File No. 23013 A-E

Chris Ward Kline v Department of Public Health (A)
Chris Ward Kline v Office of the Sheriff (B)
Chris Ward Kline v Mayors Office (C)
Chris Ward Kline v Department of Emergency Management (D)
Chris Ward Kline v SF Police Department (E)

Date filed with SOTF: 1/28/2023

Contact information:

Chris Kline (ckblueaqua@gmail.com) Complainant
Deirdre Hussey (deirdre.hussey@sfdph.org) Public Health; Paul Miyamoto
(paul.miyamoto@sfgov.org) Sheriff's Office; Victor Lim (victor.lim@sfgov.org) Dept. of
Emergency Management; Lt. William Toomey (william.toomey@sfgov.org) Police Dept.
(Respondents)

File No. 23013 A Complaint filed by Chris Ward Kline against Department of Public Health (A) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, 67.24(b)(o), and 67.25 by failing to respond to a request for public records in a timely and/or complete manner.

File No. 23013 B Complaint filed by Chris Ward Kline against Office of the Sheriff (B) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, 67.24(b)(o), and 67.25 by failing to respond to a request for public records in a timely and/or complete manner.

File No. 23013 C Complaint filed by Chris Ward Kline against Mayors Office (C) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, 67.24(b)(o), and 67.25 by failing to respond to a request for public records in a timely and/or complete manner.

File No. 23013 D Complaint filed by Chris Ward Kline against Department of Emergency Management (D) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, 67.24(b)(o), and 67.25 by failing to respond to a request for public records in a timely and/or complete manner.

File No. 23013 E Complaint filed by Chris Ward Kline against A-E SF Police Department (E) e for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, 67.24(b)(o), and 67.25 by failing to respond to a request for public records in a timely and/or complete manner.

File No. 23013 A Complaint filed by Chris Ward Kline against Department of Public Health (A) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, 67.24(b)(o), and 67.25 by failing to respond to a request for public records in a timely and/or complete manner.

Request for all communications between Public and Chris Ward Kline that deal with the app Once Systems and Bitfocus, as well as any and all APPS.

DPH response stated that they conducted a search and the only result were emails send by Mr. Ward Kline himself.

File No. 23013 B Complaint filed by Chris Ward Kline against Office of the Sheriff (B) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, 67.24(b)(o), and 67.25 by failing to respond to a request for public records in a timely and/or complete manner.

Request for all public records to include epidemlology, behavioral health surveillance to include communications from county to and from Chris Ward Kline. See file for additional details.

File No. 23013 C Complaint filed by Chris Ward Kline against Mayors Office (C) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, 67.24(b)(o), and 67.25 by failing to respond to a request for public records in a timely and/or complete manner.

It is unclear as to the exact nature of the request for records. There is a email sent to various depatments requesting records but it is not clear what was requested from the submitted documents. The request is most likely for the following:

Electronic surveillance, Microphone Surveillance, Physical Surveillance and Technical Surveillance for both main files records and cross references.

File No. 23013 D Complaint filed by Chris Ward Kline against Department of Emergency Management (D) for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, 67.24(b)(o), and 67.25 by failing to respond to a request for public records in a timely and/or complete manner.

Electronic surveillance, Microphone Surveillance, Physical Surveillance and Technical Surveillance for both main files records and cross references.

File No. 23013 E Complaint filed by Chris Ward Kline against A-E SF Police Department (E) e for allegedly violating Administrative Code (Sunshine Ordinance), Section(s) 67.21, 67.24(b)(o), and 67.25 by failing to respond to a request for public records in a timely and/or complete manner.

It is unclear as to the exact nature of the request for records. There is a email sent to various departments requesting records but it is not clear what was requested from the submitted documents. The request is most likely for the following:

Electronic surveillance, Microphone Surveillance, Physical Surveillance and Technical Surveillance for both main files records and cross references.

Thank you for your interest in the implementation of the San Francisco Sunshine Ordinance.

The Sunshine Ordinance adopted by the citizens of the City & County of San Francisco declares that:

- (a) Government's duty is to serve the public, reaching its decisions in full view of the public.
- (b) Commissions, boards, councils and other agencies of the City and County exist to conduct the people's business. This Ordinance will assure that their deliberations are conducted before the people and that City operations are open to the people's review.

The role of the Sunshine Ordinance Task Force is to advise the Board of Supervisors and provide information to other City departments on appropriate ways in which to implement the Ordinance. The Task Force is responsible for developing appropriate goals to ensure the practical and timely implementation of the Ordinance and to report to the Board on practical or policy problems encountered in the administration of the Ordinance.

If you have encountered problems regarding compliance with the Ordinance, the Public Records Act or the Ralph M. Brown (Public Meetings) Act, we ask that you fill out the attached complaint form. Please deliver the form to: Administrator of the Sunshine Ordinance Task Force, City Hall, Room 244, 1 Dr. Carlton B. Goodlett Place, San Francisco, CA 94102-4689.

We attempt to resolve complaints informally where possible, through the affected departments and the City Attorney's office. Matters, which cannot be adequately resolved, or matters that involve substantial policy considerations, may be set for a hearing at a Task Force meeting. The Task Force meets the first Wednesday of each month at 4:00 p.m. at City Hall, Room 408.

NOTICE: PERSONAL INFORMATION THAT IS PROVIDED WHEN ADDRESSING A PUBLIC POLICY BODY IS SUBJECT TO DISCLOSURE UNDER THE CALIFORNIA PUBLIC RECORDS ACT AND THE SUNSHINE ORDINANCE. MEMBERS OF THE PUBLIC ARE NOT REQUIRED TO PROVIDE PERSONAL IDENTIFYING INFORMATION, AND COMPLAINTANTS MAY REMAIN ANONYMOUS. HOWEVER, FOR PROPER NOTICING AND PROCESSING OF A HEARING REQUEST, A RELIABLE MEANS OF CONTACT IS RECOMMENDED. PLEASE NOTE THAT THE SOTF ADMINISTRATOR WILL NOT REDACT ANY INFORMATION PROVIDED IN THESE SUBMISSIONS.

11/5/2015

SUNSHINE ORDINANCE COMPLAINT FORM ALLEGED VIOLATION

- 1) Numerous request with SFDPH, SFPD, DEM and Sheriff's Department for public records for my person with most recent request dated December 13, 2022 – see that specific enclosed request for the entirety of request; specifics to include all surveillance, health surveillance, HIV surveillance and all audio/video surveillance. Pg 3-5
- 2) Please note on pg 5 "You will receive the Sheriff's office response no later than January 6, 2023" signed by Alison Lambert, Legal Assistant, San Francisco Sheriff's Office, Central Records and Warrants Unit.
- 3) Please note on pg 2, as on January 27, 2023 that request aforementioned in 1) and 2) is still listed as 'in progress' and I have not been notified via any other communications. These records have been delayed for over 8 plus months now.
- 4) All other pages in this request are a sampling and not all request sent to SFDPH, DEM, SFPD and Sheriff's Department. I have notified the Mayor, SFPD, Sheriff and Director Colfax several times of these attempts and it is obvious that there is stalling, and hesitancy to turn over the documents in the city/county possession.
- 5) The city and county utilizes an app called One System, which offers a variety of surveillance type tools to include GPS/GPRS, tracking documents and tracking individuals. Due to the GPS abilities, all data would eventually be stored within the Sheriff's Department and/or Department of Emergency Management. Just with One System, there would be records concerning myself. I'm asking for all records not just with One System, but all notes, files, surveillance, request, etc.
- 6) HIPPA Law does state that it is not required to turn over 'audio files' in protective health records; however, that a typed or otherwise printed format of the transcript is required for review by the person's health record it pertains too. The aforementioned agencies are refusing to turn over any records stating federal protection which is not valid nor true. Surveillance 'supremacy laws' lie within the city and county and are reviewable records and can be challenged in the court of law. For example, if a person was on HIV or Health Surveillance for Public Health to guide a patient to healthcare by audio means, a complete transcript of the interaction between 'operator and patient' shall be made available for review.
- 7) I'm in the process of amending my medical records with the Veterans Affairs and Kaiser. Records already received clearly would show that San Francisco has records that I'm requesting to review, challenge and potentially challenge in the court of law.
- 8) It is my desire to work with the city and county outside the court of law in resolving disputes, access to the records and their assistance with amending my records.

Respectfully,

Chris Ward Kline

1/28/2023

ADDITIONAL DOCUMENTATION CONCERNING ONE SYSTEM

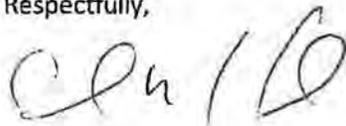

The last several pages are a list of SF Agencies and non-profits that utilize the app One System that information is stored within the Department of Emergency Management, within the Public Health/Safety Infrastructure Communications.

ALL SAN FRANCISCO DEPARTMENTS UTILIZE THIS APP, HOWEVER, SENIOR OFFICIALS ATTEMPT TO NOT LIST PUBLIC HEALTH, SHERIFF'S DEPARTMENT, SAN FRANCISCO POLICE DEPARTMENT, ETC IN AN ATTEMPT TO RESTRICT INFORMATION ON SURVEILLANCE EQUIPMENT ON CITIZENS OF SAN FRANCISCO.

IT SHOULD BE NOTED THAT THIS IS NOT LISTED ON ANY SURVEILLANCE TECHNOLOGY REQUIRED RELEASE TO THE PUBLIC. IT IS ONLY BECAUSE IT IS OVERUSED AND USED ILLEGALLY AND UNCONSTITUTIONALLY BY A FEW WITHIN SAN FRANCISCO.

With this information, which is reviewable and able to be challenged in the courts, it will show that a few in San Francisco have acted in violation of the Sunshine Act and obstructed in investigations regarding, Chris Ward Kline.

Respectfully,

A handwritten signature in black ink, appearing to read 'CWK' with a stylized flourish at the end.

RE: Public Records Request of December 13, 2022, Reference # P001596-121322

Dear Chris Kline,

On *December 13, 2022*, the San Francisco Sheriff's office received your request for records pursuant to the California Public Records Act (CPRA) wherein you requested the following:

See original request and additional items. I'm also looking for encrypted files of Interoperable Communication, text-to-voice/voice to text and for these files to be decrypted and turned over within a reasonable amount of time. It is how public health and safety uses technology. For example, it picks up code words such as 'what is the speed limit?' and the technology is supposed to inform me with computers and devices talking to me the individual. It is not classified nor confidential. It is the same devices and equipment that churches use, Federal Prisons, jails and protective housing folks as well as folks with HIV. It is also used to protect politicians inside city hall and outside during events in which SFPD and Sheriff's places on large swarths of people during these events and with the equipment atop the County Library and Asian Art Museum.

I know these records exist as they exist in all approximately 3,030 counties across the United States. This is not an abnormal request, just all files related to me and interaction with former and current employees.

I understand the legal issues and the facts that some former and possible current deputies have went to fall with their surveillance duties. The office of the Sheriff is to uphold the law with the utmost integrity.

I can if needed request this information from the District of Columbia Public Safety as that is where the Interface for the entire system that wraps up to federal agencies such of Commerce, Labor, DOJ, HHS, AND multiple others. It is also available at the FCC.

I'm also requesting all information from the Sheriff's Department on any investigation conducted by current and former employees using this equipment. I have also submitted an

Internal Affairs request and have submitted over 60 pages of documentation. There would have been notes added to my file and those are public records.

Besides One System which I have 100% proof that Department of Emergency Management and the Sheriff's Department uses, amongst others, but to also include the following:

1) body worn cameras, 2) Inmate phone call recording, 3) CCTV Cameras, 4) Fiber Optic Cameras and Under door cameras, 5) GPS Tracking devices, 6) HNT Throw Phone/Camera, 7) any stingray or related technology, 8) Recon Scout, 9) Constant Contact, 10) Google Web Analytic, 11) drones, 12) RFID Scanner, 13) Vehicle and Mobile Command Cameras, 14) SCRAM Ankle Bracelet, 15) Dataworks Plus Digital Photo, 16) Cellbrite, 17) Lil Ears Microphone, 18) Irobot, 19) Vetmax Camera, 20) Wolstenholme Hazprobe, 20) Andros Robotics with Camera, 21) under vehicle Camera, and all other apps, devices and technology.

As a portion of this has been answered already, please disregard the portions already answered by your office such as P.R.E.P.

All records within the Sheriffs Department, the Department of Emergency Management and other agencies to include the Sheriff Department Community Programs and Engagement Programs to include but not limited too: Current and valid P.R.E.P. certification from the California Department of Health and for all other records that are known to exist on a variety of incidents, issues, surveillance to include: interviewing gang members, interviewing homeless people, interacting with people on the app

One System, public health surveillance and safety equipment to include and not limited too: All Central Records Systems to include but not limited to Electronic/Microphone/Physical and Technical Surveillances for both main file records and cross reference files. These records are known to exist as all apps that utilize GPS and GPRS data, with One System and all other apps such as public health, public safety and political surveillance to include any and all surveys and messages sent to any and devices specific to Chris Ward Kline. a previous request for records was denied by Retired Deputy James Wilson which would be misconduct of a public official since the records do exist. --- Clarification response: --- I was asked for follow up on two specific parts of my records request: 1) P.R.E.P. is the Post Release Education Program, certification #380083BN expired 5/31/2017. It is required by state law as the Sheriff conducts outpatient Alcohol and/or other Drug Services. California Department of Health Care Services issues the certification. 2) the App One System was purchased by the city and county of San Francisco from Bitfocus, Inc. and is used in all agencies within the city and county of San Francisco to multiple day to day functions, monitors SIGINT, is assigned a FCC channel, and used for Protection for elected officials, gang surveillance, public health day to day operations, public safety day to day operations. With it, you can program signals to go to peoples homes, cell phones, police vehicles, fire trucks, etc. and it is being used illegally by a few in San Francisco to influence people for various personal and political reasons. Simply put, I want all information that applies to me, impacted me, etc that was used on that FCC channel. You can contact this person's email shome.vasudevan@sfgov.org who has the certification which expires in the year 2030. SFIA COMMUNICATIONS DEPT SAN FRANCISCO, SAN MATEO, SAN FRANCISCO, CA P: (650)821-3644 SY- Trunked Public Safety 700 MHz WQMR423 - Call Sign 90.523(A) - GOVERNMENT AGENCIES SAN FRANCISCO INTERNATIONAL AIRPORT PUBLIC SAFETY RADIO SYSTEM City Agency HSH is the largest agency in the city and county. It uses the app and issues credentials to agencies and individuals to, when done legally, to guide people to healthy decisions. When it is being done illegally, it can force people to move that they don't like, that don't vote for a specific person, or donate to a specific person or cause. Please let me know if there is additional information needed.

I'm also concerned that at least one record was removed from this service request system in

which the Legal Office stated that they needed two more weeks to review my claim asking for my knowledge of P.R.E.P. and One System.

I'm also looking for all credentials that were given out to any citizen, former and current employee and purpose of allowing them credentials. Within San Francisco, over 50 agencies utilize One System, from churches, non profit, Department of Emergency Management, Public Health, and politicians use to send out MailChimp, SurveyMonkey, SurveyGizmo, etc.

If the Sheriff was not able to monitor this system, a person could at any time, send an email, text, call with the aforementioned apps, to inmates or visitors entering into City Hall. It sends bots and malware that turn on a persons phone, and then can be a live operator, program, questionnaire, etc to cause violence within areas that are protected by the Sheriff's Department.

IT WOULD BE IMPOSSIBLE FOR THE SHERIFF NOT TO HAVE ANY DOCUMENTATION CONCERNING THIS, LET ALONG SOMEONE THAT HAS VISITED SAN FRANCISCO, FREQUENTED SAN FRANCISCO, SPOKE AT CITY HALL, ETC.

I'm also including multiple dates and times in which current and former Sheriff's employees were using surveillance on me at various times and the obstruction that occurred.

The Sheriff's Office responds to your public records request as follows: The Sheriff's office is conducting an extensive review to locate and review responsive records in order to respond to your public records request. Please be advised that because of the need to consult with another unit in our department, the Sheriff's office is hereby invoking an extension of time of 14 days under Gov. Code section 6253(c). On or before January 06, 2023, the Sheriff's office will notify you if we locate any records that are responsive and not exempt from disclosure to your request, in addition to providing a date that non exempt records will be provided to you.

