drecommendations.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=wNynx5KIW2oIA3rbVwoQBOKuauNlYR5Zkj_DmFLsUsA&e=)

) if a patient is suspected of having COVID-19. They should also notify infection control personnel at their healthcare facility and their state or local health department if a patient is classified as a PUI for COVID-19. State health departments that have identified a PUI or a laboratory-confirmed case should complete a PUI and Case Report form through the processes identified on CDC's Coronavirus Disease 2019 website (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_2019-2Dncov_php_reporting-2Dpui.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=G-5rC5UNs8SmDxjncsRIG2Nk9-iUbUCUprZNgKXdgG&e=)

State and local health departments can contact CDC's Emergency Operations Center (EOC) at 770-488-7100 for assistance with obtaining, storing, and shipping appropriate specimens to CDC for testing, including after hours or on weekends or holidays. Currently, diagnostic testing for COVID-19 is being performed at state public health laboratories and CDC. Testing for other respiratory pathogens should not delay specimen testing for COVID-19.

For initial diagnostic testing for SARS-CoV-2, CDC recommends collecting and testing upper respiratory tract specimens (nasopharyngeal AND oropharyngeal swabs). CDC also recommends testing lower respiratory tract specimens, if available. For patients who develop a productive cough, sputum should be collected and tested for SARS-CoV-2. The induction of sputum is not recommended. For patients for whom it is clinically indicated (e.g., those receiving invasive mechanical ventilation), a lower respiratory tract aspirate or bronchoalveolar lavage sample should be collected and tested as a lower respiratory tract specimen. Specimens should be collected as soon as possible once a PUI is identified, regardless of the time of symptom onset. See Interim Guidelines for Collecting, Handling, and Testing Clinical Specimens from Patients Under Investigation (PUIs) for COVID-19 (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_2019-2Dncov_lab_guidelines-2Dclinical-2Dspecimens.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=DhPv-k-sLjc78pLqKr6wTcm4u26PTZa_DIScyGAFg&e=)

and Biosafety FAQs for handling and processing specimens from suspected cases and PUIs (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_2019-2Dncov_lab_biosafety-2Dfaqs.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=ArqmusKD05_cloxY6FDNNTGCLsVeH7X3i0kNn5MyQTA&e=)

For More Information

More information is available at the COVID-19 website: https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_2019-2Dncov_index.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=Sp9_uKKh0IDcuxsNB7et7Xz-zld_F73fR5p-xQYvLY&e=

The Centers for Disease Control and Prevention (CDC) protects people's health and safety by preventing and controlling diseases and injuries; enhances health decisions by providing credible information on critical health issues; and promotes healthy living through strong partnerships with local, national, and international organizations

Hi Curtis,

Thank you for your feedback about our teleconference call and sharing your thoughts and concerns. We here at CDPH are in the same boat, learning as we go everyday and trying to keep up with reports and publications to come up with the best public health decisions and recommendation at the moment. Attached is that article from the China CDC (similar as the CDC MMWR) that was mentioned on the call; since we're not familiar with China CDC, I suggest reading it with some concern for the validity of the data and their interpretation, but there are some interesting and useful information there.

Thanks for manning the front line in SF,
Duc

Hi Dr. Vugia,

Thank you for today's excellent LHD teleconference call with so many clear summaries by the CDPH team. A CDPH physician described the severity of the disease and cited a study with very low CFR among young people in China. She suggested that she would forward the article to the LHDs. I found some articles (e.g., Woo, JAMA) to be very helpful, and wonder which article(s) plans to send and when?

With a new concern of community transmission in the SF Bay Area and increasing public concern about the one case of severe respiratory disease in Solano County, I've fielded many excellent community questions from clinicians and school/childcare leaders about:

1. testing only LRIs who are hospitalized

2. closure of schools and child care

Whereas I agree with the current public health decisions, as we're gathering capacity for regional lab testing and weighing the benefits/risks of childcare-school closure, the

epidemiology that your team quoted provides some rationale for:

1. CFR (below SARS and MERS) helps justify NOT testing for mild-moderate patients, particularly for some demographics? For example, 0 deaths among 416 cases of children 0-9yo in China is helpful for the pediatric community and many concerned families.
2. Risk factors (>70y, lung disease, congregate living) might be considered for testing mild-moderate disease?
3. No school closure yet. With no evidence of high CFR, we have time to understand extent of community transmission?

As I'm replying to many emails while fielding calls from clinicians for the 3rd night-in-a-row, I'm eager to reference some data/rationale for not testing possible cases and preparing (not implementing) school closure. Thank you so much for your consideration. I hope that this worker-bee Deputy Health Officer perspective/questions is helpful.

Yours,
curtis

<https://jamanetwork.com/journals/jama/fullarticle/2762130>

<10yo: 0 deaths of 416 cases

What US Hospitals Should Do Now to Prepare for a COVID-19 Pandemic

Eric Toner, MD, and Richard Waldhorn, MD

February 27, 2020

The World Health Organization (WHO) and the US Centers for Disease Control and Prevention (CDC) have called on health systems around the world to prepare for a possible COVID-19 pandemic. The purpose of this article is to offer to American hospital administrators and clinicians specific judgment on what hospitals should do to prepare for a COVID-19 pandemic. This is an update of a similar perspective related to pandemic influenza, published in 2006.¹ These recommendations derive from the authors' analysis of the consequences of a flu pandemic, review of many existing hospital plans, analysis of the federal government's recommendations, and meetings with a number of leaders in health care, public health, and emergency management. Recognizing that any such recommendations must be based on numerous untestable assumptions, any of which can be reasonably challenged, we propose specific actions and priorities for the purpose of making the discussion of hospital pandemic preparedness issues more operationally useful. This commentary pertains to hospitals, but long-term care facilities, outpatient clinics, medical offices, and other healthcare facilities must also urgently prepare.

The Argument for Urgent Preparedness

The current COVID-19 epidemic looks very much like an early influenza pandemic in many

important respects. It is spreading from person to person efficiently, much like influenza, including some degree of pre-symptomatic spread. Although the true case fatality rate is as yet uncertain, all evidence suggests that it is as severe as, if not more severe than, influenza pandemics of the last century. The case fatality rate (CFR) of confirmed COVID-19 patients in China is estimated to be 1-3%, although this may not account for all mildly symptomatic or asymptomatic infections. In some regions of China outside Hubei, the CFR has been less than 1%. For comparison, the CFR of the 2009 influenza pandemic was around 0.1%, the 1968 and 1957 pandemics in the United States were about 0.5%, and the CFR of the 1918 pandemic was estimated to be 2.5 % in the United States.

Because it will take considerable time to fully understand the epidemiology of COVID-19, it is reasonable to begin preparations using a model we have studied extensively for decades and that seems similar to COVID-19—pandemic influenza. The threat of a novel influenza pandemic has stimulated international, national, and local planning and preparedness efforts for years. In the event of a 1918-scale flu pandemic, hospitals would be flooded with sick patients seeking care.

The impact of a COVID-19 pandemic on hospitals is expected to be severe in the best of circumstances. Currently, US hospitals routinely operate at or near full capacity and have limited ability to rapidly increase services. There are currently shortages of healthcare workers of all kinds. Emergency departments are overcrowded and often have to divert patients to other hospitals.

In recent years, there has been a reduction in the overall number of hospitals, hospital beds, and emergency rooms. During an epidemic, the healthcare workforce would be greatly reduced. Healthcare workers would face a high risk of infection because of contact with infected patients; many would need to stay home to care for sick relatives, and, in the absence of vaccine, others might fear coming to work lest they bring a lethal infection home to their families. The provision of medical services to both COVID-19 and non-COVID-19 patients may be adversely affected in most communities.

Detailed modeling projections for COVID-19 have not yet been released by the US government or WHO; however, the US Department of Health and Human Services (HHS) released official planning assumptions for pandemic influenza, ranging from a moderate pandemic like 1968 or 1957, to one based on a very severe pandemic like 1918.² These may be the best tools we have at the moment. They differ by more than 10-fold in the number expected to need hospitalization, intensive care, and mechanical ventilation (see Table 1).

Table 1
HHS pandemic planning assumptions

Moderate Scenario (1968-like)	Very Severe Scenario (1918-like)
38 M needing medical care	38 M needing medical care
1 M hospitalizations	9.6 M hospitalizations
200,000 needing ICU	2.9 M needing ICU

As a comparison, there are about 46,500 medical ICU beds in the United States and perhaps an equal number of other ICU beds that could be used in a crisis. Even spread out over several months, the mismatch between demand and resources is clear.

Some patients in China have been treated with extracorporeal membrane oxygenation (ECMO), and some US medical centers with this technology are preparing to use it as well. For US hospitals with this capability, it would be prudent to think through how this scarce resource would be allocated if demand exceeds resources.

Preparedness Defined

Based on such calculations, it would seem that preparing for a pandemic of even moderate severity is a difficult challenge. For the purpose of this analysis, we use the following definition of preparedness:

Every hospital, in collaboration with other hospitals and public health agencies, will be able to provide appropriate care to COVID-19 patients requiring hospitalization while maintaining other

essential medical services in the community, both during and after a pandemic.

This definition recognizes that what constitutes "appropriate care" and the criteria for hospital admission may well change during a pandemic.

The Top Priorities

Individual hospitals and groups of hospitals involved in regional coordination of pandemic preparedness should focus their initial preparedness efforts in the following priority areas:

1. Comprehensive and realistic planning based on actual CDC FluSurge projections in each hospital, and collaborative planning among all hospitals in a region (eg, healthcare coalitions).
2. Limiting the nosocomial spread of the virus to (1) protect the healthcare workers and, thus, maintain a hospital workforce; (2) prevent the hospital from being a disease amplifier; and (3) protect the non-COVID-19 patients from infection, so as to maintain the ability to provide essential non-COVID-19 health care.
3. Maintaining, augmenting, and stretching the hospital workforce.
4. Allocating limited healthcare resources in a rational, ethical, and organized way so as to do the greatest good for the greatest number.

Specific Priority Actions to Be Taken

To implement the priority goals above, hospitals should undertake the following specific actions:

1. Employing a comprehensive and realistic planning process:
 - Employ at least 1 full-time hospital emergency manager in each hospital.
 - Dedicate a full-time infection prevention practitioner to work on infection prevention aspects of the preparations, including education, training, and exercises.
 - Designate a medical director to work closely with the emergency manager and infection prevention practitioner.
 - Create a pandemic preparedness committee (or use an existing emergency management committee) that includes representatives of all clinical and support departments as well as senior administrators.
 - Participate in a local healthcare coalition, which includes neighboring hospitals, local public health agencies, and emergency management. Members of multi-hospital health systems should integrate system-wide planning with local planning with other local hospitals.
 - We do not yet have modeling tools or planning assumptions for COVID-19. CDC has developed FluSurge 2.0, which can be used in conjunction with HHS planning assumptions to guide planning for both a moderate and severe pandemic.³ Note that the default assumptions in FluSurge are based on a 1968-like pandemic. To model a severe pandemic, FluSurge allows the assumed number of hospitalizations to be modified to correspond to the HHS planning assumptions for a severe pandemic.
 - Be able to make 30% of licensed bed capacity available for COVID-19 patients on 1 week's notice. About 10-20% of a hospital's bed capacity can be mobilized within a few hours by expediting discharges, using discharge holding areas, converting single rooms to double rooms, and opening closed areas, if staffing is available. Another 10% can be obtained within a few days by converting flat spaces, such as lobbies, waiting areas, and classrooms.⁴
 - Collaborate in regional plans to be able to make at least 200% of licensed bed capacity in the region available for COVID-19 patients on 2 weeks' notice.
 - Use telephone and internet-based advice lines to reduce unnecessary visits to the hospital emergency department.
2. Limiting the nosocomial spread of the virus:
 - The CDC has provided good technical guidance on infection control for COVID-19 in healthcare facilities.⁵
 - Limit the accidental contamination of the hospital environment by implementing respiratory etiquette and by using simple surgical masks for everyone entering the facility (staff, patients, and visitors). Assuming re-supply may be difficult during a pandemic, stockpile enough masks for 3 weeks.
 - Prevent staff from getting infected by training healthcare workers on the use of personal

protective equipment (PPE) and infection control procedures and by stockpiling a supply of PPE. PPE availability is currently limited, but hospitals should purchase what they can, recognizing that a local outbreak could last at least several weeks to several months. Given the preeminent need to protect healthcare workers, we feel the highest level of protection available should be used. We call for the use of N95 respirators for healthcare workers with direct contact with COVID-19 patients. This is in concert with the CDC's COVID-19 guidelines. Powered air-purifying respirators (PAPRs) should be available for use in high-risk aerosol-generating procedures.

- Limit the number of staff who are exposed to COVID-19 patients by cohorting (dedicated staff in dedicated units) (see Figure 1). Utilize overtime and long shifts for staff in the COVID-19 units to limit the number of staff needed. When possible, use staff who are immune (recovered) in the COVID-19 units.
- Prevent infected staff from working (except with COVID-19 patients) by tracking staff who are sick and testing for COVID-19, if possible, and keeping a log of staff who have had confirmed COVID-19.

Figure 1
Cohorting

3. Maintaining, augmenting, and stretching the hospital workforce:

- Vaccinate all staff for influenza to reduce the burden of that disease.
- Organize in-home childcare for well children of healthcare workers if schools are closed,

using screened volunteers.

- Provide medical daycare for sick family members.
- Allay fear through open, honest, and transparent planning and careful training.
- Shift clinical staff to highest-need areas from areas that may be closed or quiet; employ “just in time” education and “buddy teaming.”
- Augment clinical staff with nontraditional personnel, employing “just in time” education and “buddy teaming.” Use (1) medical professionals with prior clinical experience (eg, administrators, researchers, retirees, etc); (2) related health professionals (eg, dentists, veterinarians, emergency medical technicians, etc); (3) nonclinical hospital personnel; and (4) nonclinical outside personnel. Specific training and operating procedures for each group must be created in advance.
- Coordinate plans with other hospitals in the region to recruit and use volunteers.

4. Allocating limited healthcare resources in a rational, ethical, and organized way so as to do the greatest good for the greatest number through deferral of nonemergency care and, if necessary, institution of alternative patient care routines.

- Prioritize which services and types of procedures can be deferred, for how long, and with what consequences and create an alternative plan for patients who will be deferred. Create a process for refining and updating this plan as circumstances change. Create a process to track deferred patients.
- Plan for the graceful transition to contingency and crisis standards of care. In a severe pandemic, not all patients in need of intensive care will be able to be accommodated in the ICU. Normal staffing ratios and standard operating procedures will not be able to be maintained.
- Plan for alternative sites to provide ICU-like care within the hospital (eg, catheterization lab, catheterization recovery, OR, PACU, endoscopy units, etc).
- Implement contingency and crisis standards, which will be justified when conventional standards cannot be maintained despite the use of all available resources, including mutual aid arrangements. The legal and ethical framework for these decisions should be considered well in advance of a crisis. Alterations in hospital policy and procedures should be implemented by an active decision of the hospital leadership in consultation with the medical staff and civil authorities.
- Create criteria/clinical guidelines for use (or denial) of resource-intensive services (eg, admission, mechanical ventilation, invasive monitoring) based on national guidelines, such as the Crisis Standards of Care report⁶ in regional collaboration with other hospitals.
- Establish a process for triage of patients competing for limited resources, including admission, early discharge, and life support. These decisions should not be made solely by 1 person. The criteria used to make these decisions should be created in advance and formally sanctioned by the medical staff and hospital administration.

How to Proceed

Although a COVID-19 pandemic seems all but inevitable, there is still uncertainty about its severity in the United States. Time will tell, but, in the meantime, hospitals should not delay. In the event of a pandemic, the predictable costs of not preparing, in human, societal, and political terms, would be huge. Decision makers at all levels—including hospital CEOs and their boards and state and federal officials—should consider these issues and how to proceed. Several of the first priority items (comprehensive and collaborative planning, discussing allocation of scarce resources, and planning education and training) take substantial time. Hospitals should begin these actions now.

Tomas,

Thanks, but that sentence does not take into account the new patient in Solano/Sacto.

I am going to use the sentence Grant approved, which allows for more modes of transmission.

Thanks, Rachael

How about something like:

Risk of infection is based on exposure to the novel coronavirus in locations where it has spread (now 30+ countries), or by close contact to a confirmed case.

Country count is here:

<https://www.cdc.gov/coronavirus/2019-ncov/locations-confirmed-cases.html>

Subject: help with language in light of new case

Hi team,

So much happening. I'd like to draw your attention to one particular question (among many).

In terms of the xenophobia and discrimination theme, we have been saying: **This virus is not about race, ethnicity or culture. The risk of getting COVID-19 is based on travel history, and contacts with people who are sick.**

In light of the new California case having no travel history and no known contacts with travelers or people who are sick, how would we modify our statement? I realize we don't have all the answers right now, but the Mayor and Carmen Chu are submitting an op-ed **tomorrow** about discrimination, and I am helping them update this language. How about:

At this time, we do not have evidence that COVID-19 is spread by race, ethnicity, or culture.

Is that safe to say? Note that this is not a clinical piece, but we still want to be accurate.

Thank you,

Rachael

CDC Confirms Possible First Instance of COVID-19 Community Transmission in California

SACRAMENTO – The U.S. Centers for Disease Control and Prevention today confirmed a possible first case of person-to-person transmission of COVID-19 in California in the general public. The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.

California has a strong health care system and public health infrastructure. California has prepared for the potential spread of diseases, such as H1N1, in the past and is prepared and actively responding to the potential community spread of COVID-19. Contact tracing in this case has already begun.

The health risk from novel coronavirus to the general public remains low at this time. While COVID-19 has a high transmission rate, it has a low mortality rate. From the international data we have, of those who have tested positive for COVID-19, approximately 80 percent do not exhibit symptoms that would require hospitalization. There have been no confirmed deaths related to COVID-19 in the United States to date. California is carefully assessing the situation as it evolves.

“Keeping Californians safe and healthy is our number one priority,” said Dr. Sonia Angell, Director of the California Department of Public Health and State Public Health Officer. “This has been an evolving situation, which California has been monitoring and responding to since COVID-19 cases first emerged in China last year. This is a new virus, and while we are still learning about it, there is a lot we already know. We have been anticipating the potential for such a case in the U.S., and given our close familial, social and business relationships with China, it is not unexpected that the first case in the U.S. would be in California. That’s why California has been working closely with federal and local partners, including health care providers and hospitals, since the outbreak was first reported in China -- and we are already responding.”

As in any public health emergency, the Department of Public Health's Emergency Operations

Center has been actively coordinating response efforts across the state and preparing for possible community transmission. California continues to prepare and respond in coordination with federal and local partners.

This would be the first known instance of person-to-person transmission in the general public in the United States. Previously known instances of person-to-person transmission in the United States include one instance in Chicago, Illinois, and one in San Benito County, California. Both cases were after close, prolonged interaction with a family member who returned from Wuhan, China and had tested positive for COVID-19, the disease caused by novel coronavirus. As of today, including this case, California has had 7 travel-related cases, one close contact case, and now one community transmission.

As with any virus, especially during the flu season, the Health Department reminds you there are a number of steps you can take to protect your health and those around you:

- Washing hands with soap and water.
- Avoiding touching eyes, nose or mouth with unwashed hands.
- Avoiding close contact with people who are sick are all ways to reduce the risk of infection with a number of different viruses.
- Staying away from work, school or other people if you become sick with respiratory symptoms like fever and cough.

The California Department of Public Health will not be providing additional information about this patient due to patient confidentiality. For more information about novel coronavirus, please visit the [CDPH website](#).

Subject: Fw: News Alert: First U.S coronavirus case of unknown origin confirmed in Northern California, a sign the virus may be spreading in a local area

Dear Susan, Naveena and Julie,
Curtis and I listened to the CAHAN call today late afternoon where the first case of community transmission in Solano county was described. The CDPH call with regard to official facts was vague. My understanding from unofficial communications with colleagues is that the case was transferred from another facility to UC Davis, is critically ill with ARDs, and was tested as a PUI under the footnote in the CDC criteria of "severe respiratory illness of unknown etiology". The patient has no known epidemiologic risk factors including travel out of country or exposure to a known COVID-19 case or other ill exposures, and it sounds like contact investigation was performed thoroughly.

Since many on this email are participating on many statewide, national or hospital calls, if there is further information that anyone hears about this case please share with the Clinical Consultation Team. We have been basing much of our PUI screening criteria on epidemiologic risk (e.g. travel from an area with sustained community transmission). However, if after communicating with other county partners we confirm that this case truly had no known travel or exposure, I recommend we consider broadening our PUI definition to include any severely ill patient with pneumonia (e.g. hospitalized or in an ICU) regardless of travel history.