You will receive the Sheriff's office response no later than January 06, 2023.

Sincerely,

Alison Lambert
Legal Assistant
San Francisco Sheriff's Office

 Subject: Department of Emergency Management Response
 This message is from outside the City email system. Do not open links or attachments from untrusted sources. Good evening, Department of Emergency Management Response denies and record within 72 hours or request. It should be noted that on a SF gov website, the partner agencies list wss changed by IT and an appropriate list of previous and new are recorded which points to obstruction. I will be asking for a complete list and once again, I respectfully request the documents from Public Health, and any/all agencies that have record that include but not limited too: 'Electronic Surveillance (ELSUR) indices, the Microphone Surveillance (MISUR) indices, the Physical Surveillance (FISUR) Indices, and the Technical Surveillance (TESUR) Indices, for both maim file records and cross reference files'. Respectfully, Chris Ward Kline

Subject: Department of Emergency Management Response

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Good evening,

Department of Emergency Management Response denies and record within 72 hours or request.

It should be noted that on a SF govt website, the partner agencies list was changed by IT and an appropriate list of previous and new are recorded which points to obstruction.

I will be asking for a complete list and once again, I respectfully request the documents from Public Health, and any/all agencies that have record that include but not limited too

Electronic Surveillance (ELSUR) indices, the Microphone Surveillance (MISUR) indices, the Physical Surveillance (FISUR) Indices, and the Technical Surveillance (TESUP) Indices, for both main file records and cross reference files'.

Respectfully,

Chris Ward Kline

Your request is being forwarded to the appropriate department(s) for processing and you will be notified once the request is complete.

You can monitor request progress at the link below. Thank you for using the San Francisco Public Records Center.

San Francisco Police Department

RE: Public Records Request of October 19, 2022, Reference # P001470-101922

Dear Chris Kline,

On *October 19, 2022*, the San Francisco Sheriff's office received your request for records pursuant to the California Public Records Act (CPRA) wherein you requested the following:

All records within the Sheriff's Department, the Department of Emergency Management and other agencies to include the Sheriff Department Community Programs and Engagement Programs to include but not limited to:

Current and valid P.R.E.P. certification from the California Department of Health and for all other records that are known to exist on a variety of incidents, issues, surveillance to include: interviewing gang members, interviewing homeless people, interacting with people on the app One System, public health surveillance and to include and not limited to:

All Central Records Systems to include but not limited to Electronic/Microphone/Physical and Technical Surveillances for both main file records and cross reference files.

These records are known to exist as all apps that utilize GPS and GPRS data, with One System and all other apps such as public health, public safety and political surveillance to include any and all surveys and messages sent to any and devices specific to Chris Ward Kline.

a previous request for records was denied by Retired Deputy James Wilson which would be misconduct of a public official since the records do exist.

Additional clarification is needed in order to fulfill your request:

- Define P.R.E.P certification
- Define App One System

A reply must be received within ten (10) calendar days of the date this email was sent or your request will be closed and a new request will be required. Please respond in writing via the Records Request System so that there is a record of your response.

Upon receipt of your response, the department will further respond to your request as required by law.

Sincerely,

Juliana Petani
Legal Assistant

ckblueaqua@gmail.com

Reference No:

P000320-041221

Status:

No Records Exist

Additional Information

Type of Record(s):

- Incident Related Records
- Calls for Service
- Policy and Procedures
- Other (describe below)

The Sheriff's Office is not the custodian of records of mugshots and arrest records. To obtain copies of your criminal history and mug shots, you must contact the San Francisco Police Department, ID Bureau, located at 850 Bryant St., Room 475, San Francisco, CA 94103. The SFPD ID Bureau is open Monday - Friday, 8:00 a.m. - 5:00 p.m., and their telephone number is (415) 553-1415. You should also bring a valid government issued ID.

Incident Details

Incident Number:

Date of Incident:

Time of Incident:

04/12/2021

1335

Location/Address:

Lake Merritt BART

Please be as specific as possible including the exact address or landmark.

Date Range:

Since 09/2000

If Applicable

Involved Party:

Various members of SF County Public Safety

Describe the Record(s) Requested:

Date of Incident: 04/12/2021 Today at 1335 hrs, I received a call from number 628-227-3227 which was used to place a survey and surveillance on my phone 415-203-1662. The surveillance was and is illegal and there are no reasons for surveillance to be placed on me, friends or family. I'm requesting that these records are turned over to me immediately in order to file criminal charges and to start civil proceedings on all parties involved. The surveillance has been occurring regularly off and on since approximately 09/2000 and lately 24/7 from San Francisco Public Safety. I will be requesting similar documentation from Alameda County, the state of California, FBI and Health and Human Services. I will request a subpoena for these records as well. Respectfully, Chris Ward Kline

As a default, all records are provided to the requester electronically through the online Records Request System. If you would like to receive your records in an alternative format please select the format below. Please note copy fees may apply for non-electronic delivery.

Alternate Method to Receive Records:

Electronic Records

If you have any documents that may assist in responding to your request, please attach here:

All public health records to include epidemiology, behavioral health surveillance to include communication from county to and from Chris Ward Kline. Information should include all communication transmitted through Public Broadcast, Emergency Broadcast and Public Health Communication and any additional surveillance networks within San Francisco County via voice synthesizers and utilization of text to voice/speech and voice/speech to text during all periods from 9/2001 through July 4, 2021. It should be noted that plaintiff was not in prison nor affiliated with a gang; however, Plaintiff is requesting electronic surveillance listed above but also any involving communication with gang members and current and/or former prisoners. Respectfully, Chris Ward Kline 415-203-1662 p.s. please do not utilize my cell phone number or my email to place electronic surveillance based on this request.

CUSTODIAN OF RECORDS
REQUEST FOR DISPATCH RECORDS INSTRUCTIONS
(San Francisco Sunshine Ordinance, Administrative Code §67.2.seq.)

Dear Requestor:

Fill out each line as applicable. Specifically identify the information you are attempting to obtain.

The following information must be supplied to ensure your request is accepted:

- ✓ **Date of your request**
- ✓ **Name, address and contact telephone number**
- ✓ **CAD or police case number (if available)**
- ✓ **Date of the incident**
- ✓ **Location of the incident - if requesting address history, please list the date range**
- ✓ **Any other identifying information (i.e. requests for all calls to a particular location)**

If you do not have all of the above required information, please fill out the form to the greatest extent possible. *Incomplete requests may delay our ability to process the request in a timely manner or at all.*

We can use a police case number to locate your CAD record; however, **we do not have access to San Francisco Police reports.** For copies of a police report, contact SFPD – Record Management via their web portal at www.sanfranciscopolice.org. You may also call 415.575.7232 or email them at sfpd.cisu.reports@sfgov.org.

If your request requires a payment, we currently accept cash, check, or money order. To avoid delays in receipt of your request, please include payment in the exact amount due with the request form.

WE CANNOT PROVIDE RUSH SERVICE. Requests are processed in the order received. While we process requests as quickly as possible, we have up to 10 calendar days to accept or deny the request. It is not necessary to call for the status of your request.

You may submit a completed form via US mail, in person, fax, or email.

In person: There is a secure drop box in our lobby along with additional blank forms for your convenience.

Fax: You may fax us at 415.558.3869.

Email: dem.records@sfgov.org – Printouts only

We cannot return records by email at this time. You must choose whether to pick up the responsive records in person, or have them mailed to you via the return address you include on the form.

Requester,

DPH IT conducted an email search of the records you request below. The only results were emails you have sent to DPH yourself; however, copies of those communications are attached here as PDFs.

This concludes your public records request.

Subject: Request for One System, Bitfocus App and Network Communication

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Michaela Varisto,

I was reviewing my request and noticed your name on all the comments.

I'm now requesting all communications between Public Health and me, Chris Ward Kline that deal with the app One System and Bitfocus, as well as any and all APPS.

I have documentation that shows Public Health utilizes this app as well as other partner agencies within San Francisco.

I have reviewed all state and federal law as well as SF Public Health Manuals and have not seen any protections federally or within the state of California. It does show that these communications are reviewable and amendable with cause, which I have or can show. It also shows that these records can be challenged in state and federal court. It is my desire to resolve this within the county, collectively, amicably and timely.

I've been very patient with San Francisco in requesting these records. In fact, due to not receiving these timely requests, it cost me a civil judgment federally against H.H.S. I do believe SF has brought suit or is still involved with a suit with H.H.S. and it is my belief that H.H.S. is also accessing your One System with credentials it should not have.

If I need to request these records via another agency, please advise where to send the request.

Respectfully,

Chris Ward Kline

Request Closed

Requester, it seems as though you are requesting your own protected health information. Please note medical record/health information requests are NOT public record requests. You may request medical records, in accordance with privacy protected law, by sending a fax to 628-206-8623 or visit the Medical Records Office at 1001 Potrero Ave, Building 5, 2nd Floor, Room 2B.

Good afternoon Dr. Colfax,

I have sent you, as well as others, documented evidence that should be on my public health record with the city logo, Public Address on it.

I'm trying to resolve this without submitting to a city/county grand jury.

You certainly are not suggesting that these documents (that I submitted) are fraudulent, are you?

I know where the files are kept. Having send me only my emails will not suffice.

- This would be best resolved without a grand jury convening or other legal means.

These documents have been produced in other counties, or should I say the county settled, because they did not want the files released.

I assure you, I have always wanted this resolved amicably; however, stalling, obstructing and not being straight forward, will potentially only backfire on city and county employees with potential civil and criminal penalties.

Having said that, I want to resolve this as soon as possible or I will discuss 'voices' as a byproduct of public health to guide people to healthy or unhealthy decisions. Voices are nothing more then public health and others to include politicians using for a host of issues.

It strongly appears that public health is protecting one or more politician, who acted outside of his scope.

This was filed with the FBI and DHS, as well as others.

Regards,

Chris Ward Kline

Good afternoon SOTF,

Victor Lim contacted me today to inquire about my request.

After speaking to Victor Lim, it is clear that Senior Officials are restricting access and documentation to his office, thus preventing him from being the ultimate record keeper of appropriate data within Department of Emergency Management.

That is one of my main arguments.

I believe with this information combined with what we learned yesterday from DPH, that this warrants a full committee hearing to discuss Record Management by all city/county agencies.

Respectfully,

Chris Ward Kline

Subject: Respectively Request a Stay

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Good evening,

After most of the responses, I needed to ask your office to potentially ask for a stay of info collection and ask each agency, to follow up with their Senior Officials. If not, these agencies are outright lying and their bosses are setting them up to take the fall.

They are being led down a horrible path.

Let me explain:

Each agency uses technology to conduct surveys, questionnaires, programs, etc. It is done with computer technology that uses text-to-voice/voice-to-technology to gather information and data.

For example, a political party sends out these surveys to gather info, and agenda, etc. Another example would be emergency management training - once you attend, it is there to access at any time within your personal surveillance.

Some of the programs the city uses are MailChimp, SurveyMonkey, SurveyGizmo, etc. There are plenty others.

These programs are supposed to be automatic and computer only; however, a programmer or staff member could interject and alter the automatic program causing and altering outcomes.

These agencies are not even giving me the automatic, but simply stating nothing exist when that is impossible.

I will prove beyond a reasonable doubt, that these agencies have info on me, and not just a little info.

I do not want to embarrass this city and county.

Please ask these agencies and senior officials for the info and provide an additional five days (business days). If these responses stand as is, I will utilize in potential next steps.

Respectfully,

Chris Ward Kline

Subject: Re: SOTF - Notice of Complaint Committee hearing, March 21, 2023 - 5:30 PM; Room 408, City Hall
Attachments: image001.png

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Good afternoon SOTF,

In reading the bylaws and to expedite File Number 23013 (A-E) and to prevent further delays and respondents denials of files, evidence, I make the following request for March 21, 2023 at 1730 hrs which is not covered by the bylaws.

I request at least 8 minutes (total and combined) to present evidence against each department. I can link the presentation to include each department acting in concert (either formally or informally) to not release files.

The only time stipulation listed on the bylaws is for five minutes in presenting 'new' evidence to reopen the claim.

I will submit all documentation five days prior to hearing, with no foreseen delays, weather permitting.

Respectfully,

Chris Ward Kline
415-513-9334

Good Afternoon:

The Department of Emergency Management has been named as a Respondent in the attached complaint filed with the Sunshine Ordinance Task Force (SOTF). In an effort to provide the SOTF information in an easy to understand format the SOTF has prepared a revised request format for responding to complaints (attached). **The SOTF requests that you submit your response to our office the allegations including any and all supporting documents, recordings, electronic media, etc., to the Task Force within five (5) business days of receipt of this notice.** In developing and submitting your response, please use the attached instructions, "Preparing San Francisco Sunshine Ordinance Task Force Respondents Materials," to address your defense of this complaint. This is your opportunity to provide a detailed explanation to allow the Task Force to be fully informed in considering your response prior to the meeting.

Please refer to the File Number 23013(D) when submitting any new information and/or supporting documents pertaining to this complaint.

ACS Radio Nets

[About ACS](#)

[ACS Meeting Information](#)

[ACS Calendar](#)

[ACS Radio Nets](#)

[ACS Resources](#)

[Licensing Exams and Training](#)

[OPWS Siren Information](#)

[Related Links](#)

Being able to participate in a formal radio net and being a good Net Control Operator are important skills, and the best way to learn is BEFORE the disaster happens. ACS conducts two local radio nets per week to give radio operators living or working in San Francisco the opportunity to learn and practice these needed skills in a low-stress environment. ACS Nets are meant to simulate passing Emergency Traffic within a Directed Net - please remember your ABC's: Accuracy, Brevity, Clarity.

The Siren Net

Please visit the Outdoor Public Warning System webpage for information about the Siren Net held on the 1st, 3rd and 5th Tuesday of the month at noon.

The ACS Net

The ACS Net begins at 1930 hours (7:30 pm) local time each Thursday evening, on the WA6GG repeater at 442.050 MHz, positive offset, tone 127.3 Hz. The purpose of this net is to practice Net Control skills, practice checking in with deployment status in a formal net, and to share information regarding upcoming ACS events. All licensed amateur radio operators are welcome to check in. On the second Thursday of each month, a simplex net will be conducted on the output frequency of the WA6GG repeater, 442.050 MHz, no offset, tone 127.3 Hz.

The Travel Net

The ACS Travel Net begins at 1815 hours (6:15 pm) local time immediately before each ACS General Meeting (generally the third Tuesday of each month), on the WA6GG repeater at 442.050 MHz, positive offset, tone 127.3 Hz. The purpose of this net is to practice Net Control skills in a 1-on-1 supervised environment and to practice checking in with in-process deployment status in a formal net. All licensed amateur radio operators are welcome to check in.

Sample Script

Here's a sample script that you can use to open/close a net, or upon which you could build your own net script.

Many thanks to the Northern California Amateur Radio Group for providing the WA6GG repeater for ACS nets and activities.

What I've been working on, the uptick in overdoses, suicides, gun violence, homeless shootings, homeless encampment fires, etc.

Here is a list of agencies in San Francisco using One System.

People with credentials are using ON PURPOSE to cause issues for nothing other than politics, to get money from governor and/or federal government.

See with this app, you have a person's credentials and you can use to influence people who are vulnerable. If they complain, they simply blame it on alcohol, drugs or mental health issues - it is not the victim but the people using their credentials illegally.

Simply disgusting by just a few politicians, public health and public safety.

Good evening sir,

Attached was sent to SFPD today, the Mayor, several Board of Supervisors, Department of Public Health and multiple unnamed agencies. I have in the past two days reached out to Senator Feinstein, Senator Cruz, Speaker Pelosi and the White House, amongst others.

One System is an app that SF has placed on every homeless, gay, and select others that are meant to guide them to healthy decisions.

Not sure if you received my previous message but it didn't have the original contents.

Here is a brief packet that I will be presenting at the Tenderloin Community Meeting (if the Mayor does not cancel due to current events).

All the city agencies that currently use it are not listed but some of note include Glide Housing, UCSF Citywide.