Since there were many astute clinicians asking questions on the CAHAN call, I anticipate that tomorrow we will have many inquiries along the same lines with regard to broadening our

testing criteria, as well as requests for testing, requests for guidance, concerns about unprotected exposures in healthcare workers, PUIs, and specimen collection and testing (aside from worried well calls). Based on the available information it seems reasonable to broaden testing, but

I want to make sure we all agree and that we are prepared for the influx and extra staffing we may need to handle it.

First U.S coronavirus case of unknown origin confirmed in Northern California, a sign the virus may be spreading in a local area

The Centers for Disease Control and Prevention has been informed of the first case

of the coronavirus in a person who did not recently return from a foreign country or have contact with a confirmed case, according to a person briefed on the case. Officials have begun tracing the contacts of the resident to find out how the person may have been infected and who else might have been exposed.

CDC Confirms Possible First Instance of COVID-19 Community Transmission in California

SACRAMENTO – The U.S. Centers for Disease Control and Prevention today confirmed a possible first case of person-to-person transmission of COVID-19 in California in the general public. The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.

California has a strong health care system and public health infrastructure. California has prepared for the potential spread of diseases, such as H1N1, in the past and is prepared and actively responding to the potential community spread of COVID-19. Contact tracing in this case has already begun.

The health risk from novel coronavirus to the general public remains low at this time. While COVID-19 has a high transmission rate, it has a low mortality rate. From the international data we have, of those who have tested positive for COVID-19, approximately 80 percent do not exhibit symptoms that would require hospitalization. There have been no confirmed deaths related to COVID-19 in the United States to date. California is carefully assessing the situation as it evolves.

“Keeping Californians safe and healthy is our number one priority,” said Dr. Sonia Angell, Director of the California Department of Public Health and State Public Health Officer. “This has been an evolving situation, which California has been monitoring and responding to since COVID-19 cases first emerged in China last year. This is a new virus, and while we are still learning about it, there is a lot we already know. We have been anticipating the potential for such a case in the U.S., and given our close familial, social and business relationships with China, it is not unexpected that the first case in the U.S. would be in California. That’s why California has been working closely with federal and local partners, including health care providers and hospitals, since the outbreak was first reported in China -- and we are already responding.”

As in any public health emergency, the Department of Public Health's Emergency Operations Center has been actively coordinating response efforts across the state and preparing for possible community transmission. California continues to prepare and respond in coordination with federal and local partners.

This would be the first known instance of person-to-person transmission in the general public in the United States. Previously known instances of person-to-person transmission in the United States include one instance in Chicago, Illinois, and one in San Benito County, California. Both cases were after close, prolonged interaction with a family member who returned from Wuhan, China and had tested positive for COVID-19, the disease caused by novel coronavirus. As of today, including this case, California has had 7 travel-related cases, one close contact case, and now one community transmission.

As with any virus, especially during the flu season, the Health Department reminds you there are a number of steps you can take to protect your health and those around you:

- Washing hands with soap and water.
- Avoiding touching eyes, nose or mouth with unwashed hands.
- Avoiding close contact with people who are sick are all ways to reduce the risk of infection with a number of different viruses.
- Staying away from work, school or other people if you become sick with respiratory symptoms like fever and cough.

The California Department of Public Health will not be providing additional information about this patient due to patient confidentiality. For more information about novel coronavirus, please visit the [CDPH website](#).

Hi team,

So much happening. I'd like to draw your attention to one particular question (among many).

In terms of the xenophobia and discrimination theme, we have been saying: **This virus is not about race, ethnicity or culture. The risk of getting COVID-19 is based on travel history, and contacts with people who are sick.**

In light of the new California case having no travel history and no known contacts with travelers or people who are sick, how would we modify our statement? I realize we don't have all the answers right now, but the Mayor and Carmen Chu are submitting an op-ed **tomorrow** about discrimination, and I am helping them update this language. How about:

This virus is not about race, ethnicity or culture. The risk of getting COVID-19 is based on travel history, and contacts with people who are sick.

Is that safe to say? Note that this is not a clinical piece, but we still want to be accurate.

Thank you,

Rachael

**CDC Confirms Possible First Instance of
COVID-19 Community Transmission in California**

SACRAMENTO – The U.S. Centers for Disease Control and Prevention today confirmed a possible first case of person-to-person transmission of COVID-19 in California in the general public. The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.

California has a strong health care system and public health infrastructure. California has prepared for the potential spread of diseases, such as H1N1, in the past and is prepared and actively responding to the potential community spread of COVID-19. Contact tracing in this case has already begun.

The health risk from novel coronavirus to the general public remains low at this time. While COVID-19 has a high transmission rate, it has a low mortality rate. From the international data we have, of those who have tested positive for COVID-19, approximately 80 percent do not exhibit symptoms that would require hospitalization. There have been no confirmed deaths related to COVID-19 in the United States to date. California is carefully assessing the situation as it evolves.

"Keeping Californians safe and healthy is our number one priority," said Dr. Sonia Angell, Director of the California Department of Public Health and State Public Health Officer. "This has been an evolving situation, which California has been monitoring and

responding to since COVID-19 cases first emerged in China last year. This is a new virus, and while we are still learning about it, there is a lot we already know. We have been anticipating the potential for such a case in the U.S., and given our close familial, social and business relationships with China, it is not unexpected that the first case in the U.S. would be in California. That's why California has been working closely with federal and local partners, including health care providers and hospitals, since the outbreak was first reported in China -- and we are already responding."

As in any public health emergency, the Department of Public Health's Emergency Operations Center has been actively coordinating response efforts across the state and preparing for possible community transmission. California continues to prepare and respond in coordination with federal and local partners.

This would be the first known instance of person-to-person transmission in the general public in the United States. Previously known instances of person-to-person transmission in the United States include one instance in Chicago, Illinois, and one in San Benito County, California. Both cases were after close, prolonged interaction with a family member who returned from Wuhan, China and had tested positive for COVID-19, the disease caused by novel coronavirus. Updates and Response:

SFDPH

Summary of actions

- Mayor London Breed declared a local emergency 02/25/20, allowing CCSF to access additional resources to prepare for potential COVID-19 cases in SF.
- SFDPH DOC expanded community outreach and mitigation efforts, working closely with the CCSF

Emergency Operations Center (EOC) in anticipation of increased inquiries due to the declaration of a local emergency.

- SFDPH is focusing on providing a comprehensive picture of past and current preparation and mitigation efforts, forward leaning departmental objectives, and the data and information being used to guide the work.
- SFDPH and the EOC are collaborating to create a process for routing briefing and other informational requests (from media and non-media sources) to the appropriate channels.
- SFDPH drafted guidelines for housing plans for confirmed COVID-19 cases, potential COVID-19 cases, and medium risk individuals who live in congregate living situations including Single Room Occupancies (SROs).
- SFDPH completed a preparedness consultation site visit to Chinese Hospital 02/25/20 and UCSF Mission Bay today 02/26/20.
- SF Public Health Laboratory is strengthening their safety measures for lab personnel, including enhanced Personal Protective Equipment (PPE) requirements.
- SF Public Health Laboratory is still awaiting delivery of CDC testing kits. CDC reported they will have a ship date for the testing kits by the end of this week.
- SFDPH is updating their COVID-19 Fact Sheet to include the most recent updates and align messaging and information across DPH and CCSF sites.
- SFDPH Public Information Office recently completed a COVID-19 prevention focused informational poster, which will soon be displayed on BART Trains.
- SFDPH CDCP information: <https://www.sfdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

CDC-

- CDC updated their travel advisory to include South Korea. <https://wwwnc.cdc.gov/travel/notices/warning/coronavirus-south-korea>
- CDC reports that to date 445 people have been tested in the U.S.
- <https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html>

WHO (World Health Organization)-

- WHO stated that 4 new countries (Algeria, Austria, Croatia, and Switzerland) reported cases of COVID-19 in the past 24 hours. (as of 02/26/20)
- <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports>

CDPH (California Department of Public Health)-

- CDPH reported new cases of COVID-19 in CA in the 24 hours. Number of confirmed cases in CA remains at 10.
- <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx>

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data-

- 81,322 confirmed cases globally.
- 78,064 confirmed cases in mainland China; 3,258 confirmed cases outside of mainland China, in 46 countries.
- 2,719 deaths in mainland China + 51 additional deaths (Afghanistan, Bahrain, Iraq, Oman, Iran, Italy,

Philippines, Hong Kong, Taiwan, Japan, France, South Korea, Diamond Princess Cruise)

- Confirmed cases outside of China across 36 countries/regions (includes regions of Hong Kong and Taiwan, outside of mainland China)

National (U.S.) data:

- 59 confirmed cases currently in the U.S. (42 from Diamond Princess cruise ship, from unassigned locations) cases in 5 states.
- <https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>

NOTE: Information may vary as events and reporting are rapidly evolving.

Subject: NEW NUMBER and NEW TIME - Solano County Novel Coronavirus Call with Healthcare and EMS Partners (nonproprietary)

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

We apologize for the short notice and for changing the meeting time again this week, but we are moving this afternoon's call to tomorrow from 11:30-12:30.

Thank you all for your understanding!!

This is the weekly call for Solano County Healthcare and EMS partners. We've also invited surrounding counties and hospitals affected by the Diamond Princess evacuee response as well as State and Federal partners.

Thanks.

Solano Public Health

Updates and Response:

CCSF

- The Mayor has declared a local emergency due to COVID-19. Although there are still zero confirmed cases in San Francisco residents, the global picture is changing rapidly. Given the high volume of travel between SF and mainland China, and the spread of the virus in other countries, there is a growing likelihood that San Francisco will see cases eventually. The declaration of a local emergency will mobilize city resources, accelerate emergency planning, streamline staffing, coordinate agencies across the city, allow for future

reimbursement by the state and federal governments and raise awareness throughout San Francisco about how everyone can prepare in the event that COVID-19 (novel coronavirus) appears in San Francisco.