I have looped in other Community and Church Leaders.

Basically, just a few politicians are using it illegally.

This was something similar to what happen to Ed Jew, Leyland Lee and the most recent FBI investigation involving Nuru which is still very active and will probably be more arrests.

I believe this is a message to get the Church Leaders prepared for the fallout.

Respectfully,

Chris Ward Kline

Presentation March 21, 2023 at 1730 hrs

Good evening and thank you Sunshine Ordinance Task Force for allowing me to speak to the Commission.

I'm Chris Ward Kline, a Northeastern University Criminal Justice graduate with Public Health/Safety experience within hospitals, hotels, retail, housing, homelessness areas, risk management, emergency management. I have also been involved with high level protections of foreign presidents, dignitaries, VIP's, etc. I have a wealth of knowledge regarding electronic surveillance, both collecting data, metadata both for legal and illegal purposes.

I also have experience as a security consultant having previously contracted with NCS Pearson and the Department of Transportation at LAX and surrounding airports as the Security Director shortly after 9/11 in revamping airport security.

Unfortunately, the city and county of San Francisco, is not turning over required files and data due to personal and political reasons. Imagine, having the gold card with unlimited withdrawals, the wine bottle that keeps pouring wine, or the ability to influence a person(s) to consistently do what you want, and making that person, genuinely think it was their own decision, when in fact it wasn't. This is the only reason, the mayor and other agencies refuse to turn over all files, because it would shed light to unauthorized utilization of technology and rain on their parade.

Let's review technology:

- 1) Reference page 1 - 1975 during the Church Commission, it was discussed 'U.S. perfected technology to monitor messages that go through the air...reminiscent of the Stassi in East Germany, KGB in Russia and of course the surveillance state of North Korea and China. It further discussed that a 'Dictator could impose a tyranny on its people'. The Church

Commission stated 'we must ensure all agencies operate within the law and with proper supervision'.

One Reason for the creation of the Sunshine Ordinance Task Force was for this very reason.

- 2) Reference pages 2-8 – Forbes article discusses the technology in 2003 which is widely utilized. That was over 19 years ago.
- 3) Reference page 9 – San Francisco Built a System (One System) to track all homeless people, but also every person and agency that works with homeless or receive funds from the city and county.
- 4) Reference pages 10-11 – Big Brother in SF, so much that in 2019 the Episcopal Community stated 'there's lots of privacy concern' reference One System
- 5) Reference pages 12-13 – Similar App to One System section VI (6) that sending fraudulent, threatening, harassing messages, spamming, bombing (tech term) is not allowed, but the city and county of San Francisco widely disregards!
- 6) Reference pages 14-23 – similar tech and app SurveyMonkey (now called Momentive) Acceptable Usage Policy clearly states under 'YOUR RESPONSIBILITIES' "you may not use the Services to commit an unlawful activity; use the Services for activities where use or failure of the Services could lead to PHYSICAL DAMAGE, DEATH, MENTAL HARM, OR PERSONAL INJURY". Let that sink in for a second.
****The city and county of San Francisco utilizes SurveyMonkey, Survey Gizmo, MailChimp, One System, plus a host of other apps and technology.
- 7) Reference pages 24-31 – discusses the technology and some researchers, inventors in which technology has been around for over a century.
- 8) Reference pages 32/33 Bitfocus declaring it does not utilize DO NOT TRACK SIGNALS

So, One System, Bitfocus, Momentive, SurveyMonkey, and so on are terms that I never heard of until fairly recently, After speaking up about these concerns that

are public information, the city and county of San Francisco used some of these and others to cause to me, Chris Ward Kline:

- 1) Homelessness
- 2) Restrictions of jobs, income, revenue, grants to my Non-profit PAVEN (Prejudice And Violence Ends Now)
- 3) Monitored and harassed friends and family
- 4) Refused to step in and provide the resources (previously mentioned) to get home to my mother's funeral, my grandmother's funeral and great aunt's funeral between 2020-2021 – to teach me a lesson and to attempt to discredit me with my family.
- 5) Used to influence individuals to cause a robbery of myself, multiple hostile situations, false medical diagnosis, and even to use this technology to alter outcomes of billiard games and softball games. They even prevented me from traveling to Dallas for the Softball World Series in August 2022 and Las Vegas National Pool Tournament in March 2023.

And after repeated requests, the city and county denied not just any records but that zero records exist.

Reference page 34-35

Any app or technology used in the city and county of San Francisco such as One System, Surveillance by SFPD and Sheriff, Facebook, Twitter, Uber would fall under an appropriate MHz channel issued, to the city and county of San Francisco by the F.C.C. Reference page 34-35!

SAN FRANCISCO DEPARTMENT OF PUBLIC HEALTH

With multiple specific detailed request(s), San Francisco Department of Public Health repeatedly denied records existed:

- 1) Reference SFDPH pages 36-42 show records that should have been kept, maintained and supplied upon request(s), but not provided upon request(s).
- 2) Reference SFDPH pages 43-46 shows a list of medical conditions and appropriate reporting steps to Public Health – at least one of these was reported to San Francisco Public Health, but not provided upon request(s)
- 3) Reference SFDPH pages 47-55 - City and county of San Francisco donates to third parties such as the Felton Institute who engages in surveillance type work, i.e. suicide hotline, HIV hotline, eviction services which are all, a public health responsibility, but SFDPH is simply stating there is no oversight, or files. More on Felton later as it cross references with the Sheriff Department. SFDPH, FELTON AND THE SHERIFF using computer programs that simply voices in your head, that mimic your inner voice. If you notice the printout concerning Felton, someone printed 'survey' on each page, because that is what they typically call the program. Page 55 clearly shows SFDPH uses HIV Surveillance technology.
- 4) Gross denial of utilization of Surveillance Equipment to include Ehars, Epi-x, One System and other surveillance systems which is a MAIN function of Public Health. Section 308(d) of the Public Health Service Act allows for a citizen to legally request and receive a copy of all surveillance activities for normal reasons and other reasons to challenge legally, the scope, actions and results of any research, interventions, trace contacting, HIV surveillance.
- 5) Reference SFDPH pages 56-59 shows Consumer Assessment of Healthcare Providers and Systems in regard to SurveyMonkey. Also enclosed is the federal agency H.H.S. third party and applications Impact Assessment – thus admitting to the utilization of these apps in each level of health care are the county, state and federal government.

SAN FRANCISCO DEPARTMENT OF PUBLIC HEALTH SIMPLY DENIED ALL FILES, BUT STATED IN AN EMAIL, THAT HIV SURVEILLANCE IS PROTECTED AND CANNOT BE RELEASED. SIMPLY PUT, SFDPH IS USING ILLEGALLY TO VIOLATE MY RIGHTS, ATTEMPT TO FORCE ME TO MOVE, AND RESTRICT INCOME, GRANTS, REVENUE.

SAN FRANCISCO SHERIFFS'S DEPARTMENT

With multiple specific detailed request(s), San Francisco Sheriff's Department repeatedly denied records existed:

- 1) Reference pages 60-64 show probably cause that Sheriff has collected records of members of the public and its own staff, some resulting in civil court hearings
- 2) Reference page 65 – shows camera and surveillance system that sits on top of Public Library and Asian Art Museum which is used by the Sheriff (and others), to collect data, metadata on anyone that walks in the path and directly to the entrance of City Hall. This system collects your phone data, phone number and other data for the sole purposes of simply tracking individuals, gay people during Gay Pride, political dissidents who may protest in front of City Hall, or other large civic gatherings.
- 3) Reference pages 66-69, shows Public Records Request December 13, 2022, with normal response of December 22, 2022 expected but their own Legal Department asked for an extension until and their own deadline of January 6, 2023. Here we are as of March 11, 2023, the request is still not completed – because they are in a legal jumbo because records do exist.
- 4) Part of my job as an investigator, I interacted with people on Probation, Parole or individuals who were sent to jail and/or prison. These interviews were recorded by the Sheriff Department but not released upon a valid specific request(s) i.e. San Francisco resident in 2001, was using crack, pulled a fire alarm and I contacted 911, and was later testified at his parole hearing at San Quinton but the Sheriff states no records exist.
- 5) Reference pages 70-73 which shows an Internal Affairs report with supporting evidence sent certified mail, but this was not included with my requests nor was it investigated.

- 6) Reference pages 74-83 is budget that not only states that surveillance exist, but they contract the surveillance out to a third party....\$1,128,000 for a company that is for-profit – it is their goal to place people on surveillance to make more money. The Sheriff has a budget for 2 civilians, 25.5 sworn officers just for surveillance and two sworn officers for the Felton Institute page 79 for eviction services. Simply put, the Sheriff (and others) are using Felton Institute programs to place on people on surveillance that they want to move, discredit, political dissident, etc.
- 7) Reference pages 84-87 copies for the DA and Sheriff of Surveillance Technology in usage; clearly, there would be a few pages of files on me, but none exist.

SAN FRANCISCO SHERIFF DEPARTMENT SIMPLY DENIED ALL FILES, EVEN THOUGH THEIR CORE ROLE IS TO CONDUCT SURVEILLANCE ON INMATES, PAROLE AND PROBATION; HOWEVER, THEY USE ON MEMBERS OF THE PUBLIC SUCH AS POLITICAL DISSIDENTS. SIMPLY PUT, SF SHERIFF IS USING ILLEGALLY TO VIOLATE MY RIGHTS, ATTEMPT TO FORCE ME TO MOVE, AND RESTRICT INCOME, GRANTS, REVENUE.

SAN FRANCISCO POLICE DEPARTMENT

- 1) Reference pages 88-91 SFPD Must End Irresponsible Relationship with the Northern California Fusion Center – otherwise put, they are not reporting correctly, this is why they claim no files or data exist.
- 2) Reference pages 92-94 Bay Area Police Departments (Include San Francisco) using Stingray technology – again, if you are a political dissident, SFPD would use this on technology, but simply state it doesn't exist. This technology gives you real time GPS, GPRS, and with other technology, they could interfere with social gatherings, alter outcomes with softball, billiards, get someone agitated, cause an accident – REMEMBER, MOMENTIVE ACCEPTABLE USAGES AND USER RESPONSIBILITY THAT INCORRECT USAGES COULD CAUSE MENTAL HARM, DEATH, PHYSICAL INJURY, ETC.

- 3) Reference pages 95-108 multiple emails, police reports that SFPD simply state that they did not have any records. At least SFDPH admitted that they had emails sent by me.

BITFOCUS DESIGNER OF ONE SYSTEM

- 1) Reference pages 109-117 – shows various federal partners that utilize data supplied to them from cities such as San Francisco. These include H.H.S., Veterans Affairs and HUD. Also included would be SAMHSA which falls under H.H.S. which has an office on 90th 7th Street, San Francisco. Bitfocus recommendations for agencies to be highly involved with their technology include Emergency Services, Law Enforcement, Public Works, Parks and Recreation but not one file was given to Chris Ward Kline from several agencies listed in this complaint.

SURVEILLANCE TECHNOLOGY INVENTORY SAN FRANCISCO

- 1) Reference pages 118-142 which shows that the city uses this technology discussed but claim there is no files, meta data or data on Chris Ward Kline. Kaiser in San Francisco for a period of 6 years have over 600 pages of files but SF doesn't have one page.

DEPARTMENT OF EMERGENCY MANAGEMENT

- 1) Reference pages 143-144 – page 143 shows Interoperable Communications – this is where all the files exist in the county, but DEM says no files exist. Page 143 shows breakdown of Public Health, and they oversee Jail Services which links Public Health to the Sheriff. The sheriff also does security and operations control at the DEM, Public Health, Library, and several medical facilities. So these three combined say that the files do not exist, but with this presentation and the technology states, clearly shows that files do exist.
- 2) Reference page 145 – a release statement from the Department of Emergency Management concerning ACS Radio Nets – which are used for Emergency Communications during disasters. Any member of the

Northern California Amateur Radio Group or anyone with a little experience can tell you everything we just discussed in this presentation.

- 3) Reference pages 146-164 shows a LinkedIn post concerning this technology followed by emails to local leaders in San Francisco. I also presented this at several meetings to include the San Francisco Tenderloin Station public meeting, which was recorded. Notice HSH 9/2/2022 information concerning agencies using the technology and the one dates 9/13/2022 which DEM and several others agencies asked HSH to remove them from the website, only due to public outcry and complaints, not because they were not using it as suggested.

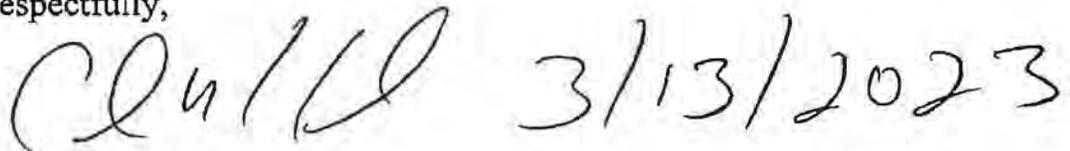

DATA SHARING AND PRIVACY

- 1) Reference page 165

In closing, Oakland Privacy Advocacy Director Tracy Rosenberg commented 'the use of any surveillance technology with impunity is a recipe for disaster'.

Your office, Sunshine Ordinance Task Force in one of these checks and balances and I ask for a favorable ruling asking for a full release and disclosure from all parties and agencies named.

Respectfully,

Chris Ward Kline

Results of the investigation

On August 17, 1975 Senator Frank Church appeared on NBC's *Meet the Press*, and discussed the NSA, without mentioning it by name:

In the need to develop a capacity to know what potential enemies are doing, the United States government has perfected a technological capability that enables us to monitor the messages that go through the air. (...) Now, that is necessary and important to the United States as we look abroad at enemies or potential enemies. We must know, at the same time, that capability at any time could be turned around on the American people, and no American would have any privacy left: such is the capability to monitor everything—telephone conversations, telegrams, it doesn't matter. There would be no place to hide.

If this government ever became a tyranny, if a dictator ever took charge in this country, the technological capacity that the intelligence community has given the government could enable it to impose total tyranny, and there would be no way to fight back because the most careful effort to combine together in resistance to the government, no matter how privately it was done, is within the reach of the government to know. Such is the capability of this technology. (...)

I don't want to see this country ever go across the bridge. I know the capacity that is there to make tyranny total in America, and we must see to it that this agency and all agencies that possess this technology operate within the law and under proper supervision so that we never cross over that abyss. That is the abyss from which there is no return.^{[25][26]}

Now Hear This

 This article is more than 10 years old.