SFDPH

Summary of actions

- SFDPH DOC Call Center has attempted contact to all return travelers from China in need of follow-up.
- SFDPH is maintaining global, national, and local situational awareness as South Korea, Japan, and Italy have reported significant increases in the number of confirmed COVID-19 cases.
- SFDPH is preparing to update stakeholder messaging in anticipation of new CDC guidance.
- SFDPH is working closely with the Department of Emergency Management's (DEM) Emergency Operations Center (EOC) on community outreach, care and shelter for potential COVID-19 cases.
- SFDPH, the Mayor, DEM, and Chinese Community leaders provided updates to the public on SF's preparedness efforts.
- SFDPH completed preparedness consultation site visits to 5 major SF hospitals, with plans to visit 2 additional sites. DPH will hold a tabletop exercise and discussion with SF hospital partners on preparing for COVID-19 cases.
- SFDPH CDCP information: <https://www.sfdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

CDC-

- CDC is operationalizing its pandemic preparedness and response plans, including measures to prepare communities to respond to local transmission of COVID-19. There is an abundance of pandemic guidance developed and adapted for a COVID-19 pandemic.
- CDC updated travel guidance on 02/23/20 recommending travelers avoid all nonessential travel to the People's Republic of China (this does not include Hong Kong, Macau, or the island of Taiwan). <https://wwwnc.cdc.gov/travel/destinations/traveler/none/china#travel-notice>
- No changes in number of U.S. confirmed cases reported since 02/24/20.
- <https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html>

WHO (World Health Organization)-

- WHO has an online course titled "Infection Prevention and Control for COVID-19." The course provides information on how facilities can prepare to respond to emerging respiratory viruses such as COVID-19. <https://openwho.org/courses/COVID-19-IPC-EN>
- The WHO-China joint mission concluded on 02/24/20 and released findings about the transmissibility and severity of COVID-19, and the impact of the measures taken. https://www.fmprc.gov.cn/mfa_eng/topics_665678/kjgzbdyvq/t1749176.shtml
- WHO and European Centre for Disease Prevention and Control (ECDC) mission arrived in Italy on 02/24/20 to support Italian authorities on the COVID-19 situation.
- WHO stated that 4 new countries (Afghanistan, Bahrain, Iraq, and Oman) reported confirmed cases of COVID-19 in the past 24 hours (as of 02/25/20).
- <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports>

CDPH (California Department of Public Health)-

CDPH lab in Richmond, CA is currently testing potential (PUI) cases quarantined at Travis Air Force Base. This lab is not providing testing for local jurisdictions at this time.

Dear Local Health Officers and Communicable Disease Control Officers,

Attached is the CDPH Guidance for Monitoring Returning Travelers where we restate and clarify CDC risk assessment and guidelines for monitoring and movement of returned travelers considered at high, medium, and low risk. At this time, this CDPH guidance only addresses persons who have returned from China within 14 days and therefore may be revised with new updates from CDC. Given the rapidly changing global situation, we will try to update guidances as needed in a timely manner.

Sincerely,
Duc

Updates and Response:

CCSF

- The Mayor has declared a local emergency due to COVID-19. Although there are still zero confirmed cases in San Francisco residents, the global picture is changing rapidly. Given the high volume of travel between SF and mainland China, and the spread of the virus in other countries, there is a growing likelihood that San Francisco will see cases eventually. The declaration of a local emergency will mobilize city resources, accelerate emergency planning, streamline staffing, coordinate agencies across the city, allow for future reimbursement by the state and federal governments and raise awareness throughout San Francisco about how everyone can prepare in the event that COVID-19 (novel coronavirus) appears in San Francisco.

SFDPH

Summary of actions

- SFDPH DOC Call Center has attempted contact to all return travelers from China in need of follow-up.
- SFDPH is maintaining global, national, and local situational awareness as South Korea, Japan, and Italy have reported significant increases in the number of confirmed COVID-19 cases.
- SFDPH is preparing to update stakeholder messaging in anticipation of new CDC guidance.
- SFDPH is working closely with the Department of Emergency Management's (DEM) Emergency Operations Center (EOC) on community outreach, care and shelter for potential COVID-19 cases.
- SFDPH, the Mayor, DEM, and Chinese Community leaders provided updates to the public on SF's preparedness efforts.
- SFDPH completed preparedness consultation site visits to 5 major SF hospitals, with plans to visit 2 additional sites. DPH will hold a tabletop exercise and discussion with SF hospital partners on preparing for COVID-19 cases.
- SFDPH CDCP information: <https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

Subject: Infrastructure Grant Funds: Q&A

Good afternoon LHJ Partners,

Thank you for all of the feedback and questions provided during our teleconference call in January regarding the grant funding each county will be receiving. We have put together a Q&A document that provides answers to questions we received, including information about allowable uses of the funding.

Please see the attached Q&A document.

If you should have additional questions or need more information, you may send questions to our LHJDCDC@cdph.ca.gov inbox or contact your program specialist noted on your award letter.

Sincerely,

DCDC Team

Updates and Response:

SFDPH

Summary of actions

- SFDPH DOC Call Center has attempted contact to 99% of returning travelers from China, per the CDC list of travelers requiring follow-up.
- SFDPH is maintaining global, national, and local situational awareness to provide messaging focused on preparation for COVID-19 and the steps we can take to mitigate and prepare at our workplaces, homes, etc.
- SFDPH is collaborating with partner agencies at a city wide level to establish housing plans for potential PUIs, and to prioritize the SF community sites requiring immediate outreach and preparation for COVID-19.
- Cleaning/disinfection guidance for businesses & organizations (including BART & MUNI) have been completed.
- SFDPH is automating processes for return traveler data entry to be able to provide a more comprehensive data picture.
- SFDPH DOC is focused on planning for potential Medical Surge at SF hospitals, including working with SFFD and assessing 911 dispatch COVID-19 screening calls.
- SFDPH is working with the California Department of Public Health (CDPH) to assess stocking levels and usage of Personal Protective Equipment PPE across local jurisdictions, to support medical service continuity of operations.
- SFDPH CDCP information: <https://www.sfdcdp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

CDC-

- CDC reports 14 confirmed cases in the U.S. (12 travel-related, 2 person-to-person spread).
- CDC reports 426 people have been tested (as of 02/24/20)- 12.4% of all PUIs have tested positive for COVID-19.
- CDC reports 39 confirmed cases among persons repatriated to the US and tested by CDC (3 repatriated from Wuhan, China, 36 from the Diamond Princess Cruise Ship)
- <https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html>

WHO (World Health Organization)-

- WHO continues its focus on exploring transmission patterns, risk factors, and other clinical features of COVID-19.
- No new countries reported cases of COVID-19 (as of 02/23/20).
- <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports>

CDPH (California Department of Public Health)- (as of 2/21/2020)

- There are 10 cases (including two from separate repatriation flights) of 2019 novel coronavirus confirmed in California by CDC lab testing and approximately 185 persons have been tested to date.
- CDPH sent out a survey to local jurisdictions to assess stocking levels and usage of Personal Protective Equipment PPE.
- <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx>

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)
International data-

- 79,553 confirmed cases globally
- 77,150 confirmed cases in mainland China
- 2,593 deaths in mainland China + 35 additional deaths (Iran, Italy, Philippines, Hong Kong, Taiwan, Japan, France, South Korea, Diamond Princess Cruise)
- 2,403 confirmed cases outside of China across 36 countries/regions (includes regions of Hong Kong and Taiwan, outside of mainland China).

National (U.S.) data:

- No newly reported confirmed cases in last 24 hours: remain at 35 total confirmed cases in 8 states.
- <https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>

Updates and Response:

SFDPH

Summary of actions

- SFDPH DOC Call Center has attempted contact to 99% of returning travelers from China, per the CDC list of travelers requiring follow-up.
- SFDPH is maintaining global, national, and local situational awareness to provide messaging focused on preparation for COVID-19 and the steps we can take to mitigate and prepare at our workplaces, homes, etc.
- SFDPH is collaborating with partner agencies at a city wide level to establish housing plans for potential PUIs, and to prioritize the SF community sites requiring immediate outreach and preparation for COVID-19.
- Cleaning/disinfection guidance for businesses & organizations (including BART & MUNI) have been completed.
- SFDPH is automating processes for return traveler data entry to be able to provide a more comprehensive data picture.
- SFDPH DOC is focused on planning for potential Medical Surge at SF hospitals, including working with SFFD and assessing 911 dispatch COVID-19 screening calls.
- SFDPH is working with the California Department of Public Health (CDPH) to assess stocking levels and usage of Personal Protective Equipment PPE across local jurisdictions, to support medical service continuity of operations.
- SFDPH CDCP information: <https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

CDC-

- CDC reports 14 confirmed cases in the U.S. (12 travel-related, 2 person-to-person spread).
- CDC reports 426 people have been tested (as of 02/24/20)- 12.4% of all PUIs have tested positive for COVID-19.

- CDC reports 39 confirmed cases among persons repatriated to the US and tested by CDC (3 repatriated from Wuhan, China, 36 from the Diamond Princess Cruise Ship)
- <https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html>

WHO (World Health Organization)-

- WHO continues its focus on exploring transmission patterns, risk factors, and other clinical features of COVID-19.
- No new countries reported cases of COVID-19 (as of 02/23/20).

Good afternoon LHJ Partners,

Thank you for all of the feedback and questions provided during our teleconference call in January regarding the grant funding each county will be receiving. We have put together a Q&A document that provides answers to questions we received, including information about allowable uses of the funding.

Please see the attached Q&A document.

If you should have additional questions or need more information, you may send questions to our LHJDCDC@cdph.ca.gov inbox or contact your program specialist noted on your award letter.

Sincerely,

DCDC Team

Subject: Fwd: Update on specimens for San Francisco PUI

Hi Tomas,
I wanted to ensure you were in agreement regarding releasing this PUI from isolation given

negative results on the repeat specimens (you'll recall that this was the person whose only exposure was Penal Code § 832.7(b)(5)(C)

). You can see from the email correspondence that both CDC and CDPH think this is reasonable but ultimately are deferring to us. I do not think this person ever had COVID, and I was pleased but not surprised to see the negative results. Let me know if you are ok with us proceeding to release [REDACTED] from isolation and let [REDACTED] go back to work [REDACTED] is better.

Thanks,
Julie

Hi all,

Thank you very much, I have received the negative results for both NP and OP specimens collected on 2/21/2020.

CDC/CDPH colleagues – based on these results (and considering their low likelihood of being positive in the first place), is there general agreement that we can conclude that this patient is negative and release them from isolation?

Thanks,
Julie

Hi, all—

Thank you for working so hard to get specimens here as quickly as possible. We received them at CDC this morning.

I'm writing to let you know we got word a few moments ago that results for the PUI  discussed

yesterday *willnot* be available tonight. We expect them to be resulted and pushed through ELIMS no later than noon tomorrow (9am PT). We'll be back in touch soon.

Ginny

Hi Tomas,

I wanted to ensure you were in agreement regarding releasing this PUI from isolation given [REDACTED] negative results on the repeat specimens (you'll recall that this was the person whose only exposure was **Penal Code § 832.7(b)(5)(C)** [REDACTED]

[REDACTED]). You can see from the email correspondence that both CDC and CDPH think this is reasonable but ultimately are deferring to us. I do not think this person ever had COVID, and I was pleased but not surprised to see the negative results. Let me know if you are ok with us proceeding to release [REDACTED] from isolation and let [REDACTED] go back to work [REDACTED] is better.

Thanks,
Julie

The ultimate decision is of course up to you all as you have jurisdiction, but I also agree this is reasonable.

Thank you all!

Best,
Katherine

Hi all,

Thank you very much, I have received the negative results for both NP and OP specimens collected on 2/21/2020.

CDC/CDPH colleagues – based on these results (and considering their low likelihood of being positive in the first place), is there general agreement that we can conclude that this patient is negative and release them from isolation?

Thanks,
Julie

Hi, all—

Thank you for working so hard to get specimens here as quickly as possible. We received them at CDC this morning.

I'm writing to let you know we got word a few moments ago that results for the PUI  discussed yesterday will *not* be available tonight. We expect them to be resulted and pushed through ELIMS no later than noon tomorrow (9am PT). We'll be back in touch soon.

Updates and Response:

SFDPH

Summary of actions

- SFDPH DOC Call Center operated over the weekend to outreach to return travelers from China.
- The Call Center has attempted to contact 98% of the returning travel list provided to SFDPH by the CDC. The Call Center will continue to contact return travelers that require follow-up.
- SFDPH DOC is looking at housing options for at-risk travelers that can't self-isolate as well as PUIs that don't need hospitalization.
- SFDPH DOC Community Mitigation Branch to perform outreach, provide education, and deliver guidance to communities, community-based organizations, and the general public.
- SFDPH continues to work with regional, state, and federal partners on communication regarding the disposition of repatriated individuals and Diamond Princess Cruise quarantined persons that are being housed at Travis Air Force Base.
- SFDPH Public Information Office continues to respond to media requests, address rumors/rumor control, and regularly update the COVID-19 fact sheet.
- SFDPH CDCP information: <https://www.sfdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

CDC- (as of 2.21.2020/4:00pm)

- CDC reports 14 confirmed cases in the U.S. (12 travel-related, 2 person-to-person spread)
- CDC reports 414 people have been tested
- CDC reports 21 confirmed cases among persons repatriated to the US and tested by CDC (3 repatriated from Wuhan, China, 18 from the Diamond Princess Cruise Ship)
- <https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html>

WHO (World Health Organization)- (as of 2/23/2020)

- No new countries reported cases of COVID-19 in the past 24 hours.
- <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports>

CDPH (California Department of Public Health)- (as of 2/21/2020)

- There are 10 cases (including two from separate repatriation flights) of 2019 novel coronavirus confirmed in California by CDC lab testing and approximately 185 persons have been tested to date.
- <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCoV2019.aspx>

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data:

- 78,915 confirmed cases globally
- 76,936 confirmed cases in mainland China
- 2,442 deaths in mainland China + 25 additional deaths (Iran, Italy, Philippines, Hong Kong, Taiwan, Japan, France, South Korea, Diamond Princess Cruise)
- 1,979 confirmed cases outside of China across 29 countries.

National (U.S.) data:

- 35 total confirmed cases in 8 states.

- <https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html>

WHO (World Health Organization)- (as of 2/22/2020)

Two new countries (Lebanon and Israel) reported cases of COVID-19 in the past 24 hours.

The role of environmental contamination in the transmission of COVID-19 is not yet clear. On 18 February, a new protocol entitled "Surface sampling of coronavirus disease (COVID-19): A practical "how to" protocol for health care and public health professionals" was published. This protocol was designed to determine viable virus presence and persistence on fomites in various locations where a COVID-19 patient is receiving care or isolated, and to understand how fomites may play a role in the transmission of the virus.

The WHO Director-General briefed the emergency ministerial meeting on COVID-19 organized by the African Union and the Africa Centres for Disease Control and Prevention.

- <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports>

CDPH (California Department of Public Health)-

As of February 21, 2020, there are 10 cases (including two from separate repatriation flights) of 2019 novel coronavirus confirmed in California by CDC lab testing and approximately 185 persons have been tested to date.

<https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx>

Subject: COVID-19 San Francisco DPH DOC IAP for OP 6
Date: Friday, February 21, 2020 10:49:07 PM
Attachments: OP6 COVID-19 IAP 2020.02.21 FINAL.pdf

Good evening,

Please see attached, the San Francisco DPH DOC IAP for Operational Period 6.

Situation Status:

Status: Yellow
Outlook: Worsening
Need: None

Estimation of total number of cases (updated 2020-02-21 at 11:03 EST)

Sources:

<https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>
<https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx>

of Cases/Deaths

Worldwide: 76,798 Cases/2,250 Deaths

US: 34 Cases/0 Deaths (Confirmed cases in the US – 13; Persons repatriated to US and tested by CDC: Wuhan – 3; Diamond Princess - 18)

CA: 8 Cases/0 Deaths (LA County, Orange County, Santa Clara County: 2, San Benito County: 2, Repatriation Flight: 2)

SF: 0 Cases/0 Deaths

There are zero confirmed coronavirus cases at this time in SF. The SF Department of Public Health (DPH) is working closely with the U.S. Centers for Disease Control and Prevention (CDC) and the California Department of Public Health, monitoring the outbreak and preparing a response that protects the public.

DPH continues to coordinate with federal, state, regional, City agencies and community partners on COVID-19 response efforts. Areas of focus include: working with key stakeholders to implement federal quarantine orders; conducting evaluation of returning travelers; identifying PUI housing options; providing public information that is accurate and accessible; providing guidance to clinicians; and coordinating with local healthcare facilities and assessing hospital readiness.

Sincerely,

Public Health Emergency Preparedness & Response (PHEPR) Branch
San Francisco Department of Public Health

Hi all,

Thank you very much for the call today. UCSF looked at the [REDACTED] patients that the employee cared for during [REDACTED] shift. Of those, [REDACTED] were admitted from the ED and of those, all but one have already been discharged. They looked through the medical records of all [REDACTED] patients and found no evidence for hospital-onset fever or any signs or symptoms suggestive of new respiratory infections.

The specimens collected today have been picked up by World Courier for delivery tomorrow 2/22/20.

Tracking no : 114287446

Anything that can be done to expedite the repeat testing, and ensure the testing is done in the original lab, would be much appreciated. Please let me know if there are additional questions or comments. Adding UCSF to this email correspondence.

Thanks,

Julie

Subject: RE: San Francisco/CDPH/CDC COVID-19 call

Hi Julie,

I'm from the COVID-19 Healthcare Infection Control Team. We'd like to have a call today to discuss some initial actions that can be taken while we await the results of the repeat testing. This is mainly to help plan for the possibility that an investigation of the Penal Code § 832.7(b)(5)(C) where the PUI worked is needed. We can see how our discussion goes and decide whether it would be helpful to have additional calls over the next couple of days. I will defer to others from CDC to see if they can answer your questions about the indeterminate result of the OP specimen.

Thanks,

Alice

Subject: RE: San Francisco/CDPH/CDC COVID-19 call

Dear colleagues,

Can you provide more information about the purpose of these daily calls? This individual seems unlikely to be a true positive given no clear exposure, the NP swab that was tested initially was negative, and there was a problem with specimen labeling for the OP specimen only which appeared to lead to a delay in testing - can CDC provide additional information about the OP specimen with the indeterminate result? Was there in fact a delay in testing b/c of issues with specimen labeling? What is the status of the repeat testing of the indeterminate specimen?

We have collected specimens on this individual and will be sending them to CDC today. The patient remains in home isolation.

Thanks,
Julie

Hi, all—

We'd like to have daily check-ins for the next 4-5 days to discuss the SF healthcare worker with (currently) inconclusive COVID-19 lab results. Please forward this invitation as needed to appropriate persons in your organizations (county, state). Our hope is that these meetings will not all need to be an hour long, but I'm scheduling them as such for now. Please see call in information below.

Thanks,

Ginny Bowen

Hi, all—

We'd like to have daily check-ins for the next 4-5 days to discuss the SF healthcare worker with

(currently) inconclusive COVID-19 lab results. Please forward this invitation as needed to appropriate persons in your organizations (county, state). Our hope is that these meetings will not all need to be an hour long, but I'm scheduling them as such for now. Please see call in information below.

Thanks,

Ginny Bowen
Deputy Team Lead, Case-Tracking Team
Epidemiology Task Force
CDC COVID-19 Response

Subject: RE: San Francisco/CDPH/CDC COVID-19 call
Date: Friday, February 21, 2020 11:18:59 AM

Dear colleagues,

Can you provide more information about the purpose of these daily calls? This individual seems unlikely to be a true positive given no clear exposure, the NP swab that was tested initially was negative, and there was a problem with specimen labeling for the OP specimen only which appeared to lead to a delay in testing - can CDC provide additional information about the OP specimen with the indeterminate result? Was there in fact a delay in testing b/c of issues with specimen labeling? What is the status of the repeat testing of the indeterminate specimen?

We have collected specimens on this individual and will be sending them to CDC today. The patient remains in home isolation.

Thanks,
Julie

Date: Thursday, February 20, 2020 4:26:59 PM

SFDPH DOC COVID-19 Situation Status Report (02/20/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths

Worldwide: 76,199 Cases / 2,247 Deaths (*John Hopkins CSSE, link below*)
US: *15 Cases (CDC excluding 14 Cases from Diamond Princess Cruise Ship) / 0 Deaths
CA: 8 Cases / 0 Deaths
SF: 0 Cases

Updates and Response:

SFDPH

Summary of actions

- A suspected case of novel coronavirus (COVID-19) from Travis Air Force Base is being treated in a San Francisco hospital. The individual has no symptoms but tested positive for the virus in Japan and was brought to San Francisco from Travis Air Force Base in Fairfield, where they were quarantined after disembarking a cruise ship.
- On 02-19-2020 SFDPH hosted a conference call with six major SF University and College systems to provide information and guidance on managing return travelers from China that may need follow up.
- SFDPH DOC is identifying reporting needs and requirements for SF return traveler data, to guide analysis and provide a comprehensive picture of the ongoing and completed work.
- SFDPH is utilizing data from incoming clinical consultation calls to guide prioritization of site visits and outreach to community clinics, healthcare facilities, and hospitals in SF. This includes facilities in the SFDPH Safety Net and external and/or private facilities.
- SFDPH Primary Care clinics are universally screening their return traveler patients in clinic and report readiness to safely manage potential COVID-19 PUI cases.
- SFDPH has identified a need to align efforts on quarantine clearance requests from the SF community and employers.
- Public Information Office is focusing on emerging questions from the community about the quarantine process for congregate living settings (Single Room Occupancy units, multi-family homes, etc.).
- SF Mayor, London Breed, will send letter to the RSA cybersecurity conference to 45k participants, reinforcing that risk for COVID-19 remains low.