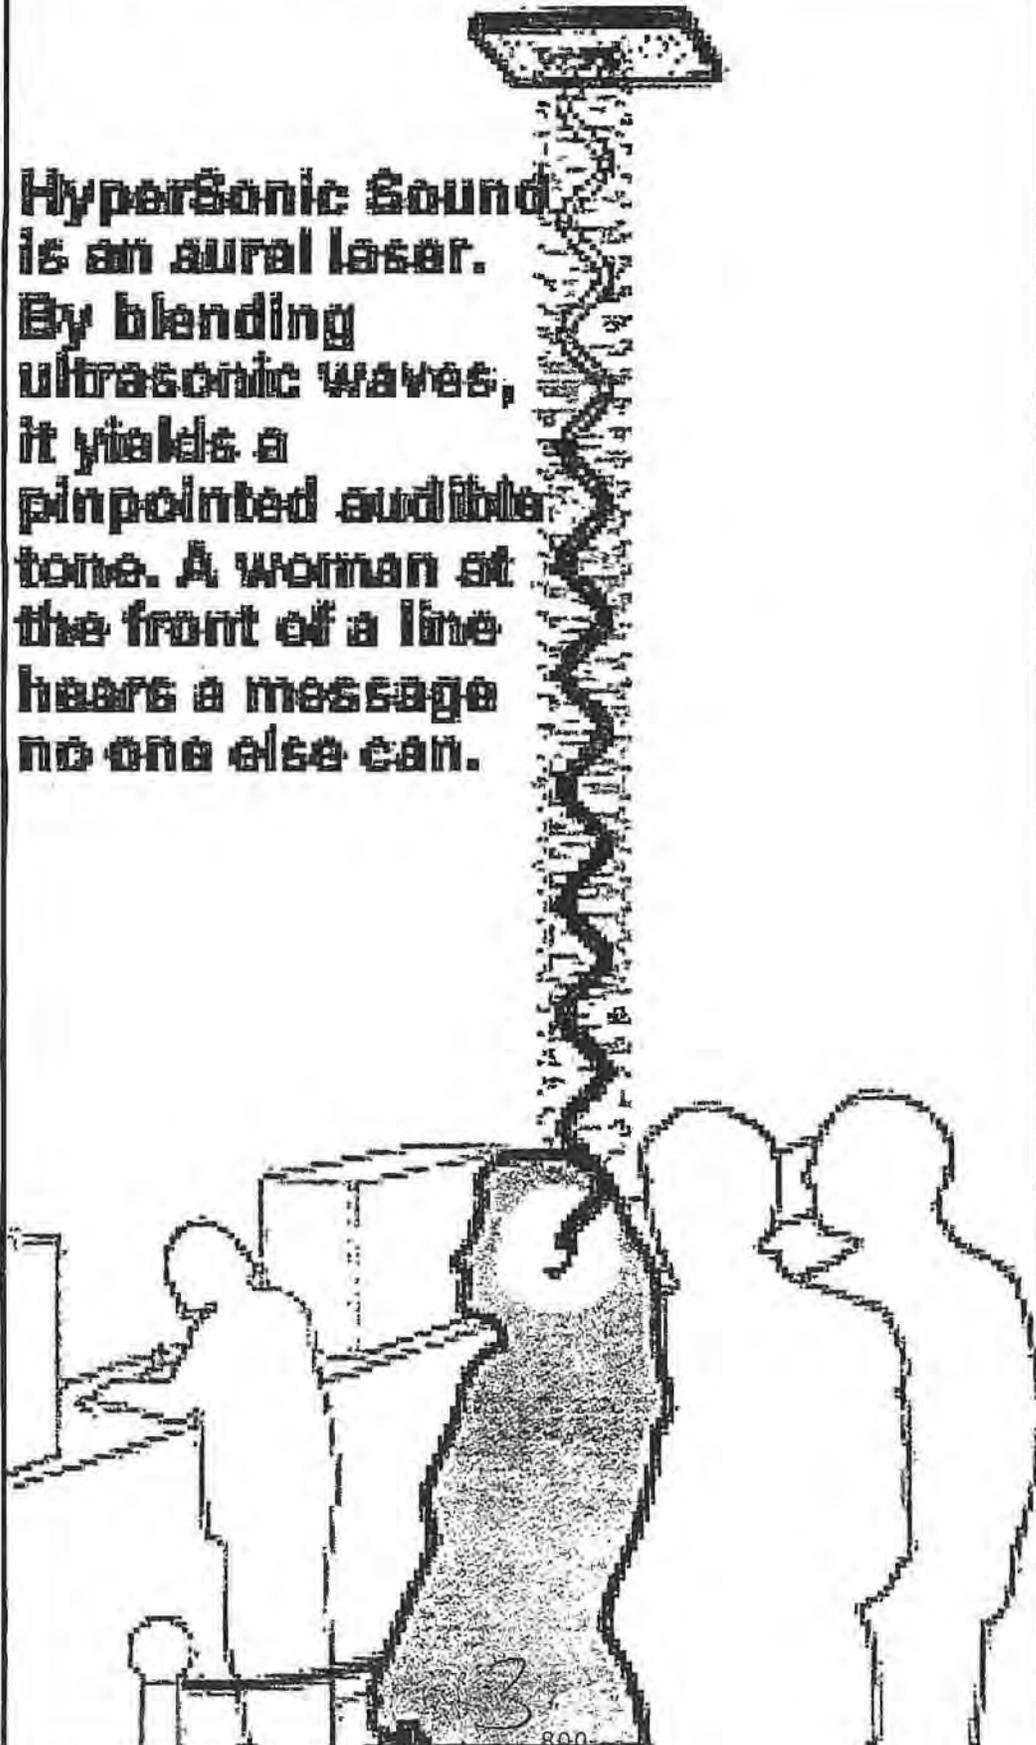

A new ultrasound system can zap a laserlike channel of sound over hundreds of feet to just one pair of ears in a crowd--a perfect pitch for marketers.

Cookie Preferences

2
799

How HSS Works

HyperSonic Sound is an aural laser. By blending ultrasonic waves, it yields a pinpointed audible tone. A woman at the front of a line hears a message no one else can.

Cookie Preferences

HSS units for testing at Wal-Mart and McDonald's. Sony has signed up to distribute the units in Europe. Gateway is considering including the technology in its line of televisions. And General Dynamics is installing them in the public address systems of U.S. Navy ships.

Woody's biggest win--until now, top secret--is the coming deployment of HSS in front of as many as 100 million supermarket shoppers a week. Disney and other big media companies plan to launch the ABC In-Store Network next year. The venture's budget calls for some 5,600 high-end supermarkets across 13 chains to spend \$250 million installing 40,000 plasma TV screens integrated with HSS emitters. The satellite-linked network will show news, previews of ABC shows and Disney movies, and, of course, advertising. Inaudible to anyone not standing in the checkout line, it wouldn't drive cashiers batty or interfere with other store announcements.

Marketers have always dreamed of whispering into the ears of individual shoppers as they mill around the aisles and inch along

checkout lanes. But speaker systems to date have annoyed everyone, employees especially, with their constant, ubiquitous noise pollution. Home uses abound, too. Imagine watching ESPN in bed at 1 a.m. without waking the wife.

Conventional loudspeakers spew a shotgun spray of sound waves in all directions. HSS, by contrast, shoots tightly focused waves of ultrasound (meaning it exceeds the frequency range of human hearing). When its various waves interact with each other, audible sounds emerge. An HSS emitter can transmit a message to a single person standing in a crowd 200 feet away, without anyone on either side being able to hear it. Motion-sensitive HSS emitters can flog Doritos on one end of the snack aisle and hawk Cracker Jack on the other. "HSS will eclipse anything I've invented so far," says Norris.

Tanned, 64 years old and gregarious, the self-taught engineer has made a fortune in four decades of inventing electronic gadgets outside the corporate tent. In 1967 he delivered a "transcutaneous Doppler," a forerunner of sonography. Since then Norris has devised a 20-hour cassette tape, the first palm-size digital voice recorder and an in-the-ear speaker that uses the bones of the skull to transmit sound. Norris sold the rights to that last device for \$5 million a decade ago. GN Netcom now sells \$40 million of them a year under the Jabra name for hands-free phone use.

His inspiration for HSS came in the late 1970s, when he found himself contemplating the characteristics of mixing. "I invent by analogy," he says. "I thought, 'It's commonplace that you can mix colors, smear them together to get new emerging colors. Likewise you can mix radio waves to get new frequencies.' So, I wondered, 'Why can't you mix sound to get new sounds?'"

Norris started on HSS in earnest in 1996. He puzzled out (and only later learned that 19th-century German physicist Hermann Helmholtz had gotten there before him) that when two tones are played simultaneously and loudly enough, they interact to create two new tones. One carries a frequency that is the sum of the two starting frequencies; the other is their difference. So if you blast inaudible ultrasonic frequencies of 100 kilohertz and 101 kilohertz, you get an inaudible 201 kilohertz overtone plus an undertone of 1 kilohertz that is well inside the range of hearing. And since ultrasound travels in a tight line akin to laser light, the emergent tones are audible only in a narrow, cylindrical path from source to ear.

It took seven years and \$45 million in venture capital and personal funds for Norris to solve the myriad distortion problems and figure out how to turn music or soda pop fizzing into ultrasound and back to music (or fizzing) again. Norris also figured out how to achieve his sound effect using only a dinner-plate-thick transducer instead of bulky speaker cones. HSS' transducer is a 28-micron-thick plastic film that flutters when exposed to an electric field (because it is "piezoelectric"). Alternate the charges fast enough and the minute fluttering of the film causes tiny dimples on its surface to push the air at ultrasound frequencies.

Norris and his engineers have tested and patented every method they could think of to make it work. So far American Technology has 17 HSS patents and 24 more pending. The promise of HSS has inspired investors to bid up ATC stock 100% to \$6 this year, giving the company a market cap of \$90 million. This, despite a first-quarter loss of \$1.4 million on \$314,000 in revenue, mostly from military contracts. Yet the stock could still be cheap. Norris, who owns a quarter of the company (and says he won't sell a share until the stock hits \$20), sees an annual sales rate of \$20 million in the

next 12 months. To do that ATC would need to deliver something like 40,000 units at \$500 each.

Norris and Chief Executive James Irish have drummed up hundreds of business leads by crisscrossing the country, shooting cacophonous jungle sounds and sweet symphonies to suits in the boardrooms or out windows into the startled ears of unsuspecting pedestrians. Sales efforts are aided by marketers such as Harbor Digital Services, which makes high-end signage and has introduced HSS to clients like McDonald's and IBM and is working on the supermarket deal with ABC. On seeing a handheld HSS emitter at work, marketers go into "immediate brainstorming mode," says Harbor's Jeffrey Dahlstrom. "The ABC guys carry it around everywhere they go."

Iport Media, which is incorporating HSS into displays for eyeglass stores, expects designers like Calvin Klein will gladly pay \$500 to \$1,000 to install motion-activated HSS for their racks, says Chief Executive Edward Weiner. The sales pitch would never cross the clerk's ears. "The idea is to get them to buy what you want by showing them the difference," says Weiner, who aims to place thousands of systems in two years.

Paul Drouin of IKS Media, who installs sound systems for McDonald's, has persuaded operators in Florida, Oklahoma and Texas to test HSS this summer. In time emitters built into soda fountains could help drive sales in the Golden Arches with a message like, "You know what goes great with Coke? McDonald's french fries."

HSS also is being integrated into consumer electronics, with Gateway exploring the idea of adding HSS to its plasma TVs to create surround-sound effects without the need for back-of-the-room speakers. DaimlerChrysler is considering putting it in cars so

that riders in the front and back seats can enjoy separate stereo systems. A buyer from Wal-Mart called Norris in July asking whether ATC could develop an HSS speaker to sit on top of a TV and direct sound to one viewer but not another. Norris expects it to hit shelves in a year for around \$200 a pop.

General Dynamics is installing HSS gear on Navy ships, including one over the captain's chair on the bridge of the U.S.S. *Winston S. Churchill*. The speaker cuts through the din to beam messages to the captain's ears only. Even cooler, but scarier, is HSS' amped-up cousin, the Long Range Acoustic Device. A ship seeking to warn off a suspicious dinghy can use the device to loudly hail the vessel from 500 yards away. If it gets closer, sailors can target it with 120 earsplitting decibels of siren sounds that cause spontaneous diarrhea, long-lasting migraines or nausea. Says Norris: "It's cleaner than the 50-caliber solution."

San Francisco Built a System to Track Homeless People

The system can coordinate help for the city's homeless, but requires a lot of personal data.

908

/ Future Society / Data / Homeless / Privacy

9

BIG BROTHER

San Francisco, unsurprisingly, has decided that the solution to the city's homelessness problem is to gather and analyze personal data.

Specifically, a program called ONE System is now gathering data about the approximately 7,500 homeless people in San Francisco so that the city can better coordinate its efforts to get people off the street. It's a program with noble aspirations, but some difficult-to-justify means — homeless participants will need to trade their private, personal data for the chance of receiving aid from the government, according to Bloomberg.

807

10

Since August, ONE System has helped around 70 homeless people get off the street, *Bloomberg* reports, and its creators hope it will halve the homeless population by 2022. To do so, the system, which Nevada-based tech startup BitFocus, Inc. developed for the city, collects data from 15 government agencies and also asks homeless participants to fill out a survey that asks about their daily routines, medical history, and other personal information that could be used to help them get appropriate help.

But the new system doesn't exactly erase the hurdles that homeless people already face — to get permanent housing in one of San Francisco's low-cost adult-supportive housing programs, homeless people must pass a background check that takes 45 days to complete and also often need to present a government-issued ID. On top of those systematic hurdles already facing homeless people, government employees will need to convince homeless people to participate in the program, even though some may have debilitating mental illnesses or be skeptical that the system's data won't make its way into the hands of the police.

808

UNSUBSCRIBE

So far, the data collected through ONE System has stayed out of law enforcement's hands and no one has tried to buy it, Chris Block, the director of coordinated entry for Episcopal Community Services of San Francisco, an organization contributing to the program, told *Bloomberg*. But there aren't any laws on the books that specifically protect the data the system collects or prevent it from being abused.

"There's a lot of privacy concerns," he said. "So far those issues haven't been significant, but that doesn't mean they won't come up in the future."

**San Diego County CoC Homeless Management Information System (HMIS)
Agency Participation Agreement**

Postings: Privacy and Mandatory Collection notices (Appendices D and E) must be posted at the Agency.

- A. The Agency must post Privacy and Mandatory Collection notices at each intake desk or comparable location.
- B. Privacy and Mandatory Collection notices must be made available in writing at the client's request.
- C. If the Agency maintains a website, a link to the privacy notice must be accessible from the Agency's website.

IV. Data Use

Data contained in the HMIS will only be used to support the delivery of homeless services in the San Diego region. Each User will affirm the principles of ethical data use and client confidentiality as noted and contained in the HMIS User Agreement.

- 1. The Agency will not solicit or input information from clients unless it is essential to provide services, or conduct program evaluation.
- 2. The Agency understands that all client data will be maintained on a central server, which will contain all client information in an encrypted state. All client identifiable data is inaccessible to unauthorized users.
- 3. The Agency shall use the system to enter and corroborate services but not for location services for past due billing.
- 4. The Agency shall not be denied access to client data entered by the Agency. Agencies are bound by all restrictions placed upon the data by the client of any Participating Agency. The Agency shall diligently record in the HMIS all restrictions requested.
- 5. The Agency shall not knowingly enter false or misleading data under any circumstances.
- 6. The Agency shall maintain appropriate documentation of client consent to participate in the HMIS.
- 7. If a client withdraws consent for release of information, the Agency remains responsible to ensure that the client's information is unavailable to all other Agencies.
- 8. The Agency shall keep signed copies of the Multiparty Authorization form for a period of seven (7) years.

V. Responsibilities

The Agency is responsible for ensuring that its staff does not intentionally or unintentionally misuse the HMIS. Such misuses include and are not limited to: damage of computing resources, obtaining unauthorized resources, taking resources from another user, gaining unauthorized access to resources, or otherwise using or computing resources without proper authorization.

- 1. The Agency will maintain an environment free of illegal or malicious acts and the Agency's users agree to never use the system to perform an illegal or malicious act. Any attempt to increase the level of access to which the User is authorized or any attempt to deprive other authorized Users of resources or access to HMIS shall be regarded as a violation of this Agreement that will be addressed as set forth in the HMIS Policies and Procedures.
- 2. Any User who finds a possible security lapse on the system is obligated to report it to the HMIS System Administrator immediately.
- 3. The HMIS software application was paid for with U.S. Department of Housing and Urban Development (HUD) grant funds. The maintenance, upgrades and license purchases are limited by the sanctions of the HUD grant.

VI. System Usage

Computer Equipment and Services are intended for HMIS-related activities. Acceptable computer system use includes data intake, reports, research of Client, Client development, and public service purposes. Prohibited Usage includes, but is not limited to, the following activities: the sending of fraudulent, threatening, harassing, or obscene messages and/or materials; inappropriate mass mailing (spamming, flooding, bombing); creation or intentional distribution of computer viruses, worms, or Trojan horses; unauthorized access to or denial of service; attempted attacks on any computer system.. Abusers are subject to sanctions as outlined in the HMIS Policies and Procedures.

VII. Rights

The HMIS Lead Agency reserves all rights, including access audit, termination of agreements, of the HMIS application and the service resources that it owns and/or operates on behalf of the Continuum of Care. These procedures shall not be construed as a waiver of any rights of the HMIS Lead Agency or the Participating Agency, nor shall they conflict with applicable acts of law.

VIII. Privileges

The HMIS services and or equipment are a privilege and are assigned and managed by the HMIS Lead or designee(s). The Agency is responsible for proper use of the system as outlined in Section VI.

1809

San Diego County CoC Homeless Management Information System (HMIS)
Agency Participation Agreement

IX. Confidentiality

Although technological and procedural securities have been reasonably exhausted by the HMIS Lead to ensure client data confidentiality, this HMIS is being used by a multitude of end users and is therefore subject to the diligence to which the Participating Agencies' staff protects client records.

The protections that the HMIS put in place to protect client confidentiality include compliance with HUD Data and Technical Standards Final Notice, institution of a mandated HMIS training program for all HMIS users, consistent application of Policies and Procedures, and signed Agency End-User Agreements.

X. Copyright

The HMIS is protected by copyright and is not to be copied, except as permitted by law or by contract with owner of the copyright. The number of copies and distribution of copies are to be managed by the HMIS Lead. Interference with measures used by copyright holders to protect copyrighted works is prohibited.

Agency users storing materials copyrighted by others on the systems or displaying the materials through web pages must comply with copyright laws and guidelines.

XI. Violations

An individual violating any of the guidelines outlined in this agreement will be reported immediately upon discovery. Such suspected violations will be confidentially reported to the HMIS Lead and or the designee of that agency in accordance with the HMIS Policies and Procedures.

Agreement

I have read this HMIS Agency Participation Agreement and thoroughly understand that this technology is for HMIS purposes only and is to be used in accordance with the HMIS Policies and Procedures.

This Agreement is executed between the Participating Agency listed below and the Regional Task Force on Homelessness (RTFH) acting as the San Diego County HMIS Lead Agency and upon execution the Participating Agency will be given access to the HMIS. The Executive Director or Authorized Designees for each Agency will sign this agreement.

Acceptable Uses Policy

LAST UPDATED: October 10, 2022

Legal Compliance

You must use the Services in compliance with, and only as permitted by, applicable law. The use of our Services in conjunction with other tools or resources in furtherance of any of the unacceptable uses described herein is also prohibited. In the event of any violation of this Acceptable Uses Policy, Momentive may, in its sole discretion, do one or more of the following:

- suspend (temporarily or permanently) or terminate your use of the Services;
- block your access to the Services;
- remove or delete content from your account(s); or
- communicate such violation to impacted third parties and/or law enforcement authorities (where appropriate and subject to applicable law).

Your Responsibilities

You are responsible for your Content, Customer Data, conduct, and communications with others while using the Services. You must comply with the following requirements when using the Services. If we become aware of Content or Customer Data that falls outside the bounds of what is acceptable under this policy, we may remove it and report it. We also take steps to prevent uses of our Services that are contrary to the spirit of this policy.

(a) You may not use the Services to commit an unlawful activity; use the Services for activities where use or failure of the Services could lead to physical damage, death, mental harm, or personal injury.

14

- (b) You may not provide any individual under the age of 16 (or under a higher age as provided in certain countries or territories) with access to the Services.
- (c) You may not purchase, use, or access the Services for the purpose of building a competitive product or service or for any other competitive purposes.
- (d) You may not misuse our Services by interfering with their normal operation or attempting to access them using a method other than through the interfaces and instructions that we provide.
- (e) You may not circumvent or attempt to circumvent any limitations that Momentive imposes on your use of our Services or your account(s) (such as by opening up a new account to create or distribute a survey, form, application, or questionnaire that we have closed for a violation of our terms or policies).
- (f) Unless authorized by Momentive in writing, you may not probe, scan, or test the vulnerability or security of the Services or any Momentive system or network.
- (g) Unless authorized by Momentive in writing, you may not use any automated system or software to extract or scrape data from the websites or other interfaces through which we make our Services available.
- (h) You may not deny others access to, or reverse engineer, the Services, or assist anyone else to do so, to the extent such restriction is permitted by law.
- ~~(i) You may not store or transmit any viruses, malware, or other types of malicious software, or links to such software, through the Services.~~
- ~~(j) You may not use the Services to infringe the intellectual property rights of others.~~
- ~~(k) Unless authorized by Momentive in writing, you may not resell or lease the Services.~~
- (l) If your use of the Services requires you to comply with industry-specific regulations applicable to such use, you will be solely responsible for such compliance, unless Momentive has agreed with you in writing otherwise. You may not use the Services in a way that would subject Momentive to those industry-specific regulations without obtaining Momentive's prior written agreement. For example, you may not use the Services to collect, protect, or otherwise handle "protected health information" (as defined in 45 C.F.R.

15
812

§160.103 under United States federal regulations) without entering into a separate business associate agreement with Momentive that permits you to do so.

(m) We may offer content like images or video that are provided by third parties. You may use that material solely in your Content or Customer Data. Momentive may modify or revoke that permission at any time in our sole discretion. In using such material, you may not imply that your Content, Customer Data, or use of the Services are affiliated with or run or endorsed by any company, product, brand or service depicted in that material unless you have obtained their permission.

(n) You may not engage in abusive or excessive usage of the Services, which is usage significantly in excess of average usage patterns of reasonable users similar to you, including any usage that adversely affects the speed, responsiveness, stability, availability, or functionality of the Services for other users. Momentive will endeavor to notify you of any abusive or excessive usage to provide you with an opportunity to reduce such usage to a level acceptable to Momentive which no longer causes such adverse effects.

(o) You must use a valid email address to register an account. You may not register accounts using a disposable or temporary email address, "bots," or other unauthorized automated methods.

(p) You may not host or transmit content that is or contains false, inaccurate, or intentionally deceptive information that is likely to cause harm to the public or adversely affect the public interest (including health, safety, election integrity, and civic participation).

(q) If Momentive determines, in its sole discretion, that your usage of the Services causes damage to our brand or reputation, or results in an excessive volume of complaints, Momentive, has the right to suspend or terminate your use of our websites and the Services.

Phishing and Security

We strive to protect the security of all our users. We take specific measures to ensure respondents are not misled by surveys/forms/applications/questionnaires used for fraudulent or malicious purposes. We will suspend any use of the Services or remove any Content or Customer Data which comes to our attention that:

- attempts to collect, as determined in our sole discretion, social security numbers or similar government-issued identification numbers, credit card numbers (other than solely for collecting payment through an authorized payment processor as permitted by the Services), passwords, or other similar types of sensitive information;
- publishes a person's identifying information without their consent;
- is intended to deceive or mislead respondents, including by linking to websites with malicious software such as malware;
- promotes or recruits for pyramid schemes, multi-level marketing campaigns, or work-from-home and other false earning scams;
- knowingly and artificially boosts or inflates a website or webpage's search engine ranking or reputation, including by offering or selling social media "likes", followers, reviews, comments, or similar services; or
- hosts content that is downloadable, live-streamed, or merely intended to solicit clicks to other sites.

Privacy and Impersonation

Users provide responses and information with the expectation that their information will be handled respectfully and not abused. Accordingly, you are responsible for complying with all applicable data protection laws and regulations with respect to any data that you submit to or collect through our Services.

- We encourage you to disclose your privacy practices when you use the Services and, if you do, we require you to act in accordance with those practices.
- You may not claim that a survey/form/application/questionnaire or other use of our Services is anonymous when it is not.
- You may not impersonate others when using the Services or collecting information.

Email and Text Message Requirements

Momentive has a zero-tolerance spam policy. This means the following:

- Emails or text messages you send via the Services must include a valid survey/form/application/questionnaire for the purpose of collecting responses

(excluding certain automated messages such as “thank you” emails, as applicable).

- Emails you send via the Services must have a valid reply-to email address owned or managed by you. You may not use a “no reply” address as the sender email address.
- Text messages you send via the Services should include your company name.
- You can only use the Services to send emails and text messages to people that have opted in to, or otherwise validly consented to, receiving communications from you, the sender through that medium. If you don’t have proof that each recipient opted in for your emails or text messages (as applicable), don’t import them into any lists in the Services. We prohibit the use of harvested mailing lists.
- We prohibit the use of third-party, purchased, or rented mailing lists unless you are able to provide proof that individuals on the list have opted-in to receiving emails of the type you will be sending them.
- You must not send unsolicited email to newsgroups, message boards, distribution lists, or email addresses.
- You must not utilize the Services to send any email or text messages in a way not permitted by or compliant with applicable law, carrier compliance requirements or industry standards, or to any recipient who has opted out, unsubscribed, or otherwise objected to receiving such messages from you or another party on whose behalf you may be commissioned.
- You must not use the Services to send emails with deceptive subject lines or false or misleading header information.
- Email messages sent in connection with our Services must contain an “unsubscribe” link that allows subscribers to remove themselves from your email messages. You acknowledge and agree that you will not hide, disable, or remove or attempt to hide, disable, or remove the opt-out link from the email invitation. You will actively manage and process unsubscribe requests received by you directly within ten days of submission and update your email lists and address books to reflect the unsubscribe requests.
- You are responsible for ensuring that the email messages or text messages you send in connection with your surveys/forms/applications/questionnaires or any use of our Services do not generate a number of spam complaints or bounce rates in excess of industry standards. If Momentive determines that your level of spam complaints or bounce rate is higher than industry standards,

Momentive, at its sole discretion, has the right to suspend or terminate your use of our Services and websites. If you receive low response rates, high abuse rates or high bounce rates, or we receive complaints associated with your use of our Services, we may request additional information regarding your mailing lists to investigate and attempt to resolve the problem, or in some cases we may suspend or remove your email privileges.

- Text message invitations you send via our Services must have a valid reply “Stop”.
- You may not use Momentive’s text messaging services to access or allow access to emergency services.

If we believe you are violating any of these prohibitions, we may suspend (temporarily or permanently) or terminate your account(s).

Violence and Hate Speech

We remove Content or Customer Data and may report information related to that Content or Customer Data to law enforcement authorities if we become aware of, or believe that, a genuine risk of harm or threat to public safety exists.

- Our Services may not be used to directly or indirectly threaten or attack others, or to organize or incite violence, harassment, terrorism, or property damage.
- Our Services may not be used for hate speech, or to promote or fund such acts. Examples of hate speech include attacking or advocating for the abuse or exclusion of people based on their ethnicity, national origin, political or religious affiliations, gender, age, sexual orientation, genetic predisposition, disability, medical or physical condition, veteran status, or any other protected classes under applicable law.
- Our Services may not be used to promote, incite, or glorify self-harm or acts of terrorism.

Bullying, Harassment, and Criminal Activity

You may not use our Services to bully or harass others, in furtherance of any criminal activity, or in violation of any applicable law.

Pornography and Offensive Graphic Material

We acknowledge nudity, pornography and gore may have a legitimate place in certain uses of our Services. However, we discourage the gratuitous inclusion of such materials.

- You may not include gratuitous graphic violent material or pornography in connection with the use of our Services.
- We recommend adding a conspicuous warning screen before displaying any material which may be offensive in nature.
- You may not under any circumstances share, transmit, upload, or store materials that constitute any of the following: unlawful pornography; material that shows a child engaging in or depicted as engaging in sexually explicit activity, for example, child sexually exploitative material (including material which may not be illegal child sexual abuse material but which nonetheless sexually exploits or promotes the sexual exploitation of minors); or materials that are otherwise indecent.

Intellectual Property Infringement

Please respect the intellectual property rights of others. You must have the appropriate rights to use any Content or Customer Data. It is your responsibility to determine what rights you need, to obtain and maintain those rights, and to understand how you are permitted to exercise those rights. You may include Content, including any third-party logos, brands and other indicia of source, (a) to the extent permitted as a fair use or otherwise under applicable law, and (b) so long as the use does not (i) cause confusion as to the origin or sponsorship of a good or service, (ii) imply sponsorship or endorsement by the trademark owner where none exists, or (iii) inaccurately describe a product or service. We recommend that you seek independent legal counsel if you have questions about your use of content or intellectual property owned by a third party.

How to Report Policy Violations

20
817

If you suspect that someone's use of our Services is in violation of this policy, please contact us immediately by filing an abuse report

(<https://smforms.wufoo.com/forms/r1vlkf520jsvo8o/>) and we will investigate the matter. Please include the URL of the survey/form/application/questionnaire or other content at issue.

Woody Norris

HyperSonic Sound

COMPUTING AND TELECOMMUNICATIONS

Elwood "Woody" Norris proves that there is no magic formula for becoming a successful inventor. Born in October 23, 1939 in Barre, Maryland, his mother and father had eighth-grade and third-grade educations, respectively, and Norris's formal training stopped with high school. Nonetheless, his aptitude for electronics and entrepreneurship and his enthusiasm for creating new technologies has taken him to the top of his game. He has garnered over 100 patents and has created a variety of successful inventions to his credit in fields as diverse as sound technology, transportation, and medicine.

Norris learned about electronics by tinkering with radios in his youth and discovered a natural ability to understand how circuitry worked. He joined the Air Force, where he received some training in radar and electronics while working on triggers for bombs. He took a job at a nearby television station as a cameraman to supplement his military income and thought that he might pursue acting after his military service was complete. As a high school student, he had enjoyed participating in school productions and possessed some talent as a performer.

Instead, when Norris left the Air Force as Airman Second Class, he took a job at the University of Washington fixing electronic equipment. Within two years, he was named director of the campus' Engineering Experiment Station. When a local company approached him, he took on the task of developing a sonar version of radar to listen to sounds inside the body. This "Doppler" tool emitted ultrasonic sound into the skin. Changes in the pitch of the sound waves that bounced back allowed physicians to

"hear" movement inside the patient. The tool, licensed to Medical Development Corporation (which was later acquired by American Hospitals), was helpful to the development of the Sonogram, and, as Norris received company stock for the device, it also helped him make enough money to set up his own company.

Norris later sold a phonographic tone arm he had been working on and evolved a specialization in audio-related devices. His subsequent inventions included headsets for mobile phones, a hearing-aid-sized FM radio, and automobile audio systems. He also created a child locator device for tracking kidnapped children, an alarm worn by a person to alert him that his artificial hip is starting to separate, and a design for a vehicle dubbed the AirScooter®, an easy-to-fly, lightweight, inexpensive aircraft that has the ability to hover in one spot while a pilot gets his bearings. Norris has worked with NASA engineers to develop a prototype of the AirScooter, which he dreams will one day be viable as a commuter vehicle.

Norris is perhaps best-known for his work on what is known as Hypersonic Sound technology (HSS). HSS, or directional sound, targets a listener with sound waves similar to the way a laser beam directs light, so that the individual who is targeted is the only one who can hear it! As a result, different people in one room could feasibly listen to different music, watch totally different television shows or movies, or hear different advertising messages without the use of headphones.

In conjunction with American Technology Corp. (now Genasys Inc.), Norris worked on HSS and other audio technologies, including a compact sub-woofer and "sonic bullets," which emit intense beams of sound at targeted individuals who pose a threat to others, giving them painful migraines.

Norris has been honored with numerous awards for his work including Product of the Year awards from *Popular Science* and *Business Week*, and the 1997 Award for Technological Innovation in the sound category from *Discover Magazine*. He won the prestigious \$500,000 Lemelson-MIT Prize in 2005 for his HSS technology.

Norris founded and served as Director and President of Parametric Sound Corporation, now known as Turtle Beach Corporation, and also served as Chief Scientist at Turtle Beach. He also founded LRAD Corporation and was the Chairman of LRAD Corporation's Board of Directors until 2010.

Most recently, Norris has been working on the BolaWrap, a handheld, non-lethal restraining device, currently being used by hundreds of law enforcement agencies. The small device works like a lasso, designed to detain people without causing severe injury. Norris expects to offer a range of new product solutions to "help meet the challenges of modern policing."

Norris currently serves as Chief Technology Officer for Wrap Technologies Inc.

WIKIPEDIA

Hermann von Helmholtz

Hermann Ludwig Ferdinand von Helmholtz^[a] (31 August 1821 – 8 September 1894) was a German physicist and physician who made significant contributions in several scientific fields, particularly hydrodynamic stability.^[5] The Helmholtz Association, the largest German association of research institutions, is named in his honor.^[6]

In the fields of physiology and psychology, Helmholtz is known for his mathematics concerning the eye, theories of vision, ideas on the visual perception of space, color vision research, the sensation of tone, perceptions of sound, and empiricism in the physiology of perception. In physics, he is known for his theories on the conservation of energy, work in electrodynamics, chemical thermodynamics, and on a mechanical foundation of thermodynamics. As a philosopher, he is known for his philosophy of science, ideas on the relation between the laws of perception and the laws of nature, the science of aesthetics, and ideas on the civilizing power of science.