CDC-

- On February 19, 2020, CDC issued travel guidance for Hong Kong, recommending that travelers practice usual precautions. <https://wwwnc.cdc.gov/travel/notices/watch/coronavirus-hong-kong>
- CDC reported U.S. testing data: 412 negative PUIs; 52 Pending PUIs.
- <https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html>

WHO (World Health Organization)-

China has revised their guidance on case classification for COVID-19, removing the classification of “clinically diagnosed” previously used for Hubei province, and retaining only “suspected” and “confirmed” for all areas, the latter requiring laboratory confirmation. Some previously reported “clinically diagnosed” cases are expected to be discarded over the coming days as laboratory testing is conducted and some are found to be COVID-19-negative.

- <https://www.who.int/health-topics/coronavirus>

CDPH (California Department of Public Health)-

- CDPH announced that 16 laboratories, including the Viral and Rickettsial Disease Laboratory in Richmond, CA, will provide more rapid results than currently available and help to inform public health action and medical care for people who may have been exposed to novel coronavirus. Results from the Centers for Disease Control and Prevention currently take between two to seven days. The Public Health Department lab anticipates it will be able to conduct testing, and report results, within two days of specimen receipt.
- <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCoV2019.aspx>

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data:

- 76,199 confirmed cases globally
- 74,999 confirmed cases in mainland China
- 1,200 confirmed cases outside of China across 29 countries.
- 2,144 deaths in mainland China + 9 additional deaths in 7 countries outside of China (Philippines, Hong Kong, Taiwan, Japan, South Korea, France, Iran).
- 2 deaths from Diamond Princess Cruise Ship.

National (U.S.) data:

- No new confirmed cases reported in the U.S. within the last 24 hours.
- <https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>

Updates and Response:

SFDPH

Summary of actions

- SFDPH is focused on working with Chinese community groups, commerce, businesses, schools, and media outlets, addressing concerns and providing preventative measures to the community.
- Site visits to SF hospitals continue. DPH is providing consultation to facilities re: level of preparedness of the hospital and EMS, according to guidance.
- SFDPH conferring with SF colleges & universities to provide COVID-19 guidance.
- SFDPH developed a COVID-19 clinical intake form and check list to provide step-by-step guidance when evaluating patients who may have COVID-19, with a goal of preventing the spread of infection and expediting investigation. <https://www.sfdcdp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/coronavirus-2019-information-for-healthcare-providers/>
- A Hospital FAQ for visitors and patients is currently in development.

General FAQs

CDC-

- CDC is creating a booklet for arriving travelers to record temperatures and symptoms, to replace current CDC temperature logs. CDC is expecting to release the booklet by the end of February 2020.
- CDC reported U.S. testing data: 412 negative PUIs; 52 Pending PUIs.
<https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html>

WHO (World Health Organization)-

- WHO is working with an international network of statisticians and mathematical modelers to estimate key epidemiologic parameters of COVID19.
- Online courses have been added to the OpenWHO platform:
 - Critical Care of Severe Acute Respiratory Infections
 - Health and safety briefing for respiratory diseases – ePROTECT
<https://www.who.int/healthacademy/courses/en/>
<https://www.who.int/health-topics/coronavirus>

CDPH (California Department of Public Health)-

- CDPH is polling regions re: their inventory of Personal Protective Equipment (PPE).
- CDPH announced that 16 laboratories, including the Viral and Rickettsial Disease Laboratory in Richmond, CA, will soon be able to perform COVID-19 testing.

- CDPH reported 02/18/20 CA testing data: 172 persons tested; 8 confirmed cases; 147 negative results; 10 pending results
- <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCoV2019.aspx>

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data:

- 75,283 confirmed cases globally
- 74,188 confirmed cases in mainland China
- 1,017 confirmed cases outside of China across 29 countries.
- 2,006 deaths in mainland China + 8 additional deaths in 6 countries outside of China (Philippines, Hong Kong, Taiwan, Japan, France, Iran).
- 2 new confirmed cases in Iran.

National (U.S.) data:

- No new confirmed cases reported in the U.S. within the last 24 hours.
- <https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>

Subject: ACTION NEEDED: 2020 Beverlee A. Myers Award for Excellence in Public Health Nominations

The following is being sent on behalf of California Department of Public Health Director and State Health Officer, Dr. Sonia Angell:

Dear Stakeholders:

This year marks 150 years of public health in California, the second oldest state public health department in the nation. This is also my first year as the California Department of Public Health Director and State Health Officer, so I am looking forward to presenting our highest public health award, the Beverlee A. Myers Award for Excellence in Public Health, to this year's recipient.

Nominations for the 2020 Beverlee A. Myers Award for Excellence in Public Health are now open through COB Tuesday, March 2, 2020. This award recognizes the contributions of public health and health care service professionals in improving the health status of Californians and will be presented at the Public Health Week Awards Ceremony in Sacramento on Wednesday, April 1, 2020.

I have attached a letter with full details and directions on submitting your nomination, and a list of past recipients. Please pass my email and the attached letter along to your interested parties and stakeholders. If you have any questions, you can contact Michael Marks at (916) 440-7147 or email michael.marks@cdph.ca.gov. Thank you very much.

Serving with you,

A handwritten signature in black ink, appearing to read 'Sonia Angell', with a stylized flourish at the end.

Sonia Angell, MD, MPH
California Department of Public Health
Director and State Health Officer
"A nationally accredited public health department"

This is also my first year as the California Department of Public Health Director and State Health Officer, so I am looking forward to presenting our highest public health award, the Beverlee A. Myers Award for Excellence in Public Health, to this year's recipient.

Nominations for the 2020 Beverlee A. Myers Award for Excellence in Public Health are now open through COB Tuesday, March 2, 2020. This award recognizes the contributions of public health and health care service professionals in improving the health status of Californians and will be presented at the Public Health Week Awards Ceremony in Sacramento on Wednesday, April 1, 2020.

I have attached a letter with full details and directions on submitting your nomination, and a list of past recipients. Please pass my email and the attached letter along to your interested parties and stakeholders. If you have any questions, you can contact Michael Marks at (916) 440-7147 or email michael.marks@cdph.ca.gov. Thank you very much.

Serving with you,

A handwritten signature in black ink, appearing to read 'Sonia Angell', with a stylized flourish at the end.

Sonia Angell, MD, MPH
California Department of Public Health
Director and State Health Officer
"A nationally accredited public health department"

Subject: SFDPH DOC COVID-19 Situation Status Report (02/18/20)
Date: Tuesday, February 18, 2020 3:57:25 PM

SFDPH DOC COVID-19 Situation Status Report (02/18/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths

Worldwide: 73,451 Cases / 1,875 Deaths (*John Hopkins CSSE, link below*)

US: 29 Cases / 0 Deaths

CA: 8 Cases (*see CDPH report below*) / 0 Deaths

SF: 0 Cases

Updates and Response:

SFDPH

Summary of actions

- Progress has been made as SFDPH continues its outreach to return travelers from China requiring follow up.
- SFDPH DOC is activating a "Community Branch" to perform outreach, provide education, and deliver guidance to communities, community-based organizations, and the general public.
- SFDPH Laboratories are prepared to start COVID-19 testing and anticipate receiving supplies from the CDC by the end of this week.
- SFDPH conducted a bed poll with SF hospitals over the weekend to assess readiness to support regional partners if needed.
- Public Information Office is creating an informational poster re: infection prevention techniques. The poster will be translated into 4 languages.
- Messaging is being created to prepare residents in the event of a confirmed COVID-19 case in SF.
- SFDPH is working with major employment agencies and organizations to organize a call to provide information on various protocols and escalation of response and messaging.
- <https://www.sfdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

CDC-

- CDC reported 60 pending PUIs in 42 states and territories (does not include PUIs in the US that were evacuated from the Diamond Princess cruise ship, including presumptive-positive cases).
- CDC reported U.S. testing data: 15 positive PUIs; 392 negative PUIs; 60 Pending PUIs
- <https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html>

WHO (World Health Organization)-

- WHO is currently gathering and assessing the needs of Member States for critical items such as Personal Protective Equipment (PPE).
- WHO started dispatching COVID-19 testing kits for 56 countries. As of 17 February, 37 shipments have been dispatched to 34 countries and three regional offices.
- <https://www.who.int/health-topics/coronavirus>

CDPH (California Department of Public Health)-

- 2 most recent COVID-19 confirmed cases in San Diego are under Federal quarantine and unconfirmed as

CA residents.

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data:

- 73,451 confirmed cases globally
- 72,439 confirmed cases in mainland China
- 1,870 deaths in mainland China + 5 additional deaths (Philippines, Hong Kong, Taiwan, Japan, France)
- 1,012 confirmed cases outside of China across 29 countries.

National (U.S.) data:

- 29 total confirmed cases in 8 states.
- 14 confirmed cases recently reported in Omaha, NB
- <https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>

NOTE: Information may vary as events and reporting are rapidly evolving.

Subject: RE: If you get calls from family members of hospitalized passengers from the Diamond Princess

Dear Kathleen;

I gave a talk to members of the Chinese community about coronavirus in Ventura County on Saturday morning. One of the things they mentioned to me was that there was a paucity of information written in Chinese characters. If that is not true, could you please point me in the direction of where I can find the information about coronavirus. If it is true, would you please create such written information for Chinese audiences? Please get back to me as their leadership is waiting for guidance. Thanks.

Bob Levin
Health Officer
Ventura County

Subject: If you get calls from family members of hospitalized passengers from the Diamond Princess

Some of you have received calls from worried family members of people who were on the Diamond Princess and are now hospitalized in Japan for COVID-19. Dr. Julie Vaishampayan provided the following information. Family members with questions about U.S. citizens who were on the ship and are now hospitalized should contact the US embassy in Japan by email (USGShipContact@state.gov) or phone (+81) 03-3224-5000.

Subject: RE: If you get calls from family members of hospitalized passengers from the Diamond Princess

Dear Kathleen;

I gave a talk to members of the Chinese community about coronavirus in Ventura County on Saturday morning. One of the things they mentioned to me was that there was a paucity of information written in Chinese characters. If that is not true, could you please point me in the direction of where I can find the information about coronavirus. If it is true, would you please create such written information for Chinese audiences? Please get back to me as their leadership is waiting for guidance. Thanks.

Bob Levin
Health Officer
Ventura County

Subject: If you get calls from family members of hospitalized passengers from the Diamond Princess

Some of you have received calls from worried family members of people who were on the Diamond Princess and are now hospitalized in Japan for COVID-19. Dr. Julie Vaishampayan provided the following information. Family members with questions about U.S. citizens who were on the ship and are now hospitalized should contact the US embassy in Japan by email (USGShipContact@state.gov) or phone (+81) 03-3224-5000.

Subject: Re: If you get calls from family members of hospitalized passengers from the Diamond Princess

CAUTION: External Email. Proceed Responsibly.

Most of the CDC pages have a button you can click on that says "other languages" (on my phone) or shows Chinese characters (on my computer) and if you click on it, it turns all the information to Chinese. See:

<https://www.cdc.gov/coronavirus/2019-nCoV/index.html>

Dear Kathleen;

I gave a talk to members of the Chinese community about coronavirus in Ventura County on Saturday morning. One of the things they mentioned to me was that there was a paucity of information written in Chinese characters. If that is not true, could you please point me in the direction of where I can find the information about coronavirus. If it is true, would you please create such written information for Chinese audiences? Please get back to me as their leadership is waiting for guidance. Thanks.

Bob Levin
Health Officer
Ventura County

Subject: If you get calls from family members of hospitalized passengers from the Diamond Princess

Some of you have received calls from worried family members of people who were on the Diamond Princess and are now hospitalized in Japan for COVID-19. Dr. Julie Vaishampayan provided the following information. Family members with questions about U.S. citizens who were on the ship and are now hospitalized should contact the US embassy in Japan by email (USGShipContact@state.gov) or phone (+81) 03-3224-5000.

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Most of the CDC pages have a button you can click on that says “other languages” (on my phone) or shows Chinese characters (on my computer) and if you click on it, it turns all the information to Chinese. See:

Dear Kathleen;

I gave a talk to members of the Chinese community about coronavirus in Ventura County on Saturday morning. One of the things they mentioned to me was that there was a paucity of information written in Chinese characters. If that is not true, could you please point me in the direction of where I can find the information about coronavirus. If it is true, would you please create such written information for Chinese audiences? Please get back to me as their leadership is waiting for guidance. Thanks.

Bob Levin
Health Officer
Ventura County

Subject: If you get calls from family members of hospitalized passengers from the Diamond Princess

Some of you have received calls from worried family members of people who were on the Diamond Princess and are now hospitalized in Japan for COVID-19. Dr. Julie Vaishampayan provided the following information. Family members with questions about U.S. citizens who were on the ship and are now hospitalized should contact the US embassy in Japan by email (USGShipContact@state.gov) or phone (+81) 03-3224-5000.

Subject: RE: If you get calls from family members of hospitalized passengers from the Diamond Princess
Date: Monday, February 17, 2020 2:53:05 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear Kathleen;

I gave a talk to members of the Chinese community about coronavirus in Ventura County on Saturday morning. One of the things they mentioned to me was that there was a paucity of information written in Chinese characters. If that is not true, could you please point me in the direction of where I can find the information about coronavirus. If it is true, would you please create such written information for Chinese audiences? Please get back to me as their leadership is waiting for guidance. Thanks.

Bob Levin
Health Officer
Ventura County

Subject: If you get calls from family members of hospitalized passengers from the Diamond Princess
Date: Friday, February 14, 2020 5:46:52 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Some of you have received calls from worried family members of people who were on the Diamond Princess and are now hospitalized in Japan for COVID-19. Dr. Julie Vaishampayan provided the following information. Family members with questions about U.S. citizens who were on the ship and are now hospitalized should contact the US embassy in Japan by email (USGShipContact@state.gov) or phone (+81) 03-3224-5000.

From: California Health Alert Network
To: Aragon, Tomas (DPH)
Subject: CAHAN Disease Notification – CDC Change in PUI Definition
Date: Thursday, February 13, 2020 7:33:53 PM

CDC has made changes to their guidance for evaluation of “Persons Under Investigation (PUI)” for Coronavirus Disease 2019. CDC’s definition of a PUI has an added footnote. Persons who may be infected with 2019 novel coronavirus should be immediately discussed with the local public health department. The new CDC guidance provides for consideration of testing persons who do not meet the PUI definition in two circumstances:

- For severely ill individuals, testing can be considered when exposure history is equivocal and another etiology has not been identified.
- For persons with travel to China within 14 days, testing can be considered at the discretion of public health officials for all persons with illnesses with fever and lower respiratory symptoms, whether or not they are hospitalized.

<https://www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html>

The California Department of Public Health has been informed that after consultation and agreement with the FDA, the CDC is manufacturing a replacement component of the test kit to better ensure quality control. The California Department of Public Health remains poised to start testing for 2019 novel coronavirus upon receiving those materials.

ICYMI - Our Coronavirus Response Is Protecting Americans

USA Today
By Secretary of State Mike Pompeo and HHS Secretary Alex Azar

February 11, 2020

Link to op-ed here: https://www.usatoday.com/story/opinion/2020/02/11/pompeo-azar-dc2adecoronavirus-2drespones-2dcdc2d7dho-2dprotect-2damericans-2dcolumn-4j12857002_and_DmWfMgE_1A67ed4zgeq6CNrARQeR_gfXy3ZLQQU0tEnFrvk7VfVE5l9YhHplP3Kj02nIk6m_GG0YTPr9ZVHgfr3X2Lx2L_e654AfIP8B8B00f6m4_4Jdtfs4EY_fmbyVKOmKnXUAYNNQR2glrfInDzw8gc

The first duty of the federal government is to keep our citizens safe. Since the United States first became aware on Dec. 30 of what has become known as the novel coronavirus, America's public health officials have closely monitored the situation, worked to understand the virus and taken steps to limit Americans' exposure to it.

Our task force is ensuring that our whole-of-government, layered, public health plan has the resources necessary to protect Americans. We've treated the sick, and traced back their travel history and contacts to minimize the spread of the virus. We've worked swiftly to screen and safely receive American travelers returning from China, and bar foreign travelers who have recently visited the epicenter of the outbreak.

Consistent with the World Health Organization International Health Regulations, our travel restrictions were intentionally devised to complement the Chinese government's policy of isolating approximately 50 million of its own citizens in Hubei province. Other nations, such as Italy and South Korea, have taken similar measures.

Our efforts in China

Thus far, the United States has only had 12 confirmed cases of the virus. We were saddened to hear last week that one American, a 60-year-old woman in Wuhan, China, has died. But we're undeterred in our vigilance to protect our people. And we're mobilizing resources around the world to help other nations fight the disease, too. This is American altruism at its finest.

Let's start with our efforts focused on the country where the virus first appeared — China. In the words of President Donald Trump, "We're offering them tremendous help." During the first week of January, the Centers for Disease Control and Prevention made an offer of assistance in order to understand the disease and help bolster response efforts.

The Department of Health and Human Services subsequently provided to the WHO a list of world-class medical professionals ready to deploy their skills in China and learn from China's efforts to combat this new coronavirus. In the last week of January, Secretary Azar personally extended an offer of help to Health Minister Ma Xiaowei; Secretary Pompeo did the same with Chinese State Councilor Yang Jiechi. We hope the mission will commence immediately, whether bilaterally or under the auspices of the WHO.

We've also facilitated the delivery of vast amounts of medical supplies to the Chinese people. Just last week, the State Department helped transport 17.8 tons of relief supplies to Hubei. And more assistance will continue to be offered — the United States is prepared to spend up to \$100 million in existing State and U.S. Agency for International Development funds to assist China and other impacted countries to contain and combat the virus.

While State managed the logistics, the donations themselves were provided by Samaritan's Purse, Boeing, Intermountain Healthcare and The Church of Jesus Christ of Latter-day Saints, and coordinated by a nongovernmental organization called Project HOPE. Time and again, when diseases and disasters strike, the American people have stepped up to help citizens of other countries without being asked. Our robust charitable giving and enthusiastic civil society groups are channeling the American people's concern for their fellow man.

Cooperation with other nations

Then there are America's actions to help the citizens of other countries, beyond China. CDC staff based in more than 60 countries are working closely with ministries of health and other health partners, often in conjunction with their colleagues at the State Department and other federal agencies.

For instance, the United States has made coronavirus test kits available to 191 qualified laboratories around the world; so far, labs from 36 countries have put in orders. We've deployed staff to train health professionals in 15 hospitals in Vietnam. In Kenya, health experts at the U.S. Embassy in Nairobi, as part of our Infectious Diseases Task Force, engaged the government early on to recommend best practices in airport screening and public health.

Our quick and effective reaction abroad is facilitated by partnerships that America has carefully nurtured over decades — long before the latest outbreak.

We believe our actions will slow the transmission of the virus to and within the United States and other countries, solidify our ties of friendship with our allies and partners, and help save lives by giving us more time to refine preparedness measures and better understand the virus.

We all hope that our concerted efforts will control the virus and cause it to subside. But the world doesn't need to wait for that day to see how America remains a force for good throughout the globe.

Dear Public Health Colleagues,

Due to the impacts of the novel coronavirus response on CDPH Infectious Diseases Branch (IDB) and Local Health Department (LHD) staff, IDB is shifting the date by which all 2019 cases of reportable diseases monitored by CDPH-IDB, as well as all reports of foodborne and waterborne outbreaks that occurred in 2019, must be closed out by LHDs. Please finish investigation, enter remaining data, and close all pending 2019 cases and outbreaks by Friday, March 27. The list of reportable diseases monitored by CDPH-IDB in 2019 is attached.

If you have any questions or anticipate difficulties meeting this deadline, please contact the CDPH IDB Surveillance and Statistics Section at (916) 552-9720.