History

Genasys was founded in Utah by Elwood "Woody" Norris as the American Technology Corporation in 1980.^[3] From 1988 to early 1992 the company was inactive. Norris recapitalized the company as a Delaware Corporation in 1992.^[4] In 1996, the company launched its first directed sound technology and began engineering sound solutions for the commercial, government, and military markets. In response to the October 2000 attack on the *USS Cole*, the company's engineering team developed their long-range acoustic device (LRAD) product line. With the introduction of LRAD systems in 2003, the company created the acoustic hailing device (AHD) market, followed by the introduction of multidirectional mass notifications systems in 2012. The

Scientists Can Now Use WiFi to See Through People's Walls

Tim Newcomb

Thu, January 19, 2023 at 1:11 PM PST

WiFi Signals Can See People Through WallsCarnegie Mellon University

- Researchers at Carnegie Mellon University can map human bodies through walls using WiFi signals.
- The technology tracks key points on the body for detection, extending previous research into using WiFi signals to locate humans.
- The study's authors position the breakthrough as helpful to privacy, even if it opens the possibilities for much easier, cheaper human tracking.

It isn't immediately clear how using only a WiFi signal to track human movement through walls *improves* personal privacy ... but that's what a new study from Carnegie Mellon University claims.

In a recently published paper, the researchers expanded on the study of employing WiFi signals to

M

"We developed a deep neural network that maps the phase and amplitude of WiFi signals to UV coordinates within 24 human regions. The results of the study reveal that our model can estimate the dense pose of multiple subjects, with comparable performance to image-based approaches, by utilizing WiFi signals as the only input."

This pathway opens the options for low-cost, broadly accessible human tracking through walls.

High-cost technology has successfully mapped people's movements through walls for years. And researchers at the Massachusetts Institute of Technology have spent over a decade working on ways to more easily see people through walls, whether using cell phone signals or WiFi. In the Carnegie Mellon study, scientists had WiFi signals send and receive a body's coordinates and then used DensePose to map the body.

From the study:

"Advances in computer vision and machine learning techniques have led to significant development in 2D and 3D human pose estimation from RGB cameras, LiDAR, and radars. However, human pose estimation from images is adversely affected by occlusion and lighting, which are common in many scenarios of interest."

By reducing the need for the advanced—and expensive—technology, the Carnegie Mellon researchers say they can make human tracking more available. Somehow, they've also positioned the breakthrough as a privacy-positive situation. You

Privacy Statement

As a Human Services data company, we take privacy particularly seriously at Bitfocus.

This privacy policy explains what personal information we collect from you, how we use, and for what reasons we may share it. This statement applies only to our public website and other Bitfocus services displaying it. Other services may include specific statements that provide additional limits and safeguards applicable to those particular Bitfocus services and customers.

What We Collect

We collect information to provide you with the best experience with our services. Depending on which services you use, we collect different kinds of personal information. We also may receive information from third parties.

Information you Provide

Primarily, we collect information you send us. For example, when you register for an event, sign up for our mailing list, or submit a question on our website we collect the information you submit in order to process those requests. We also collect messages you send us. Conversations with our representatives—including phone calls, emails and chat sessions—may be monitored and recorded.

We also collect information about how you use and interact with our services. This includes information about the device you used, your connection, and details of how you used our services.

Information from Third-Parties

We may also receive a limited amount of information about you from third parties. For example, we may use demographic or location information provided by third parties to better understand how our services are being used.

How We Use It

We use the information we collect for two general purposes: (1) to maintain, protect, and improve our services; and (2) to provide you with tailored content and communications.

We use collected information to better understand how our services are being used, to support and protect them, and to continue to improve and refine them.

Collected information is also used to improve our communications with you. For example, we record your past conversations with representatives to improve our ability to respond efficiently. We may also contact you with information about our services, including changes and improvements. We respect your choices about what communications you like to receive.

841 32

When We Share It

SCHEDULE A DEMO

We only share your personal data with your consent or as necessary to provide any service you have requested or authorized, with a limited number of trusted business partners to process it on our behalf and in compliance with this privacy statement.

With Consent

We may share personal information with outside parties when we have your consent to do so.

Legal Reasons

We also may share information to third parties for legal reasons. We will share information when required by law or legal process, or as necessary to protect the safety, rights, or property of Bitfocus and our users.

Cookies

We use cookies, web beacons, and similar technology to improve your experience and report visitor interactions. Cookies are small text files placed on your device that allow us to identify you when you visit our website and online services. Most browsers include a variety of tools to manage cookies, including alerting you when cookies are sent or blocking them entirely. However, these and other choices may impact your experience with our services.

California Privacy Notice

Do Not Track (DNT) is an effort to develop a way for internet users to control the tracking of their online activities. Although the World Wide Web Consortium (W3C) is working to develop a DNT technology standard, none has been adopted. Bitfocus, therefore, does not use DNT signals.

Bitfocus does not authorize the collection of Personal Identifiable Information (PII) from our users for third party use through advertising technologies without separate user consent.

How to Contact Us with Questions

Contact us at support@bitfocus.com with any questions, concerns or comments about this statement or our privacy program at Bitfocus. Click [here](#) to submit a whistleblower claim.

(6) Whether use or maintenance of the technology will require data gathered by the technology to be handled or stored by a third-party vendor on an ongoing basis; and

(7) A summary of the experience, if any, other governmental entities have had with the proposed technology, including information about its effectiveness and any known adverse information about the technology such as unanticipated costs, failures, or civil rights and civil liberties abuses.

"Personal communication device" means a cellular telephone that has not been modified beyond stock manufacturer capabilities, a personal digital assistant, a wireless capable tablet or similar wireless two-way communications and/or portable Internet accessing devices, whether procured or subsidized by a City entity or personally owned, that is used in the regular course of conducting City business.

"Protected Class" means a class of persons with shared characteristics based on sex, race, color, religion, ancestry, national origin, disability, medical condition, genetic information, marital status, gender identity, gender expression, or sexual orientation, or any other class protected under the California Unruh Civil Rights Act.

"Surveillance Technology" means any software, electronic device, system utilizing an electronic device, or similar device used, designed, or primarily intended to collect, retain, process, or share audio, electronic, visual, location, thermal, biometric, olfactory or similar information specifically associated with, or capable of being associated with, any individual or group. Surveillance Technology¹ includes but is not limited to the following: international mobile subscriber identity (IMSI) catchers and other cell site simulators; automatic license plate readers; electric toll readers; closed-circuit television cameras; gunshot detection hardware and services; video and audio monitoring and/or recording technology, such as surveillance cameras, wide-angle cameras, and wearable body cameras; mobile DNA capture technology; biometric software or technology, including facial, voice, iris, and gait-recognition software and databases; software designed to monitor social media services; x-ray vans; software designed to forecast criminal activity or criminality; radio-frequency I.D. (RFID) scanners; and tools, including software and hardware, used to gain unauthorized access to a computer, computer service, or computer network. Surveillance Technology does not include the following devices, hardware, or software:

(1) Office hardware, such as televisions, computers, credit card machines, copy machines, telephones, and printers, that are in common use by City Departments and used for routine City business and transactions;

(2) City databases and enterprise systems that contain information kept in the ordinary course of City business, including, but not limited to, human resource, permit, license, and business records;

(3) City databases and enterprise systems that do not contain any data or other information collected, captured, recorded, retained, processed, intercepted, or analyzed by Surveillance Technology, including payroll, accounting, or other fiscal databases;

(4) Information technology security systems, including firewalls and other cybersecurity systems intended to secure City data;

(5) Physical access control systems, employee identification management systems, and other physical control systems;

(6) Infrastructure and mechanical control systems, including those that control or manage street lights, traffic lights, electrical, natural gas, or water or sewer functions;

(7) Manually-operated technological devices used primarily for internal City communications, which are not designed to surreptitiously collect surveillance data, such as radios, personal communication devices, and email systems;

(8) Manually-operated and non-wearable handheld cameras, audio recorders, and video recorders, that are not designed to be used surreptitiously and whose functionality is limited to manually capturing and manually downloading video and/or audio recordings;

(9) Surveillance devices that cannot record or transmit audio or video or be remotely accessed, such as image stabilizing binoculars or night vision equipment;

(10) Medical equipment and systems used to record, diagnose, treat, or prevent disease or injury, and used and/or kept in the ordinary course of providing City services;

(11) Parking Ticket Devices;

(12) Police Department interview rooms, holding cells, and internal security audio/video recording systems;

(13) Police department computer aided dispatch (CAD), records/case management, Live Scan, booking, Department of Motor Vehicles, California Law Enforcement Telecommunications Systems (CLETS), 9-1-1 and related dispatch and operation or emergency services systems;

(14) Police department early warning systems; and

(15) Computers, software, hardware, or devices intended to be used solely to monitor the safety and security of City facilities and City vehicles, not generally accessible to the public.

"Surveillance Technology Policy" means a written policy that includes:

(1) A description of the product and services addressed by the Surveillance Technology, including the identity of any provider(s) whose services are essential to the functioning or effectiveness of the Surveillance Technology equipment or services for the intended purpose;

(2) A description of the purpose(s) for which the Surveillance Technology equipment or services are proposed for acquisition, including the type of data that may be collected by the Surveillance Technology equipment or services;

(3) The uses that are authorized, the rules and processes required prior to such use, and uses of the Surveillance Technology that will be expressly prohibited;

(4) A description of the formats in which information collected by the Surveillance Technology is stored, copied, and/or accessed;

(5) The specific categories and titles of individuals who are authorized by the Department to access or use the collected information, including restrictions on how and under what circumstances data collected with Surveillance Technology can be analyzed and reviewed, and the rules and processes required prior to access or use of the information;

(6) The general safeguards that protect information from unauthorized access, including encryption and access control mechanisms;

(7) The limited time period, if any, that information collected by the Surveillance Technology will be routinely retained, the reason such retention period is appropriate to further the purpose(s) enumerated in the Surveillance Technology Policy, the process by which the information is regularly deleted after that period lapses, and the specific conditions that must be met to retain information beyond that period;

(8) How collected information can be accessed or used by members of the public, including criminal defendants;

(9) Which governmental agencies, departments, bureaus, divisions, or units that may receive data collected by the Surveillance Technology operated by the Department, including any required justification or legal standard necessary to share that data and how it will ensure that any entity receiving such data complies with the Surveillance Technology Policy;

(10) The training required for any individual authorized to use the Surveillance Technology or to access information collected by the Surveillance Technology;

(11) The mechanisms to ensure that the Surveillance Technology Policy is followed, including internal personnel assigned to ensure compliance with the policy, internal recordkeeping of the use of the technology or access to information collected by the technology, technical measures to monitor for misuse, any independent person or entity with oversight authority, and the sanctions for violations of the policy; and

(12) What procedures will be put in place by which members of the public can register complaints or concerns, or submit questions about the deployment or use of a specific Surveillance Technology, and how the Department will ensure each question and complaint is responded to in a timely manner.

(Added by Ord. 101-19, File No. 190110, App. 5/31/2019, BJT, 7/1/2019; Ord. 107-19, File No. 190568, App. 6/14/2019, EFF, 7/15/2019)

1. PROJECT SUMMARY

1.1 Background

Our vision is that homelessness in San Diego would be rare, brief and non-recurring. In order to accomplish our vision, we must know the scope of the problem, know the characteristics of those who find themselves homeless, and understand which homeless resolution strategies are effective and which are not. Reliable data enables our community to work confidently towards our goals as we measure outputs, outcomes, and impacts.

A Homeless Management Information System (HMIS) is the information system designated by a local Continuum of Care (CoC) to comply with the requirements of CoC Program interim rule 24 CFR 578. It is a locally-administered data system used to record and analyze client, service and housing data for individuals and families who are homeless or at risk of homelessness. HMIS is a valuable resource because of its capacity to integrate and un-duplicate data across projects in a community. Aggregate HMIS data can be used to understand the size, characteristics, and needs of the homeless population at multiple levels: project, system, local, state, and national. The Longitudinal Systems Analysis (LSA) report, produced from a CoC's HMIS and submitted annually to HUD, provides HUD and Continuums of Care (CoCs) with critical information about how people experiencing homelessness use their system of care. This report could not be written if communities were not able to provide HUD with reliable, aggregate data on the clients they serve.

In 2010 the U.S. Interagency Council on Homelessness (USICH) affirmed HMIS as the official method of measuring outcomes in its Opening Doors: Federal Strategic Plan to Prevent and End Homelessness. Since then many of the federal agencies that provide McKinney-Vento Act and other sources of funding for services to specific homeless populations have joined together and are working with HUD to coordinate the effort.

HMIS is now used by the federal partners and their respective programs in the effort to end Homelessness, which include:

- U.S. Department of Health and Human Services (HHS)
- U.S. Department of Housing and Urban Development (HUD)
- U.S. Department of Veterans Affairs

The HMIS Data Standards provide communities with baseline data collection requirements developed by each of these federal partners. The HMIS Data Standards Manual is designed for CoC's, HMIS Lead Agencies, HMIS System Administrators, and HMIS Users to help them understand the data elements that are required in an HMIS to meet participation and reporting requirements established by HUD and the federal partners.

HUD is responsible for coordinating the collection of data, overseeing HMIS rules and regulations, and reporting to Congress through the AHAR, and will continue to manage the HMIS regulations, provide support and guidance to local CoC's and HMIS Lead Agencies, and provide guidance to users in collaboration with the federal partner agencies. The 2014 release of the Data Dictionary and Manual is the first joint publication of HUD and the federal partners and is intended to provide guidance to communities around federal expectations for HMIS. The HMIS Data Standards Manual was updated most recently in June 2020.

4. Prepare to Go Live

4.1: Policies & Procedures

4.2: Create Communication Plan

4.3: Configure Outreach

4.4: Training

may bring.

Form an Outreach Stakeholder Committee

When implementing Clarity Outreach, it is important to establish a strong Stakeholder Committee to help prepare the community and manage the rollout. Bitfocus recommends forming a Stakeholder Committee that includes a mix of stakeholders and community leadership. It is important to consider the anticipated level of involvement, interest, and influence within the project. Assess the landscape to identify stakeholders who are aligned with the project and reviewing any potential conflict or varying degrees of cooperation each stakeholder may bring.

Consider the following stakeholders for your community's Stakeholder Committee:

STAKEHOLDER	VALUE PROVIDED
CoC Representatives	Ensure outreach services are well integrated into the homelessness response system and are aligned with the community's coordinated efforts.
HMIS System Administrators	Understand HMIS software and Clarity Outreach module and can provide insight into potential workflows and data collection
Individuals with Lived Experience	Provide critical insight into the experience of being homeless, receiving services, living in encampments, and more
Outreach Providers	Experience providing outreach services, and understanding of day-to-day workflows and challenges
Funders	Knowledge of funding opportunities, limitations, and restrictions

- Emergency Services
 - Public Works
 - Park and Recreation
- homelessness. They could already have outreach and engagement processes in place that can provide insight into services, and coordinate with new efforts

[Back to Top](#)

STEP 2

1.2 Define Roles & Responsibilities

Once you have created your implementation committee, the next step is to define clear roles and responsibilities. Before the project begins, identify the staffing and support your community will need for rollout. These individuals will support the remaining steps in the rollout process.

Consider who will fulfill the following project needs:

ROLE	RESPONSIBILITY
Project Management	Coordinates all parts of project rollout, and communicates with the project team to ensure that timelines and responsibilities are clear and that all milestones are met
System Configuration	Configures Clarity Human Services to meet the needs of the outreach project
Communication	Plans and completes communication to service providers and the community at large to apprise them of timelines, processes and process changes, milestones, and other key information
Training Content Development	Develops content used to train service providers and other impacted staff which may include slide decks, job aids, workflow diagrams, and other materials
Training Facilitation	Conducts training for service providers and other impacted staff

DATA COLLECTION AND INTEGRATION IN HMIS

One of the primary challenges providers identified was with collecting client data through multiple data systems. In particular, nearly all providers interviewed discussed a need for further integration with the County's HMIS, Clarity, to reduce duplicative data entry and the burden it places on agency staff, as well as the resulting impact on data quality. Broader integration of data across systems, including County health, mental health, criminal justice, and other departments, was also needed to improve coordination across systems and provide a holistic view of the experience and outcomes of people experiencing homelessness across the county.

SANTA CLARA COUNTY'S CLARITY SYSTEM

The County's Clarity system, developed and administered by Bitfocus, is the primary means of gathering information on programs that serve people experiencing homelessness across the community (see text box for additional information on HMIS). Overall, providers were satisfied with the Clarity system and agreed it improved significantly upon the previous HMIS. Among other benefits, providers appreciated the ability to generate standard reports to analyze client outcomes and to satisfy funder reporting requirements. Providers also appreciated the support available from Bitfocus staff and reported that the recent "Data Literacy Institutes" provided by Bitfocus, which take a deeper dive into reporting functionalities for both agency staff and managers, were helpful to gain skills for maximizing the functionality of the system.

However, nearly all providers also reported some frustration with certain functionalities of the Clarity system, and acknowledged that most staff were not able to take full advantage of all of the system's capabilities due to a lack of technical expertise. Some providers were not aware of all functionalities or customization options that are currently available. In addition to reporting gaps discussed in the next section, providers cited specific areas for improvement, including:

- Additional case management functionalities.
- Capturing additional information, such as tracking historical changes in client income.
- Building out the location tab to allow for descriptions of other locations where clients may be found (e.g. where they pick up medication or where they access certain services).
- More accurate GPS location tabbing functionality, as currently it is not effectively pinning a location.
- Capability to track and manage landlord relationships or potential roommates for shared housing.
- Texting capabilities to contact clients in their preferred mode of communication.
- Streamlined reporting functionality (see *Reporting & Analytics* below for more detail).
- More prominent notifications when a client has been referred to housing.

Each Participating Agency is required to have a Progressive Discipline Policy.

5. PRIVACY AND SECURITY

5.1 Privacy and Security

Privacy and Security Policy

The HMIS Privacy and Security Policies and Procedures apply to any person accessing HMIS data, however, Participating Agencies subject to more restrictive regulations will be honored. In order to incorporate any Participating Agency's more restrictive regulations, additional implementation elements may be utilized to provide a cohesive framework for policies and procedures.

Procedure

All HMIS Lead Agency assets (e.g., workstations, laptops, and other systems or devices that process and/or store HMIS information) must be protected by commercial anti-virus and internet security software solutions.

- HMIS Lead Agency devices used to access HMIS shall utilize a firewall between the workstation and any external system including the internet;
- Security solutions must be updated when new versions or releases become available;
- Security software and operating system patches shall be applied within a reasonable time when they become available; and
- Any HMIS information stored on media shall be encrypted.

Participating Agency End-users are advised that these policies do not allow any use that is unlawful or other applicable rules and regulations, or is specifically prohibited by this policy or another applicable agency policy.

Under no circumstances will end-users store Personally Identifiable Information (PII) on any personally owned media; end-users may not place PII on a work-owned USB drive for personal use.

PII and removable data devices (e.g., USB drives, CDs, and external drives) must be protected by appropriate physical means from modification, theft, or unauthorized access. Such records and confidential information contained therein remain subject to the HMIS Policies and Procedures. When these media have reached the end of their useful life, the data will be disposed of in a manner consistent with the procedures outlined in this policy.

Risk Analysis Management - HMIS Lead Agency Risk Analysis

The HMIS Security Officer, in conjunction with executive management, and the HMIS Lead Agency Privacy Officer, will perform a modified Security Risk Analysis (RA) in accordance with the National Institute of Standards and Technology (NIST). The minimum content of the RA shall consist of:

- List of assets (i.e. hardware, software, data, physical sites);
- Threats to each of the listed assets (ex.: hacking, malware, misuse of data, burglary);

- Likelihood threats and impact of threat exploitation; and
- Heat map of likelihood versus impact.

Any decisions on selection of security measures to reduce risk must be documented and based on the RA.

Lack of funds to support security measures may be a mitigating factor for the current fiscal term, however lack of funds should be addressed in a Short-Term Security Mitigation Plan that is three (3) to five (5) years in implementation length and addresses funding.

HMIS Vendor

The CoC is responsible for the process and selection of the region's HMIS Vendor.

The HMIS Lead Agency is responsible for ensuring HMIS is operated in accordance with HMIS standards via the HMIS Vendor Contract.

The HMIS Lead Agency will include provisions in the HMIS Vendor contract requiring the physical security of the facilities and media storing the data is protected.

- The HMIS Vendor is required to take steps, consistent with the most current HMIS technical and security standards, to prevent unauthorized access to the data and the software (See Section 5.2 "Access Controls");
- The HMIS Lead Agency, through the HMIS Vendor contract, will take measures to ensure the system is protected from intrusion and risks to data loss is minimized;
- The HMIS Vendor will maintain software consistent with the most up-to-date HMIS technical and security standards:
 - The HMIS Vendor must retain a log of system changes and/or software version changes;
 - Security gaps or issues, identified by the HMIS Vendor or HMIS Lead Agency, shall be resolved in an expedient manner; and
 - The HMIS Lead Agency is responsible for ensuring all vendor-released enhancements, upgrades and bug fixes are applied promptly.

Participating Agencies shall be notified of changes by HMIS Lead Agency where appropriate.

Data Backup

HMIS Vendor shall store and maintain backup versions of the data in a separate physical location consistent with the most up-to-date HMIS technical and security standards. Examples include:

- HMIS Vendor servers on which the HMIS data is stored shall utilize firewalls;
- HMIS Vendor will also perform daily, weekly and monthly data backups;
 - Backups will be held offsite at a secondary (hot) data center;
- Intra-day and day-end backups will be held on a local server as well as offsite at the secondary data center.

Entities providing funding to Participating Agencies, or projects required to use HMIS, will not have automatic access to the HMIS.

- Access to HMIS will only be granted according to the Access Controls;
- Funders requesting access to HMIS data, or summary reports, must submit through their contracted Participating Agency;

Any requests for reports or information from an individual or group who have not been explicitly granted access to the HMIS will be directed to the HMIS Lead Agency.

- No individual client data will be provided to meet these requests without Evaluations Committee review of the data request.

Verbal Consent for Services

In an effort to more efficiently serve the client, the HMIS Lead Agency may authorize the use of a verbal process for assessment and documentation by 2-1-1 San Diego. The verbal process does not replace in person enrollment.

- The verbal process to collect information shall replace a written signature on the Multiparty Authorization (MPA) with a telephonic signature which will allow for authorized access to the client's data, and shall collect relevant identifiers to ensure unique identification of the individual and record of the Authorization;
- Authorized Participating Agencies shall certify in the HMIS they have talked to the individual, and to the best of their ability, collected the required unique identifiers and have indicated such by including a telephone reference number on the electronic file in the HMIS;
- "Data Not Collected" for identifier fields shall require physical corroboration prior to delivery of services;
- Verbal Consent process shall be monitored on an ongoing basis and should be used sparingly when a written signature is not possible;
- The HMIS Lead Agency must provide written authorization to Participating Agencies wishing to use the verbal consent process.

Research Projects

Request for research projects must be approved by the HMIS Lead Agency. Should the HMIS Lead Agency determine that additional review is required, the request will be forwarded to the Evaluations Committee for a final determination.

Research that is approved by the Institutional Review Board (IRB) must meet the Office for Human Research Protections (OHRP) requirements for use of individual client data. Waiver of Informed Consent by an IRB does not constitute a waiver of individual privacy rights under other federal or state laws.

Requirement of an IRB for research is exempt at 45 CFR 46.101 where:

- Unless otherwise required by the research entity or Participating Agency heads, research activities in which the only involvement of human subjects will be in one or more of the following categories are exempt from this policy:
 - Research and demonstration projects which are conducted by or subject to the approval of the research entity or Participating Agency, and which are designed to study, evaluate, or otherwise examine:
- Public benefit or service programs;
- Procedures for obtaining benefits or services under those programs;
- Possible changes in or alternatives to those programs or procedures; or
- Possible changes in methods or levels of payment for benefits or services under those programs.

Access to client-level data for uses or disclosures not described here must be done only utilizing the Multiparty Authorization.

HMIS Reporting and Publication

The HMIS Lead Agency may utilize data in the HMIS for federal reporting, local evaluation, analysis, and publication.

To foster full transparency, identifiable project-level data pertaining to CoC and/or federally, state, or locally funded program performance may be published by the HMIS Lead Agency upon request by the Governance Board, Full Membership, and/or its subcommittees. Identifiable client-level data may only be released within the HMIS with client Authorization solely for coordination of housing and services. Clients may authorize the HMIS to release their information outside of the HMIS (ex.: Community Information Exchange (CIE)).

Participating Agency Procedure Notification

At minimum, the HMIS Lead Agency requires Participating Agencies to post signs (Appendix F) where data collection occurs. The sign will include the following language:

"We collect personal information directly from you for reasons that are discussed in our privacy statement. We may be required to collect some personal information as mandated by law or as requested from entities that fund this program. Other personal information we collect is necessary to operate programs, improve services, and better understand homelessness. We collect appropriate information only. A Privacy Notice is available upon request."

Participating Agencies must notify individuals seeking their assistance of data collection, use, and that disclosure will occur for the purposes of:

- Coordination of individual referrals, case management, housing, or other services; and
- Sharing with other organizations that may have separate privacy policies and that may allow different uses and disclosures of the information.

Data Standard Compliance

Participating Agencies and the HMIS Lead Agency are jointly responsible for ensuring project data in the HMIS meets the thresholds outlined in this policy:

Surveillance Technology Inventory

This inventory shows all currently identified surveillance technologies. For each technology, City departments are required to create a Surveillance Impact Report, a Surveillance Technology Policy, and Annual Reports.

A "Surveillance Technology" is defined as:

- A software, electronic device, system using an electronic device, or similar device
- used, designed, or primarily intended to
- collect, retain, process, or share
- audio, electronic, visual, location, thermal, biometric, olfactory or similar information
- specifically associated with, or capable or being associated with, any individual or group

The Surveillance Ordinance includes 15 separate exemptions for technologies not required to be inventoried. For [more details, refer to the ordinance directly.](#)

Our current inventory of surveillance technologies by department will continue to grow as additional technologies are identified.

RE: EXPLANATION OF INTRO ALL PAGES 1-12

Pg 1-2: DOJ critiquing proposed Gang Injunction in 2006 that would have utilized surveillance type of equipment. A few people and agencies did without the injunction and placed people on surveillance without court order or paperwork, then simply state that the paperwork doesn't exist because there was no warrant. If person continues to make waves, they attempt at all costs to claim the suspect, claimant or plaintiff as having mental health issues.

With this, you can 'isolate or quarantine' a person from his friends and family. Public Health uses this same surveillance for epidemics, sheriff and police to place people on gang surveillance (that the law didn't catch, so to teach them a lesson) and the mayor or others, place political dissidents on that pose a political threat. DEM (Department of Emergency Management) is the agency that collects and saves all the information, but they too, can utilize in an illegal manner. This type of surveillance is simply called Cyberstalking which will clearly show the city and county of San Francisco has the devices, the technology and equipment to store such behavior. A check and balance allows the state of California to have a copy of these files, as does the DOJ, Department of Commerce, Labor, Intelligence Community, Health and Human Services, amongst other county, state and federal partners due to protections and potential violations of the Constitution.

Pg 3: 14th Amendment Equal Protection and Other Rights state cannot deprive any person of life, liberty or property without due process of law....

Pg 4: 14th Amendment S1.5.2 right to be free from official stigmatization ref: 1971 Wisconsin v. Constantineau

Pg 5: 14 Amendment s1.5.3 Property Deprivations and Due Process – No state shall make or ENFORCE any law which shall abridge the privileges or immunities of citizens of the United States

Pg 6: Cyberstalking to include equipment, technology and prohibitions to include all electronic forms of communications

Pg 7: Penalties for Cyberstalking include imprisonment for 2, 3, or 4 years and/or a fine of up to \$10,000 – one of the main reasons every would deny at all costs to prevent release of files

Pg 8: Document on SFgov website listing a portion of agencies and departments that utilize an app and application called One System. Please notate the numbers of listed agencies to include the Department of Public Health, UCSF, Swords to Plowshares, Veterans Affairs – THIS IS A PARTIAL LIST AND I WILL AT A FUTURE DATE PROVIDE A COMPLETE LIST OF ALL SAN FRANCISCO AGENCIES UNDER THE CITY AND COUNTY OF SAN FRANCISCO

Pg. 9: Document on SFgov website that list applicable codes of professional conduct that would call under

- 1) SFPD
- 2) SHERIFF
- 3) PUBLIC HEALTH
- 4) DEM
- 5) Ultimately the Mayor's Office as she uses behavioral surveillance staff, and authorized \$53 million to fund Urban Alchemy, which every individual is placed on electronic surveillance, which is monitored by the Sheriff, SFPD and Mayor's Office through their devices, emails and phone numbers. So if I walk by one of these individuals, any one of the aforementioned agencies can bounce the surveillance and leave it on me for as long as they want.

San Francisco's Proposed Gang Injunction: What Will it Mean, What Are the Problems, and How Will it Work?

NCJ Number: 218338

Date Published: November 2006

Length: 4 pages

Annotation

After reviewing a proposed preliminary injunction being sought by San Francisco's City Attorney against individuals it believes are members or associates of an alleged street gang called Oakdale Mob, this paper identifies problems with such an injunction and considers the likelihood of its effectiveness.

Abstract

An injunction is a court order that prohibits a named person or persons from continuing a particular activity named in the injunction. The proposed injunction against the Oakdale Mob aims to stop a public nuisance alleged to be illegal drug sales and possession, possession of illegal firearms, and assault with a firearm. The injunction would impose 11 specific restrictions on the activities of certain individuals identified by the city as gang members or associates. These restrictions would include a 10 pm curfew, a prohibition against associating with any other gang member or associate in public, and other activities already prohibited by law. Gang injunctions present many problems due to the severe limitations they impose on individual rights. One of the most commonly debated issues is injunctions' casting

of a broad net that may mistakenly restrict the movements and associations of innocent people who have not engaged in behavior that violates a law. The short-term effects of gang injunctions generally show decreased crime rates in neighborhoods affected; however, over a long period of time (more than 1 year), the effects are marginal or minimal. Injunctions are more likely to have a positive long-term effect if accompanied by the development of constructive community programs for youth who may be attracted to or associated with gangs.

Fourteenth Amendment Equal Protection and Other Rights

Amdt14.1 Overview of Fourteenth Amendment, Equal Protection and Rights of Citizens

Amdt14.2 State Action Doctrine

Section 1 Rights

All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

E INTRO - All pg 3

In some cases, the Court also appeared to expand the notion of liberty to include the right to be free from official stigmatization, finding that the threat of such stigmatization could in and of itself require due process.¹² Thus, in the 1971 case *Wisconsin v. Constantineau*, the Court invalidated a statutory scheme in which persons could be labeled "excessive drinkers" without any opportunity for a hearing and rebuttal, and could then be barred from places where alcohol was served.¹³ Without discussing the source of the entitlement, the Court noted that the governmental action at issue impugned the individual's "reputation, honor, or integrity."¹⁴

By contrast, in the 1976 case *Paul v. Davis*, the Court appeared to retreat from recognizing damage to reputation alone, holding instead that the liberty interest extended only to those situations where loss of one's reputation also resulted in the loss of a statutory entitlement.¹⁵ In *Davis*, the police had included plaintiff's photograph and name on a list of "active shoplifters" circulated to merchants without an opportunity for notice or hearing. The Court rejected the constitutional challenge, holding that state law "does not extend to respondent any legal guarantee of present enjoyment of reputation which has been altered as a result of petitioners' actions. Rather, his interest in reputation is simply one of a number which the State may protect against injury by virtue of its tort law, providing a forum for vindication of [that] interest by means of damage actions."¹⁶ Thus, it appears that unless the government's official defamation has a specific negative effect on an entitlement, such as the denial of the right to obtain alcohol that occurred in *Constantineau*, there

INTRO - All pg 5

What Does Cyberstalking Consist Of?