Thank you,

Yanyi

Subject: SFDPH DOC COVID-19 Situation Status Report (02/13/20)
Date: Thursday, February 13, 2020 2:04:33 PM

SFDPH DOC nCoV Situation Status Report (02/13/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths

Worldwide: 60,363 cases / 1,370 Deaths (*John Hopkins CSSE, link below*)

US: 15 Cases / 0 Deaths

CA: 8 Cases (*see CDPH report below*) / 0 Deaths

SF: 0 Cases

Updates and Response:

SFDPH

Summary of actions

- SFDPH DOC welcomes new Incident Commander Dr. Naveena Bobba.
- SFDPH objectives have expanded to support an infrastructure for contacting and interviewing return travelers from China who require follow up.
- CDPH and SFDPH are discussing collaboration on a CDC surveillance project looking at community transmission of COVID-19.
- Guidance in development for "Home Health Care" workers.
- SFDPH outpatient clinics are conducting travel screening with all patients in clinic, to broaden the ability to identify possible PUIs or people needing follow up, including asymptomatic patients with potential for COVID-19 infection.
- SFDPH Supply Unit continues to address nationwide N95 respirator shortage. Plan to order industrial respirator masks as an option.
- <https://www.sfdcdp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20coronavirus/>

CDC-

- Public Health Laboratories are awaiting COVID-19 test replacement kits from the CDC to begin local testing. The replacement will provide a more effective diagnostic test component.
- CDC reported U.S. testing data: 15 positive PUIs; 347 negative PUIs; 66 Pending PUIs
<https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html>

WHO (World Health Organization)-

- WHO published key considerations for repatriation and quarantine of travelers in relation to COVID-19- file:///C:/Users/kristina%20leonoudakis/Downloads/Repatriation_Quarantine_nCoV-key-considerations_HQ-final11Feb.cleaned.pdf
- WHO prepared a list of Q&A on infection prevention and control for health care workers caring for patients with suspected or confirmed 2019- nCoV <https://www.who.int/news-room/q-a-detail/q-a-on-infection-prevention-and-control-for-health-care-workers-caring-for-patients-with-suspected-or-confirmed-2019-ncov>
- The UN activated a Crisis Management Team (CMT) to be led by WHO. The CMT includes WHO, OCHA, IMO (International Maritime Organization), UNICEF, ICAO, WFP, FAO, the World Bank and departments of the UN Secretariat. The CMT will focus on the health response as well as the wider social, economic and developmental implications of the outbreak. <https://www.who.int/health-topics/coronavirus>

CDPH (California Department of Public Health)-

- **CDPH reported 1 newly confirmed case in San Diego.**
- The 2 most recent cases in California (both in San Diego County) are individuals in the repatriation population and it is unknown if they are California (CA) residents.
- CDPH reported CA testing data: • 139 persons tested • Eight confirmed cases • 111 negative results • 20 pending results
- CDPH return traveler data- 4,763 return travelers with arrival from China on or after 02/03/20 from approximately 43 local health departments. This does not include persons from repatriation flights in federal quarantine.
- CDPH stated the recent surge in number of confirmed cases is related to adoption of a new diagnosis classification. Hubei Province is now including clinically diagnosed cases into the number of confirmed cases.
- 9 Public Health Laboratories in CA are awaiting COVID-19 test replacements from the CDC to begin local testing- CDPH, Sacramento, Contra Costa, San Francisco, Santa Clara, Tulare, Los Angeles, Orange and San Diego Counties.
- CDPH released their guidance for schools and universities- file:///C:/Users/kristina%20leonoudakis/Downloads/Coronavirus+Colleges+Guidance+2_11_20.cleaned.pdf

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data:

- 60,363 confirmed cases globally
- 59,826 confirmed cases in China
- 1,368 deaths in China + 2 additional deaths (Philippines and Hong Kong)
- 474 confirmed cases outside of China across 27 countries.

National (U.S.) data:

- 15 total confirmed cases in the U.S.
- **2 new cases confirmed- 1 in San Diego, CA and 1 in San Antonio, TX.**
- PUIs in 41 states and territories.

Subject: CACDC call 2-14-20 canceled
Date: Thursday, February 13, 2020 7:51:28 AM
Importance: High

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Hello CACDC Members and Partners,

Due to the ongoing 2019 novel coronavirus (or COVID-19) situation, we have decided to cancel tomorrow's CACDC meeting. I was a little torn about canceling as I do think it would be useful to have a discussion about how things are going, how different programs are managing the situation, and sharing of best practices, but perhaps we can save that for our next meeting on March 13.

Talk to you then and hope all is well.

Louise

Situation Report - Update - COVID-19 (#9)

Department of Emergency Management
Division of Emergency Services

02-12-2020 - 17:56:44

Change Since Last Situation Report:

Situation Update:

- **International data:**
 - 45,210 confirmed cases; 44,687 cases in mainland China; 1,116 deaths in mainland China
 - 523 confirmed cases outside of China across 27 countries/regions. *(total includes 175 cases on the Diamond Princess cruise ship docked at Yokohama, Japan)*
- **National (U.S.) data:**
 - 13 total confirmed cases in the USA *(7 confirmed cases in California)*
 - There are no confirmed cases in San Francisco.
 - The risk of COVID-19 in California remains low.
- **There are no recommendations to cancel events.**
- <https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>
 - **NOTE:** Information may vary as events and reporting are rapidly evolving.
- **We are in flu season. The San Francisco Department of Public Health (DPH) recommends that persons with symptoms stay home from work, school and social gatherings. Practice hand-washing precautions. It is never too late to get the flu vaccine.**

SFDPH Activities:

- San Francisco Department of Public Health (DPH) engaged with San Francisco Unified School District (SFUSD) recently to discuss COVID-19 in school settings and to start development of a SFUSD FAQ sheet.
- DPH is collaborating with the NICOS Chinese Health Coalition to support the Chinese Community.
- DPH continues to monitor return travelers from China, with a goal of contact within 72 hours and is prioritizing outreach to families of school age children who have traveled from China.
- DPH is working with CDPH and CDC to develop process to contact travelers who provided incorrect or insufficient locating information
- DPH is focusing in on 2 major areas of work: community outreach and preparation of appropriate housing for a variety of Persons Under Investigation (PUI) patients (i.e. high risk vs. medium risk PUI cases).
- DPH Medical and Health trained staff are conducting site visits to major San Francisco hospitals (Kaiser, CPMC, ZSFG) to assess preparedness for potential COVID-19 patients and provide recommendations and support through collaboration.
- DPH Department leadership are strategizing around Persons Under Investigation (PUI) and return traveler access to N95 masks, to ensure equity to all.
- DPH DOC is preparing to rotate in new DOC staff and leadership, including new Incident Commander (IC) Dr. Naveena Bobba. Current IC (Tomas Aragon) will continue his involvement in the activation as Health Officer.
- DPH plans to distribute CDC guidance on the re-use of N95 respirators to SF healthcare facilities and hospitals this week.
- SFDPH is prepared to start COVID-19 testing, in line with CDC testing guidelines. Awaiting CDC approval to move forward.
- Operations continues to identify needs for additional staff and Plans and Logistics Sections are working on these requests
- SFDPH Public Health Lab has completed initial quality procedures to start COVID-19 testing, in line with CDC testing guidelines. CDC is working through some identified problems in the kits they have provided during this pre-testing work. Local testing is on hold until these issues can be resolved.

- <https://www.sfdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

Public Information:

- The World Health Organization (WHO) has renamed Novel Coronavirus to COVID-19 and has asked others to refer to the virus in this manner. Public information will work to introduce this term in future materials.
- DPH and the San Francisco Department of Emergency Management (DEM) continue to operate the Joint Information Center to develop and disseminate accurate, timely, relevant and accessible public information about COVID-19 (Novel Coronavirus).
- Public Information Objectives:

<!--[if !supportLists]-->1) <!--[endif]-->Rumor Control

<!--[if !supportLists]-->2) <!--[endif]-->Engagement with the Chinese and Asian Pacific Islander community

<!--[if !supportLists]-->3) <!--[endif]-->Keeping Public Information up-to-date.

- DPH and DEM continue to finalize announcement plans should a San Francisco resident contract COVID-19. The Office of Civic Engagement and Immigrant Affairs (OCEIA) translated these materials in all threshold languages.
- The following community outreach events are planned on Thursday February 13th in Chinatown:
 - 8:45 a.m. – Joint outreach meeting with SFUSD at Gordon Lau Elementary for parents of students.
 - 11:00 a.m. – Supervisor Peskin hosting a Dim Sum event with Chinatown leaders at New Asia. DPH and DEM will also be present.
 - 3:00 p.m. – First Chinese Baptist Church with the NICOS Chinese Health Coalition Disaster Preparedness Council Meeting.
- DPH, San Francisco International Airport (SFO) and DEM conducted a conference call with Moscone Center Staff at the request of the City Administrator's Office. The purpose of the meeting was to provide guidance to convention and meeting planners having events at the Moscone Center.
- DPH and DEM Public Information Officers (PIOs) continue to respond to media inquiries and prioritize Chinese language media.
- 311 has received 400 inquiries on COVID-19 since January 27, 2020.
- Updated factsheets remain available at www.sfdph.org and www.sf72.org.

CDC Response:

- Under the Health and Human Services (HHS) Public Health Emergency, enhanced screening continues at 11 designated airports. CDC reports it has conducted 32,434 screenings at these airports as of 2/10/20.
- CDC released their guidance for EMS providers and re-use of N95 respirators.
- CDC reported U.S. testing data: 13 positive PUIs; 347 negative PUIs; 60 Pending PUIs <https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html>

WHO Response:

- An international mission is being prepared to determine characteristics of the COVID-19 virus and China's public health response in containment of the virus. A group of international experts, with a range of specializations, will work with Chinese counterparts on increasing understanding of the outbreak to guide global response efforts.
- Chinese and external expert groups are working to identify the animal source of COVID-19. Identifying the animal source will help prevent future outbreaks and provide critical information on the initial spread of the disease and how these viruses jump from animals to humans.

CDPH Response:

- California Department of Public Health (CDPH) released their guidance for childcare and pre-school settings: https://www.cdph.ca.gov/Programs/CID/DCDC/CDPH%20Document%20Library/Coronavirus%20daycare%202_7_20%20Final.pdf

Resources:

- For operational coordination and information sharing, visit WebEOC (<https://sfvem.org>) under Incident Name: 2020-01-21 2019 nCoV. Note - WebEOC is password protected.

Situation Summary:

- CDC is closely monitoring an outbreak of respiratory illness caused by COVID-19 that was first detected in Wuhan City, Hubei Province, China and which continues to expand.
- Chinese health officials have reported thousands of infections with COVID-19 in China, with the virus reportedly spreading from person-to-person in many parts of that country.
- Infections with COVID-19, most of them associated with travel from Wuhan, also are being reported in a growing number of international locations, including the United States.

Subject: RR# XSF-20200211-001 HID Ambulance Txf from UCSF to XBE.
Date: Wednesday, February 12, 2020 5:00:58 PM
Attachments: 2020-02-11 nCoV_RR-XSF-20200211-001.pdf
Importance: High

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Good evening,

Attached, please find the completed RR# XSF-20200211-001, for the HID ambulance and crew, from Contra Costa, to transport COVID-19 patients to their home in San Benito.

I have included the MHOACs from both counties, as well as the MHOAC from San Benito (final destination of patients). I have also included the Health Officers from all three OAs, and the appropriate Duty Officers, for transparency and efficiency.

Please maintain these documents, for your internal tracking and reimbursements (as needed).

Thank you all, for your hard work and collaboration, to effectively complete this transfer.

Very respectfully,

Aram

Aram L. Bronston EMT-P