Cyberstalking as a criminal offense, consists of using the internet or other electronic means to harass another person.

The communication can be done through:

- Text messages,
- Social media comments,
- Direct messages,
- Email and
- Other electronic forms of communication

The actor typically engages in the behavior deliberately and persistently to annoy or harass someone. Sometimes the acts can be minor and cause a slight upset in the targeted person. Still, some cyberstalking cases are severe and disturbing and can lead to serious feelings of fear, stress, anxiety, or worry.

Does California Prohibit Cyberstalking?

Yes, California makes it illegal for anyone to engage in a course of conduct that causes fear, annoyance, or terror. A course of conduct includes any action occurring two or more times over a certain period, regardless of how brief, that is likely to continue.

The state does not have a separate cyberstalking law. The elements of the offense are the same as those for traditional (or in-person) stalking. The statute includes online forms of stalking by having a provision stating that written credible threats include those made through electronic communication.

Electronic communication devices include, but are not limited to, the following:

- Telephones,
- Cell phones,
- Computers, and
- Video recorders.

Under California Penal Code § 646.9, stalking (and cyberstalking) consists of willful and malicious:

- Repetitive following, or
- Harassment involving credible threats.

INTRO - All pg 6

The potential penalties include imprisonment for 2, 3, or 4 years and/or a fine of up to \$10,000. Cyberstalking is also a felony if the actor has been convicted of domestic violence or violating a restraining order. In that case, the possible punishments include a prison sentence of 2, 3, or 5 years.

DEPARTMENT OF HOMELESSNESS AND SUPPORTIVE HOUSING
STATEMENT OF INCOMPATIBLE ACTIVITIES

I. INTRODUCTION

This Statement of Incompatible Activities is intended to guide officers and employees of the San Francisco Department of Homelessness and Supportive Housing ("Department") about the kinds of activities that are incompatible with their public duties and therefore prohibited. For the purposes of this Statement, and except where otherwise provided, "officer" shall mean the executive director ("director"); and "employee" shall mean all employees of the Department.

This Statement is adopted under the provisions of San Francisco Campaign & Governmental Conduct Code ("C&GC Code") section 3.218. Engaging in the activities that are prohibited by this Statement may subject an officer or employee to discipline, up to and including possible termination of employment or removal from office, as well as to monetary fines and penalties. (C&GC Code § 3.242; Charter § 15.105.) Before an officer or employee is subjected to discipline or penalties for violation of this Statement, the officer or employee will have an opportunity to explain why the activity should not be deemed to be incompatible with their City duties. (C&GC Code § 3.218.) Nothing in this document shall modify or reduce any due process rights provided pursuant to the officer's or employee's collective bargaining agreement.

In addition to this Statement, officers and employees are subject to Department policies and State and local laws and rules governing the conduct of public officers and employees, including but not limited to:

- Political Reform Act, California Government Code § 87100 et seq.;
- California Government Code § 1090;
- San Francisco Charter;
- San Francisco Campaign and Governmental Conduct Code;
- San Francisco Sunshine Ordinance;
- Applicable Civil Service Rules;
- Applicable codes of professional conduct, including, but not limited to:

- * → ○ California Board of Behavioral Sciences; ← Applies to SFPD, Sheriff, etc
- Business and Professions Code of California; ← Public Health, OEN, etc
- Title 16, California Code of Regulations;
- * → ○ California Health and Safety Code;
- * → ○ California Penal Code;
- * → ○ California Welfare and Institutions Code;
- California Family Code;
- California Corporations Code;

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Good evening Cheryl and Victor,

Im enclosing information to be presented as evidence and hearing to include from Homeland Security, interoperable Communications and a flow chart that shows the flow of interoperable Communications between county, state and federal government.

I will present whole disclosure if needed after our meeting on March 21, 2023 where it is intended that both parties try to resolve this amicably without going to the next level.

I'm enclosing a photo and print, color coded on how interoperable Communications are divided up and flow through the Department of Emergency Management. I have previously sent communications proving this aspect

Finally, the flow chart from Boston University Law that shows how information is collected via interoperable Communications.

The flow chart collects data from trace contacting surveillance, parole, probation surveillance, HIV Surveillance, behavioral surveillance, etc. It goes from the doctor, county (see tier 1), state, etc.

I was on probation at times in San Francisco, so DEM would absolutely have had data and neta data on me.

Also have video ready and signed statement from employee who turned over documents at DEM. There is video taken at that location.

Thank you.

Respectfully,

Chris Ward Kline

Subject: SOTF - Complaint Filed with the Sunshine Ordinance Task Force - File No. 23013(D)

Good Afternoon:

The Department of Emergency Management has been named as a Respondent in the attached complaint filed with the Sunshine Ordinance Task Force (SOTF). In an effort to provide the SOTF information in an easy to understand format the SOTF has prepared a revised request format for responding to complaints (attached). **The SOTF requests that you submit your response to our office the allegations including any and all supporting documents, recordings, electronic media, etc., to the Task Force within five (5) business days of receipt of this notice.** In developing and submitting your response, please use the attached instructions, "Preparing San Francisco Sunshine Ordinance Task Force Respondents Materials," to address your defense of this complaint. This is your opportunity to provide a detailed explanation to allow the Task Force to be fully informed in considering your response prior to the meeting.

Please refer to the File Number 23013(D) when submitting any new information and/or supporting documents pertaining to this complaint.

Cheryl Leger

Assistant Clerk, Board of Supervisors

Disclosures: Personal information that is provided in communications to the Board of Supervisors is subject to disclosure under the California Public Records Act and the San Francisco Sunshine Ordinance. Personal information provided will not be redacted. Members of the public are not required to provide personal identifying information when they communicate with the Board of Supervisors and its committees. All written or oral communications that members of the public submit to the Clerk's Office regarding pending legislation or hearings will be made available to all members of the public for inspection and copying. The Clerk's Office does not redact any information from these submissions. This means that personal information—including names, phone numbers, addresses and similar information that a member of the public elects to submit to the Board and its committees—may appear on the Board of Supervisors website or in other public documents that members of the public may inspect or copy.

Wireless Communications Interoperability

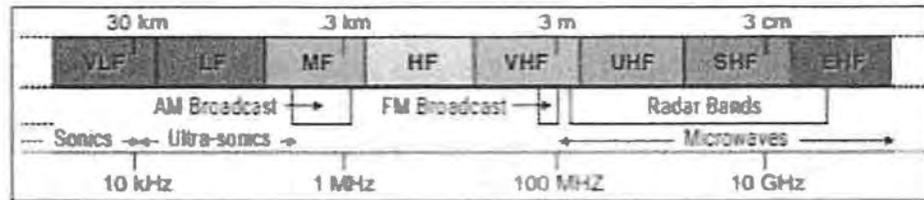

Awareness Guide

Homeland Security

Current emergency responder channels are located in several portions of the radio spectrum, resulting in separate spectrum "islands" that isolate emergency response operations and jurisdictions. This fragmentation of spectrum impedes interoperability and joint emergency response. Because no single radio can span all of the emergency response channels, agencies using different portions of spectrum cannot communicate with each other. Responders often must use multiple radios or other ad hoc means of linking communications.

Additional spectrum is needed to meet current communication needs and to support the deployment of new technologies.

Funding Limitations

Many existing emergency response communications systems are more than 10 years old. They cannot support the modern technologies needed for interoperability. Replacement of isolated systems or system expansions are also expensive, and funding limitations for upgrades often prevent emergency response agencies from purchasing the technology and equipment that can enhance interoperability and improve organizational effectiveness. To obtain the necessary funding, emergency response agencies must compete for public, private, and concerned citizens of the critical need for modern communications.

Incompatible Technologies

A variety of new radio technologies are becoming increasingly popular as agencies plan to replace or upgrade their existing systems. Because these new technologies, competing equipment vendors, and manufacturers—and emergency response agencies—cannot purchase equipment that is not interoperable, communications equipment from multiple manufacturers uses proprietary and incompatible protocols.

"Lack of Interoperability Costs Lives of Rescue Personnel"

September 2001

After the collapse of the World Trade Center towers, all New York City police officers were ordered to evacuate the area. The fire and rescue personnel, however, did not receive the same order because of a lack of radio interoperability. As a result, while 60 police officers died in the collapse, which was tragic enough, 343 fire and rescue personnel perished. Of these 343, the U.S. National Task Force on Interoperability concluded that 121 were close to an exit and might have survived if they had received the same warning that police officers did in real time.

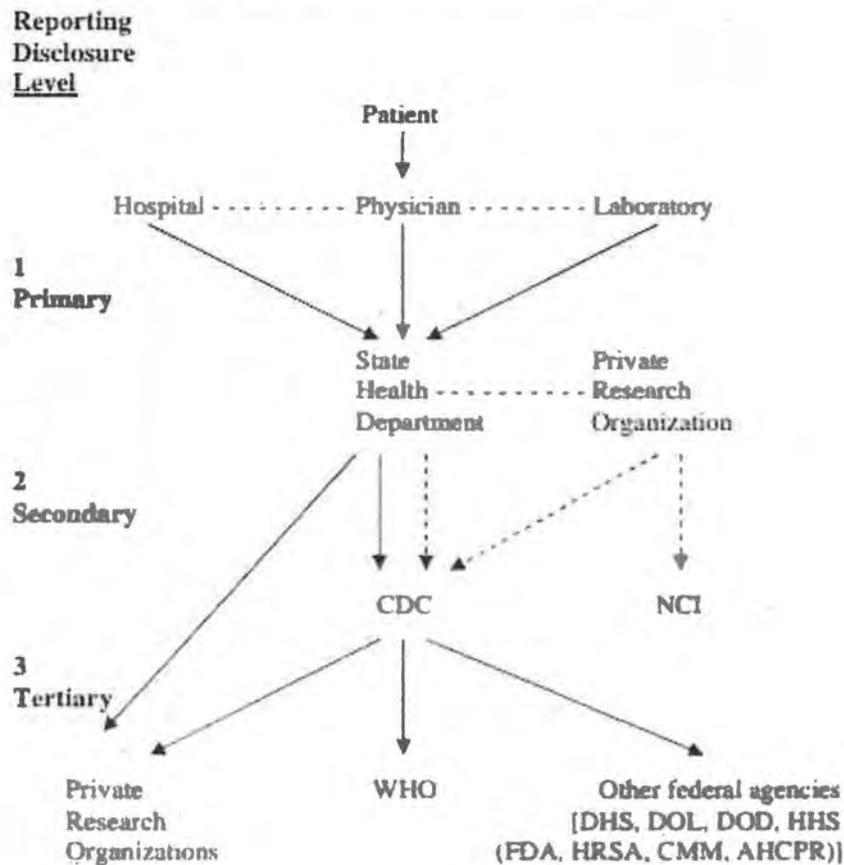

"Emergency Responders Replace Radios with Runners"

April 1995

In the immediate aftermath of the 1995 Oklahoma City bombings, emergency responders used runners to carry messages from one command center to another

...the... emergency... interoperability... standards and... equipment...

To: Sunshine Ordinance Task Force via electronic mail

Re: File No. 23013 D

Dear Sunshine Ordinance Task Force Members:

We write in response to Complaint Number 23013 D, filed by Mr. Chris Ward Kline with the Sunshine Ordinance Task Force on February 13, 2023, and received via electronic mail by Mr. Victor Wai Ho Lim, DEM's External Affairs Manager and Custodian of Records, on February 15, 2023. Mr. Kline alleges that the San Francisco Department of Emergency Management (DEM) violated Sections 67.21, 67.24(b)(o), and 67.25 of the Sunshine Ordinance for failing to respond to a request for public records in a timely and/or complete manner.

The Task Force should dismiss this complaint.

DEM denies Kline's allegations. DEM has responded to Kline's request in both a timely and complete manner.

Below is DEM's recitations of facts in this case, with a detailed timeline of DEM's communications with Mr. Kline included in Exhibit A to this response letter:

On Sunday afternoon, September 4, 2022, at 12:24 PM, Mr. Kline submitted his first request via email to DEM's Division of Emergency Communications' (DEC) Public Records Team.

On Tuesday morning, September 6, 2022, at 6:43 AM, DEM staff time stamped Mr. Kline's request form and began processing his request.

On Wednesday, September 7, 2022, DEC's Public Records Team issued a printed written response to Mr. Kline. DEM informed Mr. Kline that DEM does not maintain the records he requested and suggested he separately submit a public records request to the San Francisco Police Department for potential records. DEM public records staff telephoned Mr. Kline to inform him he could pick up the printed written response at DEM's office at 1011 Turk Street. Mr. Kline picked up the printed response on the same week.

London N. Breed
Mayor

Department of Emergency Management
1011 Turk Street, San Francisco, CA 94102

Mary Ellen Carroll
Executive Director

On Wednesday afternoon, October 19, 2022, at 12:02 PM, Mr. Kline submitted a new public records request via fax to DEM's DEC Public Records Team. On the same day, at 12:18 PM, DEM staff date stamped the form and began to process Mr. Kline's second request.

On Tuesday, October 25, 2022, Public Records Team issued a printed written response to Mr. Kline. DEM informed Mr. Kline that DEM does not maintain the records he requested and suggested he separately submit a public records request to the San Francisco Sheriff's Office for potential records. DEM public records staff telephoned Mr. Kline to inform him to pick up the printed written response at DEM's office at 1011 Turk Street. Mr. Kline picked up the printed response on the same week.

Attached, please find copies of Mr. Kline's requests and the responses provided by DEM.

The above recitations of facts demonstrates that Mr. Kline has no basis for his complaint against DEM.

For all the reasons stated, the Task Force Should dismiss Mr. Kline's complaint.

Respectfully submitted,
/s/

All,

This really shouldn't be difficult. I'm just asking Law Enforcement Officers to do their job. Here is the basis of the request. Please do not continue to lie when we all know the records exist.

I will be sending a request to the Department of Emergency Management as well.

If needed, I will send it to state and federal law enforcement for further action and investigation.

Respectfully,

Chris Ward Kline

All records within the Sheriff's Department, the Department of Emergency Management and other agencies to include the Sheriff Department Community Programs and Engagement Programs to include but not limited to:

Current and valid P.R.E.P. certification from the California Department of Health and for all other records that are known to exist on a variety of incidents, issues, surveillance to include: interviewing gang members, interviewing homeless people, interacting with people on the app One System, public health surveillance and to include and not limited to:

All Central Records Systems to include but not limited to Electronic/Microphone/Physical and Technical Surveillances for both main file records and cross reference files.

These records are known to exist as all apps that utilize GPS and GPRS data, with One System and all other apps such as public health, public safety and political surveillance to include any and all surveys and messages sent to any and devices specific to Chris Ward Kline.

a previous request for records was denied by Retired Deputy James Wilson which would be misconduct of a public official since the records do exist.

Good afternoon SOTF,

In reading the bylaws and to expedite File Number 23013 (A-E) and to prevent further delays and respondents denials of files, evidence, I make the following request for March 21, 2023 at 1730 hrs which is not covered by the bylaws.

I request at least 8 minutes (total and combined) to present evidence against each department. I can link the presentation to include each department acting in concert (either formally or informally) to not release files.

The only time stipulation listed on the bylaws is for five minutes in presenting 'new' evidence to reopen the claim.

I will submit all documentation five days prior to hearing, with no foreseen delays, weather permitting.

Respectfully,

Chris Ward Kline

The [Legislative Research Center](#) provides 24-hour access to Board of Supervisors legislation, and archived matters since August 1998.

Disclosures: Personal information that is provided in communications to the Board of Supervisors is subject to disclosure under the California Public Records Act and the San Francisco Sunshine Ordinance. Personal information provided will not be redacted. Members of the public are not required to provide personal identifying information when they communicate with the Board of Supervisors and its committees. All written or oral communications that members of the public submit to the Clerk's Office regarding pending legislation or hearings will be made available to all members of the public for inspection and copying. The Clerk's Office does not redact any information from these submissions. This means that personal information—including names, phone numbers, addresses and similar information that a member of the public elects to submit to the Board and its committees—may appear on the Board of Supervisors website or in other public documents that members of the public may inspect or copy.
